

Nervous Prostration.

A Noted Boston Woman Describes its Symptoms and Terrors.—Two Severe Cases Cured by Lydia E. Pinkham's Vegetable Compound.

ADELE WILLIAMSON.

"I am so nervous! no one ever suffered as I do! There isn't a well inch in my body. I honestly believe my lungs are diseased, my chest pains me so, but I have no cough. I am so weak at my stomach, and have indigestion terribly, and palpitation of the heart; am losing flesh; and this headache and backache nearly kills me, and yesterday I had hysterics. There is a weight in the lower part of my bowels, bearing down all the time, with pains in my groins and thighs—I can't sleep, walk, or sit, and blue—oh goodness! I am simply the most miserable of women."

This is a most vivid description of a woman suffering with nervous prostration, caused by inflammation or some other diseased condition of the womb.

No woman should allow herself to reach such a perfection of misery when there is no need of it. Read about Miss Williamson's case and how she was cured.

Two Bad Cases of Nervous Prostration Cured.

"DEAR MRS. PINKHAM:—I was suffering such tortures from nervous prostration that life was a burden. I could not sleep at all, and was too weak to walk across the floor. My heart was affected so that often I could not lie down at all without almost suffocating. I took Lydia E. Pinkham's Vegetable Compound and it worked like magic. I feel that your medicine has been of inestimable benefit to me."

"I had nervous prostration terribly, caused by female weakness. I suffered everything; was unable to eat, sleep, or work. After a while I was induced to try Lydia E. Pinkham's Vegetable Compound, and I really began to improve on taking the first bottle. I continued to take the medicine, and am now better in every way, and feel like a different person. I am simply a well woman."

Miss ADELE WILLIAMSON, 195 N. Boulevard, Atlanta, Ga.

Mrs. DELLA KEISER, Marienville, Pa.

\$5000 REWARD.—We have deposited with the National City Bank of Lynn, Mass., which will be paid to any person who can find the above testimonial letters are not genuine, or were published before obtaining the writer's special permission.

CALLS IN A HURRY.

What Telephone Mean to the Remotely Situated Farmer. The farmers of Oneida county have a telephone service almost as complete and convenient as that of any small city, says a Utica dispatch to the New York Press. For rural telephone companies this county is one of the foremost. The outside world is connected with the local lines, and for its long distance system the farmers' line has had the praise of electricity experts.

FRAGRANT

Sozodont Tooth Powder

In a new Patent Box, handy to use. SOZODONT LIQUID, 25c. LARGE LIQUID & POWDER, 75c. 25c. At all the Stores, or by Mail. Address, HALL & RUGEL, NEW YORK

DYSPEPSIA

Need not be endured a day longer if you use

A natural medicinal water—concentrated, sweet, laxative, tonic. A specific for all liver, kidney, stomach and bowel disorders. Cures: Biliousness, Jaundice, Dropsy, Constipation, Headache, Migraine, Stomachic, Heartburn, Indigestion, Nervousness, Irritability, and all ailments of the digestive tract. Crab Orchard Water is the most effective of the natural mineral waters most common to take; most economical to buy. The medicine is sold by all druggists with Crab Orchard Water Co. logo on every bottle. CRAB ORCHARD WATER CO., Louisville, Ky.

MORPHINE, OPIUM, COCAINE CURE GUARANTEED.

New treatment, quick results, moderate cost. Advice free. Add. COLUMBIA MEDICINE CO., P. O. Box 781, Atlanta, Ga.

THE SUREST CURE FOR

Consumption. Use Dr. Williams' Pink Pills for Pale People.

SCIENCE AND INDUSTRY.

A parasite has been brought from Africa to prey upon the minute insect which causes the olive scale, and a fungous disease contagious among grasshoppers and fatal to them has been imported from Natal and taken to Colorado and Mississippi, where it has already destroyed swarms of locusts.

The observatory of Mendon, France, reports the discovery of a singular cloud obscuring for some time a certain crater on the moon. The matter has aroused worldwide interest among astronomers. The only explanation of the cloud seems to be that the volcano is in a state of mild activity, and that there is some sort of atmosphere round the moon. If the phenomenon is verified it will upset important theories as to conditions upon our satellite.

The first electricity station in the Congo district is to be started at a Roman Catholic mission on the river Luba. The head of the mission is now taking out with him from Belgium a dynamo, turbine, lamps, cables, wires, etc. He proposes to obtain the necessary power from the waterfall, some 23 feet high. The dynamo will light 150 lamps and it is proposed to light up the mission and the adjacent village with 100 incandescent lamps and three arc lamps.

The French government has decided to establish their own service of submarine cable communications. This decision has been arrived at as a result of the Transvaal and Chinese campaigns, when the majority of the messages from France had to be dispatched over lines under British control. Even the communications that pass between the home government and the various ministers abroad have to pass through English hands. It is proposed to establish four cable lines interconnecting the colonies and the home country.

The latest invention in connection with wireless telegraphy is an apparatus designed to warn ships of their approach in times of fog or in places where a simpler system of signaling is not practicable. The invention consists essentially of a toothed revolving wheel, which operates a Morse key in such a manner as to spell the name of the station. The wheel may be rotated either by clockwork or by a small electric motor, and may be adjusted to send the signals automatically every minute or two. In this way all ships coming within range of the instrument may be notified of the fact by the ringing of a bell and the reception of a message giving the name of the place, provided they are fitted with apparatus for detecting the electric waves.

