HOME NEWS.

The "Granite Budget" did not reach us this week.

Col. G. W. Morse came up from New Chicago last Friday.

Mr. and Mrs. James M. Bailey, of Deer Lodge, were up on a visit last week.

James Gallagher is building a large warehouse on his lot south of Broadway.

George Tyrrell, the genial mixologist at Kaiser Bro's haven of the thirsty, is on the sick list.

Sam Lee is bringing suit against Mrs H. Schnepel for closing up the road to Lee's saw mill.

The music for the dancing at the Silver Lake picnic, to-morrow, will be furnished by the Pelkey brothers.

A. W. Gordon & Co., druggists of Granite, have just received a large and complete stock of wall paper.

Innumerable fishermen of all degrees have been busy during the week plying their piscatorial avocations.

The water pipes have been laid to Dr. Allen's new hospital, the building of which is moving along rapidly.

The cupola for the foundry was erected and put in place this week. The fire-brick lining is now being built.

There has been a dearth of police court happenings this week, and business in legal circles is reported not booming.

The twentieth of August is now talked of as the date of the arrival of the first train in Phillipsburg, instead of September 1st.

Mike O'Mara has rented John Rains' saloon, and is now running a first-class bar, stocked with the best of all things drinkable.

The steam wood sawing machine is upon us; we mournfully relegate the buck saw to well-merited seclusion and rest--vale.

The New Northwest is the only outside paper that has contained a reliable account of the race between Turner and Little Turf.

Lund & Ritz will this week start up their new brick charcoal kilns in Coulter's Gulch, which will burn coal for the Granite company.

Mr. Titus' hearing in the matter of the recent contempt case will take place on Saturday next at Deer Lodge before Judge Galbraith.

Part of the new and heavy hoisting machinery and one of the new boilers for the Bi-Metallic were seen going through the town this week.

Frank Wilson, Jno. W. Dawson, C. Gable and numerous others have gone to Deer Lodge, many of them witnesses in the jumping cases.

M. Kaiser is having the exterior of his hotel painted and penciled. When this is finished it will be one of the neatest hotels in the territory.

John Rains has sold his residence on Stockton street, where he has lived so long, and will put up a handsome brick house in Wilson's Addition.

The trees recently set out on Granite street are not flourishing. They show less and less signs of life and will probably have to be removed.

A Helena firm will shortly erect a large three-story brick hotel on the ground opposite the West Granite office--plans for the same are now being prepared.

H. L. Turner, our rustling green grocer, has purchased lots in the rear of the school house and will at once commence the erection of a residence thereon.

The posters for the W. S. F. & R. Association outline a most attractive programme at the coming meeting in Butte on August 10th, 11th, 12th and 13th.

Work on Wilson's new building on Lower Broadway has again commenced and it is the intention of the builders to finish the structure as soon as possible.

Last week Johnny Cole, Mrs. Matthews and Miss Mary McDonald were upset and thrown from a wagon between here and Granite and all sustained slight injuries.

From the valley we hear that the rails of the Drummond & Phillipsburg railroad are laid across the river and will probably be half way to Stone Station by the end of next week.

Wardner & Brookes is the firm name of a new barber shop established in the Capitol Saloon. The gentlemen in charge of the chairs are first-class artists from Helena and Butte.

After the big race of last Sunday, several smaller races were matched on the ground. Skookum was a winner in three consecutive dashes of 600 yards against three different competitors.

Gus Graeling, long associated with Mr. Beardsley in the lower barber shop on Broadway, has bought out his partner, and from now on will conduct the business in his own name.

The walls and roofing of Doe & Hoyer's new building are finished and work on the wood finishing of the interior begun. The building will be ready for occupancy by the 10th of August.

The price for single copies of this issue of the MAIL with supplement is 25 cents to all corners. New subscribers sending in their names before August 15th will receive one copy of this supplement and all subsequent ones gratis.

We understand that the roads leading into Wilson's addition on the north side of town are to be repaired and improved, and several new ones to be put in from points from which the ground is now inaccessible.

Mrs. Schnepel has the foundation laid for her new two-story brick dwelling house. The site selected is on the plateau, west of the race track. The location is admirable and all that could be desired for the purposes of a home.

J. E. Myer will move his butcher shop in temporary quarters, now being built opposite his present place while the latter is being torn down preparatory to the building of Wm. Weinstein's new brick building.

Robert McDonel, proprietor of McDonel's saloon, will leave during the ensuing week for a brief sojourn east, to visit relatives in Pennsylvania. We wish him a pleasant trip and a speedy and safe return.

The Silver Lake House is in process of renovation throughout both the first and second floors. The rooms on the second floor will be commodious and elegantly fitted for lodgers, and the first floor will be the new quarters of the postoffice.

In going to Drummond last Monday, the stage was upset below Horton's, and Jack Deering, who was on his way to Deer Lodge, had his leg badly broken. He was taken on with the rest of the party and is reported as getting along well.

Chas. Smith, one of the owners of Little Turf, came into the office last Tuesday and asked us to state as publicly as possible that he had been well treated while in Phillipsburg, and had nothing but praise to speak of the place and the people.

