

ENGLISHMAN LOSES TO WHITE ON FOUL

MORAN OUTFIGHTS HEBREW. BUT IS DISQUALIFIED FOR USING ELBOW.

DIFFERENCE OF OPINION

Spectators Disagree as to Whether Foul is Committed or Not—White Is a Disappointment.

Los Angeles, July 20.—After forcing whatever fighting there was for nearly nine rounds of a scheduled 20-round bout today, Owen Moran of England was disqualified for using his elbow in clinches, and the decision awarded to Jack White of Chicago by Referee Charles Epton. The abrupt ending of the fight was received with mingled cheers and groans, most of the latter for Moran and some for the referee. There were no features. Moran did nearly all of the leading and fully half the time was spent in feinting and racing with Moran, the pursuer. White had the better of only one round, the seventh, when he landed three left swings to Moran's head. Moran was first warned in the fifth round when a short left hook opened White's lip. The Chicagoan protested that Moran had used his elbow in striking the blow. Twice again in subsequent rounds Moran was warned and each time he protested that he was not using his elbow. Among ring-side spectators there was almost as much difference of opinion as at the Waigast-Rivers decision, many asserting that because of White's methods of defense in clinches Moran seemed only to be fighting unfairly. Moran showed much more cleverness than White, whose showing was disappointing. Moran was a 15 to 7 1/2 favorite at the ringside, with comparatively little White money in sight. "Moran has fought his last fight for me," said Promoter Tom McCarey of the Vernon Athletic club. "No man who deliberately fouls another can fight in the Vernon arena. Referee Epton did the only thing he could do. He repeatedly warned Moran not to foul White, and when Moran showed no inclination to respect these warnings, gave the decision to White."

DUBUC MAKES GOOD

JEAN DUBUC.

Detroit, Mich., July 20.—Jean Dubuc, the Tigers' French-Canadian twirler, is making good. He's an all-around player.

Jean stands head and shoulders above the ordinary pitcher when it comes to hitting. He can hit when he can't do anything else.

Dubuc depends principally upon a change of pace and a cross-fire. His slow ball is thrown with identical motion as his fast one, and the batter who divines the Tigers' intentions is considerable of a mind reader.

The first impression of Dubuc is unimpaired; it seems as though the pitcher is throwing himself off balance when he pitches and that the batter, when connecting, would have little difficulty driving balls through the box.

But after watching Dubuc field his position any doubtful impressions are soon dispelled. Dubuc fields as few other pitchers in the American league can. There is seldom a game but that he has three and four assists and he handles them all cleanly.

Jean is modest. He attributes his success to the fielding work behind him. Talk of pitching and Jean will tell of fielding plays that jerked him from ticklish situations. Insist on talking pitching and he will tell of what the other Tigers have done.

He keeps himself in the background. There are young pitchers who would "lose their heads" were they to be smiled upon by success as has been this French Canadian. But not so with Dubuc.

He keeps himself in condition. He is willing to pitch any time he is called upon. He is willing to act as a pinch hitter. And, if asked by Jennings, would play any position in the infield or outfield without a murmur.

Dubuc is not only a rarity as a pitcher, but he is a rarity as an all-around player and a rarity so far as disposition is concerned.

RUBBER FLOWERS FOR BATHING.

The last trinity of fashionable dress is the rubber rose, designed to adorn the bathing cap or the corsage of the bathing suit. These roses are made of pink rubber and are really remarkably natural in appearance—but imagine wearing a flower into the salt sea; and imagine flowers, anyway, with a swimming costume! But now that the summer girl has taken to wearing embroidered collars and cuffs with her bathing suit and a lingerie petticoat beneath its skirt, and when silk stockings are the rule rather than the exception on the beach, corsage flowers do not seem a long step in the direction of the bizarre. These rubber posies come in the form of pink roses and vividly purple violets so far, but doubtless orchids, gardenias and lilies of the valley will follow soon.

CABINET NOMINEES REJECTED.

Peking, July 20.—The assembly voted today all President Yuan Shi Kai's nominees for cabinet portfolios. As a result of the assembly's act the premier, Fu Cheng Hsiang, alone is left in office and he threatens to resign.

BUSY AT BOZEMAN DURING SUMMER

IMPROVEMENTS ARE MADE ON COLLEGE CAMPUS—NEW FACULTY MEMBERS.

Bozeman, July 20.—(Special)—The south half of the fourth floor of the agricultural building at the Montana State college is being remodeled to make suitable rooms for the Young Men's club. There will be three large rooms in the apartment, one being provided with different games where students may find recreation and the other two rooms will be fitted up with chairs, study tables, etc. Reading matter in the way of magazines and papers will be provided.

New Walk.

The plank walk of the Montana State college, leading from the east side of the college campus by way of the main building and on down to the agricultural building has been torn up and the work of putting in cement walks begun. About 1,200 running feet of cement walk will be laid.

New Registrar.

R. O. Wilson, the recently elected registrar at the state college, began work the first of July. For the past six years he has held the position of secretary to the president of the South Dakota State college. Mr. Wilson is well equipped for the duties he is to perform and the college feels fortunate in securing so able a man.

Agronomist Selected.

