

FARM AND GARDEN NOTES.

ITEMS OF INTEREST ON AGRICULTURAL TOPICS.

Harrowing in Fall Crops—Fences for Angoria Goats—Butter from Pasteurized Cream—Satisfactory Salting of Beef—Harvesting the Crop, Etc., Etc.

Harrowing for Fall Crops. Fertilizer can be applied on fall crops with advantage, especially phosphate and potash, but unless it is well incorporated with the soil some of the seed may be injured.

Fences for Angoria Goats. Angora goats are not brenchy, but they will climb. If a fence leans from them they will crawl over it, or they will creep if the fence is too open.

Butter from Pasteurized Cream. The results which have been attained in the United States from making butter from pasteurized cream have not generally been satisfactory.

Satisfactory Salting of Beef. Beef salted in the following manner will seldom fail to keep well. Cut the meat up as soon as cold and put in a cool place where it will not freeze.

Harvesting the Crop. The proper harvesting and preservation of the hay crop has a great influence on dairying, especially winter dairying.

Woman a Beast of Burden. It is not uncommon sight to see Italian women walking along the streets balancing burdens on their heads that the average man would prefer to have sent home on a truck.

Green Tomatoes Fried—Cut crosswise in rather thick slices, drain on soft cloth, dust with salt and pepper, roll in fine bread crumbs and fry at once in hot butter.

Creamed Eggs—Eight eggs, one tablespoonful of butter, half a cup of sweet cream. Melt the butter, place the eggs in it, without breaking; pour over them the cream, simmer gently until done, basting frequently with the cream.

Morello Cake—Soak half of a pound of white bread in milk; press out the surplus milk. Add four well-beaten eggs, two ounces of chopped blanched almonds, four ounces each of butter and sugar, a coffee-spoon of cinnamon and a cup and a half of stoned cherries (other fruit can be substituted).

Household Recipes. Green Tomatoes Fried—Cut crosswise in rather thick slices, drain on soft cloth, dust with salt and pepper, roll in fine bread crumbs and fry at once in hot butter.

Creamed Eggs—Eight eggs, one tablespoonful of butter, half a cup of sweet cream. Melt the butter, place the eggs in it, without breaking; pour over them the cream, simmer gently until done, basting frequently with the cream.

Good and Poor Cows Compared.

The importance of keeping none but the very best cows cannot be too strongly urged upon dairymen and farmers. A study of the amounts paid the patrons of any cheese factory will soon convince one that there is a very great difference between the amount paid for the best cow's milk and that paid for the milk of the poorest cow.

The record of the dairy herd of fifteen cows at the Utah station shows that the food cost of 100 pounds of milk varied with the different cows from 23.48 to 52.07 cents. The cost of food per pound of butter had a wide range. It was from 5.91 to 11.8 cents per pound.

At the New Jersey station the cost of keeping a cow for the year was \$23.34, being the average for a herd of twenty-one cows. Valuing the milk at once cent a pound, the best cow cleared a profit of \$40.69, and the poorest one only \$1.79.

Such facts should convince every farmer that it is to his interest to test his cows and find out definitely which cows in his herd are the profitable ones to keep.

Short and Useful Pointers. Don't overcrowd the poultry house. Coal oil will cure scaly-legged poultry.

With some farmers field beans are a paying crop. Too much feeding will cause the hens to have bowel trouble.

When you secure a good customer for your products hang on to him. Sheep are naturally quiet animals. They dislike changes and excitement.

Aerating the milk tends to drive out the bad odors that have been absorbed. It is said that a few potatoes are excellent to keep a horse in good condition.

An advantage that sheep have is that they are comparatively free from disease. The average farmer hardly realizes that wide tires benefit him in mow ways than one.

Rather than allow the land to lie idle, sow a green crop to be ploughed under as manure. Farmers should study the fertilizing question. Plants are like animals: they need a balanced ration.

Feed raspberries can be set with profit in the Fall, but Spring setting is preferable for the black caps. Feed the horses plenty of grain while at work, and when they are idle decrease the amount of grain and increase the hay.

Plant and cultivate what your home market requires. Don't ship produce any further than it is absolutely necessary to do.

One of the good points of a separator is that it leaves the skim-milk sweet and fresh. When in this shape it can be used to a better advantage. The farmer with the richest soil is not the one who comes out best at the end of the season. It is generally the man who has paid the most attention to business.

We all love to see the old hen strutting around with her brood of chicks, but when she struts as far as the garden, brickbats appear to take the place of sentiment.

When we take into consideration the nature of the cow's product it becomes evident that we might as well deprive her of her rations as to furnish an insufficient amount of pure drinking water.

It is not uncommon sight to see Italian women walking along the streets balancing burdens on their heads that the average man would prefer to have sent home on a truck. A few days ago one of these women passed through City Hall Park.

