NEWS OF THE CITY.

THE RUSSELL CASE.

He is Remanded Before the Superior

Criminal Court. The case of the State vs. Berry Russell, the ate president of the Lafayette Bank, now in liquidation, charged with breach of trust and embezzlement of \$12,800, came up before Judge Sheehan yesterday on a preliminary

The evidence went to show that Mr Rossell had sold to the Bank of Lafayette drufts on S. H. Endicett A Co., of Boston, which were protested. When the bank went into

were protested. When the bank went into fiquidation and the accounts were being settled Russell, acting as president and cashier of the bank, presented four notes drawn by Russell & Hall, and amounting to \$3500.

This amount being in excess of the paper due legitimately to the bank by Russell & Hall, Russell was questioned as to the maner the bank had become possessed of those notes. Russell replied that he would explain, but never did. He also presented to the board a note for \$9300, drawn by Berry Russell, to cover the overdraft of his account in bank.

bank.

Mr. Adams, upon seeing the latter note, said, "This is criminal," whereupon Russell replied, "I know it; but if you push this affair you will force me into liquidation."

The liquidators accepted an offer of Russell to settle at forty cents on the dollar for that portion of his indebtedness on the paper which they considered legitimate, but demanded immediate payment in cash for the four motes, amounting to \$3500, and the hand note of \$3300.

Kussell failed to meet their demand and

charged with being absent without leave, were

charged with being absent without leave, were dropped from the rolls.

Patrolman P. Collus, for neglect of duty, was dismissed the force.

Patrolman S. Clark, for absenting himself from his beat, was fixed one day's pay.

Patrolman F. Keenan, for sitting down and sleoping on his beat, was fined two days' pay.

Patrolman William Jackson, for drukenness and conduct unbecoming and officer, was fined ten days' pay.

NEW MUSIC.

Pulaski March-A Centennial Souvenir.

From Ladden & Bates' Southern Music House, Savannah, Ga., we have received a copy of the "Pulaski March," written by Prof. Henry Sheller, of Dalton, Ga., specially for the Savannah centennial, October 9, 1879, marvains recognition of the pulsas of the savannah centennial, October 9, 1879, marvains recogniting affections with a truly marvains recogniting. for the Savannah centennial, October 9, 1879. for the Savannah centennial, October 9, 1879, and played by the Thirteenth United States Infantry band at the laying of the Jasper monument corner-stone. The piece is elegantly gotten up, and reflects great credit on the enterprising publishers. The march is brilliant and inspiring, but not difficult. Bands are playing it generally, and it is voted a genuine success. All music dealers sell it.

PROFESSORS APPOINTED.

At a meeting of the Board of Administra-tors University of Louisiana, held last night, Mr. E. C. Harding, A. M., formerly of the

University of Virginia, was appointed Pro-lessor of English Literature, and adjunct Professor of Greek in the Academical Depart-ment of the University. Mr. Alcee Fortier was appointed Tutor of the Preparatory School attached to the University.

C. C. B.

The Crescent City Battallon was inspected ast night at the armory on Dryades street and turned out as fully as could have been expected in the present busy season. Col Chas. E. Fenner, who has intely returned from a summer frip through the North and from a summer trip through the rectal and West, and called the boys together to see how they tooked, and appeared lightly satisfied with the inspection. After the military cor-neous had been performed the battailon, headed by its appendid band, made a short trip through our principal streets, and re-turning to the armory, disbanded.

CUSTOM-HOUSE NOTES

Special Agent Weeks has delayed his departure from New York until next month, and will not be in this city before the tenth proximo.

Special Agent Wheeler is expected to arrive in the city during the coming week. Inspector Lawler and Mr. Tomlinson, chief-clerk of the Collector, have gone to Washing-ton. The character of their business is kept

accret.

The new court-rooms are completed and ready for the coming term of court.

AMUSEMENTS.

Academy of Music.

note of \$9300.

Russell fulled to meet their demand, and hence the affidavit charging him with embersteement. On the testimony, of which the above is a synopsis, the accused was sent had to the followed by the McKeo Rankin Company on Sunday next.

ST. CHARLES THEATRE. The following marriages, births and deaths they opened with.

Haverly's Georgia Minstrels will appear again this evening in the same excellent bill they opened with.

STATE-HOUSE.

The Governor has appointed Andrew P McNickle, of New York city, commissioner of deeds for Louisiana.

A military commission, consisting of Gen.
Beauregard, Col. Alfred Roman and Major B.
M. Harrot, was in session yesterday in Gov.
Nicholis's private office.
It is suspected that the case of Capt. Sambola and other officers of the Orleans Artillery was being investigated, but that is only a suspicion.

A TAXED PEOPLE.

The British Debt and Cost of Army and Navy How the John Bulls are Bled.

(York (Eng.) Letter to the Philadelphia Press

(York (Eng.) better to the Philadelphia Press.)
The estimate of appropriations asked for the army for this year by the Conservate administration was over \$75,000,000. Fhis sum has already been exceeded, it is helleved by about thirty-three per cent, making the cost of the army this year \$100,000,000 or over. And this is cheap for Eurpee, for the English army is a smail one when compared with the Continental masses of legions. In France the military burden is worse, and in Germany it is appailing.

