

NEW TOWN TO HAVE RAILROAD

VALIER, MONTANA'S LATEST METROPOLIS, TO HAVE TRAINS THIS WEEK.

Thomas Hurley, a business man of the new town of Valier, was a visitor in the city yesterday, and, like all others from the new town, he is a booster and predicts a remarkable future for the country adjacent as well as the city.

He stated that passenger and freight service will be established this morning on the Montana & Western railway, which was constructed from Conrad to Valier by the Conrad Land & Water company. He stated that 10 coaches, ordered from eastern manufacturers, have arrived at Conrad and are ready for service on the new railroad. He added that the company is now provided with three Baldwin locomotives to be used in freight and passenger service. He said the company for the present would operate mixed trains, but within a few weeks separate passenger and freight trains would be in operation. According to present arrangements the train will leave Conrad at 1 o'clock in the afternoon for Valier. The same train leaves Valier at 7 o'clock on the following morning for Conrad. During the rush expected for the Valier lands two passenger trains may be installed, which will make several trips each day over the road between the two little cities. The present schedule on the Montana & Western is such that passengers make connections at Conrad with Dupuyer and the Birch Creek country. Six temporary buildings for the accommodation of the large number of visitors expected are completed and are being finished on the interior. Each building is capable of housing 100 people. J. P. H. of Butte is in Valier for the purpose of wiring the residences and places of business for the lighting of the city October 1 by the light plant now being hurried to completion.—Great Falls Tribune.

HUNT PICTURES ARE "NATURE FAKES"

SCENES OF ROOSEVELT IN AFRICA REALLY LAID IN A CHICAGO STUDIO.

Not long ago residents of Missoula saw moving pictures of the Roosevelt hunting party in Africa, in which lions behaved so naturally in their wild, waving jungle and were killed so successfully that the cry of "fake!" seemed precluded. Still, the whole hunt was staged in Chicago's west side, where an authentic lion performed for a bored machine operator.

Tells About It.
Collier's Weekly tells of the means by which the pictures were secured. "The moving picture companies, whose enterprising rascals every corner of the earth for graphic subjects to amuse an over-sated and insatiable public, are showing 'Roosevelt in Africa,' a jungle adventure as it was staged in America, the pictures for the film being made in a Chicago studio. A real lion was brought down by the made-up ex-president of the United States, the king of beasts was tied to a long pole and carried to the Roosevelt camp, there hung up and skinned by the glow of the camp fire, around which the party gathered.

Preparing the Jungle.
"The great hunt happened in April, several days before Mr. Roosevelt arrived in Manhattan, Africa, taking place in the studio of a moving picture company. The lion, hunted by a moving picture plant was far from being free from danger during the time that the movements of the fakers were being recorded by the camera, for once a lion always a lion," and when the fatal shots were fired, Leo came near making an end of the moving-picture Roosevelt and the African beaters, otherwise the members of Chicago's colored population.

"The beginning of the subject, telling of the ex-president's hunt for big game, displayed the celebrated American and the African beaters preparatory to the dash into the jungle. At last all arrangements having been made, the party was off for a white rhinoceros or anything in the way of an African animal that might turn up. "It was the jungle nest, a cage about 60 feet long by 20 wide, with the best jungle scenery that could be manufactured. A bellows was being operated on one side of the cage, giving the effect of a spring breeze, which agitated the bamboo and palms. The cage in which the lion was held a captive was wheeled up to the larger one and the animal admitted to the dense jungles, his native habitation. The creature did not seem to like his new home and he was frightened, then belabored, and, when provided in the ribs with poles, sought a place to lie down back of all the vines, bushes and other scenery.

"From the camera platform it was

A Good Clock for 59c

(Easily Worth \$1.00)

SPECIAL TODAY ONLY

MARVELOUS," some will say; "it can't be done," will be the comment of others—yet here are the clocks, 200 of them, and the heading tells the story as to price.

These clocks come from far-off Germany, have Swiss movements and are thoroughly reliable and serviceable timepieces. The face is about 2 1/2 inches in diameter, with good, clear, legible numerals; the case is perfectly round, with a handle on top and feet to maintain its position.