On her head she was carrying what appeared to be the entire woodwork from the interior of some house. The bundle was made up of eight pieces of hard wood, the shortest being fully twelve feet in length.

Each piece was six inches in width and an inch thick. The woman steadied this burden with one hand, while in the other she carried what one would consider a good load for one person in the shape of a bundle of shorter pieces of wood.

As she turned into Centre street near Chambers the end of the load of lumber on her head came in contact with the head of a man who was going in the opposite direction. In order to prevent hitting him too hard the woman tried to turn to one side, and as she did so her burden fell to the walk. In vain she tried to replace it on her head. At last two men took hold of it, one at each end. They found that even their combined strength was just sufficient to lift up and place it on the woman's head again.

HOUSEHOLD HINTS:

Toasted Bread For Invalids: Toasting bread until it becomes brown largely converts the starch into dextrine, and hence, so far as the brown portion is concerned, one of the processes of digestion is gone through before the bread is taken into the stomach.

The Care of House Plants. In caring for house plants it is a good idea to treat them much as they would be treated out of doors. It doesn't rain every day, therefore it cannot be necessary that they should be deluged every twenty-four hours.

Pictures in the Nursery. As it is well known discrimination in applying knowledge is as important as the knowledge itself. In a nursery seen recently, the walls were covered with one of the papers specially designed for nurseries, showing in constant repetition many of the characters famed in children's stories.

Cleaning the Oil Lamp. Every good housekeeper who enjoys the light from a good oil lamp should keep always on hand a little brush to clean the holes in the burners, the lungs of the lamp. The lamp should be taken apart every day. That is, it should be opened to allow the gas to escape, and then carefully filled.

How to Clean Brass. Fine Calias sand mixed with a little oil of tartar in a strong solution of soda; the articles to be well scoured with this mixture, then dried and polished with a leather dipped in whiting.

Who are permitted to wear men's attire in France, but for this privilege they are required to pay a tax of fifty francs a year.

Depreciation of Money. In 1872 a silver dollar was worth one dollar and six-tenths in gold. In 1878, eighty-nine cents; in 1883, eighty-five cents; in 1888, seventy-two cents; in 1898, sixty cents, and in 1900, forty-five cents. Money may depreciate but there is one standard stomach remedy, which has not changed in half a century, and that is Hostetter's Stomach Bitters. It always has been the one unsurpassed remedy for indigestion, dyspepsia, liver or kidney troubles.

One-fourth of what a man eats enables him to live—and the other three-fourths enables his physician to live.

The Manufacturers of Carter's Ink have had forty years' experience in making it; and they certainly know how. Send for "Inkings," free.

A woman who boards is as busy as one who keeps house, but she will never admit that it costs her largely of frittering.

Piso's Cure is the best medicine we ever used for all affections of throat and lungs.—Wm. G. ENDSLEY, Vanburen, Ind., Feb. 10, 1900.

What did you say to the lawyer about breaking your father's will in your lifetime? "I told him I hoped he would allow me a reasonable per cent on what he got out of it."

Dyeing is as simple as washing when you use PUTNAM FADELESS DYES, Sold by all druggists.

Mrs. Hilman: "The Dobsons at last have a girl they hope to keep." Mrs. Grady: "Ah! Where is such a girl to be found?" "She was born to them yesterday."—Philadelphia North American.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. The effect is rapid. It cures in one week. It falls to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O., Sold by Druggists.

Hall's Family Pills are the best. Deliberate twice before doing or saying anything, for you have not the power of recalling what has been said or done.

If a woman's crown of glory is her hair, Jessie Fraser, of Fine, N. Y., must be a queenly woman. She wrote us, last January, that her hair was nearly 64 inches long and very thick.

And she gave Ayer's Hair Vigor all the credit for it. Ayer's Hair Vigor may do this for you.

We don't claim the 64 inches every time, though.

J. C. AYER COMPANY, Lowell, Mass. Ayer's Sarsaparilla, Ayer's Hair Vigor, Ayer's Cherry Pectoral, Ayer's Comatone.

Every life touches many other lives. Let us move on, for through the world let our touch be a harsh and hurtful touch.

The Best Prescription for Chills and Fever is a bottle of GROVE'S TASTELSS CHILL TONIC. It is simply iron and quinine in a tasteless form. No cure—no pay. Price 50c.

There is a period in every girl's life when she thinks that the most valiant thing in the world is a boy's healthy appetite.

If you want "good digestion to wait upon you" you should always have a bar of Adams' Tutti Frutti.

When a family adopts a girl of sixteen, it means that they will have a kitchen girl in utero without wages.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Kidney Remedy. 43 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 31 Arch St., Phila., Pa.

