A Beautiful Pulpit.

In the Netherlands there are many churches filled with rare and exquisite carvings, with altarpieces, shrines, pulpits, choir, vestries, fonts, and sacristies laden with a wealth of intricate work...

The melon-chole days have arrived. Pounded ice for dinner is not what it is cracked up to be.

Fools always ask what time it is, but the wise know their time.

If brokers wish to raise the wind they should negotiate a cyclone.

Ought to be allowed to air down—a merchant of forty years standing.

A polite way of putting it—Tributed with a chronic indisposition to exhort.

What species of love is that which is never reciprocated? A neurological affection.

You will need a long spoon if you wish to eat with the devil out of the same dish.

Grind while the wind is fair, and if you neglect, do not complain of God's providence.

He who lags behind in the road where many are striving will always be in a cloud of dust.

We are never so well inclined to believe in a stroke of good fortune as when one has just been dealt in.

Why is a young lady like a bill of exchange? Because she ought to be settled when she arrives at maturity.

'Tis the sinner that best know the world at twenty, whose lip is, at sixty, curled with disdain at its follies.

They are believed in politicians, and think they are all square men, when any rate, he says, "they are never round."

Tilden's letter is highly characteristic of the man. It begins in fact with a falsehood and ends in a puff—of himself.

We must row with the oars we have, and as we cannot order the wind, we are obliged to sail with the wind that is given.

When a young lady hands you a card nowadays with the eulogistic letters V. M. C. A., it means "you may call again."

Patience and attention will bring us far. If a cat watches long enough at the mouse's hole the mouse will not escape.

The ploughman must go up and down, and whatever else may be done, there is no other but the long way to do the work well.

It is given on the authority of a New Orleans paper that there is in that city a young man with his ears so far back that he cannot hear himself sneez.

Gov. Tilden in his letter of acceptance has made a word of commendation for the Hamburg massacre and other Southern atrocities. A man can't think of everything in forty-two days.

What a traveller you have become! exclaimed a Chicagoan on meeting an acquaintance at Constantinople. "Told you the truth," was the frank reply. "I am obliged to run about the world to keep a log of my character; for the moment it overtake me I am ruined."

A lady of London has discontinued a custom originated by her a habit of having visitors write their names in a book in the hall in the event of her absence, as a supposed visitor came in fact to collect a bill of long standing, and wrote in the book "Is sorry Mrs. — didn't leave the amount as she agreed."

The value of a man who did not happen to be very fashionably dressed was confiscated by a hotel keeper at Long Branch a few days since. The man turned out to be a prominent citizen of Philadelphia, who somewhat astonished the Boniface by presenting a \$1,000 bill in payment for his meals and lodgings.

A frontiersman was requested by the sheriff to come to the jail to identify an inmate who was charged with a serious offense. "I'll go and look at him, but I'm not going to be familiar with him until he apologizes for shooting my brother last fall," was the naive reply of the guileless son of the flower-bespangled prairie.

At the closing of a concert, while a young gentleman was struggling with his hat, cane, overcoat, opera-glass, and his young lady's fan, all of which he was trying to retain on his lap, a suspicious looking bottle fell on the floor with a thud. "Here," he exclaimed to his companion, "I shall lose my ough medicine." That was presence of mind for you.

Says the Burlington Hackney: "The authorities took a poor man from Happy Hollow one day this week and sent him out to the poor house. The party belonged to the poor man and his eleven dogs, which he distributed among his sympathizing relatives, was affecting in the extreme. We believe the man had a few children too, but not enough to make any fuss about."

A rough and hairy-looking man was yesterday seen to fall down a state street as if overcome by the heat, but before any one could reach him he had crawled under the shade of a tree. When approached and asked if he was ill, he replied: "Knocked clean over by a sunstroke. 'Do you feel any pain?' was asked. 'Lots of it, my legs are stiff as poker.' 'The sun affects the head, and the legs, I guess you were not sun-struck.' 'Well, I know I was,' said the old man, with a good deal of spirit. 'You don't know perhaps there are various kinds of sunstroke, but there are forty different species, and all are liable to strike a man at once. If you could show me a ten-cent piece I believe I'd feel better.' The citizen passed on and left him groaning.