We were fortunate enough to secure 200 of these pretty little clocks at about half their real value, and today we offer them in the Dry Goods department on the same basis of pricing.

EVERYBODY NEEDS A CLOCK EVERYBODY WILL WANT ONE OF THESE THERE'S NOT ENOUGH TO GO AROUND

So come early and get one—you can have one in a nicked, polished brass or polished copper case—a good, full dollar's worth for

ONLY 59 CENTS

MISSOULA MERCANTILE COMPANY

Dry Goods Department

MISSOULA MERCANTILE CO.

THE STORE THAT "MAKES GOOD"

If Every Man Who Is Ready

Or Going to Buy Fall Clothes Knew These Facts, He

Would Buy Nowhere But at Missoula

Mercantile Co.

If He Knew--

1. That he can get the best clothing made in America at Missoula Mercantile Co.
2. That he can choose from the most extensive variety to be found in Missoula at Missoula Mercantile Co.
3. That every garment sold at Missoula Mercantile Co. is guaranteed for satisfactory service, and that any defect which comes to light is made right immediately, without quibble.
4. That our long dealing with the best makers gives us first choice of all they have to offer.
5. That our immense business—easily greater than that of all other Missoula clothing stores combined—would never have grown to these proportions were it not for these facts.
6. That, having such a distributing power, we are possessed of unusual purchasing power, enabling us to offer better values.
7. That he need only to look around and make comparisons to be convinced that these facts are indisputably true.

We hope it's a case of "show me" with you—because we never were so well prepared to prove our case as we are this fall. Our clothing is at top notch in quality, in style, in beauty of fabrics and patterns. It fits right; it will hold its shape, and it will give the best wear that any clothing can give.

Men's Fall Suits \$15.00 to \$50.00

Young Men's Fall Suits \$12.50 to \$35.00

Men's Fall Shirts

Marvels of Beauty

To speak of these shirts as marvels of beauty may seem a bit overdrawn, but really the shirts justify it, for they are the handsomest in pattern and coloring that have yet been given man to wear.

Here are the famous "Manhattan" Shirts—the best shirt known, in a range of styles itself hard to beat—\$2 to \$3.50; beauties made by the E. W. people, and our "Coronet" line in extra fine designs, at from \$1.50 to \$4.00—making in all a variety from which any taste can be quickly satisfied.

That Heavier UNDERWEAR

Men's wool underwear, in fall weight, natural color, unusual value at \$1 per garment. Egyptian cotton underwear, medium weight, for fall, \$1.25 per garment. Extra fine worsted underwear, natural color, \$1.50 per garment. Mercerized list, derby ribbed underwear, made with high French neck, perfect fitting, \$1.75 per garment. Union Suits, in mercerized list, in all colors, natural, worsted and fine silk and worsted mixtures, at \$3, \$4, \$5 and \$6.50.

All Records Go to Smash in the Boys'

Clothing Store

It doesn't take mothers long to find out where the best boys' clothing is, and the way they are buying here is the best evidence that this is the place. Never before have we outfitted so many boys in the same time as we have since school began—the reason will be found in a comparison of our qualities, our styles, our values.

Our "INDESTRUCTIBLE" Suits at \$5 and \$6 Are Absolutely Unmatchable

They are the greatest suits to wear, the most economical to buy. A great variety of patterns to choose from—fancy worsteds, dark mixed worsteds, cassimeres and kerseys, in the latest colorings and in plain blue. The models are strictly new and fully up to the most expensive in style. Sizes 8 to 16 years. Every suit unconditionally guaranteed.

Boys' Reefers Suits, with straight knee pants.	\$3 to \$6
Boys' Reefers Suits, extra Knickerbocker trousers, and an extra pair of them.	\$5-\$6.50

Boys' Shirts.	50c to \$1.50
Boys' Knee Pants.	75c to \$1.75
Knickerbockers.	\$1 to \$2.50

and came toward him. There was a puff of smoke and the sharp crack of a .356 high power rifle. The next instant there was a loud roar such as no man ever turned loose in a cage, and Leo, his left paw burst by the bullet that went too low, hurst out into the open and straight for the men on the platform. The bars were 12 feet high, but the infuriated animal attempted to jump over them, but fell back, unable to make the distance because of the loss of blood. The sight of the blood now enraged him, and he charged the beaters, but two quick shots, which were not bungles, ended the animal's existence. One of the bullets hit in the right eye and the other just an inch above. Leo was killed as dead as anything Mr. Roosevelt will bring down in the real Africa. Down on the home-made jungle ground he sank and there passed from the world of moving pictures to the happy hunting ground.

