

NEW EPOCH STARTS GEOLOGICAL SURVEY FOR INDIANS HAS NEW HOME

AGENT ON ALBERTA RESERVATION PLANS TO EDUCATE HIS RED CHARGES.

Calgary, Alberta, March 22.—Expressing his belief that the Indians of Alberta are entering upon a new epoch and that the rate of mortality has reached its maximum among them, P. J. Fleetham, government agent for the Sarcee reserve, stated in an interview recently that from now on the Indians of this province will continue to multiply, notwithstanding the popular theory that they are a doomed race. Mr. Fleetham has ideas concerning the future of the redmen in Alberta, that are unique if not startling. In a word, he is convinced that an industrious Indian is a possibility, and when that type has been developed, then the ever-increasing death ways that have been threatening for years to exterminate the aboriginal American will be stemmed. But this Indian agent does not believe in too much book learning at the present stage of the game for the reservation Indian. He would first inculcate them with the first principles of physiology, impressing upon them the necessity of sanitary living and clean lodgings, if good health is to be enjoyed. The next logical step, in the education of his proteges, Mr. Fleetham believes, is to instill in the primitive mind of the Indian the value of work to long life and bodily vigor. Agriculture will, of course, be offered them as a means of employing their spare time and every inducement will be presented to obtain the Indian's interest in farming.

Mr. Fleetham believes this is a big step, but is confident that success can be obtained. Recently a portion of the Sarcee reservation was announced for sale, the Indians waiting all their claims to a number of acres. The money obtained by the sale of the land will be used to purchase farm implements, horses and wagons for Indians of the reservation that manifest a desire to try mixed farming. The result of this scheme will be watched with interest by the government and if the plan succeeds the same system will be employed on all other reservations in the dominion.

NEW YORK YACHTSMEN CORNERED BY LIPTON

New York, March 22.—Sir Thomas Lipton has found a way to put the New York Yacht club "in the hole." Members of the club admit it and don't know how to get out. In the request for a reconsideration, which the Royal Ulster Yacht club has asked the New York club to make of its refusal to accept a challenge for the America's cup, it is indicated that Sir Thomas will eliminate all conditions. That is, he will enter for his sloop a 75-footer against anything the New Yorkers may choose to send out, up to the 90-foot stipulated in the deed of gift of the America's cup. Yachtsmen agreed today that if the challenge took this form the New York Yacht club would be forced to accept it and if, in accepting, the New Yorkers entered a 90-footer against the British 75-footer, the race would be such a force that American yachtsmen would be held up to the ridicule of the world.

It was reported today that the New York club might reply to the Royal Ulster club as early as Monday next, although the regular meeting of the club is not scheduled until Thursday.

WELSH LEAVES ENGLAND.
Liverpool, March 22.—Freddie Welsh, champion light-weight boxer of England, sailed for New York today on the Mountatun. He expects to arrange a match with champion Willie Ritchie of San Francisco.

CONGRESS APPROPRIATES BIG SUM FOR CONSTRUCTION OF MODERN BUILDING.

After a 28-year campaign the United States geological survey has received generous recognition at the hands of congress in the authorization of an expenditure of \$2,596,000 for the construction of a fireproof building of modern office-building type of architecture. With this sum it is proposed to erect a building on ground already owned by the government which shall accommodate, besides the geological survey, the reclamation service, the Indian office and the bureau of mines, all bureaus of the interior department whose work is closely related to that of the survey and among all of which there is more or less constant cooperation.

