CONVENT AND ACADEMY

OF THE
IMMACULATE CONCEPTION,
Opelousas, Louisiana.

THIS Institution will be opened by the Ladies of the "Holy Cross" in the beginning of October, in the Town of Opelousas, for the education of the young Ladies of the Parish and of the neighboring Parishes. The location is most delightful, and offers all the exterior advantages which parents may desire for their children. The system of education will embrace all the branches taught in the best Institutions of America or Europe: Reading, Spelling, Grammar, Composition, Rhetoric, Elocution, applied to the French and English languages, to both of which the utmost attention will be paid, and both of which pupils will most carefully be trained to speak and write with correctness, elegance and fluency.—Writing, Geography, sacred and profane, ancient and modern History, Mythology, Arithmetic, Book-keeping, the elements of Algebra and Geometry, Natural Philosophy, Natural History, Domestic Economy, Sewing, Embroidery, Artificial Flowers, Drawing, Painting, Vocal and Instrumental Music.—This last branch will be taught by a distinguished Artist just arrived from New-Orleans.

Nothing will be omitted to kindle in the pupils a vivid emulation for learning; the greatest attention will also be paid to develop their minds, form their hearts, and elevate their character. They will have nothing to fear from evil examples or evil associations, remaining at all times within the enclosure of the house, and under the eyes of kind teachers who will watch over their morals with maternal affection. They will receive no visits, except from their parents or relations, who will be admitted to see them in the parlor, on Thursdays after the morning classes and on Sundays after the high mass.

The utmost attention will be paid to the health of the pupils; the diet will be wholesome and abundant, the sick will be nursed with maternal vigilance and tenderness.

Religion is the ground work of education. The Institution is Catholic; however, young ladies who belong to other denominations will be received, on the only condition of conforming to the public exercises of the house.

To enable parents to send their children at an earlier age to school,—a child may profit from the age of seven or eight, and even sooner,—to keep them longer, and send several of them at once, the most moderate prices have been adopted:—For Board and Tuition, \$100 per scholar for six months, payable quarterly in advance. Day-scholars will pay \$20, \$30 or \$40, according to the number of classes and the classes they will attend. \$6 per month on the Piano or the Guitar will be charged. \$6 per month for the use of the Piano—\$3, per month for vocal music.

Parents will have to supply their children with books and paper, and provide for the washing of their clothes; expenses incurred in sickness will also be charged to them.

Boys will have to be supplied, at their entrance, with a mosquito bar, a sufficient quantity of sheets, blankets, towels, and every day clothes; they must also bring the uniform, consisting for the whole year of a blue frock, according to the color of the school, trimmed with black velvet; two sun bonnets, 1 blue, 1 of brown linen; two veils, 1 blue, 2 yds, 1 white, 2 yds; a spoon, fork, tumbler and knife; a pair of small brushes, combs, a pitcher, bowl, and looking-glass.—These last articles will be for sale in the house, to preserve uniformity in the dressing room.

For further particulars apply to
Sister MARY OF THE HOLY ANGELS,
Superior,
or to Rev. G. RAYMOND,
Rector of the Church of Opelousas,
Opelousas, August 16th, 1856.

OPELOUSAS LITERARY INSTITUTION.

St. Landry, (La.)

UNDER the direction and proprietorship of Messrs. A. DE ST. CRY D'ARTHUR and JOHN GARRET, this Institution will be opened on Monday next, 7th day of July, for the reception of pupils.

The course of education comprises the English, French and Spanish languages; Classics, Mathematics, Arithmetic, Writing, Declaration, History, Chronology, Philosophy, Geography and Globes.

It is also a small business, regulated by the laws, in highest esteem; because of the extraordinary extent of territory, as well as globe,—encompassing commerce of the three nations, claiming their respective languages, will be taught at this Institution, in such pure style of their native properties, as regards orthography and correctness of grammatical construction, eloquence of diction, and euphonious elegance of reading and delivery, as cannot be found in any other school of the age. The strictest vigilance will be exercised over the orthographical and orthopedical departments of all languages taught.

AYER'S

PILLS.

FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

There has long existed a public demand for an effective purgative pill which could be relied on as safe and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all. The one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and both what success would result, and the safety of the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicine is enervating and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as to make the bowels inoperative, and the system is left debilitated and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all. The one which should have none of the objections, but all the advantages, of every other. Many of them produce so much griping pain and revulsion in the system as to make the bowels inoperative, and the system is left debilitated and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all. The one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and both what success would result, and the safety of the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicine is enervating and irritating to the bowels. This is not.