At the regular board meeting on Friday evening, July 5, Ralph R. Wells was elected to the position of assistant agronomist. Mr. Wells was raised on a farm near Wenona, Ill., and has this year graduated from the University of Illinois. The statements sent out by the professors under whom Mr. Wells took his work, indicate that he was one of the best students that has ever taken the agronomy work there. This work is under the direction of Dr. Cyril G. Hopkins, who is possibly the leading soil authority of America, if not of the entire world. The very careful soil survey work which has been done in Illinois was initiated by, and was under the direction of, Dr. Hopkins. The college is very fortunate in securing the services of so promising a young man, and further in having connected with the agronomy department a man trained directly under Dr. Hopkins. Mr. Wells will take up his work at the college September 1, and will devote his entire time to instruction along soil and crop lines.

ON THE SPUR OF THE MOMENT

By Roy K. Moulton

According to Uncle Abner.

Bill Higgins has bought a clay farm which is so hard that he has to shoot the seeds into it with a 22-caliber rifle, by gum.

Miss Amy Stubbis, our village milliner, is wearin' a genuine Paris hat, because she made it herself.

Mr. and Mrs. Ab Hicks expected to buy a touring car this summer, but on account of circumstances they have decided to have a little runabout. They don't know whether it will be a boy or girl.

A woman's smile is gen'ally only skin deep.

The Hickeyville Silver Cornet band is being organized for the summer. The citizens of the village have clubbed together and rented a barn nine miles in the country for the band to practice in.

The tin peddler had a runaway the other day and the echoes of it have kept the population of this village awake nights ever since.

One sign of insanity is for a feller to believe that he kin get a good night's sleep in a hammock out on the front porch.

When a writer can't find anybody else to publish his stuff he gen'ally starts a magazine and names it after himself.

If they are looking for a real dark horse, what's the matter with Jack Johnson?

Caught on the Fly.

Report says codfish is very expensive in Portugal. Some of our astute candidates ought to be able to make a paramount issue out of that without losing any votes.

Eighteen million microbes have been found on a one-dollar bill. When the microbes infest the one-dollar bills they become a real menace to the general public.

A New York state farmer advertises: "For Sale—A full blooded Jersey cow giving milk, three tons of hay, a lot of chickens and three stoves." Some cow, that.

A Harvard professor announces that women talk too much. Wonder if professors get real money for handing out information of that kind?

An eastern paper says American men should walk more. A good many of them have since the railroad passes were abolished.

But the Turkish-Tifian war is never going to attract much attention without better press work.

New York has the stepless street car, but what is really needed is the strapless street car.

Then again it is strange that you so seldom see a peroxide blond sitting on the bleachers.

During the summer months mothers of young children should watch for any unnatural looseness of the bowels. When given prompt attention at this time serious trouble may be avoided. Chamberlain's Colic, Cholera and Diarrhoea Remedy can always be depended upon. For sale by all dealers.

Alterations Free During This Sale

We believe that our customers are entitled to a perfect fit at all times. Alterations will cost you nothing and they'll be done right.

B & A

Satisfaction or Your Money Back

We will gladly exchange or refund the full purchase price without a murmur if you find anything unsatisfactory in any way.

SEMI-ANNUAL CLEARANCE

SATURDAY'S business proved our assertion that this sale would be attended by the best dressed and most discriminating men in Missoula. Fastidious men, who would ignore an ordinary sale, came into our store in throngs yesterday. Men are convinced now that a sale at this store is a thing worth while. The same good quality prevails even when the price is cut and we guarantee the same fit, style and service now that our customers have always had in the past. Ready for you again tomorrow morning and all this week. It is to your advantage to come in while the assortments are at their best.

INTERWOVEN HOSE

We are offering a NEW SOCK for men, possessing wearing qualities, fit and appearance far superior to any half-hose ever before offered at anything like the price.

It is a fine texture, lightweight, snug-fitting sock in permanent silk-luster colors and manufactured with the new wear-resisting interwoven toe and heel, which give it many times the wearing strength of ordinary hosiery. This new feature provides strength where strength is needed without making the sock coarse or heavy.

During the Sale All 25c and 35c Inter-Wovens, 5 Pairs for \$1.00

ANY SAILOR STRAW IN THE HOUSE AT HALF

Panamas and Bankoks as Follows

\$5.50	\$4.50	\$3.85
Instead of \$10	Instead of \$8	Instead of \$6

Armstrong, Beeson, Wingert Co.

GALLATIN RAILROAD TO BUILD CITY PARK

Bozeman, July 20.—(Special)—Bozeman is likely to have a suburban park on its new line of railroad if plans now under consideration by the city council are carried through. The city owns an extensive tract of land north of Bozeman, about three miles, in connection with its water system. At one end of this tract is a fine grove, and near this the new extension of the Gallatin Valley railroad passes. It is proposed to lease this grove for a term of years to the Gallatin Valley railroad to develop as a resort, with the understanding that after some fixed number of years the improvements are to revert to the city. A committee of the council will take up the plan with the railroad which is understood to be favorable.

MUSEUM OF SPELEOLOGY.

The Austrian department of agriculture has made an appropriation for the establishment of an international museum of speleology, which is to be founded at Adelsburg, in that country, and not far from the grotto which is the largest cavern in Europe. This is claimed to be one of the most suitable locations for a museum of this kind. In the museum will be collected objects of all kinds relating to the study of subterranean botany, zoology, paleontology, anthropology, as well as geophysics, underground waters, etc. It is claimed that the museum will be the largest and most complete of its kind in the world.
