Jane E. Hall and her sister, of Mont-
gomery county, Pa., are suing the gov-

Maggie Dean, who disappeared so mys-

Crystal Falls, a small mining town in
the upper peninsula of Michigan, is in
imminent danger of destruction from the
forest fires. Iron Mountain, Quinnesic

cordwood, ties and standing pine is es-

and party were attacked, and this time
O'Brien himself was hit on the head with
a stone and severely injured. As before
the police made no effort at arrest. Dr.
Doyle, of Watertown, N. Y., where the
O'Brien party arrived on Saturday, said
O'Brien was suffering from internal in-
juries sustained during the Kingston attack,
and that attack of pleurisy would be
the final outcome if he did not
rest for a few days at Niagara Falls.
However, he left Niagara Falls for
Hamilton on Monday, where the nation-
alists were organized for his protection,
and where the Orangemen, afraid to
attack him openly, shot at him from al-
leys as he was driving home unprotected.
The driver was wounded in the hand, but
O'Brien escaped unhurt.

The recent earthquake in Arizona ex-
posed a rich quartz ledge for a distance,
by the side of a mountain sliding off and
leaving it bare. The boys of a neighbor-
ing camp were advised of the uncovering
of the ledge by a prospector, who no
doubt always looked out for the main
chance, and there was a grand rush made
for the place and men took up claims
when the earth still shook so violently
that they had to hang on the side of the
mountain while they drove their location
stakes. There may possibly be men more
enterprising and daring than the average
prospector, but we have never seen the
color of their hair. If the earth should
open up and swallow one of them he
would prospect the different strata as he
went down. Arctic cold, nor tropic
heat, nor storm, nor flood, nor earth-
quake, stand not in his way.—Exchange.
