

THE SENATE

WEDNESDAY, March 16, 1900.
The Senate was called to order punctually at noon by Lieut. Gov. McNeill, twenty-seven Senators, a quorum present.
The reading of the journal of the previous day was dispensed with.
COMMITTEE REPORTS.
By Senator Walton, from the Judiciary Committee, unfavorably on Senate bill No. 21, relative to securities on official bonds.
Unfavorably on Senate bill No. 109, to amend section 100 of the Revised Statutes.
By Senator Robertson, from the Finance Committee, by substitute for Senate bill No. 102, to amend section 100 of the Revised Statutes.
The committee's substitute does not change the interest rate and simply provides that the interest shall be paid in arrears, and that the warrants to be paid in arrears shall be numbered and entered in the public account books, and that the warrants shall be numbered and entered in the public account books, and that the warrants shall be numbered and entered in the public account books.

HOUSE OF REPRESENTATIVES.
WEDNESDAY, March 16, 1900.
The House was called to order at 10 o'clock. Speaker O'Brien in the chair and seventy-one members present.
Prayer was offered by the Rev. Dr. Walker.
THE REVENUE BILL.
Representative Henry moved to reconsider the vote by which the revenue bill was passed to its third reading. Adopted.
On the passage of the revenue bill, Representative Farmer moved to suspend the rules in order to take up this time the amendments to the revenue bill. The Speaker announced that the House would not suspend the rules in order to take up the amendments to the revenue bill.

M. SCHWARTZ & BRO.,

149 TO 169 MAGAZINE STREET,
AGENTS FOR
DEANE'S PATENT STEAM PUMP

GREAT REDUCTION IN PRICES!
The attention of the public is particularly called to the
SUPERIORITY OF THE DEANE PUMP,
It has been the constant endeavor of the manufacturer to render it still more worthy of the name with which it has been received, by such
IMPROVEMENTS IN DESIGN AND DETAIL
As will simplify, strengthen and perfect it for the many uses to which it is applied, until now admitted to be
The Most Perfect Steam Pump Made.

Each PUMP is subjected to a rigorous test before leaving the manufactory, and every PUMP is guaranteed.
We obligate ourselves to refund the purchase money in case any Pump should fail to perform the work for which we warrant it.
We have constantly on hand a large and complete assortment of
PUMPS FOR VACUUM, SYRUP, TANKS AND FEEDING BOILERS.

KELLY STEEL BARB WIRE.
STEEL BARB FENCE WIRE.
With the invention, manufacture and use of BARBED WIRE, a new era in fencing has been inaugurated. Formerly all fences of wire or wood had to be made of pulchritude strength to resist the brute force of the animal, and it depended upon the strength and activity of the animal as to whether the fence could be broken down or scaled; hence, fencing had become very costly, and, in many cases, almost impracticable to be obtained, thus making a great drawback to the settlement of some of the finest portions of our continent.

THE EASE AND COMPARATIVE CHEAPNESS
With which BARBED WIRE can be transported, the small amount of time and labor required to put it up, its wonderful economy as a fence, and its Comparative Cheapness, has made for it a most wonderful and remarkable success. The amount of sales has been unprecedented, and through it has been heard of in every part of the world, and used in all the States and Territories of the United States.
We are Prepared to Execute All Orders, Small or Large, Promptly and at Very Low Prices.

FRIEDMAN'S INJECTORS AND EJECTORS.
The special attention of manufacturers, mill owners, and other parties using steam is called to the great economy of employing injectors as a means of supplying water to steam boilers. In most cases these injectors may take the place of steam pumps to great advantage, and even where the latter have been set up and are working, it would be a matter of economy to apply one of the former also to your boiler, for the following reasons, among many other reasons, which are pertinent, that might be given:
The Best of Pumps Will Sometimes Get Out of Order,
others frequently, in which case much valuable time is lost while making repairs. Here, under such circumstances, is a comparatively inexpensive machine, always in order and ready to run at a moment's notice to take the place of the disabled pump and allow the work to go on as usual, without any interruption. It is a simple machine, and its operation is so simple that it can be operated by a boy, and it is so simple that it can be operated by a boy, and it is so simple that it can be operated by a boy.
