

VOL. VIII--No. 153.

IN THE YOUNG AND RISING GENERATION, the vegetative powers of life are strong, but in a few years how often the pallid hue, the lack-lustre eye, and emaciated form, and the impossibility of application to mental effort, show their baneful influence. It soon becomes evident to the observer that some depressing influence is checking the development of the body! In females, the beautiful and wonderful period in which body and mind undergo so fascinating a change from child to woman, is looked for with anxiety, as the first symptom in which Nature fails to show her saving power in diffusing the circulation, and visiting the cheek with the bloom of health. Alas! increase of appetite has grown by what it feeds on, and the energies of the system are prostrated, and the whole economy is deranged. Consumption is talked of, the powers of the body, too much enfeebled to give rest to healthful and rural exercise, thoughts are turned inward upon themselves. The parent's heart bleeds in anxiety, and fancies the grave but waiting for its victim.

HELMHOLD'S EXTRACT BUCHU, A positive and specific remedy for Diseases of the Generative Organs, Diseases of the Bladder, Kidneys, Gravel, Dropsy, and

FOR WEAKNESS, Arising from Excesses, Early Indiscretion, Attended with the following symptoms:—

Indisposition to Exercise, Loss of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Dreadful Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Languor, Universal Lassitude of the Muscular System, often Enormous Appetite with Dyspeptic Symptoms,

Hot Hands, Flushing of the Body, Bryznes of the Skin, Pallid Countenance and Eruptions on the Face, Pain in the Back, Heaviness of the Eyelids, frequently Black Spots Flying before the Eyes, with Temporary Suffusion and Loss of Sight, Want of Attention, Great Mobility, Restlessness with Horror of Society.

Nothing is more desirable to such patients than solitude, and nothing they more dread for fear of themselves, no repose of manner, no earnestness, no speculation, but a hurried transition from one question to another.

These symptoms, if allowed to go on—which this medicine invariably removes—soon follow

LOSS OF POWER, FATUITY, AND EPILEPTIC FITS,

In one of which the patient may expire. During the supererogation of Dr. Wilson, at the Bloomingdale Asylum, this said result occurred to two patients. Reason had for a time left them, and both died of Epilepsy.

Who can say that those excesses are not frequently followed by those direful diseases

INSANITY AND CONSUMPTION? The records of the INSANE ASYLUMS, and the melancholy deaths by CONSUMPTION, bear ample witness to the truth of these assertions. In lunatic asylums the most melancholy exhibition appears. The countenance is actually sallow and quite destitute—neither mirth nor grief visits it. Should sound of the voice occur, it is rarely articulate.

"With woful measures, woe despair, Low, sullen sounds his grief beguiled," While we regard the existence of the above diseases and symptoms, we are prepared to offer an invaluable gift of chemistry, for the removal of the consequences,

FINANCE AND COMMERCE. OFFICE OF THE EVENING TELEGRAPH, Saturday, Dec. 28, 1867.

The Stock Market opened dull this morning, but prices were without any material change.

Quotations of Gold—104 A. M. 133 1/2; 11 A. M. 133 1/2; 1 P. M. 133 1/2, a decline of 1/2 on the closing price of last evening.

The New York Herald this morning says: "Money was in moderate demand from the Stock Exchange, and loans were generally made at 6 per cent, the exceptions being at 5 per cent."

There is a sluggish movement in discounts, and while commercial bills are in fair demand, they are not in excess of the street. The interior passes freely out of town.

The disbursements of the January dividends of the banks and other corporations will probably contribute largely to swell the volume of loanable funds and to stimulate the demand for Government and other securities.

pected rise will not take place. The dullness in trade, however, to stimulate speculation; but the policy of the exchange is of course dependent upon the movement of the market.

The New York Times this morning says: "There was a good inquiry late in the day for money from the stock brokers on miscellaneous collateral at 6 1/2 per cent, but owing to the increased and in some cases the revival of speculation in what is generally known as the 'stock' market, the exchange dealings. The offerings to the leading houses at 7 per cent, however, were quite free, and on large scale wanted on the part of the holders of the bonds paying railways. The public funds were active, and the 5-20s and 10-40s all on the advance, except the 10-40s which were steady at yesterday's figure. The amount of these bonds supposed to have arrived from the outside by the Steamer was estimated at \$1,000,000, and \$1,000,000 was estimated to have been sold at 100 per cent of the 1867-68 loan due 1st inst. for redemption on 1st of January."

Our Stock of Food.—In accordance with our usual custom, says the editor of the Commercial Letter and Price Current, we have made up the stock in this city, of Flour, Rye Flour, Corn Meal, Wheat, Corn, and Oats at the close of the year, in the bands of the Commission Houses, Forwarders, and Millers:—