The other day a dreamy young poet of Burlington set down with a bundle of old letters, in stained envelopes, with faded addresses, to write a sad requiem over the days that are dead. He began: "Thou who wakened and thought, as he began, 'I will surely lay you away. Than the cold gray light of to-day. And when he got that far he ceased one of the letters for a little inspiration and read: "Sir your bill for drinks at this bar is \$17.85 an has bin runnin 8 months and if not paid this evnin will present the same to yore onered father fur paym't. Kepp. Abel Gitting," and then he sighed and laid away the letters, and didn't feel like finishing the requiem that day.

The DuH Heartach light-house, recently constructed on the western coast of Scotland, is situated upon a rock 14 miles from land. Work was begun in 1867, but landings were difficult, from 37 to 62 days each year only being available. The rock is 35 feet above the water, and the light rises 145 feet above the sea. Once a gale detached more than a dozen stones, each weighing over three tons, although they were 35 feet above high-water mark. The structure cost \$257,000.

WOMAN'S TEMPERANCE COLUMN.

Rum and Tobacco.

"And thus shall in no wise enter therein anything that defileth."—Bible.

The joy and the hope of the soul, in this world and that to come are found in the precious love—Are lost to the drinkers of rum.

If we ask at the house of the poor, Whence this rank of the papers do come, They will tell us they beggers become, When they knock at the door of rum.

If we look through the prison-cell bars, At those by transgression undone, Deeply they will confess, They're lost to the drinkers of rum.

Ask the man happy, beautiful bride, In her waned and worn wreathed hair, How a husband was changed to a fiend: She will tell us by telling rum.

For the tendrils of love that were here, Were withered, his heartstrange was numb, From the day he was false to his vow And began to bid pleasure in rum.

Who pines for the body and soul, And who breathes and the breath of the slum; Evil thoughts coming out of the mouth— They're lost to the drinkers of rum.

In the "Garden of God"—"Bliss abode," Who's holding under the tree of life— There will mix with the breath of the flowers No fumes of tobacco or rum.

Voice of the Churches.

The forty-fourth annual session of the American Baptist Home Missionary Society unanimously...

"Resolved, That this society deplore the use of and traffic in intoxicating liquors as a beverage."

The Presbyterian General Assembly at its recent annual meeting unanimously adopted the following resolutions:

"In view of the terrible effects of intemperance upon the souls and bodies of men, of the pauperism, misery and crime consequent upon the manufacture and sale of intoxicating drinks, and the combination of the liquor-sellers of the present day to resist every effort at reform, and to make gain by the corruption of our youth and our legislative bodies and our courts of justice, we therefore..."

"Resolved, That this General Assembly recommend to our ministers, ruling elders, and communicants in every part of the Church renewed and more earnest effort to arrest the progress of this tremendous evil."

The General Conference of the M. E. Church, at its recent session, declared that:

"The attitude of the Church should be hostile toward the liquor traffic, and it should regard an aggressive warfare against this branch of the army of Antichrist. This is the battle of the ages, and it is the duty of each coming generation to take up the conflict where the preceding left it, and continue the struggle till total prohibition shall become the undeplicated policy of the whole earth. Therefore..."

"Resolved, That we are unalterably opposed to the importation, manufacture and sale of all kinds of distilled, fermented, and vinous liquors to be used as a beverage. We protest against voting to license the sale of spirituous or malt liquors, or vesting property on which they are sold, and it is the duty of every member of the Church at all times, by voice and vote, to oppose the liquor traffic, which is the stronghold of the prince of darkness."

Take Your Choice.

Be a drunkard if you want to squander your money. Ten cents a dram is not much, but it counts up in the end, to the other hand, if you want to save your money, if you want to live in comfort and ease, if you want property to attend you in this world, why, don't handle rum.

Be a drunkard if you want to lose your health. Be a drunkard if you want to lose your mind. Be a
