

STUDENTS RECEIVE POWER SITES BILL REPORTS

RESULT OF RECENT EXAMINATIONS IS MADE PUBLIC BY SUPERINTENDENT.

Yesterday Mrs. Pearl Marshall, county superintendent schools, mailed reports to all the pupils that took the recent examinations. Some failed to put their postoffice address on their papers and their reports will be sent to the general delivery.

Much credit is due Mrs. Marshall and Dr. M. J. Elrod for the promptness with which the reports were gotten out. Dr. O. J. Craig, the third member of the examining board, is in California and consequently the work was much harder than usual.

The next county teachers examination will be held on the last Friday and Saturday in February.

The following are the successful ones in the recent examinations: Those who received high school diplomas are: Mary Cutler, William Elliott, Helen Fredericks, James Taylor, Clarence Prescott, Hazel Davis, Henry Karkenen.

Those who passed in part of the subjects are: Agnes Caine, James Friauf, Katherine Gill, Elsie Herwig, Esther Jacobson, Leona LaGrandeur, Daniel Longpre, Helen McDonald, Lois Ray, Harvey Roberts, Henry Roberts, Dayton Shields, Clark Smith, Myrtle Swanson, John Henry Swartz, Walter Whitaker.

Those who passed in part of the subjects are: Agnes Caine, James Friauf, Katherine Gill, Elsie Herwig, Esther Jacobson, Leona LaGrandeur, Daniel Longpre, Helen McDonald, Lois Ray, Harvey Roberts, Henry Roberts, Dayton Shields, Clark Smith, Myrtle Swanson, John Henry Swartz, Walter Whitaker.

COPIES OF SENATOR CARTER'S MEASURE COME TO TANA-OF INTEREST.

MEASURE COME TO TANA-OF INTEREST.

Copies of a bill to authorize the issuance of patents to states for water power, have been received in Missoula. This bill was introduced by Senator Carter and, if passed, will confer to the states the right to withdraw from settlement land that is valuable for water power, provided that this is proven to the satisfaction of the secretary of the interior. The substance of the bill is as follows:

Be it enacted by the senate and house of representatives of the United States of America in congress assembled: That, subject to the limitations herein prescribed, any state may enter any unappropriated public land located within its borders which is chiefly valuable for use in the development of water power, upon making proof to the satisfaction of the secretary of the interior that the land sought to be patented is chiefly valuable for such purpose and that the whole area described in the application to enter is necessary to insure development of the largest available power at the point designated. If upon submission of such proof the secretary of the interior shall be satisfied that the land described is in fact chiefly valuable for use in aid of the development of water power and that a valuable water power can be developed by the use thereof, he shall cause patent to issue to the state for all of such land or such portions thereof as he may deem necessary and useful for the aforesaid purpose.

That any patent issued in pursuance of this act shall contain and be issued subject to the following conditions, and not otherwise: That the state shall never alienate the fee-simple title to the land and shall by law reserve unto its legislature the right to fix rates of rental for the use of the land based on capacity for power developed and to regulate the price to be charged by any person, company, or corporation for electric current generated by the power developed on or in connection with the use of the land described in the patent.

FLIGHT BY PAULHAN DISAPPOINTS AVIATOR

Salt Lake City, Jan. 30.—Louis Paulhan, the French aviator, made a successful flight of 10 minutes' duration at Agricultural park today. He reached an altitude of 300 feet, or approximately 1,500 feet above sea level. He made an average speed of about 30 miles an hour and indulged in much graceful maneuvering, showing absolute control of his machine. A Farman biplane No. 1, having 50-horse power.

After the flight Paulhan expressed his disappointment that he was unable to fly a longer time. He said that owing to the peculiar atmospheric conditions he was unable to reach a higher altitude. The temperature was 35 degrees and the wind velocity five miles an hour.

BAY STATE ON RECORD AS TO INCOME TAX

Boston, Jan. 30.—It is expected that Massachusetts will be the first northern state to go on record on the proposed income tax amendment. The income tax resolution was referred three weeks ago to the joint committee of the legislature on federal relations, and, beginning tomorrow, that committee will be ready to hear arguments on the measure. The committee will report the measure by the last of February. It is intimated that the house will favor the income tax, and that the senate will oppose it, which means that Massachusetts will vote "no" in the convention of states.

CHINESE GOVERNMENT DENIES PETITION

Peking, Jan. 30.—An imperial edict issued today denies the petition recently submitted by the representatives of the province of Szechwan, who are now in Peking, asking for the early establishment of a parliament. The throne adheres to the original plan of an imperial assembly now and the establishment of a parliament at the end of nine years, according to the constitutional scheme.