"Get him!" cried the huntsmen, by this time working up to a stage of real excitement.

Monarch Expires.

"The big native tracker, always on the job, hurst through the underbrush and found the slain monarch breathing his last. Again he raised his sword and wrapped his arms around his naked body, snake fashion. The other natives hurried up with Mr. Roosevelt and son in the lead and the Englishman trailing along aside.

"They picked Leo up and looked him over. They counted the bullet holes and shook each other by the hands. Then Kermit wound up the huge form of the lion. The camera men up on their platform estimated the distance between them and the lion. Not a sound was heard throughout the big studio.

"Are you ready?" the producer asked.

"Ready," replied Mr. Roosevelt who was then taking aim.

"Just as the outdoor American said ready the lion came rushing out of his quarters. The animal did not like the appearance of the man in khaki, and he was now hung up and skinned. It was night in the wilds of Africa, and the warm glow of the camp fire reflected on the dark bodies of the natives. While the head tracker and the afforesaid Englishman were engaged in removing the animal's hide, the statesman and hunter, as well as writer, scribbled some notes upon his pad, which probably read:

"Perhaps another century and big-game hunting, as far as lions, elephants, rhinos and hippopotami are concerned will be past forever."

"This hunt was voted a success. It was considered by the producer the most realistic faking that was ever done.

"All of the participants in the hunting expedition were pleased with the events of the day, which had been recorded upon hundreds of feet of celluloid. One man who had stood and watched the proceedings muttered discontent. He was the wild animal man from whom the moving-picture company purchased the lion.

"Although the expense of making this picture was not normal, its total sales will probably net \$15,000, and more than 100,000,000 will enjoy this faking of Roosevelt's African expedition. Many copies of the film were made by the moving-picture company—120 at least—and sent around to the exchanges in the Film Service association. Each exchange, in turn, will supply the film to the thousands of nickel show houses that dot the cities and towns."

NOTES OF SCIENCE

The world's production of wine has been decreasing steadily since 1889, the production last year being more than 20,000,000 gallons behind that of 1907.

One person can use a two-man saw by splitting it with a low-man saw by counteracting its tendency to buckle.

Recent investigations by the geological survey have indicated that oxygen forms in coal an impurity that is almost as injurious as the ash content.

According to a noted English scientist there are 20,000 tons of radium in solution in the waters of the earth, and 1,000,000 tons in the oceans' beds.

The Norwegian government is requiring the employees of its railroads to attend ambulance classes to give them a knowledge of first aid in case of accidents.

Arkansas produced 2,678,357 short tons of coal last year, a greater decrease from the previous year's output than was shown by any other southwestern state.

Electric tramway competition reduced the suburban traffic of the Great Eastern Railway around London by 2,282,317 passengers in the last six months of last year.

A syndicate prospecting on the Red Sea coast, 150 miles south of Suex, has struck oil which flows in a manner that indicates an immense supply of fuel in reserve.

The company controlling Philadelphia's street car lines is paying cash prizes to employees who devise means to lessen accidents and labor and time-saving compliance.

The chemist who discovers how to extract the leaching principle from the common juniper seed and places it within reach of family and laundry use has a fortune in store.

coast, where it had lain for a century and a half, it was found that the action of sand and pebbles had worn one side to almost immeasurable thinness.

Plans are on foot for an agricultural and corn exposition in the City of Mexico in connection with the celebration of the Mexican centennial in September of next year.

A simple electric light wire grip, which may be attached at any time to handle or take up the slack in wire, consists of a spindle with two gripping members at either end.

One of the deepest telephones in the world is 2,500 feet down a mine shaft in the Cedar creek district, Idaho. With it a miner can talk to as distant a point as Chicago.

