### Baptist Family Party.

The good fellowship gathering at the Baptist church Thursday night was a success in every respect. About 250 adults gathered in the upstairs room, and about 50 children in the basement. The program given upstairs was interesting, entertaining and amusing. The congregation joined heartily in singing "Blest Be the Tie That Binds." Mrs. William MacGregor rendered a piano solo very beautifully. Another musical number was the tenor solo by R. H. Smith. A newspaper, called the Baptist Reflector, was one of the very interesting features of the program. The "associated press" reports were read by Mrs. Allen, the local, by Mrs. Cayton, the editorials by the pastor, and the children's part by Miss Utley. Many of the items were cleverly written. Mrs. Veeder, who never fails to interest with her readings, gave an original poem, entitled "Our Church." Valentine Robinson represented the children from the elementary department with a well-told story.

At the conclusion of the program refreshments were served and the remainder of the evening spent in getting better acquainted. The church is indebted to the ladies for the success of the evening.

### The Merry-makers.

The Merry-makers, the official name adopted by the recently-organized boys' club, gave a jolly dancing party at the club room in the Knowles building on South Third street Thursday evening. The pleasant room, which has been tastefully decorated with pretty things, each member donating something from his cozy corner at home, was filled with happy young folks and the lady proved that they are well versed in the art of entertaining. The club's own orchestra of six pieces furnished the music for the dancing. This is the first of a series of parties which the club proposes to give during the winter.

The Merry-makers hope to have 40 members before the charter is closed. The idea of the club is to furnish its members with a wholesome place to meet in the evenings where a rousing good time can be enjoyed away from the influence of the saloon or the pool room. The club has a player-piano, and, as mentioned before, enough musicians to make up an orchestra, so there will be no lack of music. With furniture and pictures the lady are already well supplied. Parents of the lady are interested and the efforts of the members are being directed along proper lines. The club's first officers are as follows: Homer Mix, president; Earl Cruz, vice president; Charles Elain, secretary; James Orr, treasurer.

### Neighborhood Party.

Mrs. E. W. Kramer entertained a company of the ladies of her neighborhood Thursday afternoon at her home in Orchard Homes. The ladies plied busy fingers while they visited, and completed the tying of three quilts for their hostess. A charmingly appointed tea was served by Mrs. Kramer at the close of the afternoon.

### Claimant-Heyford.

Harold Griffith was the officiating clergyman, and a company of about 30 relatives and intimate friends witnessed the ceremony. Miss Hazel Steeples and Albert Heyford acted as bridesmaid and best man. The bride was becomingly crowned in pale gray satin with pearl trimmings, and she carried a bouquet of sweet peas. The bridesmaid wore a gown of white silk messaline. A profusion of carnations and sweet peas, banded with smilax and ferns, adorned the rooms of the Heyford home. A sumptuous wedding supper was served after the ceremony was concluded. Mr. and Mrs. Heyford will go Saturday to Spokane for their honeymoon. Upon their return they will reside at 223 West Spruce street.

### Whitford-Chisholm.

A belated announcement was made in Missoula Thursday of the wedding of Miss June Jeannette Whitford and Angus D. Chisholm, solemnized on November 17 in Seattle. ### Valley Social Club.

The members of the Valley Social club were very pleasantly entertained Thursday evening by Mr. and Mrs.

The officers were read at the coming year as follows: President, Mrs. Winter; vice president, Mrs. W. Hixon; secretary and treasurer, Mrs. John Flynn.

### For Miss Dunstan.

B. club, gave a kitchen shower at the Rygg home on Pattee street Wednesday evening, in honor of Miss Hilda Dunstan, who will be the first member of this club to be married. The rooms of the Rygg home were decorated with the club colors, pink and green, and with red hearts in honor of the occasion. ## GRANDMA NEVER LET HER HAIR GET GRAY

Keep Her Looks Dark, Thick, Glossy, With Sage Tea and Sulphur.

