Dr. Leach's tablets for the prevention of yellow fever for sale by Sandoz the Druggist.

A choice assortment of fine table wines—domestic and imported at Allen T. Sandoz & Bro's.

A first-class stenographer and writer desires a position immediately. Can furnish best references. Apply at this office.

The opening of the next session of the Louisiana State University was postponed from Sept. 20th to Oct. 18th.

We can suit you in a summer suit in quality, style, finish and price. Call and look over our stock.—F. L. Sandoz.

The official proceedings of the Board of Aldermen of the town of Opelousas are of special importance this week; they will be found on our 4th page.

Weather Prophet DeVoe, whose forecasts this year have been correct six times out of eight, predicts an early fall. He says frost will fall about the middle of next month.

The Anse-la-Butte field, in St. Martin parish, La., is now proven, Lake Oil Company's Well No. 2 producing a steady stream of pure petroleum. Work will be started at once on another well.

Don't send away your printing and then preach the doctrine of patronage to home industries, especially when you can get that work at home much better than elsewhere at no advance in cost.

**FOR SALE**—One thoroughbred Ben B. colt, four years old, about 15 hands high, light sorrel color. Suitable for a good buggy horse. For particulars apply to **BAYARD J. SANDOZ, Opelousas, La.**

Moralizing on the cause and effect of yellow fever in New Orleans, the Memphis News-Scimitar declares that "crime and dirt and graft have been partners in the government and life of New Orleans."

It begins to look as if a close understanding now exists between France and England in regard to all European and Eastern matters that affect them. If this is the case we may look for stirring events to occur within the next twelve months.

If the theory as to mosquitoes carrying yellow fever germs is correct, then it is easy to accept the statement made by leading physicians that they also carry malarial germs. Suppress the mosquito, and no doubt there will be less fever this summer and fall.

We had a pleasant call from Dr. Z. T. Young, of Ville Plate, last Thursday. The Doctor reports that many planters in his section will not make half a crop in either cotton, corn or potatoes; that the caterpillar is ravaging some of the fields, which will still more reduce the crop.

Chicken thieves got a warm reception at the residence of P. T. Blacksher last Tuesday morning, when the whole neighborhood was aroused by the report of a shotgun at 4 o'clock a. m. P. T. says he thinks he peppered one of the thieves, as he was heard to scream after the shot was fired at him.

The last report of the Opelousas National Bank, published in another column, shows a very satisfactory condition, notwithstanding the dull season and business depression incident to yellow fever and quarantine restriction to commerce. This bank is not only holding its own, but shows an improvement in some respects over the last report.

It is the little mosquito with striped legs and body that furnishing is expected to reach. It is not the big, black or brown fellow that makes night hideous. Fumigating is done during daylight, to get rid of the daytime mosquito, which does the ugly work. You cannot mistake her, for she is a small grey mosquito with hovering wings around the feet of the fellow who wears long trousers.

## The Yellow Fever Situation.

There is little change to be noted in the yellow fever situation in New Orleans. The health authorities appear to have the matter well in hand, and the disease is not making great headway; in fact, there appears to be a small decrease in the number of new cases and in the death rate. The report for the 24 hours ending Thursday, at 6 p. m., shows 41 new cases, 6 deaths and 6 new foci.

The conditions in the State are not so favorable, in fact in some localities the disease has developed alarming proportions. Here are the latest reports:

La Rose, discovered 2 new cases, Lake View 1 case, Lake Providence 2 cases, Elizabeth 4 deaths, 1 new case, Patterson 5 new cases, Bayou Barataria, 1 new case, Donaldsonville, 4 new cases, Kenner 9, Hanson City 2, St. Gabriel 1, Alexandria 1, Bunkie (suspicious) 1, Smoke Bend 2, St. Rose 2, Pecan Grove 4, Schaffer Plantation, nest of 30, Ellendale 1, Bell Grove 2, Moise Settlement, in Terrebonne parish, nest of 22 cases, 1 death, between Houma and Schriever, nest of 60 cases. Heavy spread on both sides of Bayou Bouff, in St. Mary and Assumption parishes; Leeville to date, 170 cases under treatment, 28 deaths, 103 recovered, 102 houses infested.

Mississippi—Gulfport 1 death, 3 new cases, Pearlport 2 new cases.