JOHNSON IS LOCATED.

New York, Jan. 30.—Tom L. Johnson, former mayor of Cleveland, was found here today at the Hotel St. George. He was said at the desk that Mr. Johnson, his wife and a trained nurse had been guests for 10 days. Confirmation of a report that Mr. Johnson had cirrhosis of the liver is lacking. None of the Johnson party could be seen today.

CRUISER AGROUND.

Tangier, Jan. 29.—The French cruiser Chateaufort ran aground near Arzila, 29 miles southwest of Cape Spartel, today. Other warships were unable to approach the Chateaufort on account of the heavy sea and high wind.

NO INDIGESTION OR MEASURE FURTHERS SICK STOMACH RECLAMATION

HEARTBURN, HEADACHE OR DYSPEPSIA ARE RELIEVED IN FIVE MINUTES.

Why not get some now—this stomach, and forever rid yourself of stomach trouble and indigestion? A dieted stomach gets the blues and grumbles. Give it a good eat, then take Pape's Diapepsin to start the digestive juices working. There will be no dyspepsia or belching of gas or eructations of undigested food; no feeling like a lump of lead in the stomach or heartburn, sick headache and dizziness, and your food will not ferment and poison your breath with nauseous odors.

Pape's Diapepsin costs only 50 cents for a large case at any drug store here, and will relieve the most obstinate case of indigestion and upset stomach in five minutes. There is nothing else better to take gas from stomach and cleanse the stomach and intestines, and, besides, one single dose will digest and prepare for assimilation into the blood all your food, the same as a sound, healthy stomach would do it.

HYDRAULIC BANNER GOES TO NEW YORK

Albany, N. Y., Jan. 30.—New York displaces all other states in the gross total of hydraulic power in use, according to the fifth annual report of the state water supply commission. The commission estimated that 1,500,000 horse-power can be developed on interior streams of New York, without counting Delaware and St. Lawrence rivers. It says this great reserve of power, equal to nearly a third of all water power in use in the United States is sufficient to displace all power now derived from coal and to provide the state with all the motive power it will need for as many years as anyone can foresee.

APPROPRIATION URGED FOR IRRIGATION WORK

Washington, Jan. 30.—(Special.)—During the consideration of the Indian appropriation bill by the house committee on Indian affairs, Senator Dixon appeared before the committee in behalf of liberal appropriations for irrigation works on the Indian reservations in Montana. He pointed out the great benefits to agriculture which accrued from irrigating the Indian lands, and of the interest it aroused in the Indians, encouraging them in gainful pursuits. He especially urged that the committee include in the bill appropriations of \$200,000 for irrigation projects on the Flathead Indian reservation, and of \$200,000 for similar work on the Black-foot reservation.

CHARGES EXPLAINED BY SENATOR CONGER

Albany, N. Y., Jan. 30.—Senator Ben Conger made public tonight the formal charges which he will prefer tomorrow against Senator Jonathan P. Aldis, president pro tempore of the New York state senate. Conger says that in his presence Senator Aldis accepted \$1,000 in consideration of his failure to press a certain bill then pending.

SUBWAY IS EXPENSIVE.

New York, Jan. 30.—The new subway will be the most costly railroad in the world. The present system cost \$32,000,000 to build and lay down. For equipment and extensions \$45,000,000 more will have been spent, making \$80,000,000 in all. The new system will cost \$100,000,000 to bore and lay down and when ready for operation with all stations built and equipment of power houses and cars, will cost \$210,000,000.

MEYER'S PLANS.

Washington, Jan. 30.—There is some hesitation among members of the house naval committee as to the navy reorganization plan submitted by Secretary Meyer. Members are divided on the question, and some will probably seek to make changes in the plans. This action will be fought, however, by friends of the secretary, who believe the reorganization plan should not be tried until next year's convention, if desirable changes can be made.

England is building a floating dry dock with a lifting capacity of 17,000 tons, which will be towed to Bermuda for the use of naval vessels on this side of the Atlantic.

BILL FOR SALE OF CERTIFICATES WOULD HELP GOVERNMENT PROJECTS.

WOULD HELP GOVERNMENT PROJECTS.

Senator Carter, on January 24, as has been told in this paper, introduced a bill to authorize the issuance and sale of certificates of indebtedness against the "reclamation fund." This bill, if passed, should be instrumental in hurrying the completion of the different reclamation projects on which work would be suspended as soon as the fund was exhausted. In view of the local interest that is attached to this bill, it might not be out of place to reproduce it in its entirety.

