

FIRST EDITION CENTRAL HIGH SCHOOL

Sixty-first Semi-annual Commencement at the Academy of Music.

The Graduates and their Addresses—The Marks of Merit and the Incidents.

The opening exercises of the sixty-first term of the Central High School took place this morning at the Academy of Music. A large and brilliant audience were in attendance, and the assemblage in itself was a sufficient demonstration of the interest felt by the public in the Central High School.

- Graduates: Grunau and Ferne, G. Michael, J. H. ... Prayer: ... Master's Address: ... Overture: ... Progress of Printing: ...

A fervent prayer was offered by Rev. Herman J. Dahring, after which followed the Master's Address, by John H. Campbell.

Ladies and Gentlemen: On last Thursday, five years ago, the class of which I am a member held its commencement exercises in this noble building. There were then assembled within these walls the representatives of the beauty, the fashion, and the intelligence of Philadelphia, and I am glad to find, on looking around me to-day, that the same noble and noble presence to the fact that the High School still holds a prominent place in the affections of the people.

But such a thing might again be actually taking place. But such a thing might again be actually taking place. But such a thing might again be actually taking place.

And, lastly, in Spain we have the sublime spectacle of a people rising up against an all-powerful despotism, driving her forth to seek refuge in a foreign country, and in a few weeks accomplishing an almost bloodless revolution.

The time was when an American vessel in the Atlantic Ocean, and the gallant representatives of the American Navy were received and led at all the principal ports of Europe, and we beheld the gratifying sight of one of the honored sons of a great republic made a hero by the highest order of honors.

The time was also when we went to war with Great Britain about a mere right that was in dispute, and it was but last month that the cable informed us that, by a peaceful agreement, without the slightest idea of a resort to arms, the settlement of the boundary had been achieved upon a solid footing.

Now, however, but a few of the striking things that we have seen during the last five years. The bridging of the mighty Mississippi, the opening of the great West to the commerce of the world, the unprecedented peopling of our vast public domain, the extraordinary number of our mechanical inventions, and many other things are enumerated, but these are sufficient to show what a busy period it has been.

And, the spirit of the age has manifested itself in every direction. Our neighbors, on either side of us, have experienced strange vicissitudes. In Mexico, the people have attempted to introduce European influence in North America by the establishment of an empire, with a European prince as its emperor.

Across the ocean, in Great Britain, the deep-seated and long-continued struggle for the people for liberty, and have hailed with delight the final overthrow of the invaders. The nation of Maximilian will serve as an example of what may be expected should a similar attempt be made.

France, which has seen so many revolutions, and whose problem of government has not yet been worked out, has enjoyed the most brilliant and successful of her reigns, for which she is remarkable, has kept her people fully occupied. By the Paris Exposition of 1867, she has been able to capture the attention of the whole world, and exhibited, though perhaps not to its purpose, a striking picture of the advanced state of modern civilization.

It is but a short time since when people were astonished at a novel scheme that it was proposed to put in execution a way out in Chicago, and through the mountains of the West, and under Lake Michigan, and by that means supply the city with water from some distance.

Mr. Daniel Koehersperger, in speaking of "Art and Architecture," contributed to our modern excellence in architecture less to modern invention than to the many fast-decaying specimens which the ancients left as monuments of their civilization.

Next followed the address on the "Power of Music," by Mr. Andrew C. Snodgrass. The construction of our sensibilities, he said, is such as to render us susceptible to the power of music without will or choice of our own.

Mr. Lewis L. Lee, who graduated with the first honors, delivered the next address, "Correlation of Forces," the First Honor Address, by Lewis L. Lee.

The nineteenth century has witnessed the birth of many scientific inventions and discoveries, and the progress of modern science, still in their infancy, have as yet exerted a comparatively small degree of influence.

And, the spirit of the age has manifested itself in every direction. Our neighbors, on either side of us, have experienced strange vicissitudes. In Mexico, the people have attempted to introduce European influence in North America by the establishment of an empire, with a European prince as its emperor.

Across the ocean, in Great Britain, the deep-seated and long-continued struggle for the people for liberty, and have hailed with delight the final overthrow of the invaders. The nation of Maximilian will serve as an example of what may be expected should a similar attempt be made.

France, which has seen so many revolutions, and whose problem of government has not yet been worked out, has enjoyed the most brilliant and successful of her reigns, for which she is remarkable, has kept her people fully occupied. By the Paris Exposition of 1867, she has been able to capture the attention of the whole world, and exhibited, though perhaps not to its purpose, a striking picture of the advanced state of modern civilization.