The public buildings law, which carries the survey item, authorizes an immediate appropriation of \$596,000, the balance to be appropriated as needed in construction. While this omnibus building law is only an "authorization" measure, leaving the actual appropriation of the money to a future act, \$96,000 of the amount included in the measure may be expended immediately, having been appropriated by a former congress in connection with the purchase of the site on which the survey building is to be erected. Plans can thus go forward at once for the construction of the new building. For the needs of the survey and the other bureaus mentioned an up-to-date, conveniently arranged and well-lighted building is of especial importance. Too many of Uncle Sam's great army of civil employees at Washington work in part or exclusively by artificial light, in quarters that may be compared to dungeons, a condition which is suggestive of medieval times, when the first requirement of castles was walls thick enough to resist the attacks of battering rams and catapults, or of the still more ancient period when huge, ornate pillars and columns were the fashion, regardless of the arrangements with respect to light and convenience on the inside of the building. The innovation of providing a structure of the modern office type for government "workshops" in which a maximum of high-grade output is the first consideration, such as will occupy the new building, will be welcomed.

A Cold, La Grippe, Then Pneumonia
Is too often the fatal sequence. La Grippe coughs hang on, weaken the system, and lower the vital resistance. R. G. Collins, postmaster, Hartington, N. J., writes: "I was troubled with a severe La Grippe cough which completely exhausted me. Foley's Honey and Tar Compound soon stopped the coughing spells entirely. It can't be beat." Missoula Drug Co.—Adv.

NEW YORKER DEFEATS FORMER WOMAN CHAMP

Pinhurst, N. C., March 22.—An exciting contest between Miss Lillian Hyde, Long Island Metropolitan champion, and Mrs. J. V. Hurd, Pittsburg, former international woman's champion, marked today's qualification round in the women's event of the thirteenth annual United North and South Amateur Golf tournament. Miss Hyde won with a card of 89 against 92 for Mrs. Hurd. The winner's score is said to be six strokes lower than any previously recorded here in women's competition play. Boxes for the course is 79.

MARKET IN WHEAT IS BOOSTED

BULLS IN CHICAGO GET BUSY FOR FOREIGN BUSINESS AFTER EASTER.

Chicago, March 22.—Leading bulls, who were plainly in control, hoisted the wheat market today, presumably for effect on foreign exchanges after Easter. The close was firm, 1/4c to 3/4c net higher. Other leading staples, too, showed an advance as compared with 48 hours before. Corn 1/4c to 3/4c, oats 1/2c to 3/4c, and provisions 1 1/2c to 2 1/2c higher.

There was not a great deal of selling opposition to the upturn in wheat. Cold weather discouraged the bears, despite the fact that experts in the fields were unanimous in reporting the general outlook as nearly perfect as it could be at this season. On the other hand considerable apprehension existed among many traders, who held that whatever may happen between now and harvest time must be for the worse.

Expectation that had roads would interfere with movement of corn caused firmness in that grain. Delayed seeding of oats sent prices in that market up. Lightness of hog receipts caused firmness in the provision list. Today's range: May wheat opened at 90 3/4c; high, 90 3/4c; low, 90 1/4c; closed, 90 3/4c. May corn opened at 53 1/2c; high, 53 1/2c; low, 53c; closed, 53 1/2c. May oats opened at 33 1/2c; high, 33 1/2c; low, 33 1/4c; closed, 33 1/2c.

Chicago Livestock.
Chicago, March 22.—Hogs—Receipts, 7,000. Market strong. Bulk of sales, \$8.55@9.10; light, \$8.85@9.20; mixed, \$8.70@9.15; heavy, \$8.50@9.10; rough, \$8.50@8.70; pigs, \$6.90@9.00.
Cattle—Receipts, 200. Beeves, \$7.10@9.20; Texas steers, \$6.50@7.60; western steers, \$6.80@8.15; stockers and feeders, \$6.00@8.20; cows and heifers, \$3.50@8.00; calves, \$7.00@11.25.
Sheep—Receipts, 1,000. Market steady. Native, \$6.15@7.00; western, \$6.40@7.10; yearlings, \$7.20@8.25; native lambs, \$7.00@8.85; western lambs, \$7.25@8.90.

Metal Market.
New York, March 22.—The metal markets were dull and practically nominal. Lake copper, \$15.25@15.37 1/2; electrolytic, \$15.00@15.12 1/2; casting, \$14.75@14.87 1/2. Iron unchanged.