The amount asked for the English mayy for the current year is £10,80,210—mariy \$55,000,000. This one sum of naval cost is more than our entire "Gvil service and miscellaneous" expenditure for 1878—more than the whole actual expenses of our entire government, less the war, navy, indian, pension and public debt interest accounts. Or, I can contrast the figures in another way, the cost of the army and navy to England for this year is equal to all our current expenses of all kinds last year, saving the item of interest on the public debt.

The final proof, however, in the comparative burden of government will be found in the multic debts of the two contries. It is

months of August and September that it is very doubtful that the proposition will be favorably considered.

The waterworks.

The contractor for the construction of the stand-pipe of the improved waterworks system arrived yesterday in the city from Louis lawlie, where the greater part of the castings are being made and nearly fluished. The castings of the base made in the city are completed and will be examined to-day by the contractor and President Toby. The work of laying the new mains and smaller pipes, in accordance with the charter of the company will commence immediately, and in a very few months our waterworks system will probably show remarkable improvement.

POLICE BOARD.

The Board of Police Commissioners metals inght at their rooms in the Central Station, Mayor I. W. Patton in the chair and a graph of the base of the season of the commissioners metals and whater the probably show remarkable improvement.

Mark Twain In Politics.

Mark Twain (Samuel L. Clemens (introduced Gen. Hawley, the speaker of the evening, at a Republican meeting in Elmira, N. Y. a few nights ago. He referred to him as "President of the Centennial Commission, a gallant soldier in the war, Governor of Connecticut, a Congressman, a member of my church at Hartford, and, "continued the humorist." as author of the 'Beautiful Snow, he has acided a new pang to winter. He is an American of Americans so broad, so bountiful in his character that he never turned a framp empty-hunded from his door, but always gave him a letter of introduction to me. He is a square, true, honest man in politics, and I must say he occupies a mighty lonesome position." After the laughing was over, Gen. Hawley spoke an hour and a half on the issues of the campaign.

Suncadons Partisan Lying.

[Chicago Times.]

(Chicago Times.) (Chicago Times.)

If anybody will take the trouble to make the computation from the data furnished by the Republican press, he will find that since 1876 Mr. Samuel J. Tilden has contributed from his private fortune for political purposes no less a sum than that represented by the combined national debts of the United States and Great Britain. It is a great drain on his resources, but his fortune is easily replenished. He has Mr. Field to euchre every time he wants a few billions.

Mr. Tilden will have no opposition in the Democratic party, but if Kelly succeeds in defeating Robinson, then the opposition to Mr. Tilden will concentrate around Mr. Bay-ard. The nomination of Mr. Bayard would call for a complete change of campaign tactics in the Republican camp.

THE SUPREME COURT.

Work.

Some of the Justices Whose Play Is Hard

Work.

(Washirston Letter)

The Supreme Court of the United States researchiled here this week. Each year, as this body reconvenes in the fall, the old habituse of the court, expect to see at least two of the members missing. One Justice is absent from the bench this fall, Judgo Hunt, of New York, and it is not probable that he will again take his seat with his associates; but the two gentlemen whose presence is a constant surprise, even to their friends, are Mr. Justice Swayne and Mr. Justice Ciliford. One of these gentlemen is, I believe, seventy-six years of age, the other, I taink, seventy-sive Any time within live or six years they could have both been retired from active service on full pay, as they have filled very much more than the term which a just and proper law provides for active judicial service on this bench, and could live the remainder of their declining years in ease on full pay. But they are not inclined to go. Age does not seem to have weakened their faculties or to have impaired their ability to work. In 1874 Mr. Justice Ciliford could have retired on full salary. He is there still, to the annovance, doubtless, of younger men within his circuit who are aspirants for his position, and to the great satisfaction of himself and of his friends. Four years ago it was thought that his time had come. He lay at Portland, Me, his home, during the summer, too sick to be moved. But when the fall days came he announced to his family that he was a going to Washington. He said that he should go, and was lifted to the cars, and every hour as he rolled on toward the capital city his strength came back. Judicial routine is the habit of his life, as it is of all old judicial efficers. One reason, probably, why they decline to refire to make way for younger men is because they droved to let go. No one may tell what might happen to the physical machinery should the accustoned routine be abandoned. It has been the experience of many old men that the years of case, to which they should most avoid, and that health

any special subject. There were experienced bunds to do all the formal part of the work so that my dtules there were mainly of a di-rectory character. But in this piace of Chief-Justice there are no duties that can be dele-gated. Everything must be done by one's own hand." Bergh's Prescription.

Bergh's Prescription.

(Philadolphia Times.)

About the most unpopular man in New York city is Capt. Williams, who has set the police of the metropolis the example of clubbing people indiscriminately. Williams, however, has his champion, and that champion, a queerly enough, is Henry Bergh, famous for his prominence in the Society for the Prevention of Cruetty to Animals. Mr. Bergh thinks that such a man as Williams is a public necessity, and only laments that there are not more of them. Indeed, if Mr. Bergh could have his way he would punish people, not by clubbing them on the head, but by plying the lash to the bare back. He relates with great gusto his observation in Egypt of the bastimado, and only wishes we could transplant the system to this country. "Strip these men men who his horses on the head or kick them; men who insult your wife or your daughter, or try to rob or break into your house strip them to the walst and then lash them on the bare back until the blood runs down on the floor!" Such is Mr. Bergh's prescription. prescription.

