The Earliest Oranges of the Season.

Where are they grown? Why do they ripen earlier in other sections?

Why are they so luscious?

These and other questions are answered in a booklet which we have issued describing Glenn County, California.

Glenn County is in the heart of the great, rich Sacramento Valley. A few years ago oranges were grown commercially in only the southern part of the State. Later it was discovered that citrus fruits ripened perfectly in even the northern part of the interior valley. Since then Glenn County has come forward with some magnificent fruit. There are countless opportunities for not only citrus fruit culture but for all sorts of delicious fruits, live stock, grain, truck farming, etc., in Glenn County.

We will send this beautiful book describing Glenn County free to you if you will send us your name and address and a two-cent stamp to help pay the postage. Better still, send ten cents in stamps and we will send the Glenn County book, a map of California and a sample copy of Sunset Magazine, the great Pacific Coast national magazine.