The New Orleans papers are inclined to censure the people of those towns and localities where rigid quarantines have been established and are maintained. They declare that it is impossible to argue against panic and fear, which is a fact, nevertheless it must be admitted that communities cannot be blamed because they take extraordinary precautions to prevent the introduction of the dreaded fever in their midst. The city papers look upon the situation with commercial glasses, and anything that affects the trade of their city looms up as a big thing to be dreaded and fought. Now there are people who value life more than they do money—people who prefer to close all the avenues of trade for a period of two months rather than see their towns decimated by the yellow fever or any other scourge.

It is easy to recoup money losses, but the dead do not come to life again. A yellow-fever-stricken town is a town that, besides losing a goodly portion of her population, is set back for years. Understanding all of this, such places are taking no risks, and we don't blame them a bit for doing so. Keep your confounded trade out of the present dangers—we are in for a fight to preserve life.—Avoyelles Blade.

Now and then is heard the faint echo of "Africanization of the State," and "white supremacy must dominate." Fortunately the wails of the party baronets, the long feeders at the public crib, can no longer terrorize the people. White Supremacy is fully entrenched, and there is no danger whatever from Africanization. What the people want is a law which will secure to them honest and fair elections, where the majority will prevail. There is greater danger from the election thief than the nigger.—The Caucasian.

A newspaper should be judged by its averages upon the whole and not upon one act of omission and commission. No editor publishes a paper above criticism. If he does not offend he is flabby, truculent, numby pambly. Every newspaper makes mistakes, but in the long run, week after week, year after year, the paper stands for right living, for honest thinking, if it speaks fair for those who are doing right and condemn sneaks, cheats and violators of law—then it deserves to be patronized by this very standard.

We have a large stock of cuts of all kinds for the display of advertisements or job work. We have the type to please anybody and the material to do the work. If you want the best job work, or want to advertise to the greatest number of readers, the COURIER office is the place.

Send or phone your order for groceries, wines and liquors to A. T. Sandoz & Bro. Their goods are reliable and their prices will suit you.

Sandoz the Druggist has for sale Dr. Leach's tablets for the prevention of yellow fever.

Old newspapers for sale at this office.

## Sewerage and Drainage.

MR. EDITOR: What is the matter with your town papers and your town leaders? The greatest issue ever brought up in your town for the health and general welfare of your people seems to be drifting, when your leaders and your papers should be explaining it to the poor people.

Upon inquiry I find the following gentlemen in favor of it: E. M. Boagni, J. P. Boagni, Dr. C. F. Boagni, E. B. Dubuisson, Ike Roos, R. Lee Garland, H. E. Estorge, Thos. H. Lewis, E. T. Lewis, M. L. Swords, Yves Audrepond, W. J. Sandoz, L. Austin Fontenot, Littell & Lawler, G. L. Dupre, Dr. John A. Haas, John W. Lewis, Dr. A. J. Bercier, Remi Mornhinveg, F. Charleville, Dr. B. A. Littell, L. A. Sandoz, your honorable self, and a host of others, all big property owners, except a few who possess influence instead. On the opposing side the greatest opposition I find is Hon. Homer Ventre. He occupies a conspicuous position in the gift of the people, and no doubt if he is asked by the people not to bring his influence to bear against their wishes, as an ever ready to please gentleman he will consent. Your town could not do a greater good to its people than to remove the 3,000 privies that impregnate the atmosphere with impure air, remove the upper ground cisterns or tubes that hold the impure, stagnant water that absorbs a great amount of the noxious gases that arise from privies and hog pens, and drink pure water from the rock beds and lay the dust that is costing your people not less than \$10,000 per annum. Sewerage and drainage is the issue first. Don't be afraid, poor brothers; I am as poor as any of you, but I see where my doctor's bills will be reduced, and where our town will improve, which means prosperity, more work and higher wages. The little cost of putting in sewerage is paid but once, and don't cost over \$25 for an ordinary fitting. My tax for it will only be \$1.25 per year, and if the town tax is reduced 2½ mills, I don't pay any more tax than I do now. Hurriedly yours, P.USH.

**A Liberal Offer.**  
With every order for dodgers, posters, hangers, etc., printed at the COURIER JOB OFFICE, we will give, free of charge, a reading notice calling attention to same in the local columns of this paper, thus doubling their advertising value. We are the only office in town able to do this, and the only printing office in the parish supplied with stock and trade cuts for illustrating large poster work of every description. We have over a hundred cuts of all sizes to select from. When you need anything in the printing line, no matter how small or how large the order, give us a call.