[Hartford Times.]
The "financial issue" told, in Ohio especially where it was felt in the shape of \$5 and \$10 purchases of votes, out of John Sherman's civil service reform fund, all over the State.

Sherman's Fortorn Hope. (Cincinnati Enquirer)

When the Grant boom takes up its Eastward march again the senatorial chances of Mr. Sherman will be much enhanced. Destructive forest fires are getting in their

regular autumn work. A week ago they were raging through thousands of acres in the Northwest Territory, and now they are burning over the wooded hills along the Eric in the vicinity of Corning and Port Jervis, and sweeping the limber from the mountains about Mansfield, Waterville, Warren and other towns in Vermont.

The reputed gold and silver mines discovered at Belton, Cass county, Mo., have not "punned out" as was expected. About 100 pounds of the ore was brought to St. Louis to be assayed. Mr. Hug. Annoldt, metalurgist, sampled and assayed the lot and found no trace of either gold or silver.

The Buffalo Courer points out that New York is not in the habit of following Ohio when the latter State goes Republican. Thus Ohio went Republican in October, 1867, New York Democratic the next month; and the same diversity was exhibited in 1869, 1875 and 1876, and will be this year.

AGENTS FOR

DEANE'S PATENT STEAM PUMP

The attention of the public s particularly called to the

GREAT REDUCTION IN PRICES!

This reduction is possible on account of the decrease in the cost of labor and man risk, now any lowering of the quality of either.

Notwithstanding the previously acknowledged

SUPERIORITY OF THE DEANE PUMP. It has been the constant endeavor of the manufacturer to render it still more worthy of the favor with which it has been received, by such

IMPROVEMENTS IN DESIGN AND DETAIL As will simplify, strengthen and perfect it for the many uses to which it is applied, until it is now admitted to be

The Most Perfect Steam Pump Made.

Each PUMP is subjected to a rigorous test before leaving the manufactory, and every Pum a is guaranteed.

We obligate ourselves to refund the purchase money in case any Pump should fail to perform the work for which we warrant it.

We have constantly on hand a large and complete assortment of

PUMPS FOR VACUUM, SYRUP, TANKS AND FEEDING BOILERS,

KELLY STEEL BARB WIRE.

STEEL BARB FENCE WIRE.

With the invention, manufacture and use of BARBED WIRE dawned a NEW BBA IN FIG.

ING. Previously all fences of wire or wood had to be made of sufficient strength to resist the brute force of the animal to be restrained, and it deemeds upon the strength and activity of the animal as to whether the fonce could be broken down or scaled; hence, fencing had become very costly and, in many cases, almost impossible to be obtained, thus making a great drawback to the settlement of some of the fluest portions of our Continent.

THE EASE AND COMPARATIVE CHEAPNESS

With which BARBED WHEE can be transported, the small amount of time and labor required to put it up, its wonderful efficiency as a Fence, and its Comparative Cheapness, last made for it a most wonderful and remarkable success. The amount of sales have been unprecedented, and though litte was beard of it four years ago, it is now known all over the civilized world, and used in all the States and Torritories of the United States.

We are Prepared to Execute All Orders, Small or Large, Promptly and at Yery

FRIEDMAN'S INJECTORS AND EJECTORS.

The special attention of manufacturers, mill owners, and other parties using steam, is called to the great economy of employing Injectors as a means of supplying water to steam boilers. In most cases these Injectors may take the place of Steam Pumps to great advantage, and even where the latter have been set up and are noy in use, it would be a matter of economy to apply one of the former also to your boiler, for the cllowing, among many other reasons equally pertinent, that might be given: The Best of Pumps Will Sonetimes Get Out of Order,

others frequently, in which case much valuable the is lost while making repairs. Here, under such circumstances, is a comparatively inexpensive machine, always in order and ready to start at a moment's notice to take the place of the disabed Pump and allow the work to goton as if noting unusual had occurred. Then again timay bessed to great advantage in replicationable Boilers during the mobilization, so as to be in a good condition to get up a full head of steam without delay in the morning, effecting by this operation alone a

Great Saving in Fuel, and Wear and Tear of Boilers.

The Steam employed in working the Injecor is returned to the Bolier with the Feed Water, thereby raising its temperature, and preventing the unequal expansion so disastrous to Bolier Plates, caused by pumping in water at a low temperature. The Feed Water enters the Boller throug the Injector in a continuous stream, which is a great advantage over the unavoidable intermitent supply produced by all kinds of pumps.

These Injectors are warranted to work win the most perfect regularity, and when properly applied, according to the instructions given, maranteed to work to the fullest extent of their capacity, as laid down in our table.

They will also, if desired, be sent on trul to responsible parties for thirty days; to be accepted if found to work as represented, otherwise to be returned free of expense except for transportation.