When you darken your hair with Sage Tea and Sulphur, no one can tell, because it's done so naturally, so evenly. Preparing this mixture, though, at home is messy and troublesome. For 50 cents you can buy at any drug store the ready-to-use tonic called "Weyl's Sage and Sulphur Hair Remedy." You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning all gray hair disappears, and after another application or two, your hair becomes beautifully darkened, glossy and luxuriant. You will also discover dandruff is gone and hair has stopped falling.

Gray, faded hair, though no disgrace, is a sign of old age, and as we all desire a youthful and attractive appearance, get busy at once with Weyl's Sage and Sulphur and look years younger. Missoula Drug Co., Agents—Adv.

### Dimick-Riley.

Cards were received in Missoula yesterday containing an invitation from Mr. and Mrs. C. H. Dimick to the wedding of their daughter, Miss Hattie A. Dimick and Frank C. Riley, to be solemnized at their home in Linwood, Kan., on January 27. The groom is a second lieutenant in the United States army stationed at the Philippine Islands. He is well known and liked in Missoula, where he lived for a number of years with his brother, Dr. H. J. Riley.

### THE PART THAT FLIES.

"Pa, what's a theatrical angel?" "A man whose money has wings, my son."

### BELLE OF ARMY SET

MISS DOROTHY ALESHIRE.

Miss Dorothy Aleshire, the elder daughter of General and Mrs. J. E. Aleshire of Washington, is one of the belles of the army set at the national capital. Miss Aleshire has her mother and her younger sister spent last summer on a Wyoming ranch.

vanian, Italian, Serbian, Austrian, German, French, Danish, Swedish, Irish, Scotch, English and Cherokee Indian. Twenty-five different occupations were represented. In ages the pupils ranged from 15 to 62. Many of them shed the ordinary elementary branches but there was also a strong demand for such subjects as bookkeeping, shorthand, typewriting, Spanish, mechanical and architectural drawing.

Foreign universities are now receiving some of the large private benefactions for which they have long envied American institutions. Cambridge University has recently received \$40,000 for general purposes, and \$50,000 for a chair of astrophysics; Bristol University has had a gift of \$100,000 from one donor, \$90,000 from another, and \$150,000 from two others; Glasgow has been willed \$50,000 for a research lectureship in medicine and \$170,000 from three other benefactors; and Leeds has an anonymous gift of \$50,000 for the erection of a school of agriculture. In Germany, \$2,000,000 has been subscribed for transforming the scientific institutes at Frankfurt-am-Main into a university, and the University of Hamburg is to start with an endowment of \$6,250,000. In the case of Hamburg, however, the money has been neutrally appropriated by the city.

Many cities hesitate to start open-air schools because of the supposed expense, particularly of heating. In Green Bay, Wis., the cost of heating in the open-air school has been found to be only 5-1-3 cents per day, or \$8 a year, for each child.

A one-year course in tanning has been established by Pratt Institute, Brooklyn, N. Y., in co-operation with the National Association of Tanners. The course is for men already employed in the tanning industries or high-school students without practical experience who wish to take up tanning.

In New Zealand all males are obliged to do military drill from 14 to 21 years of age, and schools are required to withhold scholarship grants from any student who can not prove that he has complied with the provision of drill. Much opposition has developed, especially among school men, according to the American Peace society.

As indicating the educational work of the Y. W. C. A. there are 42,000 girls and women enrolled in 171 cities in day or evening classes. Each of 65 associations has an enrollment of more than 100 students, several of them registering from 1,500 to 2,000. In each of 14 cities over 500 students are registered. Two-fifths of the girls are in day classes, and the rest in evening classes. There are 26,400 students in household arts.

Newly naturalized immigrants in Los Angeles, Cal., are instructed in the responsibilities of American citizenship through the social center. "Recognition day" services are held at the close of each term of school. Says the social center report: "All the new citizens who have received their second papers within the six months are specially invited to a banquet given by prominent citizens and hosts. Later there is a public meeting in the auditorium. The program consists of addresses by leading citizens, city, county and state officials, patriotic music, motion pictures, and the ceremony of extending the right-hand of citizenship."

