

RIOTS OF THE PAST.

Some of the Notable Ones in This Country. Under our popular system of government there ought to be no such thing as a riot to enforce a popular claim of any kind...

September 24, 1831, four persons were killed by the militia in a riot at Providence. August 18, 1835, several men killed and wounded in a riot at Baltimore about the Bank of Maryland.

July 10, 1834, a riot occurred in New York city about the supposed aims and objects of the Abolitionists, who were accused of promoting amalgamation.

August 11, 1834, a Catholic seminary or nunnery was burned at Charlestown, Mass. August 12, 1834, forty houses were destroyed in an "Abolition" riot in Philadelphia.

February 13, 1837, a riot was caused by the "hard times" and high price of flour, and flour warehouses were sacked and the flour destroyed in New York.

May 17, 1838, Pennsylvania Hall and other buildings were destroyed by an "Abolition" riot. December 8, 1838, the Pennsylvania Legislature was broken up by a mob, and, after several days of riot, the militia were called out to suppress the rioters.

May 6-8, 1844, in a riot between native Americans and Irishmen, in Philadelphia, thirty houses and three churches were burned, fourteen persons killed and forty wounded.

The Astor place riot, between the friends of Fremont and Macready, took place May 10, 1849, when several persons, among them many innocent spectators, were killed. The great anti-draft riot in New York, July 13, 1863, was the latest outbreak of the mob spirit upon any great scale previous to the present deplorable railroad riots, which have shocked and saddened the country, and caused great loss of life and property.

LEWIS' PREPARATION of Fine Cast Steel to the Sulphureted Dust. of Fine Cast Steel used and tested the value of this compound, are respectfully informed that it can be had at the Drug Store of E. L. LYON and many other druggists of this city. To the uninitiated and skeptical I will say that, in placing it before the public, I have derived from the whole course of inventors of the present and best anti-bilious medicines, etc. I allude to their invariable secrecy of ingredients. The usual and only other mode in producing Sulphureted Iron is by the hydrogen process, where it is made by hundreds of pounds for the commerce of the world, and is not to be depended on as containing so great a proportion of carbon (charcoal), which cannot be avoided in the process of their manufacture.

This Sulphureted of Refined Steel is the pure sulphureted of steel, having not a particle of foreign matter in its combination. It is made by hand. Those eminent professors of chemistry and physicians of France, together with the United States Dispensary, have analyzed this compound in administering iron is to get the greatest quantity into the gastric juice of the stomach, as it is intended to restore and purify the blood, and its known value as a tonic.
