

SOCIETY

"Do Your Christmas Shopping Early," has been the controlling spirit of the week just ended in Missoula. The few and informal gatherings of the week have centered about the absorbing theme of Christmas giving and many of these gatherings have been held conveniently in the Christmas shops. Indications are that there will be less extravagance and less loss giving this year, than has been known for many years past. The sorrow and stress of circumstances fallen upon so many thousands of neighbors, has opened warm currents of sympathy and charity. It is going to be the fashion this year to send a card, a book or a loving letter to the friends who are living in peace and comfort, sparing the larger treasure for the needy.

Correct this and the hair's natural luster and abundance will return. Almost extraordinary results. An exquisite hair dressing.

THAT LITTLE FLICKER OF EXPRESSION.
If you can make it, "Bing!" we've got it.
So much progress has been made in the field of photography that at the present time the photographer, instead of dancing about his camera like a maniac to hold the baby's attention while the negative received enough impression to show that it was a baby being photographed, can if he is properly equipped secure the negative in a flash. Light passes at the rate of 176,000 miles per second and the photographer, if he is skillful can whack off the few feet necessary and your photograph is taken. All that is needed to guarantee your perfect satisfaction is to create the expression wanted. The rest is easy.
Photographs, and especially the high grade kind, cost more than formerly, but this is because of the doubling and trebling of the amount of the precious metals used in manufacturing the splendid product we use at the present time. Pure silver and platinum chemically treated are expensive factors, and our finest materials of today are very rich in those metals. This not only produces a finer tone, but also insures permanency for a high-grade photograph of today will last a thousand years, and then some.
As a matter of course, the photographer of the present time must know his business thoroughly to produce the finest results, and if you can make the little flicker of expression wanted, "Bing!" we've got it.
The name "French" on your photographs means something.—Adv.
