

Why the Smile?
Because he has bought his winter underwear of

Brooks & Turner

He supposed he would have to pay MUCH more for goods of that quality, and so he would at other store.

"Everything that men wear."

We Have Made An Enviably Reputation

On \$25 Made-to-Order Business Suits

We make a suit that is surprisingly good at this price—and costs more. But any price you pay here is low when you consider the superior patterns, master workmanship and unequalled quality you get in return.

Our new line of fall and winter woollens is now complete and you should make early selection of patterns and style, if you would be in the forefront of fashion.

Don't be misled by store clothing because the price looks cheap. It will cost you more in the end and never satisfies. Have your clothes made just for you.

A FIGHT WILL BE MADE TO ADOPT ANOTHER NAME

(Continued from Page One)

Now, we need not be afraid that we cannot take care of these people, and I am not afraid that what we will, and that they will learn to take care of themselves; but my anxiety is how they will be taught. Will they wait until an empty stomach and absolute hunger drives them to do right? Or will they take it up like intelligent men with forethought and follow a line that will lead them to success.

Comparatively New.

"The study of modern scientific agriculture is a comparatively new study. Your agricultural college, and that of every other state, is in touch with all the agricultural educational institutions in the world, and everything that they have demonstrated there is beyond question the common property of all.

"Modern scientific agriculture calls for as high an order of intelligence as any other science.

"Now, to go back to your 200,000,000 people and we are going to see how we are going to take care of them. With us in this country the average consumption per capita is six and a half bushels of wheat, but since the high prices of meat, we find throughout the bread-casting nations the quantity necessary for bread and seed per capita per annum has increased. The higher prices of meat throw a greater burden on the bread and butter. Last year we exported 68,000,000 bushels of wheat, or 28,000,000 bushels more than we had to spare. What was the consequence? When my farmer neighbors in Illinois, Washington and their wheat at 85 and 90 cents, told my man to keep on ploughing and I would not sell until spring, I got \$125 for mine. They got, I hope, a little experience. If it has served them this year they are not rushing their wheat to market, although the Great Northern railroad is taking from 800,000 to 1,000,000 bushels a day to market, and some of your men think they are holding the grain, but the people who are watching the source of supply under the law of supply and demand when they see one road carrying 1,000,000 bushels a day, are apt to conclude that there is not going to be any shortage and he can wait. Farmers want to be very careful while they are marketing their crops because, not to carry it so far that some fellow down in the southern hemisphere, it may be Australia, it may be Argentina, will raise a crop that he is planting about this time, and have it on the market alongside of him before they sell theirs.

Very Low Price.

"In 1907 I was looking those figures up with care, and I went back 25 years. In 1882 we had nearly 52,000,000 people, and we raised 504,000,000 bushels of wheat and exported over 200,000,000 bushels of wheat and got a very low price for it. In 1907, we raised 631,000,000 bushels of wheat. During that 25 years our population increased 61 per cent and our wheat yield 25 per cent. Converging lines meet in the angle of convergence and those lines meet perilously near. Each year the country requires 15,000,000 bushels of wheat more than the preceding year. In five years that is 75,000,000 bushels. I know I was not talking at random when I said that within 10 years we would become a non-exporting country unless we changed our methods.

"Now, you have in Montana an area of land susceptible of good cultivation. It is not necessary that you should have irrigation, but where a man with intelligent methods and industry can make himself comfortable and support his family in independence, you have an area (you may think I am not pessimistic this time) equal to that of the state of Iowa that can be cultivated. Now, there are 280,000,000 acres in four northwestern states—Montana, Idaho, Washington and Oregon, and I think I am safe in saying that 90,000,000 acres—certainly over 75,000,000—is today susceptible of good cultivation, good intelligent cultivation, and will give results that will surprise us.

"Now, if Montana can raise, as she does, about twice the average yield of all the agricultural states in the Union in wheat and other grain, why is not Montana to be classed as a farming state? That is the careful of our farming. Be careful to get your farmers started right. Pay a little attention to the quality of your seeders. When you want people to come in and when you want to boost for Montana, or for any of the states west of here, do your boosting in a proper way—the 'tin-horn' business."

The sessions of the congress are presided over by Governor Norris and immediately after Frank C. Bowman of Idaho Falls, had called it to order, other speeches were made by Mayor H. J. Thompson of Billings, W. A. Skidmore, president of the Billings Chamber of Commerce; Dr. John A. Wetmore, president of the agricultural college of Utah.

Afternoon Session.

At the afternoon session the report of the executive committee was offered, but consideration of it was postponed until tomorrow morning, for which time it was made a special order.

Set speeches were delivered by H. E. Chamberlain, superintendent of the Farmers' Institutes, South Dakota, who spoke on "Dry Farming, Good Farming."

