

Opeleous Courier.

Official Journal of the Parish of St. Landry.

PUBLISHED ON SATURDAY BY

LEONCE & L. A. SANDOZ

OPELOUSAS:

SATURDAY, JULY 27, 1889

Don't be a clam - Advertise.

A dog supposed to be mad was killed near the depot on last Monday.

The familiar whistle of the papawet is heard once more in our prairies. Let our nimrods get ready for sport.

Rubber Stamps, Stencils, Seals, Monograms, Badges, &c., furnished on short notice. Apply to Fred L. Sandoz.

Read Mr. M. Vilaseca's advertisement in another column and go and examine his stock. His groceries are fresh and sold at dull time prices - try him.

Death and marriage notices, not exceeding five lines are published free. Obituaries are charged at one half rate of reading notices.

The pastor of the Baptist Church requests us to state that he will not be able to fill his regular appointment here next Sunday, the 29th.

The past week has been quite favorable for the cultivation of the crops. A light shower of rain fell on last Tuesday and was good for the growing crops.

The negro who murdered another, at Church Point, some weeks ago, has not yet been arrested. It would appear that he has left this section of the country.

Ovide Godwin, a colored hoodlum, was arrested and put in jail on last Monday, charged with violating Act 31, and committing an assault with a dangerous weapon with intent to kill.

Barnett & Sons wish to say to their patrons and the public that they have decided to remain thirty days longer. Those who are in need of photographs will do well to come at once.

Ulysses Thibodeau, who shot and killed Therence Daigle, at Church Point, in Acadia parish, on Wednesday last week, was brought before Judge Z. T. Lewis, on a writ of habeas corpus on last Monday, at that place, and was remanded to prison at Crowley without benefit of bail.

STABBED - On last Saturday a rencounter took place between two colored men, near Barry's Landing, in which Foulard Balque was stabbed several times with a pocket knife. Henry Melancon, the wounds are serious and may prove fatal. Melancon was brought to the hospital at the time, but was attended by officers at Metville on last Monday and lodged in the parish jail.

Within the past few days a large number of sunstrokes - many of them fatal - have been reported from different portions of the United States. Many have occurred in Southern localities, but seldom of a fatal nature. The latter days of July have been exceedingly hot, and the heated term will doubtless be one of extreme sultriness and oppression for many days to come.

Sullivan had a comparatively easy time in defeating Kilrain in the hippodrome at Richburg, Miss., but his sluggish progress avails him nothing against the "strong arm of the law." Governor Lowry has been making "Johnnie" skip around the ring quite lively ever since the late mill, without "his 800-^{lb} right handers" affording him the usual protection. Oh, mighty Hercules! thus he is pursued by an ordinary mortal; but this is a "round" between barbaric strength and the electric power of civilized order.

The Eastern Caligraph is in favor of iron bridges instead of the wooden ones that are in use across most of the streams in the State. The Caligraph very truly says: "Iron bridges are more durable, safer and less liable to be washed away by freshets than wooden bridges, and in the end are no doubt cheaper, besides the iron bridge seldom gets out of fix and requires less repairs, and the item of repairs alone amounts to considerable expense during the existence of an ordinary wooden bridge." How does this idea strike our Police Jury?

Mechanical and Agricultural Fair.

The Farmers' Union of this parish has taken a step in the right direction in the proposed establishment of a Mechanical and Agricultural Fair, to be held annually at Opelousas. As an organized body of farmers, representing the aggregate strength of agricultural interests in the parish, and incorporated under the laws of the State to give them all necessary corporate and legitimate powers for the transaction of business, they should possess all of those cohesive elements of capital, energy, system and judicious management, energy, system and enterprise to make the success of the fair as well as a munition of increased prosperity to the general industry and commerce of this entire section. In every State where these annual fairs are held a marked improvement is noticeable in every department of agriculture. These annual exhibits of the products of the soil, of mechanical handicraft and of improved stock stimulate the people to still greater exertions in improving their methods of cultivation and in striving to obtain still better results from a more careful management and more enlightened system of labor with each passing year.

These fairs may be aptly termed the "commencement exercises" of our agricultural schools; the great body of farmers composing the classes who are competing for the highest premiums and prizes, and who represent the progressive intelligence and systematized industry of the country. A healthy competition in methods is promoted, order and good management stimulated, and the results of well directed industry are properly rewarded.

The movement is a grand one in every sense of the word, and we propose to discuss some of its most salient features in future issues of this paper.