The race between Lilly of the West and Joe Bowers for \$200 a side, which was to have come off last Sunday, was thrown up by Jack Hall, the backer of Lilly, because the mare hurt her foot and was lame and he preferred to lose the \$50 forfeit rather than to risk damaging the racer.

F. L. Currie writes a ridiculous letter in the Helena Herald ostensibly to explain and exonerate his action in the jumping of the North Granite ground but really in a wild attempt to implicate certain well-known citizens of the town in the affair, out of revenge for not standing in with him.

A horse race a day has been about the figures for the last week. Every discussion between racing men as to the respective merits of their favorites seems to wind up with a dare or a bluff. When the other side won't be bluffed a race is immediately matched to come off in five minutes.

The three brick yards are working full force, and find it almost impossible to supply the demand made upon them for building material. Two two-story buildings on Broadway are now in course of construction, with three more ready to start upon as soon as brick can be obtained.

The ranchers of the vicinity and valley report a large hay crop for the year. It is estimated that the production will exceed that of previous years by at least one-half. This being the case we may expect a more reasonable rate for hay the coming winter than what was paid during the past.

Early last Friday morning the gypsies folded their tents and stole away after having told innumerable fortunes at two dollars per head. It is not known whether they left through fright at the action of the vigilantes the night before, or through fear of being accused of complicity in the same.

Through the courtesy of Mrs. Lawrence, the telephone operator, we learn that the testimony of eight witnesses were taken in the vigilantes case at Deer Lodge yesterday. Demars, Tolman and Currie being the first three examined. The court then adjourned until 10 o'clock this morning. The lawyers for the defense are Stapleton and Robinson.

Demars and Tolman being advised by friends and officials here in Phillipsburg not to swear out warrants for the arrest of anybody suspected to have been connected with the recent marauding party, went to Deer Lodge, where warrants were issued for N. B. Ringeling, Joseph Mackey, Hugh O'Donnell, William Burke, James Patten, Al. Porter, M. Shovelin and James Valley. These gentlemen having been nearly all of them interested in the property recently jumped are arrested on suspicion of having been among the party that drove the jumpers from town. All the prisoners left the Burg for Deer Lodge Sunday evening. It is also claimed that one of the party was recognized by the falling off of his mask.

LOCAL MINING NEWS.

Our Mining Editor's Report Upon the Mines of this District.

NOTES.

General Manager Pardee, of the West Granite, got back from Helena last Sunday.

Phil. M. Saunders, general manager of the North Granite and San Francisco syndicates, is expected back from Helena on Saturday.

The Phillipsburg sampling works are being pushed to completion as rapidly as possible.

A number of St. Louis members of the San Francisco and North Granite syndicates, accompanied by Phil. M. Saunders and Ed. I. Zimmerman, will reach Phillipsburg to-night or to-morrow. Some of the gentlemen will stay two or three weeks, and investigate the district thoroughly.

GRANITE.

Everything running steadily and nothing new to report. The product of the stamps continues to keep up to the usual standard. The directors and stockholders will shortly begin to arrive for the meeting, when action will undoubtedly be taken toward increasing the milling appliances of the company. Rumor has it that a 100 stamp mill will shortly be built on Douglas creek, a mile or so above Phillipsburg.

HOPE.

Mine and mill running steadily and on the usual quality of ore, with nothing new to report beyond the continuance of the favorable conditions of the last month.

SAN FRANCISCO CO.

It is the vein in the tunnel of this property instead of that on the North Granite as reported in last issue, which has pinched. The tunnel has now a length of 847 feet, in hard breaking ground, with the vein still pinched but widening.

The levels from the 200 foot station of the shaft are in 27 feet to the east and 33 to the west, with the vein holding well in quality and width, and becoming more nearly perpendicular in pitch.

WEST GRANITE.

The Rattlesnake shaft is down 385 feet considerable trouble being experienced from water, with the country rock breaking somewhat softer.

The Elizabeth tunnel is in 524 feet in fair working ground, and without apparent change in the quality of the vein matter, though we see considerable rock being set aside for assay.

The Butte crosscut is in 178 feet in softening country, and growing wetter.

NORTH GRANITE.

Tunnel is now in 746 feet. The point for the crosscut north has not as yet been chosen. The vein is looking well and holding about the same width.

BELLE.

Machinery continues to arrive, and is rapidly being put in place. Some of the heavily-timbered ground is to be cleared to give room for operations on the surface.

PETER COYLE.

We understand the stamp and concentrators will be started this morning. Development of this property continues, and a large quantity of excellent ore has already been mined and placed on the dump.

DUNKLEBERG.

From this district we hear of increased activity on some of the leads. The Stonewall and Pioneer shafts now have a depth of 100 feet, with a vein from eighteen inches to six feet in width, carrying high-grade silver ore, running from 35 to 70 per cent lead. The Starlight, J. I. C., and claims belonging to the Hollenback Bros. are very promising prospects.

The leads to the south of the Dunkleberg creek have an easterly and westerly strike, and are reported as true fissure veins. On the north side the ore occurs in blanket veins and pockets, which have a general northeasterly and southwesterly strike, with one wall lime and the other sandstone.