The liberal advertiser is always liberal with his customers. By advertising he proves he didn't buy his goods simply to ornament the shelves. That he is anxious to sell them and push along his business. The diligent business man will always advertise, and the advertiser is ready to sell at close margins or he would not advertise.

Our readers will consult their best interests and confer a favor on the COURIER by patronizing the business men who advertise in our columns. They are anxious for your trade and will make it to your advantage to do your business with them. Watch our columns all the time.

Give us your printing. It is not a question of one dollar's worth of reputation and 10 cents worth of value, but just the opposite. We claim nothing for forty years' experience but just what we give and no more.

You don't have to wait for your job printing when you have it done at the COURIER office. All work delivered on time—every time.

Printers—A Washington handpress, will print a 7-column paper, in first-class condition, will be sold very cheap if applied for soon. Address Courier office, Opelousas.

That splendid business stand under Sandoz Opera, on Main street, is for rent. Apply at this office.

We always have a fresh stock of groceries, and also all kinds of liquors and wines.—A. T. Sandoz & Bro.

Go to Fred L. Sandoz and see the bargains he is offering in summer goods.

## Seasonable Advice.

Dr. Quitman Kohnke, President of the Board of Health of New Orleans, gives the following timely advice concerning yellow fever:

The spread of yellow fever is easily controlled by the application of very simple rules. Yellow fever is transmitted from person to person by the bite of a stegomyia mosquito—the kind whose breeding places are cisterns, water barrels and similar collections of water. The stegomyia mosquito bites in the daytime usually, seldom at night.

It is important to know the conditions under which these mosquitoes transmit the disease so that measures of prevention may be intelligently operated. Mosquitoes, in order to become infectious, must bite a patient during the first three days of the fever, and then ten days must elapse before it is capable of transmitting the disease.

Mosquitoes are, therefore, not dangerous before the tenth day after biting the sick, and the patient is not dangerous after the third day of fever.

Protect from mosquitoes, day and night, all cases of fever for three days, and then destroy before the tenth day, after the beginning of the illness, the mosquitoes that are in the room.

Whenever yellow fever spreads from person to person, it is because these preventive measures have not been carried out.

The rules laid down by the highest medical authority for stamping out the yellow fever in New Orleans are very simple, viz:

- First—To keep empty all unused receptacles of water in every house, and allow no stagnant water on any premises.
- Second—To screen all cisterns after placing a small quantity of insecticide on the surface of the water.
- Third—To place a small quantity of insecticide in cesspools or privy vaults.
- Fourth—To sleep under mosquito nets.
- Fifth—Whenever practicable, screen doors and windows with wire screens of close mesh.

## It Would Be a Daisy.

There is no lameness in the proposition to require the voter to record his party affiliations when he registers. By this apparently simple means it will become as easy as rolling off a log to find out how many qualified Democrats, Republicans, or men who want to keep their politics to themselves, there are in every ward and parish in the State.

This information will help to find out the places where fine work will do the most good, and who to work on or coerce into line with threats of loss of employment, business, etc., just as it is done in some Northern States that have been made unalterably Republican by this device, which it is proposed to import and inculcate into Louisiana politics.—The People.

## Letter to H. D. Larcade.

OPELOUSAS.  
Dear Sir: A painter complained that our cans are too full; unhandy; spill.

It's a way we have; 'tis handier not to be full; but we have a weakness for full-measure. Our gallon contains eight pints; the usual "gallon" is seven.

We'll think it over again; but we like a full can. How much shorter would you like a barrel? Seven gallons would be the proportion.

Short-measure suggests that the shortage is probably not in the cheapest ingredient.

Guess we'll stick to four quarts to a gallon, and fifty gallons a barrel.

The name to go by is Devoe lead-and-zinc. Yours truly  
F W Devoe & Co  
P S—J B Sandoz sells our paint

It is our business to print, and do it right. If you want any of that quality send us your orders. If the other kind will suit your purpose go elsewhere.

If you want to keep posted on State and National affairs, there is no better way than by subscribing to The People, published at Baton Rouge, La.

We can supply you with any kind of groceries from our large stock, and we make the prices right. Allen T. Sandoz & Bro.

Furnished room for rent, centrally located; \$1.50 per week. Apply to J. C. Pierce, COURIER office.

Try a box of Dr. Leach's tablets for the prevention of yellow fever. For sale by Sandoz the Druggist.

For Rent—A residence in Opelousas, with large yard and garden. Apply at this office.

An elegant line of summer underwear going at bargain prices at F. L. Sandoz's.