Minneapolis Wheat.
Minneapolis, March 22.—No. 1 hard, 86 1/2c; No. 1 northern, 86 1/2c; to arrive, 84 1/2c@85 1/2c; choice to arrive, 86c; No. 2 northern, 82 1/2c@84c; No. 2 northern, 87c; No. 3 wheat, 80 1/2c@81 1/2c.

Market Review.
New York, March 22.—The dull stock market of this week showed that speculation was still laboring under the burden of unsolved difficulties. The problem presented by the enforced abandonment of the Union Pacific-Southern Pacific dissolution plan was not wholly unexpected, but there was room for its further reflection in additional declines of prices. The release of credits tied up to meet the obligations of the underwriting syndicate probably had its part in the slightly easier tone of the money market earlier in the week. This was the more welcome because of the renewed demand upon New York gold supplies which tightened the call loan market again.

Stock market operations made very light requirements for money. The prolonged Easter recess in prospect increased the disinclination to make commitments or to leave existing contracts open. The latter disposition accounted for some covering up of shorts at the last. Pressure upon borrowers proved especially costly to holders of some of the so-called "good will" stocks, which were objected to in collateral. Necessitous selling of these developed a thin market and some severe declines resulted. Preparations for April money settlements abroad continued.

While exports of merchandise for February were about stationary at last year's value, imports expanded over \$15,000,000 with an impairment of the trade balance in our favor. The approaching spring promise of the country's agriculture and sustained commercial and industrial activity were hopeful factors. Labor problems kept up an undercurrent of anxiety.

BIG FIRE BALLOON UPSETS ENGLAND

London, March 22.—The discovery by a game-keeper on a lonely Yorkshire moor of the remains of a fire balloon had ended one of the most acute attacks of "airshipitis" from which England has suffered since the jingoes began to discuss the danger of an airship attack by Germany. For several weeks towns on the east coast have been in a fever of excitement over the reports of mysterious lights to have been seen hovering over them. It is now believed that the reported airships have all been heat balloons sent up by practical jokers. The evening star, unusually prominent for some time past on account of a notable lack of fog, also shares the blame, and Venus was responsible for breaking up a meeting of the West Hartlepool Corporation Finance Committee.

Widow of the Murdered President

Mrs. Francisco Madero and her three nieces, (left to right), Antonio, Marie and Mercedes.

New York, March 22.—Senora Francisco Madero, wife of the murdered ex-president of Mexico, has joined the other members of the Madero family in New York. She arrived in this city a few days ago, accompanied by Julio Madero, a brother, and the Senoritas Angela and Mercedes Madero, sisters of Francisco; Mrs. Francisco Madero, the mother of the late president, Senora Rafaela Zilion, his sister and her children, Maria, Mercedes, Antonio and Philippe Zilion.

The Maderos are now practically all in New York. They will not return to Mexico in the near future, as they believe they would be killed if they returned to their native land. Senora Madero is now confined to her bed. Her illness is not serious.

About twenty years ago a medical student, who had not yet qualified for his profession, lived on the Isle of Dogs and did church work there. He finally decided that he would rather be a monk than a physician, and he gathered about him a number of youths who sympathized with his aspiration. Presently they arbitrarily decided to call themselves "Benedictines," but did not receive any sanction from the order. Disregarding this detail they banded themselves together under the Benedictine rules of life and wore the habit of the order.

electd with the title of Father Aeldred, Abbot of Painsthorpe, a place in Yorkshire to which they had removed from the Isle of Dogs. This place presently became too small for the order, and the monks purchased and moved to the Island of Caidy, where they now live.

A. J. Balfour, former premier and until last year leader of the Unionist party, is one of the very wealthy men of Great Britain, his annual income being placed at some half million dollars. Most of this comes from his Scottish estate, Whittinghame, Haddingtonshire, the chief products of which are potatoes and metal for road making.