For the present, we suggest that immediate steps be taken for the formal inauguration of the scheme about the 1st of next November. Let sufficient notice be given so that all of our industrial interests, mechanical and agricultural, may be represented in the opening exhibition. A temporary site can be selected, and a start be made even if it is on a small scale. Let the matter be agitated and assume a tangible shape without delay.

HAASVILLE, LA., July 22, 1889.

EDITORS COURIER:

The crop prospects have improved wonderfully during the past ten days of dry weather. The farmers in both this and the Elm Bayou neighborhood have high hopes at present for a good yield of cotton. The weed is growing and is healthy looking and now beginning to fruit well. The Elm Bayou farmers have very good crops of corn, and will make no doubt enough to do them for the year.

The corn crop throughout this country is a very fair one. Cane has improved beyond all expectations since I last wrote you. While no large fields are planted to cane in this immediate vicinity, a number of small places grow from one to five and sometimes ten acres. '98s is properly a sugar-growing country, and more attention should be devoted to cane.

Mr. Slocumb, a St Landry farmer living a few miles west of this place, informed me last week that he had four acres of upland rice, to use his words, "as fine as ever grew." Mr. Slocumb plants his rice on new ground, he says it is easy to cultivate; he grew two acres last year and some of his neighbors affirm it had been thrashed and the straw made into such as 60 bushels per acre. I need mention only that Mr. Slocumb's farm is in the hill country where the lands are not so rich as the alluvial districts.

Quite a representative meeting was held in Cheneyville on the 20th inst to devise, organize, and perfect means to build a central sugar factory at that place. One of the needs of the country is more factories to shape and work the raw material so abundant everywhere into goods for the markets of the world. You hit a happy wrinkle last week in the COURIER when advocating the construction of fair grounds at Opelousas.

Capt. Sam'l Haas and family of Chicot were visiting at the residence of his brother, Capt. A. M. Haas on the 29th.

Mrs. Dora Pokorny, for some time on a visit among relatives in Haasville, left over the T. & P. road on the 21st for her home in New Orleans.

Miss Rosa Finberg of Opelousas, is making a pleasant visit to friends and acquaintances in Haasville.

Maj. Frank Wharton of Chicot dropped in to see us last Saturday. The Major is a welcome visitor.

Mr. Wm. Feigle of Elm Bayou was in our village one day last week. Mr. F. reports much advance in his crops since the rains of 97.

The sorghum crop is extraordinary. It makes excellent forage to feed to cattle, horses, mules and hogs. Mr. L. Petrin, the Haasville gardener, has succeeded in growing some fine stalks of tobacco this year. To come down to solid facts, South-Western Louisiana will produce every thing man wants - don't you think so?

Yours, ILLINOIS.

The New York Herald of July 5th says: "We have some good talkers in and around New York. On the great occasions even it is not necessary to import eloquence from any part of the union. But Senator Eastis of Louisiana will allow us to say that he delivered an admirable speech in Tammany Hall yesterday. It was thought of political cious in the statement of many truths, with theologic oratory in many of its periods. Senator, we are glad to welcome you. Please remember that the late string is always on the outside when you come this way."

Washington Advocate: Messrs. Leon Wolff and Phil Jacobs bought last Wednesday, 157 bales of cotton. The cotton was shipped to New England, through William Hill & Co., of Alexandria.

Fifty-Second Annual Commencement of St. Charles College.

Again the session has rolled quietly by, and as usual a pleasant exhibition was given at the Jeanin College, Grand Coteau, at 10 o'clock a. m. The College Band opened the morning's entertainment, and then Mr. Murphy, A. B., welcomed all in behalf of the faculty and students. He trusted that they would return to their homes, satisfied with the performance.

The debate "Should Capital Punishment be Abolished" was a very exciting one. At times one would favor the affirmative, but when the negative would come forward with his unsophisticated arguments every body would seem to agree that capital punishment should not be abolished. The affirmative won the debate. The address "The Nervous Man" met with the approbation of the auditors.

The College Glee Club sang sweet songs. The orchestra's rendition of Norma was a treat to the hearers. Mr. Martin, A. B. was valedictorian, and he spoke feelingly of the cruel hand of fate for separating, perhaps for aye, true and kind fellow-students. He thought it was best to bear with resignation this sad parting.