J. H. Shepperd, dean and vice director of the agricultural college of North Dakota, told of the progress of the dry farming movement in his state.

"Some Things We Do Know About Dry Farming," was a good paper by Professor R. C. Burford, Worldland, Wyoming, and was a feature of the afternoon.

President Howard Elliott of the Northern Pacific, in a brief address, voiced objections to the present name and then dwelt upon the progress that has been made in the northwest by the movement.

Telisi of Work.

United States Senator Moses E. Clapp of Minnesota, in an address

Sucks Germs From Body; Cures Disease

"FALLS OFF WAGON" NEWSPAPER DECLARES

St. Louis, Oct. 25.—Officials of the St. Louis club, yesterday morning at the west of the Commercial club, were indignant today over a story printed in the St. Louis Post-Dispatch, and attributed to the authority of the club's head waiter that President Taft had drunk a big cocktail at the club, thus "falling off the wagon," that he had added six big cups of black coffee to the cocktail and had partition of the remainder of the breakfast in proportion. As a matter of fact, the club officials say they knew full well that the president is abstinent, that he has recently abstained from drinking any alcoholic beverages merely as a part of the dietary plan, and for reasons of health and the service to him was governed accordingly.

NEWLANDS GIVES OUT REPLY TO MR M'NAB

Remo, Oct. 25.—Senator Francis G. Newlands made public tonight his answer to James M'Nab, president of the San Francisco Chamber of Commerce, who had written asking the senator's view regarding the passage by congress of a ship subsidy law. Mr. Newlands said that he opposed the subsidy and advocated rather that the United States build an auxiliary fleet to be leased to private persons in time of peace. The senator said that under the protective tariff the United States could not hope to compete with other nations in the carrying trade.

CARDS SHOW DEATH AND SHE KILLS SELF

Seattle, Oct. 27.—Orpha Gourif, aged 25, a waitress, dependent over a quarrel with a man who had been attentive to her, told her fortune last night with a deck of cards to see how her love affairs would turn out.

After the cards had been laid out she told her friends that she was "all surrounded by death." A few hours later she shot herself through the heart.

ILCO COMPANY FINED.

Austin, Tex., Oct. 26.—The Standard oil company of Indiana was today fined \$65,000 in the district court here for violation of the Texas anti-trust law.

This Will Stop Your Rheumatism

A Remarkable Electric Device That Positively Has Relieved Countless People of the Pains and Causes of Rheumatism.

Throw away your pills, powders and other medicines. Here is a treatment that will make you rub your eyes and wonder. It is not a myth, but it is a fact—a marvel. It has been proven a tremendous success. Men and women formerly crippled with rheumatism report themselves now hopping around like boys and girls, as a result of using this simple and wonderful device, called Electropoles.

Electropoles produces a wireless, unobtrusive, yet powerful electric current, which passes through the entire body, through every muscle, nerve, fiber, vital organ and blood vessel. It is the new way of using electricity, opening a tremendous field to the successful treatment of disease.

By this electric current, Electropoles regenerate the tissues, purify the blood and the vital organs, especially the kidneys, report themselves now turning the nerves almost into cords of steel.

It proves that electricity is not only life, but health and vigor in all its glory. Electropoles will positively stop your rheumatism, lumbago, pain in the back, kidney trouble, nervous prostration, stomach and liver trouble, insomnia and heart weakness.

Electropoles are distributed from any electric device in that they produce a current of electricity in actual use. They are metal insoles so placed in the heels of the shoes as to be in contact with the wearer.

To prove these statements are ever so true, your druggist will sign a contract that if the Electropoles are not perfectly satisfactory to you after 20 days' actual use, the money will be refunded.

Electropoles are sold at drug stores at \$1 a pair. If your druggist does not have Electropoles, send your remittance to the Electropole Co., suite 65, Holland block, Lima, Ohio, and you will get a pair to test with the firm's contract binding the druggist to completely refund the 20 days' use, or positively refund your money. See whether for life or death.

THE BED-ROCK OF SUCCESS

lies in a keen clear brain backed by indomitable will and resistless energy. Such power comes from the splendid health that Dr. King's New Life Pills impart. They vitalize every organ and build up brain and body. J. A. Harmon, Lizenore, W. Va., writes: "They are the best pills I ever used." 25c at Missoula Drug Co's.

ASTOUNDING EFFECT OF ROBINSON THERMAL BATH ON MANY DISEASES.

Prominent Physicians Indorse Remarkable "Life-Saver."

During the last few years there has been a tremendous "change of heart" among physicians in the treatment of diseases by means of drugs. In all parts of the country prominent physicians have been advising the use of hot-air baths, commonly called Robinson Thermal, or Turkish baths, with results little short of astounding.