Be it enacted by the senate and house of representatives of the United States of America in congress assembled: That to enable the secretary of the interior to complete and properly extend reclamation projects already begun the secretary of the treasury is authorized to borrow from time to time, at a rate of interest not exceeding 3 per centum per annum, such sum or sums as in the judgment of the secretary of the interior may be necessary to complete the reclamation projects heretofore begun, including necessary extensions thereof, by the secretary of the interior, and to issue therefor certificates of indebtedness in such form as he may prescribe and in denominations of \$50 or multiples of that sum; and each of said certificates, together with interest thereon, shall be payable out of the reclamation fund created in pursuance of the provisions of an act of congress, approved June 17, 1902, entitled, "An act appropriating the receipts from the sale and disposal of public lands in certain states and territories to the construction of irrigation works for the reclamation of arid lands," and such payment is hereby guaranteed by the United States; Provided, that the aggregate issue of such certificates shall not exceed \$30,000,000, and the provisions and penalties of existing law respecting counterfeiting and other fraudulent practices are hereby made applicable to the certificates of indebtedness authorized thereon accrued, at such certificates shall be paid quarterly, and each certificate shall be payable, with interest thereon accrued, at such time after the reclamation of arid lands of its issue as the secretary of the treasury may prescribe. That said certificates of indebtedness may be disposed of by the secretary of the treasury at no less than par under such regulations as he may prescribe, giving all citizens of the United States an equal opportunity to subscribe therefor; but no commission shall be allowed, and the interest on said certificates and any expense incident to preparing, advertising, and issuing the same shall be paid out of the reclamation fund and shall be the same with all other expenses in future estimates of construction, operation, or maintenance. The certificates authorized by this act shall be exempt from taxes in any form by or under state, municipal, or local authority. That all money borrowed under authority of this act shall be devoted exclusively to the completion of work on projects heretofore begun.

That beginning five years after the date of the issue of the certificate of indebtedness authorized by this act 50 per centum of the annual receipts of the reclamation fund shall be applied to the payment of said certificates, which shall be canceled when paid.

AMERICAN RAILROADERS CONCLUDE CONFERENCE

Laredo, Texas, Jan. 30.—According to a telegram from Mexico City, the members of the committee of American railway conductors and engineers that has been in conference with the management of the National Railways of Mexico, left tonight for their several headquarters. Immediately upon their arrival, polls will be taken of employees to determine their action on the railroad men here are convinced that the men will be practically a unit for resignation, and it is believed that a general walkout will occur soon. It is said locally that the engineers are acting in full accord with the conductors and that such dissension as may at first have existed have been adjusted.

FLATHEAD REGISTER OFFERS NEW PLAN

(Continued from Page One) mutation but should make actual five-year residence. Then when he came up for final proof he should be allowed to buy the remainder of the standing timber at a reasonable cost, a cost low enough to give him a profit after it was marketed. This would encourage him, and would discourage the timber speculator, who would never make five-year residence and cultivate the land for the sake of selling the remainder of the timber.

There is no need, as some seem to think, for taking this land away from the forestry service, but it should be left in charge of that service and would in that way insure efficient help in fighting fires and actually become a benefit to the service. Neither is there any need to alter the boundaries of the forest service. All that is needed is a more liberal interpretation of the statutes and a classification of agricultural land as such. This much is needed to help in settling up the country.

TAKING BROTHER ILL.

Los Angeles, Jan. 29.—Henry W. Taft of New York, brother of the president, is suffering from a slight attack of erysipelas and will be taken to the Good Samaritan hospital in this city tomorrow morning. Dr. William A. Edwards said tonight that Mr. Taft's condition was not at all serious, but that it was thought best to have him in some place where he can have absolute rest and proper care.

The Good Old Hen

Can do no better; don't blame her if she can only hatch a dozen eggs at once. She could be earning more for you putting in the time laying eggs while a MODEL INCUBATOR would be hatching from 80 to 250 eggs, and do it with better results.

In Construction, Insulation, Heating Device and Heat Regulation and in Circulation the MODEL is a model of perfection. It has no equal in the market for Simplicity of Operation, Safety in Operation or Hatching Results, and every one bears our guarantee as follows:

WE GUARANTEE We guarantee the Model Incubator to be as represented in every particular. We guarantee that the Model Incubator will hold a more even temperature, with less attention, than any other make of incubator. We guarantee that the Model Incubator, when run in competition with another make, shall, in three or more hatches, bring out a larger percentage of the fertile eggs in strong, healthy chicks or ducklings than does its competitor.

Table with 2 columns: Model Incubator type and Price. Includes No. 0 Incubator, No. 1 Incubator, No. 2 Incubator, Model Indoor Brooder, Model Indoor Brooder, Model Colony Brooder.