The degree of Master of Arts was conferred on "Thos. S. Taitton, A. B., M. D., Hon. Benj. Taitton, B. L. L., Edgar Barry, A. B. M. D., Francis Barry, A. B. The degree of Bachelor of Arts was conferred on Francis Murphy and Laurent Martin.

The distribution of prizes followed. Hon. B. Taitton was asked to address the graduates. He spoke in glowing terms of the brave and noble sons of St. Ignatius, at whose hands he received paternal care, good counsel and complete instruction. Indeed St. Charles has reason to be proud of such a scholar, one who will always prove to be a true man and a true Christian.

Glories America will be proud of such men, who will cherish love for their God and love for their country. The band concluded the entertainment with Home Sweet Home, and the faces of many were illumined with smiles, which indicated that the exhibition was a treat which will long be remembered.

A. H.

BARBER'S LAC, July 23, 1889.

EDITORS COURIER - As I read your paper every week I must say without flattery that it is the best we have in our parish. Having never written to you before, I thought that I would write you something concerning our little town of Barber. It is situated on the banks of Bayou Boeuf, half a mile from the M. & T. Railroad depot of Barber. There are two stores in the town. They do a very good business for 200,000 a year and the other a business of \$4,000. It is a very good business place. We have three large sugar plantations that surround us that make up an area of three hundred headlands of sugar each.

With all of the bad weather that our farmers had to contend with, I think that they will make good crops yet, if the good weather we are now having will continue for a couple of weeks. Our farmers never fail in making crops here. We have thrifty, intelligent people in our section. Our neighborhood is unexcelled when it comes to sport and fun. A two hours' drive will take you to the Mountain Bayou Springs, the best we have in our parish. Near it there is bayou Corodine and its lake that affords all the fish you want to catch the whole year round. The Springs are owned and managed by Mr. Chas. Dossman, a very nice and clever gentleman. In sight of his Springs you have the woods and swamps to hunt deer and squirrels and birds; and the sportsman could not wish for a better place in our whole parish for fun. I will come to a close by asking you to please publish this in your next issue. Yours, &c., F. H. S.

Mr. V. C. Reynolds favored us with a visit last Monday.

Mr. M. M. Hayes has returned from the Sea-shore Camp Meeting at Biloxi.

Mr. H. E. Esturge has gone to Biloxi to recuperate.

Mr. L. T. Taney returned home last week after a few days' sojourn in New Orleans.

Misses Ella Eiler and Mauda DuRoy left on Monday morning for a visit to their relatives who will spend a few weeks with DuRoy.

Mrs. Chas. Hansen, who has been teaching penmanship in our town for the past three weeks, left yesterday morning for Texas. The Professor thinks he may again visit us in the fall.

Mr. J. B. Lebas, of Charenton, St. Mary parish, and his daughter, Miss Blanche, are on a visit to friends and relatives here.

Mr. G. Marks was returned from a pleasant visit to that popular summer resort, the Pointe-au-Loup Springs, which is so nicely kept by Mr. G. Miller.

Mr. J. B. Lebas, who has been in New Orleans for several months, returned home last Sunday.

Miss Bernadette Dupre has returned from a visit to the convent of the Sacred Heart.

Miss Lillie Harley of Chataignier is on a visit to friends here.

One Who Knows.

The following testimonial is from a gentleman who knows our formula and is thoroughly acquainted with the curative properties of our medicine. He writes: "I wish to try the article. Any practicing physician who desires the formula of Dr. Westman's Calisaya Tonic may obtain it from the medicinal Calisaya Tonic Company, Greenview, S. C. This letter is from a malarial section."

WEST POINT, Miss.

Having shown me the formula for making your Tonic while visiting your city the past summer I take great pleasure in recommending it. I am delighted with it, having tried it in my practice successfully, and to members of my own family suffering from malarial toxemia. Very truly, B. S. DEXTER, M. D. For sale by F. E. Bailey, Opelousas, and Blake & Durko, Washington, La.

Read the card of S. M. Peters, bricklayer, and when seeing any work in his line give him a call.

Alexandria Town Talk: Messrs. Wm. Hill & Co., of this city, purchased 200 bales of cotton at Washington, La., on last Tuesday.

Senator Randall L. Gibson has gone to Europe for the benefit of his health.

General Notes.

Franklin has just organized a building and loan association.

Tom Bowling, colored, was to have been hanged at Baton Rouge yesterday.

Maj. E. A. Burke, with his wife and son, are spending the summer in Europe.

Gov. Nicholls has issued his proclamation fixing the election in the Third congressional district for September 1st.

