

## Father Says-

"I like a store that I can depend upon to keep good kinds of tobacco and the quality brands of cigars. I appreciate also a conveniently placed store. But I am specially keen for the cigar counter where I am always sure to get fresh goods."

Father can satisfy his wishes here.

### Well Stocked and Handy

Particular tastes are assured of gratification in our stock of cigars, tobacco, pipes and other smokers' accessories. A deserved popularity keeps it always fresh.

If you have a favorite brand, and it is worthy of your choice, you will find that it has also been worthy of ours.

WOULD LIKE TO THOUGH.  
Teacher—Name a bird besides the ostrich that doesn't fly.  
Bright Boy—The jailbird.

A GUESS.  
Why golfing is so popular  
We can't exactly see  
Unless folks take to it  
because It suits them to a tee.

I see Mr. Smith is out of jail, how did he manage it?  
Oh, he put up bonds.  
Must have been Liberty Bonds.

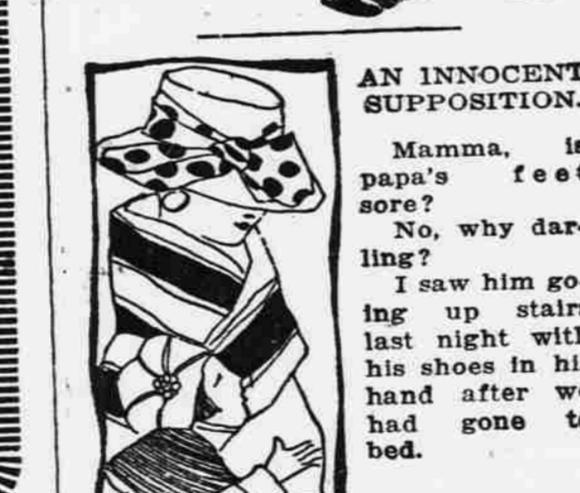

FROM FLORIDA.  
Suit Case—Ever travel in the South?  
Alligator Bag—Sure thing, that was my old home, you know.

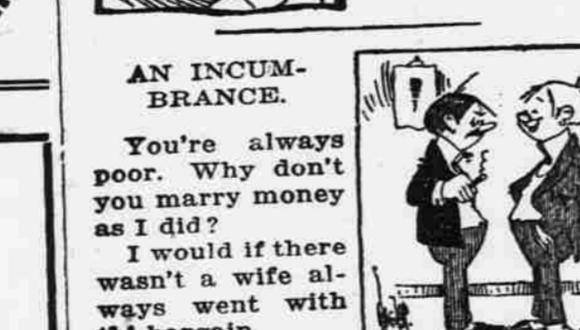

Can you keep a secret?  
Yes.  
Well, auntie has eloped with the chauffeur, and they've borrowed your motor.

Times have changed.  
What now?  
I was just thinking that I can remember the time when a man bought life insurance merely to get rid of the agents.

Mamma, is papa's feet sore?  
No, why darling?  
I saw him going up stairs last night with his shoes in his hand after we had gone to bed.

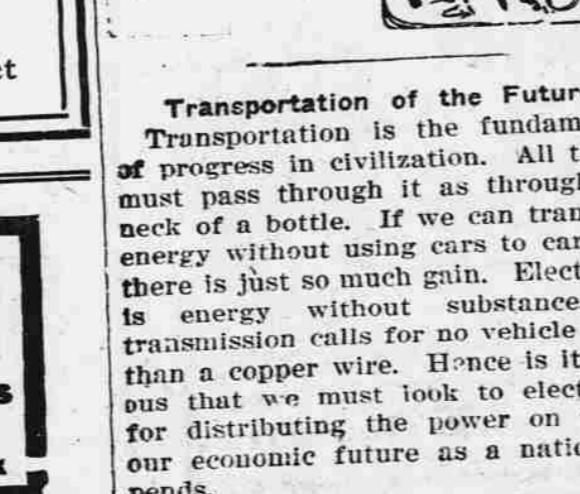

You're always poor. Why don't you marry money as I did?  
I would if there wasn't a wife always went with the bargain.

Uncle, what are seasoned troops?  
Those that have "pep" and "ginger" in 'em, I suppose.

Jones married a girl named Lou.  
Huh! met his Waterloo, so to speak.

Transportation of the Future.  
Transportation is the fundamental of progress in civilization. All things must pass through it as through the neck of a bottle. If we can transport energy without using cars to carry it, there is just so much gain. Electricity is energy without substance. Its transmission calls for no vehicle other than a copper wire. Hence it is obvious that we must look to electricity for distributing the power on which our economic future as a nation depends.

### Water for Fowls

It is highly important to provide a convenient supply of pure fresh drinking water for fowls and chicks. Lack of water even for a short time may cause intense suffering in hot summer weather, and drinking from unwholesome sources is almost certain to cause disease. While pure water and plenty of it is an essential part of a fowl's rations, they are often depended on to look after their own requirements in this respect without any especial attention on the part of the care taker. It frequently happens that poultry keepers suffer serious losses by reason of this neglect.