## HERE'S OPPORTUNITY FOR WOMEN TO DRILL

Chicago, Jan. 17.—For electrifying every housewife and arousing the inert women for active support of equal suffrage, it is said that leaders in Chicago have under consideration achieving a true textile law which shall put a stop to the frauds and adulterations in fabrics and in shoes. The true textile league has behind it the power of women's clubs, suffrage and study organizations as well as business organizations of men, it is said. "Women of the United States have the opportunity of a century to do what men have failed to do and cannot do without women's support," "message" of the league declares. "The textile bill of the country exceeds a billion dollars a year, is nearer a billion and a half, yet there is no means today for the protection of purchasers of woollens, silks, linens and cottons, no law like the 'pure food law' and little general knowledge of textiles. The output of deceptive goods has become a national scandal, but women are aroused to the case. Once the suffrage and women's other organizations endorse a true textile bill in congress as really giving them protection and also aiding the honest manufacturers of textile goods and the achievement will bring the inert class of women to realize the power of women and to show a different degree of interest. Results will do what predictions can never do. No bill now pending should have women's support—for the present."

### EDUCATION NOTES

Emory and Henry college, Virginia, until recently an institution of the literary type, shows interestingly the trend of the times in its efforts to meet more directly the needs of the immediate vicinity. Without weakening its literary departments, the college is seeking to put its young men into touch with the everyday life of the rural communities from which they come. Recently a demonstration agent was secured, to have his headquarters at the college and direct agricultural and industrial work both for the students of the college and the people of the surrounding community.

Senior students in the state normal school at Troy, Alabama, are specially trained for rural-school teaching. Instead of depending on regular textbooks, the students use the proceedings of the conference for education in the south, which contain discussions of actual rural school problems by those engaged in handling them. Each student is expected not merely to be familiar with rural school conditions in general, but with those of one rural school in particular. Professor Edgar M. Wright, who is directing the work, hopes in this way to produce teachers who will be enthusiastic leaders in life in the open country.

When an epidemic of cholera is raging in the Philippines the authorities do not close the schools to avoid contagion. They keep them open as centers of hygiene information for preventing the spread of the disease.

The Massachusetts state board of education maintains a teachers' registration bureau for teachers desiring positions in Massachusetts. In the past year, the first of its existence, the bureau filled 89 positions at salaries ranging from \$2,700 down to \$10 per week.

A ship-building slip is maintained in connection with the high school at San Pedro, Cal., where, under the practical instruction of a nautical architect, the students learn how to build a boat, make and place the engine, and launch and run the craft. Classes in boat building and marine commerce make trips to the wharves and aboard ship to study ship construction, engine action and the character of the cargoes. Shipping law is also part of the course.

Night schools of cosmopolitan character are by no means confined to congested centers in the east. At Gallup, McKinley county, New Mexico, the following nationalities were represented in a recently established evening school: American, Spanish, Sla-

## RACE OF SUPERMEN WILL POSSESS NEW SKIN

PARIS SCIENTIST FURNISHES A NEW IDEA OF NOTHING TO DO BUT WORRY.

(By Associated Press Cable.) Paris, Jan. 17.—The race of supermen which may eventually replace present day humanity on our planet, according to some prophets, will have a skin greatly different from that of the man of today.

Professor Daniel Berthlet, the eminent French specialist, declares that the skin of the human race has undergone great changes since our primitive ancestors. He finds notably that while the whitest of modern skins reflect almost all the colors of the spectrum, the skin of the more primitive races absorb the colors of higher and finer vibrations and only reflect the stronger colors at the spectrum's lower end. For instance, the skins of the primitive negro races reflected practically no colors at all. The red-skinned races reflected only the red at the lower end of the spectrum and the so-called yellow races only as far as the yellow in its center. The white skins of the races today are able to reflect not only the blues, but also the violets at the top of the visible spectrum, although the strength and clearness of the reflection varies with each individual skin. But no skin has been found so far capable of reflecting the ultra-violet rays, which, although present in almost all light, vibrate at a rate too high to be visible by the human eye. It is therefore believed that the past evolution of the human skin foreshadowed the existence in the distant future of an ultra-white race, which, in addition to its other capacities, will have a skin capable of reflecting the invisible ultra-violet rays.