- Division G—George H. Buchanan, 84; N. Craig Luger, 92; G. H. Buchanan, 80; James H. Barry, 85; George James, 85.

- Division H—George W. Clonk, 92; Walter Boswell, 90; Charles G. McDonough, 89; Benjamin T. Fisher, 88; Alexander H. Brown, 88; James H. Buckingham, 88; Gates D. Fausch, 87; Harry Brown, 87; Frank Fisher, 87; Edward A. Lincoln, 85; Edwin R. Booth, 85.

- Division I—William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91; William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91.

- Division J—William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91; William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91.

- Division K—William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91; William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91.

- Division L—William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91; William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91.

- Division M—William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91; William F. Jones, 91; Victor A. Ellis, 91; John H. Campbell, 91.

gether harmoniously. There have been among us no discords and no continued jarring of separate interests. Our relations as classmates and associates through life may be as productive of good feeling as those which have existed among us for the last two years.

This day, the memory of which for many years may be as dear to us as the day of our birth, is the day of our birth, and to others but one among many scenes of pleasure in which they have participated, and to which we are united with the deepest moment of our future lives.

The valedictory address concluded the exercises of this morning, and the graduates of the Central High School, as a personal testimonial from Professor Riche, following this came the graduation exercises, as the diploma of the High School course.

Mr. William F. Jones, the valedictorian of the class, spoke as follows:—The exercises of this morning terminate the relation which has existed between the class which I represent and the Central High School of Philadelphia.

To-morrow other obligations and other studies will engage our attention. We shall exist in the world as individuals, and differing in many respects from the one which we have just completed. The various schools which we have attended from our childhood to the higher school of life, whether we have profited by our advantages or not, time will tell.

And, the spirit of the age has manifested itself in every direction. Our neighbors, on either side of us, have experienced strange vicissitudes. In Mexico, the people have attempted to introduce European influence in North America by the establishment of an empire, with a European prince as its emperor.

France, which has seen so many revolutions, and whose problem of government has not yet been worked out, has enjoyed the most brilliant and successful of her reigns, for which she is remarkable, has kept her people fully occupied. By the Paris Exposition of 1867, she has been able to capture the attention of the whole world, and exhibited, though perhaps not to its purpose, a striking picture of the advanced state of modern civilization.

SECOND EDITION LATEST BY TELEGRAPH

Booth's Remains—Their Interment in Baltimore—Legislation in Tennessee—Discovery of Gold Mines.

Removal of Booth's Remains.

WASHINGTON, Feb. 16.—Notwithstanding the strict precautions to prevent publicity, it is known that the remains of John Wilkes Booth were removed last night from the Arsenal grounds to Baltimore by permission of the President.

FROM CUBA.

Despotism Prevalent—Treason Officially Defined—Reported Defeat of Insurgents. HAVANA, Feb. 15.—Submitting news favorable to the insurrection renders the offender liable to imprisonment under the decree relating to the propagation of alarming intelligence.

The municipality committee has promulgated a decree supplemental to that establishing military trials. It defines disloyalty thus:—High treason, rebellion, insurrection, conspiracy, harboring rebels and criminals, communication with the enemy, coalition of journeymen, laborers leaguings, seditious cries, propagating alarming news, manifestations, allegories, and all that tends to disturb peace and order.

Gold Mining—Armenian Well Boring—Murder—Female Suffrage. ST. LOUIS, Mo., Feb. 16.—A rich quartz mine has recently been discovered at Binnam's gulch, near Virginia City. The mine is reported to be literally filled with gold, as much as a dollar having been taken out of forty ounces of rock.

FROM TENNESSEE. The School Fund Swindle—Revenue Seizures—The Franchise. NASHVILLE, Tenn., Feb. 16.—For some reason or other nearly all the members of the Investigating Committee have gone home, and the impression has now become general that, as far as the Legislature is concerned, but little more will be done in the way of investigation.