Alexandria Democrat: The State Baptist Convention will meet at Lake Charles, Calcasieu parish, the 2d of August.

W. W. Edwards, of Vermilion, has been appointed judge of the 25th judicial district, vice Judge Debaillon, resigned.

Miss Lillie Robertson, sister of Congressman Robertson, was married at Baton Rouge, on July 10th, to Col. J. M. Sherrone.

Pointe Coupee Banner: The valuation of property in the parish of St. James shows an increase of one hundred thousand dollars over last year.

N. O. Picanay, 23d: There were last week ten fatal cases of insolation in the city, and in the average of years that will generally occur during an entire summer.

Abbeville Mercuriel: In East Baton Rouge the police jury sitting as a board of reviewers raised a great many assessments, particularly in the city of Baton Rouge.

DeSoto Democrat: We are informed by Col. D. M. Heriot, our assessor, that the assessment roll for this parish, for this year, will exceed that of last year \$100,000 or more.

Bienville Advance: The assessment on real estate in Claiborne parish for 1889 is \$250,000 in excess of last year. Bienville's increase is a trifle less than that, we believe.

Thibodaux Sentinel: The police jury has fixed the parish tax at 2 mills - a reduction of one-half mill on last year. The rolls show an increase of some \$28,000 over last year's assessment.

Madison Caligraph: The police jury of Iberville parish has raised the assessment this year of 102 property holders. That is the only way to get an honest assessment in many of the parishes of Louisiana.

The State of Arkansas is to have a "Confederate Soldiers' Home," to be located at Little Rock. The sum of \$15,000 has been raised already, and the work of soliciting subscriptions has hardly commenced.

Morgan City Review: Capt. Pharr's new sugar house for diffusion on Glenwild plantation is now completed, 112 feet by 25. It is three stories high, of brick, stucco roof, and is quite a handsome structure.

Monroe Bulletin: The Times Democrat estimates that the assessments in Louisiana this year will show an increase of \$20,000,000. This will go a long way toward closing up the deficit and reducing taxation.

The Farmers' State Union will meet the first days of next month in Alexandria. Some action will be taken at this meeting looking to the building of a cotton factory in Louisiana. Monroe and Alexandria are bidding high for it.

Washington Advocate: We entirely endorse the work now being done by the Police Jury and take occasion to express our belief that the future verdict of our people will be, "well done," and to those who have assisted in carrying it through.

Ruston Caligraph: It does not take a very keen observer to see that Senator James B. Eastis of Louisiana is rapidly coming to the front as one of the leading orators and thinkers of the United States. The Senator is a native born and the long Louisiana and Louisiana is proud of him.

Mount Hope Nursery.

Mr. T. J. Lacy brought us some of his Leconte pears last week, raised at his nursery near Washington. They were not quite ripe, but they will be ready to eat in a few days. We have complimented Mr. Lacy so often on his fruits that we will now let another paper, the Lake Charles Commercial, say for us. He writes: "I wish to say that his fruits are not confined to St. Landry."

Mr. Lacy has made his Mount Hope Nursery widely famous, and those who have dealt with him, in the purchase of fruits and fruit trees, will bear evidence that he richly deserves his fame and success. He cultivates and supplies fruits and the young trees, in every variety, suitable to the climate, and will send his descriptive circular to all who apply. His fruit baskets hold a water-bucket full, and the price is one dollar per basket. When seven baskets are ordered, Mr. Lacy gives a free one. For a single basket he sends a free one. His Leconte pears are now ripe, and his Kieffer variety ripens October 1st. He will have 50,000 grapes ripe by the 15th prox. He says: "It may sometimes be necessary to keep pears a few days to ripen in the house, as they ripen better, and especially in a dark place. His peach, plum, apple, quince, and Japanese persimmon trees, and his Kieffer variety ripens October 1st. He will have 50,000 grapes ripe by the 15th prox. He says: "It may sometimes be necessary to keep pears a few days to ripen in the house, as they ripen better, and especially in a dark place. His peach, plum, apple, quince, and Japanese persimmon trees, and his Kieffer variety ripens October 1st. He will have 50,000 grapes ripe by the 15th prox. He says: "It may sometimes be necessary to keep pears a few days to ripen in the house, as they ripen better, and especially in a dark place. His peach, plum, apple, quince, and Japanese persimmon trees, and his Kieffer variety ripens October 1st. He will have 50,000 grapes ripe by the 15th prox.