If people were to get paid for all the foolish things they say and do poverty would soon be a thing of the past!

Mrs. A. G. Russell, Nashville, Tenn., writes: Dr. Moffett's TEETHINA (Teething Powders) is the greatest blessing to teething children that the world has ever known.

A traitor is a man who discovers things about himself and then says them about someone else.—Life.

Mrs. Winslow's Soothing Syrup for children's teething, softens the gums, reduces inflammation, allays pain, cures wind colic, and is a bottle of the Bible tells of one thoroughly congenial couple, anyway. "Who were they?" "Ananias and Sapphira."

To Cure a Cold in One Day. All Take Laxative BROWN QUININE CAPSULES. All capsules refund the money if it fails to cure. W. W. GAY'S signature is on each box. 5c.

A great bar to education is the habit that ignorant people have of getting angry when they cannot understand.—Town Topics.

To college and business women alike, to all who must be wage-earners, the practical virtues appeal. Set a high value on yourself, dear totter, and live up to your own estimate. Have before you an ideal or true womanhood, and pray daily that you may not fall below it. If the precise work you wish for does not offer itself, take something else, even if you do so only temporarily.—Margaret E. Sangster, in the June Ladies' Home Journal.

SUFFERING AND RELIEF

Three Letters from Mrs. Johnson, Showing that Lydia E. Pinkham's Vegetable Compound Cures the Ills of Women

Wrote for Mrs. Pinkham's Advice November, 1897

"DEAR MRS. PINKHAM—I am a great sufferer, have much trouble through the lower part of my bowels, and I am writing to you for advice. Menstrues are irregular and scanty, am troubled with leucorrhoea, and I ache so through my back and down through my loins. I have spells of bloating very badly, sometimes will be very large and other times very much reduced."—Mrs. CHAS. E. JOHNSON, Box 33, Rumford Center, Maine, Nov. 20, 1897.

Improvement Reported December, 1897

"DEAR MRS. PINKHAM—I wish to tell you that I am improving in health. I am ever so much better than when I wrote before. The trouble through the lower part of bowels is better and I am not bloated so badly. I was very much swollen through the abdomen before I took Lydia E. Pinkham's Vegetable Compound. I still have a feeling of fullness across my chest. I have used three bottles of it and am on the fourth."—Mrs. CHAS. E. JOHNSON, Box 33, Rumford Center, Maine, Dec. 13, 1897.

Enjoying Good Health June, 1899

"DEAR MRS. PINKHAM—Since a year ago I have been taking your medicine, and am now strong and enjoying good health. I have not been so well for three years, and feel very thankful to you for what Lydia E. Pinkham's Vegetable Compound has done for me. I would advise all who suffer with female troubles to try your medicine."—Mrs. CHAS. E. JOHNSON, Box 33, Rumford Center, Maine, June 1, 1899.

PISO'S CURE FOR CURS WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists.

With regard to the Boers and education, I may say at once that the Dutch in South Africa are not cultured in the sense that is understood in Europe. They do not know much about Ruskin or Carlyle or Emerson, or any of the great English-speaking masters of prose and thought.

There is a student at the Carlisle Indian school whose father was a leader in the battle of the Little Big Horn, where Gen. Custer and his entire command were killed. Some authorities tell us that 277 men fell in that awful massacre and none lived to tell the tale. The opposing Indian force is set down at about 1,200. This student says his father informed him that there were no less than 5,000 Indians in the battle. Nine thousand "tame" Indians were settled on surrounding reservations, and many of these slipped away in the night time to join Sitting Bull for a raid, returning under cover of darkness to their homes. Nearly 4,000 were with him when Custer made his fatal error.

Spectre of the Brocken

The summit of the Brocken, or Blockberg, the highest of the Hartz mountains in Prussian Saxony, presents a singular optical phenomenon eight or nine times during the year. It is usually seen at sunrise or sunset and consists of a gigantic projection of the observer, or observers, upon misty clouds, which rise out of the valley on the side of the mountain opposite to the sun. Sir Walter Scott wrote of it: "Among the various legends current in that wild country there is a favorite one, which supposes the Hartz to be haunted with a kind of tutelary demon, in the shape of a wild man of huge stature, his head wreathed with oak leaves, and his middle cinched with the same, wearing in his hand a pine torn up by the roots. It is certain that many profess to have seen such a form, traversing with huge strides, in a line parallel to their own course, the opposite ridge of a mountain when divided from it by a narrow gully; and, indeed the fact of the apparition is so generally admitted that modern skepticism has only found refuge by ascribing it to optical deception."

Denominations of Stamps. Of the 250 stamps which have been issued the values have ranged from one cent to \$5,000. Five dollars is the highest value among postage stamps, but newspaper stamps reach the \$100 mark, while a revenue stamp may represent \$5,000.