Mr. Balfour does not himself grow potatoes or quarry road metal, but he draws his income in rents and royalties. The valleys of the estate are world-famed for the potatoes they produce, and the crop, which yields the highest prices, is shipped to England and at times even to America. The farmers, getting big prices in turn, pay big rents, and do so very gladly. The road metal is sold to a contractor, who pays Mr. Balfour a fortune in royalties for the purpose of quarrying at Whittinghame. There is a whole mountain of the metal, so that the former premier is assured of a steady income for many years from this source alone.

Mr. Balfour's only extravagance is the keeping up of a large house in Carlton House Terrace in London, and of course his country home. Since he gave up the leadership of the Unionist party his chief occupation is golfing and tennis and he engages in these games on the Riviera in winter and in Scotland in summer.

Many a Suffering Woman
Drags herself painfully through her daily tasks suffering from backache, headache, nervousness, and loss of sleep, not knowing her ills are due to kidney and bladder troubles. Foley's Kidney Pills give quick relief from pain and misery, a prompt return to health and strength. No woman who suffers can afford to overlook Foley's Kidney Pills. Missoula Drug Co.—Adv.

GOOD GROUNDS.
(From Judge.)
"On what grounds do you claim the title of champion thirty man for St. Ryeland's?" challenged Bill Dorkins, chairman of the Loafers' club.
"When he comes to town he brings an apple for lunch," said the storekeeper, "and he always carries the core home to use for fertilizer."
An Epidemic of Coughing
Is sweeping over the town and young and old are alike affected. Foley's Honey & Tar Compound is a quick, safe, reliable family medicine for coughs and colds. A. S. Jones of Lee Pharmacy, Chico, Calif., says: "Foley's Honey and Tar Compound has no equal, and I recommend it as containing no narcotics or other harmful properties." Missoula Drug Co.—Adv.

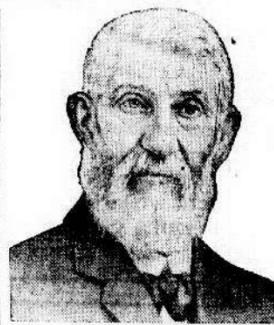

Bowels Get Weak As Age Advances

THE FIRST NECESSITY IS TO KEEP THE BOWELS GENTLY OPEN WITH A MILD LAXATIVE TONIC.

Healthy old age is so absolutely dependent upon the condition of the bowels that great care should be taken to see that they act regularly. The fact is that as age advances the stomach muscles become weak and inactive and the liver does not store up the juices that are necessary to prompt digestion.

Some help can be obtained by eating easily digested foods and by plenty of exercise, but this latter is impossible to many elderly people. One thing is certain, that a state of constipation should always be avoided, as it is dangerous to life and health. The best plan is to take a mild laxative as often as is deemed necessary. But with equal certainty it is suggested that cathartics, purgatives, physics, salts and pills be avoided, as they do but temporary good and are so harsh as to be a shock to a delicate system.

A much better plan, and one that thousands of elderly people are following, is to take a gentle laxative- tonic like Dr. Caldwell's Syrup Pepsin, which acts as nearly like nature as is possible. In fact, the tendency of this remedy is to strengthen the stomach and bowel muscles and so train them to act naturally again, when medicines of all kinds can usually be dispensed with. This is the opinion of many people of different ages, among them Mr. O. P. Miller, Baroda, Mich., who writes: "I am 80 years old and have been constipated for many years. Since receiving your sample bottle I have procured two more bottles and find that it is the best remedy I ever used and does just what you claim for it to the very letter. I can not recommend it too highly."

MR. O. P. MILLER

A bottle can be bought of any druggist at fifty cents or one dollar. People usually buy the fifty-cent size first, and then having convinced themselves of its merits they buy the dollar size, which is more economical. Results are always guaranteed or money will be refunded. Any elderly person can follow these suggestions with safety and the assurance of good results. If no member of your family has ever used Syrup Pepsin and you would like to make a personal trial of it before buying it in the regular way of a druggist, send your address—a post will do—to Dr. W. B. Caldwell, 417 Washington St., Monticello, Ill., and a free sample bottle will be mailed you. The cause of the exodus declared that the