An ingenious idea has been taken up in the German army and small globes of silk, called balloon targets, are to be substituted for the wooden dummies hitherto used to represent men in shelter trenches and behind cover. The wooden dummies remain standing after being struck and may be hit several times while firing lasts, so that the subsequent count gives no accurate idea of the effect of the firing. With the balloon targets the result is seen at once, the silk globe collapsing immediately on being struck. In the exercises in which these are used they are placed at irregular intervals, in groups, in line, and to represent individuals, and when a moving target is used its upper edge is not of uniform height. The targets are not exposed until the troops are called on to open fire. Instructions are given as to advancing by rushes, firing at every halt, and also for the final charge with the bayonet. The freres will see the immediate effect of their shots and will learn to observe the gaps made in the enemy's line, and to concentrate their fire on the groups which remain.

New German Building Material. Under the name of Geramo, a new building material, composed principally of glass, and manufactured at Penzig, in Silesia, has been placed on the German market. As far as known this material is made from powdered glass waste, which is hardened by a special devitrifying process and combined by means of strong pressure. In this way the transparency, brittleness and fragility of the glass are destroyed, but other prominent properties—extraordinary hardness, stability against exposure to the weather, non-conduction of heat, non-inflammability, insensibility to oil, grease, acids, etc.—are retained in this new material. The price of keramo is about \$1.50 per square yard, and so far the trials which have been made with this product have been most successful.

The Temperature at Cape Nome. Such records of the temperature as were kept at Cape Nome last winter show rather more than the ordinary disagreement among thermometers. According to one of the most reliable records the coldest day in the district last year was Nov. 29, when the temperature fell to 56 degrees below zero. The majority of those who attempted to keep a record are of the opinion that the most extreme temperature was between 50 and 60 degrees, though one observer states that he experienced weather as severe as 69 degrees. The climate is very moist, and the effect of the low temperature is proportionately felt. In the summer months clothing and other articles become quickly moulded unless frequently dried.

A Modern Motor Car. Recently a motor carriage has been introduced in France which combines many novel features. It is normally propelled solely by an oil engine, but on hilly ground is helped by an electric motor. The oil engines works at constant speed, and when the vehicle does not absorb all the engine power the excess drives the motor as a dynamo and charges the accumulators. Then the accumulators are used only occasionally, and they are kept fully charged. The engine is directly connected to the dynamo motor, which in turn used to start the engine. The changes in speed are effected mechanically.

CASH IN A BAG.

Peccoliar Way Kaffirs Have of Banking Their Money.

The natives of that part of South Africa which to a great extent is inhabited by bushmen and Hottentots have a peculiar system of banks and banking. These Kaffirs among whom this curious system of banking obtains live near Kaffraria, in the south of the Colony country. The natives come down south from their country to trade in the several villages and towns in large numbers and then return to Kaffraria. From those who trade of their own number they select one, who for the occasion is to be their banker. He is converted into a bank of deposit by putting all the money of those whose banker he is into a bag, and then they ally forth to the stores to buy whatever they want. When an article is purchased by any of those who are in this banking arrangement, the price of the article is taken by the banker from this deposit money bag, counted several times and then paid to the seller of the article, after which all the bank depositors cry out to the banker in the presence of the two witnesses selected: "You owe me so much!" This is then repeated by the witnesses. The general accounting comes between the banker and his several depositors when all desired purchases have been made, after which all the natives depart for their northern wilds.

STATE CAPITOLS.
Buildings Upon Which the Tendency Is to Expend Millions.
The cornerstone of a \$1,000,000 state capitol for Arkansas was laid recently at Little Rock. A few days ago a contract was given out at Jackson, Miss., for building there a new state capitol at a total cost of nearly \$1,000,000. The present capitol and grounds at Jackson are of the estimated value of \$400,000, and the Little Rock capitol and ground of the value of only \$250,000. Many of the older settled states have capitols which were built many years ago and were designed to meet conditions which nearly every state has since outgrown. The capitol of Alabama, at Montgomery, represents an investment of only \$50,000, that of Louisiana, at Baton Rouge, \$250,000, the grounds being included in this estimate; that of Kentucky, at Frankfort, the scene of the Goebel shooting, \$500,000, grounds included, and that of Maryland, at Annapolis, \$300,000. There has been a general tendency to replace the old buildings by new and more costly structures, as is being done in Arkansas and Mississippi. Thus in Sacramento, the capital of California, the new building and grounds represent a total expenditure of \$3,000,000. Austin, Tex., has a \$5,500,000 capitol. Pennsylvania has at Harrisburg a \$2,500,000 capitol. The little state of Rhode Island has at Providence a \$3,000,000 capitol, and the Iowa state capitol, at Des Moines, represents a total investment of \$3,500,000. The Illinois capitol, at Springfield, represents a total investment of \$4,500,000, and the Nebraska capitol, at Lincoln, represents a cost of \$750,000. The Wisconsin capitol, in the small town of Madison, represents an investment of \$1,000,000, and Michigan has at Lansing a \$1,500,000 capitol.

DEFENSES CANNOT BE CURED by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

A Doctor whose knowledge has resulted in the greatest liniment ever given to the public—its name—**SLOAN'S LINIMENT** (For Man or Beast) Cures Rheumatism, Contracted Muscles, Neuralgia, etc., because it penetrates—no severe rubbing necessary. It warms and soothes, so alleviates aches and pains quicker than cold, clammy feeling applications.
