

SERIOUS PROBLEMS NOW CONFRONT GOETHALS

AS GOVERNOR THE COLONEL HAS QUESTIONS AS PERPLEXING AS ANY HE HAS HAD.

(By Associated Press Cable.) Panama, Feb. 14.—"Making both ends meet" is Colonel Goethals' present problem, somewhat as it was when he came to dig the canal, but it now concerns itself with income and outgo instead of bringing the two oceans together. There are only \$47,000,000 left of the funds appropriated for construction of the canal, and while this may appear a liberal sum for the finishing touches, Colonel Goethals believes that only an era of far-reaching economy will assure keeping within his allowance. He is determined that the \$47,000,000 shall last until the canal is finally opened for commercial use. Notwithstanding that many economies have already been put into practice, including a great reduction of both the executive and laboring forces, expenditures generally must be still further cut down to make the appropriation last.

Nearly every ship that leaves the Isthmus for the United States is carrying big men and great who have laid down their shovels. The work on the canal is finished, and they must seek other employment. In some instances they hope to return as employees of the permanent operating force, but that organization is in such an embryonic state that none can know with what success he will meet. It is probable that some of their operations from the tropics to the frozen north if the government goes ahead with the Alaskan railway project.

Sanitation of the isthmus is also again looming up as one of the problems of the canal. While not so acute as it was during the early years of construction, it is now an important matter by reason of the great extent of Gatun lake formed by the closing of the spillway at Gatun dam. The lake, at the 85-foot level at which it is proposed to maintain this portion of the great canal, has covered an area of a little more than 120 square miles of jungle. As the waters rose there was backed up in many out of the way places much water that is more or less stagnant. Some of this is already being oiled by the sanitary division but much of it is in isolated places and difficult of access.

The oiling squads will have to be kept at work indefinitely and this will make sanitation one of the important functions of the permanent government of the canal zone. To aid in the work it is hoped to acquire a five-mile strip around that portion of Gatun lake not within the borders of the zone.

Preparations for the electrification of the Panama railroad across the Isthmus of Panama practically will be completed early this spring when the high tension installation is finished. Already there have been erected many of the track span bridges which will carry the power across the isthmus.

It is planned to manufacture at the electrical power plant at Gatun about 7,000 horsepower which will be distributed to all the points along the isthmus for light and power purposes. Much of this will be transmitted to the permanent headquarters town of Balboa at the Pacific entrance to the canal where the large navy and other repair shops will be located.

It is not the intention of the government to immediately undertake the complete electrification of the railroad for the reason that at present there is no knowing the amount of traffic the road will carry across the isthmus after the opening of the canal. Should this prove to be sufficiently large to warrant the expense of making the change the railway will altogether cease to be a steam road.

CAUSE FOR PALLOR.

(From Judge.) Wife—George, I want to see that letter.

Husband—What letter, dear?

Wife—That one you just opened. I know by the handwriting it is from a woman, and you turned pale when you read it. Hand it here, sir!

Husband—Here it is, dear. It is from your dressmaker.

GIVE PROPER CARE TO THE HAIR AND YOU WILL NEVER NEED A WIG

The man who wears a toupee does not like it, but has the courage of his convictions. Nature never intended that the top of the head should be left entirely without protection. A bald head is very susceptible to contraction of colds and neuralgia. Wearing an artificial top piece counteracts this tendency, and, aside from the improvement in the personal appearance, is amply justified.

How much better it would have been had the man, now chronically bald and wearing a toupee, but realized earlier in life the approaching danger and devoted a little regular attention to his hair, which would have saved it.

There is a remedy which will absolutely prevent baldness. Loss of hair in nine cases out of ten is unnecessary, being due to dandruff and the germ that causes it. This germ must be destroyed and the accumulations of Adv.

CANAL ZONE POLICEMEN

An unusual problem has been solved in policing the Panama canal zone. One of the most cosmopolitan populations in the world has been gathered in Panama. The workmen are obliged to live very close together. Many weird stories are told of crime and violence on the isthmus in the old days. With the coming of the Americans, however, all this was changed. A large, well-disciplined force of policemen have patrolled the zone, and life and property have become as safe

BOOSTING BUSINESS THROUGH THE CANAL

GOVERNMENT AGENTS AND CONSULS SEEKING TO DIRECT TRADE THROUGH DITCH.

(By Associated Press Cable.)

London, Feb. 14.—The government at Washington is making preparations for increased emigration from Europe to the Pacific coast of the United States on the opening of the Panama canal, as indicated by a request to American consuls in Europe to furnish the department of labor with reports on the plans being made by transportation agencies to handle the increased traffic. The consuls have also been called upon to supplement the work of special emigration commissioners who have visited Europe lately, with reports of the quantity and quality of the expected immigration.

European representatives of American railroads welcome this action on the part of the American government as indicating the beginning of a movement by Washington to encourage the high type of emigration which England and Germany are making every effort to divert to their own colonies. These governments offer every inducement to steamships and railroads to handle this traffic while the agents of American transportation concerns complain that the American government adopts a negative policy, which, while effectively shutting out many undesirable immigrants, also discourages the solid type of immigrant for whom there is still much room in the United States.

