Saves Money

An **OP-PULL** ownership means a tremendous saving and of money, whether you use it only for yourself or work for others.

It will do the work of 15 to 30 horses, according to the size engine used, in eight and day—two to two-and-a-half acres per hour. That's time saved.

It requires only two men in place of five or ten—makes work easier—cuts out the before-light and after-dark drudgery there. That's labor saved.

You can do your work when and how you want it done—harvest your crop when just ripe, before it goes down or shells out. That's worry saved.

You can cut out the feed bill—pay fuel bills out of board and labor saved—that's expense saved.

OP-PULL AT PRICES TO SUIT ALL POCKETS

The **OP-PULL** cuts the cost of producing wheat \$2.00 per acre. Consider the percentage of profit this adds on an average yield of twelve to twenty bushels.

Burns cheap kerosene, at all loads, under all conditions. Automatically regulates the fuel supply.

The **OP-PULL** is for plowing, drilling, cultivating, harvesting, hauling and road grading—for threshing, chaffage, cutting clover haying, corn shredding, and husking, etc.

For the latest and most complete specifications of all sizes, pictured descriptions, full information, see the **OP-PULL** manual.