Since it is becoming the fashion to have at least one race a week of sufficient importance to attract large crowds of people, no time should be lost in constructing a grand stand and seats on the race track for the accommodation of visitors. There is but little doubt that this would have the effect of doubling the gate receipts, as many people now give their reason for not attending the races the fact they are compelled to stand during the whole time.

We are pleased to learn that we were in error when speaking in our last issue of the assignment of Mr. H. W. Leopold, in saying that he paid his creditors 21 cents on the dollar. He is paying all of his creditors 100 cents on the dollar whenever they present their bills, with the single exception of Mr. J. Chauvin, of Butte, with whom he made a settlement of an account of long standing. Instead of \$900 worth of stock we should have given \$2,000 as the value of the furniture which Mr. Leopold still has on hand.

Dr. W. H. Pittwood, dentist, has arrived in Phillipsburg, and is prepared to do everything appertaining to dentistry. He expects to locate here permanently if he meets with sufficient encouragement. Dr. Pittwood comes highly recommended, and is a graduate of the Ohio College of Dental Surgery, of Cincinnati. Can be found at the Silver Lake House. Entrance on side street.

Continued from Supplement.

BI-METALLIC.

The Bi-Metallic mining company was formed among St. Louis capitalists to work the James G. Blaine and adjoining properties. The capitalization is \$5,000,000 in 200,000 shares, of \$25 each, only a few shares being on the market. The officers of the company are Chas. Clark, president; Chas. D. McClure vice-president; Paul A. Fusz, treasurer; S. O. Smith, secretary, and James B. Risque, superintendent.

The Blaine was located in 1882 by William Williams, a prospector, who sold it to Clarke, McClure and Merrill for \$1,200. It was purchased because it lay upon the possible strike of the great Granite Mt. vein, the discovery being a seam of high grade quartz. In the spring of 1886 the company began systematic exploration of the Blaine through a vertical shaft to be driven to a depth of 500 feet. This shaft is located about 200 feet northeast of the discovery shaft and about 450 feet west of the east side line of the claim and has now a depth of 315 feet, sinking being temporarily stayed for the purpose of making the shaft one of three compartments, etc. At the 200-foot level a cross-cut was run to the north, which at a distance of 135 feet encountered a 12-foot vein, dipping slightly to the north, and carrying next the hanging wall about three feet of an excellent grade of ore, averaging, we believe \$90 to the ton. The point of intersection of the cross-cut and vein was determined by an upraise in the latter to be about 35 feet below the apex of the ore chute, the extent of which east and west was in a similar manner determined by levels run on the vein in each direction. These levels were run in as much as 100 feet, but we are unable to say how much, if any farther, or give the exact figures. From these workings were stoped and shipped about 50 tons. Shipping was stopped by reason of the inadequacy of the hoisting machinery and for numerous other reasons with which the writer is unacquainted.

In concluding this article it is necessary to state that it is not found in its proper place on the back of the map for the reason that the matter there contained was compiled sometime since from notes obtained from managers and superintendents and from inspection of the properties mentioned whereas these few notes on the operations of the Bi-Metallic company have been collected at the last moment from a mass of such information as we have been able to gather from various sources. The rejection of such of this as we have considered unreliable has greatly retarded us in the preparation of the notes.

IN ADDITION

to the claims and companies mentioned in these articles it is unnecessary to say that the immediate vicinity is full of the most promising enterprises many of which receive mention from time to time in our local mining column and which space prevents our mentioning in detail in this issue.

Go to Wilson Bros. for your oats.

Hay and oats now for sale at Wilson Bros.' new place, on lower Broadway.

Teeth extracted without pain by Dr. Pittwood, at the Silver Lake House. Entrance on side street.

Fresh Strawberries at Mrs. E. McDonel's, Mondays, Wednesdays and Saturdays--\$1.50 a gallon.

Finest Strawberries ever brought to Phillipsburg, at Mrs. E. McDonel's. Send in your order.

Any one wishing to attend the grand opening excursion and ball at Silver Lake, near Cable, can make the round trip for \$3.00. Apply to Pelkey Bros., at the "Bee," by 9 a. m. to-morrow (Friday).

Found.

In William Weinstein's store last Monday, July 25th, a purse containing some money. The owner can have the same by proving property and paying for this advertisement.

Bids Wanted.

Bids will be received by William Weinstein for the construction of two brick stores 60x30 and 70x30 respectively. Plans and specifications may be seen at Weinstein's store. WM. WEINSTEIN.

Wanted.

Bids for the immediate delivering of 1,500 cords of wood at the Hope mill. WM. WEINSTEIN.

Stockholders' Meeting.

OFFICE BI-METALLIC MINING CO. } ST. LOUIS, MO., July 28, 1887. } The annual meeting of the stockholders of this company will be held at the office of the company at Granite, near Phillipsburg, Deer Lodge county, Montana territory, Tuesday, August 16th, 1887. Polls open from 12 o'clock noon until 4 p. m. S. O. SMITH, Secretary.