Alexander Jackson, who has represented a large American railroad system for many years in Europe, has suggested to the local American consulate that the United States prepare booklets setting forth the agricultural and business possibilities of the various states for free distribution in Europe. He believes that such booklets would lead to a great increase in the numbers of immigrants who are looking for farms or business openings rather than for ordinary jobs.

dandruff checked. Then the hair will not fall out, but instead will grow naturally and luxuriantly. Newbro's Herpicide is the remedy, regular applications of which oftentimes produces the most gratifying results. It has long been known as the "original remedy" that kills the dandruff germ and is absolutely dependable.

Newbro's Herpicide in 50c and \$1.00 sizes is sold by all dealers who guarantee it to do all that is claimed. If you are not satisfied your money will be refunded.

Herpicide applications may always be obtained at the better barber shops and hair dressing parlors. Anyone desiring to try Newbro's Herpicide before purchasing a large bottle will receive a nice sample and booklet by sending 10c in postage or silver to The Herpicide Co., Dept. R., Detroit, Mich. Missoula Drug Co., special agents—Adv.

WHITE MEN THRIVE IN TROPICAL CLIMATES

RESEARCH EXPLODES THEORY THAT TORRID REGION IS NOT FIT FOR CAUCASIAN RACES.

(By Associated Press Cable.) Melbourne, Australia, Feb. 14.—Dr. Anton Brodie, director of the Australian Institute of Tropical Medicine, who has been studying the possibilities of maintaining tropical Australia as a white man's country, confirms the observations made by American scientists in explosion of the theory that a white man's blood deteriorates or becomes thin in tropical climates. The American observations had been made in comparison of the blood corpuscles of acclimated East Indians and American soldiers of long service in the Philippines and these showed that no appreciable change had taken place. Similar results have been obtained by Dr. Brodie from experiments on school children in an Australian town.

What is called tropic anaemia, a form of pallor and listlessness observable in the inhabitants of hot climates, is really due, not to any defect in their blood, but to minute changes in the outer skin, according to Dr. Anton's belief, and along these lines there is need of further research to establish the actual influence of high temperatures on physical organisms, as follows: "It is yet too early to say definitely whether the great experiment of populating tropical Australia by a white working population can be accomplished. This, however, is certain. Northern Australia, when compared with other tropic regions, offers the most favorable conditions for permanent white settlement. The position certainly justifies the application of unlimited effort, as the prize in view is the successful holding of a whole continent for the white race."

James K. Hackett has presented to the Players' club in New York the trowel with which his father, the late James H. Hackett, laid the cornerstone of the old Booth theater.

HUNTING BIG GAME IN PANAMA JUNGLES

AMERICAN SCIENTISTS ENTER STRIP FOR RESEARCH WITH GUNS AND CAMERAS.

(By Associated Press Cable.)

Panama, Feb. 14.—The coming of H. E. Anthony and George Ehrhart as representatives of the American Museum of Natural History in New York to hunt game in the Panama jungle with camera and gun, brings to notice Colonel Goethals' ambition to make the canal zone a large and safe haven for beast and fowl as well as a gateway for commerce. While the bars will be let down for the present party and probably for all who, like Colonel Roosevelt, "Colonel Goethals will carry out strictly as the zone's first civil governor what he has insisted upon during his engineering work—that the canal zone shall be a game preserve."

So strict have his orders been followed during the past few years that seldom has a gun been heard on the isthmus except in certain brief open seasons and despite the noise and powder smoke of the canal blasting, wild fowl and isthmian game of all kinds have greatly increased, knowing well that they are practically safe from molestation. It is probable that the museum men will find as good if not better specimens than would have been possible before the canal diggers began work here.

Gatun lake, which covers an area now of more than 120 square miles, is the paradise for feathered game of all kinds. They are coming to the lake in great numbers and each season sees the feathered tribes increase. Most of these birds are attracted by the fish with which the lake is filled.

The shores and floating islands on the lake abound in blue and white heron, the latter being the bird from which is obtained the beautiful egret, now barred from the United States by the new tariff act. Then there are blue and white cranes, cormorants, pelicans and several species of the rail family. An odd feature is the recent arrivals of a number of wild duck. They are beginning to come in ever increasing numbers.

Out of the jungle there are many deer and the number is on the increase in spite of the fact that they still are being hunted. They are not yet on the taboo list. Tapir, or forest cattle, as the natives call them, also are numerous and are becoming quite tame. It has been noted within the last few weeks that the wildcat is also on the increase. Then there are reported to be many alligators in Gatun lake and the Chagre and other smaller rivers.

With the depopulation of the zone, which is well under way, there will be even less hunting and fishing than there is now. Wild fowl and game will be undisturbed and probably will make of the isthmus a permanent home and haven.