The asteroid Eros, noted for the eccentricity of its orbit, again is attracting attention of astronomers, as it is due to approach to within 15,500,000 miles of the earth in 1913.

The mile-long steel bridge of the Canadian Pacific near Lethbridge, Alberta, said to be the longest of its kind in the world, recently was completed at a cost of \$1,500,000.

The volcano which arose in the Samoan island of Savaii in August, 1905, and which has been ceaselessly active ever since, has emitted more lava than any other volcano of which there is a human record.

The most extensive experiments in the use of electricity in agriculture ever attempted are under way in Scotland, where a field of 23 acres is covered with a network of wires 16 feet above the surface.

A government agricultural explorer has returned from Java with some nuts, the kernels of which are used in that country to furnish milk for infants. A test of raising them in this country will be made.

A French doctor is reported to be making marvelous cures of nervous diseases by keeping his patients in absolute silence in apartments where

everything, even the electric lights at night, is blue.

A New York man has patented something new in the lightning rod line, a system of conductors that pass over all high points of a building, terminating in the ground on both sides, so that lightning will be led to earth, no matter where it strikes.

American engineers are figuring on a project for connecting the Mediterranean sea at Salonika and the Danube river with a ship canal, with an ultimate connection thence via Austria and Germany to the North sea.

Tracing a stream in Portugal, the water of which was reputed to have therapeutic properties, a scientist found that, near its source, it ran over a bed of uranium phosphate. Thus a new source of radium was discovered.

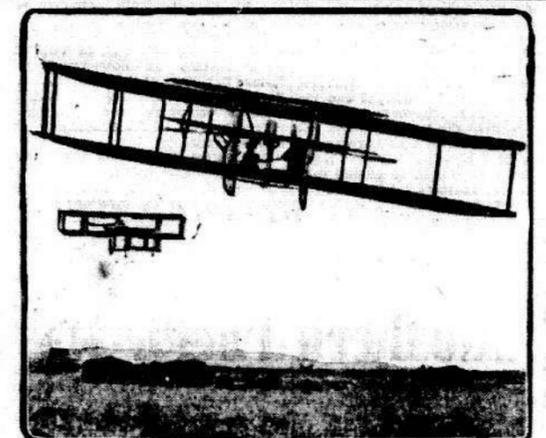

A German scientist claims to have disproved the theory that human hair can be turned white by fright. He says gray hairs are those which are pressed out by others, and which never have an opportunity to absorb the natural pigment.

Go With a Rush.

The demand for that wonderful stomach, liver and kidney cure, Dr. King's New Life Pills, is astounding. The Missoula Drug Co. say they never saw the like. It's because they never fail to cure sour stomach, constipation, indigestion, biliousness, jaundice, sick headache, chills and malaria. Only 25c.

Many people delude themselves by saying, "It will wear away," when they notice symptoms of kidney and bladder trouble. This is a mistake. Take Foley's Kidney Remedy, and stop the drain on the vitality. It cures backache, rheumatism, kidney and bladder trouble, and makes every trace of pain, weakness and urinary trouble disappear. Garden City Drug Co. (Geo. Freishelmer, proprietor)

Wing and Wing Race

ONE OF THE WRIGHT BROTHERS' MACHINES IN THE LEAD, FOLLOWED BY PAULHAN, AT REIMS, THE GREATEST AERONAUTICAL PICTURE EVER TAKEN.

The unusual spectacle of a speed contest by heavier-than-air aeroplanes in a neck and neck, or more properly speaking, a wing and wing race, was seen at Reims, France, during aviation week. The amazement of the spectators broke forth into a cheer for the aviators when it was realized that for the first time an airship race was a reality. Those who saw the airship

in action have become enthusiastic believers in aeroplanes as a sport, if not as a commercial success. Compared to an automobile or a horse race, the airship contest is far ahead for excitement.

This is considered to be the most remarkable picture ever taken in the history of the world in connection with aeroplanes.

FOR DISEASES OF THE BLADDER AND ALLIED ORGANS

There is no remedy so quick and additional as this.