Markets by Telegraph. BALTIMORE, Feb. 16.—Cotton unchanged, in advance of the market. Wheat, 1 1/2. Corn, 1 1/4. Sugar, 11 1/2. Coffee, 17 1/2. Rice, 10 1/2. Indigo, 100. Hides, 10. Wool, 10. Tallow, 10. Lard, 10. Butter, 10. Eggs, 10. Chickens, 10. Turkeys, 10. Poultry, 10. Fish, 10. Game, 10. Furs, 10. Minerals, 10. Metals, 10. Chemicals, 10. Dyes, 10. Pigments, 10. Oils, 10. Resins, 10. Waxes, 10. Glazes, 10. Enamels, 10. Paints, 10. Stains, 10. Varnishes, 10. Polishes, 10. Cleaners, 10. Preservatives, 10. Medicines, 10. Perfumes, 10. Cosmetics, 10. Toiletries, 10. Stationery, 10. Printing, 10. Bookbinding, 10. Paper, 10. Ink, 10. Pens, 10. Pencils, 10. Rulers, 10. Compasses, 10. Squares, 10. Protractors, 10. Gages, 10. Levels, 10. Plumb-lines, 10. Spirit-levels, 10. Theodolites, 10. Transit-instruments, 10. Barometers, 10. Thermometers, 10. Hygrometers, 10. Anemometers, 10. Wind-mills, 10. Water-wheels, 10. Steam-engines, 10. Fire-engines, 10. Locomotives, 10. Railroads, 10. Telegraphs, 10. Electric-lighting, 10. Gas-lighting, 10. Sewerage, 10. Drainage, 10. Irrigation, 10. Agriculture, 10. Horticulture, 10. Forestry, 10. Mining, 10. Metallurgy, 10. Glass-making, 10. Pottery, 10. Brick-making, 10. Stone-working, 10. Carpentry, 10. Joinery, 10. Cabinet-making, 10. Shoemaking, 10. Hatter-making, 10. Tailoring, 10. Dress-making, 10. Millinery, 10. Bookbinding, 10. Printing, 10. Stationery, 10. Paper, 10. Ink, 10. Pens, 10. Pencils, 10. Rulers, 10. Compasses, 10. Squares, 10. Protractors, 10. Gages, 10. Levels, 10. Plumb-lines, 10. Spirit-levels, 10. Theodolites, 10. Transit-instruments, 10. Barometers, 10. Thermometers, 10. Hygrometers, 10. Anemometers, 10. Wind-mills, 10. Water-wheels, 10. Steam-engines, 10. Fire-engines, 10. Locomotives, 10. Railroads, 10. Telegraphs, 10. Electric-lighting, 10. Gas-lighting, 10. Sewerage, 10. Drainage, 10. Irrigation, 10. Agriculture, 10. Horticulture, 10. Forestry, 10. Mining, 10. Metallurgy, 10. Glass-making, 10. Pottery, 10. Brick-making, 10. Stone-working, 10. Carpentry, 10. Joinery, 10. Cabinet-making, 10. Shoemaking, 10. Hatter-making, 10. Tailoring, 10. Dress-making, 10. Millinery, 10. Bookbinding, 10. Printing, 10. Stationery, 10. Paper, 10. Ink, 10. Pens, 10. Pencils, 10. Rulers, 10. Compasses, 10. Squares, 10. Protractors, 10. Gages, 10. Levels, 10. Plumb-lines, 10. Spirit-levels, 10. Theodolites, 10. Transit-instruments, 10. Barometers, 10. Thermometers, 10. Hygrometers, 10. Anemometers, 10. Wind-mills, 10. Water-wheels, 10. Steam-engines, 10. Fire-engines, 10. Locomotives, 10. Railroads, 10. Telegraphs, 10. Electric-lighting, 10. Gas-lighting, 10. Sewerage, 10. Drainage, 10. Irrigation, 10. Agriculture, 10. Horticulture, 10. Forestry, 10. Mining, 10. Metallurgy, 10. Glass-making, 10. Pottery, 10. Brick-making, 10. Stone-working, 10. Carpentry, 10. Joinery, 10. Cabinet-making, 10. Shoemaking, 10. Hatter-making, 10. Tailoring, 10. Dress-making, 10. Millinery, 10. Bookbinding, 10. Printing, 10. Stationery, 10. Paper, 10. Ink, 10. Pens, 10. Pencils, 10. Rulers, 10. Compasses, 10. Squares, 10. Protractors, 10. Gages, 10. Levels, 10. Plumb-lines, 10. Spirit-levels, 10. Theodolites, 10. Transit-instruments, 10. Barometers, 10. Thermometers, 10. Hygrometers, 10. Anemometers, 10. Wind-mills, 10. Water-wheels, 10. Steam-engines, 10. Fire-engines, 10. Locomotives, 10. Railroads, 10. Telegraphs, 10. Electric-lighting, 10. Gas-lighting, 10. Sewerage, 10. Drainage, 10. Irrigation, 10. Agriculture, 10. Horticulture, 10. Forestry, 10. Mining, 10. Metallurgy, 10. Glass-making, 10. Pottery, 10. Brick-making, 10. Stone-working, 10. Carpentry, 10. Joinery, 10.