A heavy cold in the lungs that was expected to cure itself has been the starting point in many cases of disease that ended fatally. The sensible course is to take frequent doses of Ballard's Horehound Syrup. It checks the progress of the disorder and assists nature to restore normal conditions. Price 25c, 50c and \$1.00 per bottle. Sold by Garden City Drug Co.—Adv.

Henry Savage purposes to try "Along Came Ruth," a pretty sentimental play from the French stage, in New England within the next few weeks.

HEAD CHOPPED OFF FOR FAKE REPORT

CHINESE OFFICER LOSES HIS CRANIUM BECAUSE HE TOLD AN OFFICIAL WHOPPER.

(By Associated Press Cable.)

Peking, Feb. 14.—The report has come from the interior of the Fukien province that the unnamed official who attempted to deceive the central government as to the death of General Hwang-Liang has been beheaded. Hwang-Liang is the brigand chieftain who during the anti-Manchu revolt proclaimed himself the "Sixteenth emperor of the Ming," the pre-Manchu dynasty, and who recently drove a number of American missionaries out of the interior of the Fukien province. The American legation was soon afterward informed that the brigand leader has "suddenly ceased to exist" but announcement is made in a Shanghai dispatch that the coffin supposedly containing the body of the "emperor" had been found filled with rubbish.

The object of the trick may have been to obtain reward or to escape the difficult and dangerous task of capturing or killing the outlaw. Chinese brigands are not easy to catch. The rural police system is very feeble, especially at this time of transition from one form of government to another. When hard pressed by soldiers the outlaws vanish into fastnesses easy to defend, or disappear among the country people, who are made to hold their tongues by threats of terrible vengeance. It is said that the followers of White Wolf in Honan secure their arms and lay aside their fine clothes and become, to all appearance, ragged farmers and villagers when expediency demands. It is announced that \$10,000, which is an enormous fortune in China, is to be offered for the capture or death of this notorious leader.

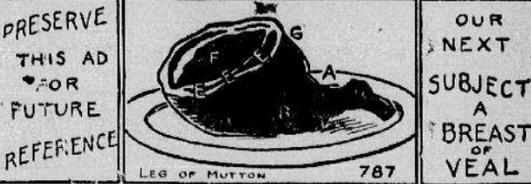

Henry Miller has started rehearsals for "Daddy Longlegs," which is to have its first presentation this month. The comedy is said to be as quaint as its title.

Announcement

The Banking Corporation

is a mortgage bank organized for the purpose of making mortgage loans in Montana, at the usually prevailing rates, and selling them again in the east at the rates prevailing in financial centers. The Corporation will not accept checking or commercial bank accounts of any character, and will not sell, exchange or do any other banking business. An adjunct of mortgage banking, however, is the handling of time deposits, pending satisfactory investment for customers and the like, and to that end The Banking Corporation of Montana will accept funds to be left with it for a stated period of six or twelve months, or funds to be left on deposit in the form of a savings account. On such accounts the Corporation will pay interest at the rate of 4 per cent per annum.

The Managing officers of the Corporation at Missoula having established quarters in the banking room at the southeast corner of Main street and Higgins avenue, will take a particular interest in discussing business in their line with anyone interested.

How to Carve In cutting a leg of mutton begin across the middle, cutting the slices way down to the bone, as shown by the letters A and B. Some prefer to cut it at the end, from G to F, in the form of a semi-circle E E E. This part contains more fat. TWICE-A-DAY CLASS ADS ALWAYS GET RESULTS

Study Your Catalogue

The "Song and Story" catalogue may make you a prize winner. Study it carefully—go over it word by word. The correct title to every picture in the \$500 game positively appears in the catalogue, and you can find them all if you go about it in a systematic way. Divide the Catalogue into sections and give a section to each member of the family. Have them pick the appropriate answers from their section—this way you will gain many possible solutions that you might otherwise miss.

Here Is a List of the Prizes

- First Grand Prize \$100 in gold
Second Prize \$50 in gold
Third Prize \$25 in gold
Fourth Prize \$20 in gold
Fifth Prize \$15 in gold
Six Prizes of \$10 each \$60 in gold
Fifteen Prizes of \$5 each \$75 in gold
Forty Prizes at \$2.50 each \$100 in gold
Fifty-five Prizes at \$1 each \$55 in gold

How to Win a Prize

Get each picture every day. Look for its right title in your catalogue. Paste it up in your listing book, with one to seven answers to it. Save all answers till called for at the end of the game. THEN turn them in as your entry for a prize.

Two Big Helps

The Catalogue has 5,000 titles of songs and books, among them the correct answers to all the pictures. Catalogues cost 35 cents; 40 cents by mail.

The Listing book gives twelve free answers and has a space for every picture in the game. Listing books are 75 cents; 80 cents by mail.

Send for Catalogue in This Way

Gentlemen: Enclosed please find 40 cents (stamps or money order) for which send me at once the "Song and Story" catalogue, with its 5,000 titles, among which are the seventy correct answers to the pictures. My Name Address