Such men as Dr. Benjamin W. Richardson, Dr. Erasmus Wilson and Sir Edwin Chadwick, one of the world's foremost sanitarians, fully indorse the thermal bath.

One of England's greatest authorities on hygiene says the surface of the whole body is covered with 7,000,000 tubes or pores, each about a quarter of an inch long, and if stretched out end to end would extend nearly 28 miles. This immense drainage system is designed by nature to relieve the body of its vicious excretions. When these pores are obstructed a deposit is formed at the mouth of each pore, which tends to paralyze the healthy action of the skin and sow the seeds of disease.

Drugs do not eliminate the clogged-up poisons from the system, they have to fight myriads of germs, the battle is too unequal and the germs rout the drug instead of the drug routing the germs.

The Robinson Thermal Bath extracts poisons from the pores almost as a liquid is sucked up through a straw; the poison is extracted and the cause of disease disappears.

The effect of the Robinson Thermal Bath on rheumatism, lumbago, kidney and blood troubles, dyspepsia, throat and lung trouble, nervous prostration, insomnia, eczema and all skin troubles, ind colds, neuritis and constipation are simply surprising.

Robinson's Thermal Baths can now be taken at home at a cost of but a few cents each, and with almost no trouble at all.

The results are a real godsend. If you are sick from any cause it will have an almost miraculous effect upon your system. If you are well, it will keep you so.

The Robinson Thermal Bath Cabinets are a remarkable invention. They are now on exhibition and for sale in Missoula by the Missoula Drug Co.

Go and see them, examine them. Also ask for that wonderfully instructive book, "The Philosophy of Health and Beauty." Its price is \$2, but it is now being given away free for only a limited time.

If you cannot go and see these Robinson cabinets, send your name and address to the Robinson Manufacturing Company, Suite 21, Snowflake Bldg., Toledo, Ohio, for full illustrated information free.

JEFFRIES CONTINUES TO TRAIN FAITHFULLY

New York, Oct. 26.—The battle of the heavyweights, James J. Jeffries and Jack Johnson, will be arranged before the end of the week if the public demands of the two principals are borne out. Johnson and his manager, George Little, are expected here Thursday, when the match will be made. In the meantime Jeffries keeps hard at work on the road and in the gymnasium here with his sparring partner, Sam Berger.

"I am eager to get a crack at Johnson and only hope he will appear and sign up the articles," Jeffries said today. "We won't stop for any undue ceremonies, and I am willing to meet him for the go at any reasonable time and place."

Bids for the fight continue to come in. So far most of them have been from California clubs. Coffroth of San Francisco said today he would not present his formal bid until after the articles of agreement had been signed.

Athletics, 4; All-Nationals, 3.
Walla Walla, Wash., Oct. 27.—Olling's hit in the ninth after the All-Nationals had tied the score in the eighth brought in the winning run.

JOHNSON IS SUED.

Chicago, Oct. 26.—Suit was filed in the municipal court here today against Jack Johnson on behalf of "Yank" Kenny, formerly Johnson's trainer. Kenny alleges the money is due him for training fees and breach of contract. Kenny's attorney declares that Johnson hired his client in New York in April, 1907, agreeing to pay him \$60 a week for one year to act in the capacity of trainer and that he deserted him at Cedar Lake, Ind., last August, having paid him but \$229. Johnson expects to leave for New York tomorrow and up to late tonight court bailiffs had been unable to find him to serve him with papers.

CARROLL OUTCLASSED.

Quiland, Oct. 26.—Monte Attell, bantamweight, was given the decision over Jimmy Carroll in a 10-round fight here this evening. Attell won all the way and in the fifth the best saved Carroll, who had been knocked down from a knockout. Percy Cave easily defeated Al Emmick in a six-round preliminary.

SUCCESSFUL FLIGHTS.

College Park, Md., Oct. 26.—Unaccompanied by Wilbur Wright, his instructor, Lieutenants Humphreys and Lahm of the aeronautical division of the signal corps today made successful flights in the government aeroplane.

College Park, Md., Oct. 26.—Unaccompanied by Wilbur Wright, his instructor, Lieutenants Humphreys and Lahm of the aeronautical division of the signal corps today made successful flights in the government aeroplane.

ONE IS KILLED.

Madison, Wis., Oct. 26.—One man was killed and three others injured as a result of a collision between a Chicago & Northwestern passenger train and a stock train in the Monon yards this afternoon. Among the injured was E. F. Foster of Wedo, Mont.

The pleasant purgative effect experienced by all who use Chamberlain's Stomach and Liver Tablets, and the healthy condition of the body and mind which they create, make one feel joyful, sold by all dealers.