Many epidemics of so called "cholera" are directly due to a lack of water or to the fowls drinking from polluted sources. This is more apt to occur on farms where no regular provision is made for watering them. They are expected to supply their needs at water tanks, streams, or wherever they can find a source of supply. This may be satisfactory so long as water is abundant, but in dry weather when the streams dry up or when the water becomes stagnant and foul, serious consequences may ensue. Even where water is regularly supplied, much trouble results from a lack of cleanliness in the drinking vessels used.

The importance of clean drinking water for laying hens is clearly shown by the result of an experiment made at the Missouri State Poultry Experiment Station, where it was found that giving the fowls water once a day (meaning presumably, all they wanted to drink once a day) the egg yield was reduced at least 50 per cent.

The egg consists of 65 to 70 per cent water and if the amount available or consumed is only sufficient to meet the requirements of the fowl's body, there will be none left for eggs, and production must suffer. Another important use for water is its influence in equalizing the temperature of the hen's body. Bulletin No. 12 of the Missouri State Experiment Station states:

"First cold water lowers the body temperature, while warm water holds the temperature high. For this reason give the hens cold water in summer and warm water in winter. The second method of cooling is by evaporation which is a cooling process. The temperature of the human system is reduced by the evaporation of sweat from the surface of the body, but with the fowl the evaporation takes place principally through the breathing organs, which accounts for the holding her mouth open and breathing rapidly on a hot day."

The ordinary bodily requirements of fowls for water are about the same at all seasons, the normal wide range in daily consumption being influenced chiefly by weather conditions, also by whether or not the fowls are laying. At the North Carolina Station it was found that the adult males in the month of June, where the room temperature was 78 to 85 degrees consumed at the rate of 3.6 gallons per day for 100 fowls. At the Missouri Station a pen of 60 White Leghorn hens averaged to consume 2½ gallons of water daily during hot weather, or at the rate of one gallon to 16 hens.

Location of the drinking water has a marked effect on the water consumed, because the birds will drink more often if the water vessels are conveniently located and are reasonably near the food hopper.—From The Reliable Poultry Journal.

### ROANOKE ISLAND FOR GOOD ROADS

A decided victory for Good Roads was won last week on Roanoke Island, in an election held at Manteo and Wanchese, the two voting precincts of the Island. It was voted to establish the historic island as a "Road District", and provide for the issuance of bonds for improving approximately 20 miles of highways in same. It is proposed to expend approximately \$140,000 in road improvement, local conditions being such that it is believed that this sum will provide good highway facilities to all parts of the island.

## TAKES TIME TO PLACE THE DISABLED SOLDIERS

Case Board of Federal Board for Vocational Education is now Considering 1,000 Cases a Day

Disabled soldiers and their families have been concerned about the time consumed in arranging for training with the Federal Board for Vocational Education.

A knowledge of the procedure necessary for the Board to legally place the man in training will do much to clear up this misunderstanding. The Central Case Board is working at great pressure, as are the district boards. Almost 1,000 cases are being reviewed by the Central Case Board every day. These cases have been previously passed on by the district officers, but certain evidence must be in the possession of this Central Board before the man's case may be approved. The official army discharge and the military or naval medical report are very essential. These documents are the proof that the disability was incurred while in the service, that it is in some way traceable to such service.—Having established these facts, the Board must determine that the man's disability is the cause of a vocational handicap that must be overcome through a course of training. The new vocation for which the man is to be trained must be examined, with the view to its suitability and the man must be steered away from overcrowded occupations. The process reads smoothly. But note the obstacles: discharge papers are missing and it takes time to get duplicates, medical certificates are lost, and more time is wasted in renewing them. Insufficient evidence on vital points must be completed. Time is consumed in supplying the facts which must be in the possession of the Board before government money can be used for training.

In some instances men must be brought to the district offices for personal interviews on examinations. Personal desires must be considered in the light of economic advantages. In other words, the reeducation of disabled soldiers, sailors and marines is a great big human problem, the man's future is at stake—he must, if possible, attain independence as well as satisfaction; the best interests of the community is in the balance, non-productive citizenship must be controlled. Thoroughness in investigation is the right of the disabled man. A little forethought on the part of the discharged soldiers in securing beforehand the necessary evidence and a little patience on the part of the public will help in the accomplishment of the work.

### "I Spent a \$1 on Rat-Snap and Saved the Price of a Hog."

James McGuire, famous Hog Raiser of New Jersey says, "I advise every farmer troubled with rats to use RAT-SNAP."

Tried everything to get rid of rats. Spent \$100 on RAT-SNAP. Figured the rats it killed saved the price of hog."

RAT-SNAP comes in cake form. No mixing with other food. Cats or dogs won't touch it. Three sizes 25c, 50c, \$1.00.

Sold and guaranteed by CITY DRUG STORE, CULPEPPER HDW. CO., and G. W. TWIDDY.
