LEWIS' PREPARATION of Fine Cast Steel to the Sulphurated Dose.

Those having used and tested the value of this compound, are respectfully informed that it can be had at the Drug Store of L. L. LEWIS and many other druggists of this city.

To the uninitiated and skeptical, I say that, in placing it before the public, I have deviated from the usual and only mode in producing Sulphurated Iron is by the hydrogen process, where it is made by hundreds of pounds for the commerce of the world, and is not to be depended on, as it contains too great a proportion of carbon (charcoal), which cannot be avoided in the process of their manufacturing it.

This Sulphurated of Refined Steel is the pure sulphure of steel, having not a particle of foreign matter in its composition. It is made by hand.

These eminent professors of chemistry and physicians of France, together with the United States Dispensary, state that the great object in administering iron is to get the greatest quantity into the gastric juice of the stomach, as it is intended to regenerate and purify the blood, and its known value as a tonic.

CONSUMPTION. Positively Cured.
