### WHAT PURE WHISKEY IS

Can easily be ascertained. Smell your drink before imbibing it. Better still, smell the drained glass. The least disagreeable or foul odor betrays poison in the whisky. Perfect distillation means the careful separation of the first and the end run from the still, the poisonous, impure, essential grainoil, (phlegms, faints, fusel), from the middling product, good, potable spirit. Very likely the majority of cheap whiskies, either for economy or from ignorance, carry more or less of impurities. Such defective liquors could never be admitted to that grandest of stocks, and hence can not be obtained at the store of

Chris. Xander's Quality House, 909 Seventh Street Northwest. THE WUNDERS OF IMERMIT.

Melts Both Iron and Steel in Short Order--Burns at Temperature of 5,400 Degrees.

Humanity, which swelters in a heat of 90 degrees, and withers and dies if the mercury runs up 10 or 15 degrees higher, finds it hard to realize a hear of 5,400 degrees. Yet, says the Brooklyn Eagle, that is the heat developed in the combustion of thermit, a heat which welds together pieces of the most ponderous machinery, which makes it possible to mend iron castings weighing tons, which heretofore had to be replaced at great expense of labor and time; which can unite iron rails so perfectly that the jolting can scarcely be seen or felt, and a rail can be made miles long, instead of 50 or a hundred feet at the outside.

This thermit is a compound discovered by Dr. Hans Goldschmidt, of Essen, Germany, who has been lecturing in this country before chemical and engineering associations on this chemical discovery of his that is so full of engineering possibilities; a discovery that, unlike so many scientific discoveries, is not merely interesting to the scientist, but commercially valuable in the industrial world. The thermit is a mixture of finely granulated or powdered aluminum with some metallic oxide, most frequently oxide of iron. This mixture looks not unlike gunpowder, or to a housewife would suggest mixed tea, the light granules being aluminum and the dark ones oxide of iron. In burning this mixture creates a temperature, as Dr. Goldschmidt expressed it in a paper read at the annual meeting of the American Society of Mechanical Engineers, "about equal to that of the electric arc light."

#### PATIENT'S LUCKY ESCAPE.

Victim of Blood-Poisoning Saved His Limb by Dodging the Surgeons ---Strange But True.

"We certainly have some strange cases to deal with," said the hospital attendant, "and an odd one came to us recently. An awfully bright but eccentric chap was brought here for the treatment. He had contracted blood poisoning from some colored wearing apparel, and it was decided that amputation above the knee was the only thing that would save his life. Of course, we told him about it, and made all preparations for it. But the strange part was that when we got ready for the operation the patient was nowhere in sight. He had quietly moved out without saying anything to anyone. We were frightened, because we were afraid it meant the sacrifice of his life. But two days later he appeared again, saying that he had made up his mind that if that was his last chance for a two-legged bat, he was going to have a good one. And I guess he had had it, judging by his looks. But the most remarkable thing about it was that he was so much better that the doctors found that it was not necessary to operate. Yes, it is a strange case but it is the truth."

#### Commercial Camphor.

Practically all the camphor of commerce comes from Japan and Formosa, which is a Japanese colony. As Japan needs it for making smokeless gunpowder, the government has forbidden its export, so that Russia may not get any, and also in order that the Japanese powder mills may not run short. Japan's control of the camphor trade gives the mikado a sort of control over war among other nations.

## A BOY WANTED

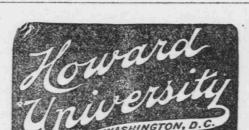

In every town and hamlet is the United States and Canada wno is willing to sell TheColored American on a liberal commission. Any boy with push can easily get up a large list of weekly customers and make considerable money. The work is pleasant and agreeable, and need not take up more than a few hours each week.

## HERE IS OUR PLAN:

We will send free of cost ten bright new copies of THE COL-ORED AMERICAN, which you may sell amongst your friends and neighbors at the rate of 5 cents per copy, and tell them you would like to bring them the paper in this way from week to week, allowing them to stop when they please. It will be easy for you to get up a route of twenty to a hundred papers, which will amount to \$1.00 to \$5.00 a week. Of this amount you may keep two-fifths as your profit. This means that on every ten papers sold you have a clear profit of 20 cts., or two dollars a hundred. We furnish you sufficient papers, free of cost, to start you and enable you to try the plan. We pay the postage and run all risk. Could you ask for anything better or make money more easily? Write today and reserve territory in your town. Address

THE COLORED AMERICAN, 459 C St., N.W. Washington, D. G.

REV. JOHN GORDON, D. D., PRESIDENT.

Incorporated March 2, 1867

Gives opportunity for Higher Education to all without regard to creed, race or sex.

Ten departments—Theological, Medical, Dental, Pharmaceutical, Legal, Collegiate, Teachers, Commercial, Preparatory, Industrial—conducted by one hundred competent Professors and lustructors.

Tuition Free except in the Medical Department.

### MEDICAL DEPARTMENT

Including MEDICAL, DENTAL and PHARMACEUTIC COLLEGES
Thirty-Seventh Session.

DAY SCHOOL FOR NEW MATRICULANTS.

Tuition fee in Medical and Dental Colleges, each, \$80.
Pharmaceutic College, \$70.

ALL STUDENTS MUST REGISTER BEFORE OCTOBER 12, 1904

## LAW SCHOOL.

Organized 1868.

Applicants for admission to this well-known Law School must be over eighteen years of age and possess the proper qualifications. Matriculation fee \$10.00 strictly in advance.

Non-Professional Departments open September 21, 1904. Theological Department opens September 28, 1904. Medical and Law Departments open October 1, 1904.

For catalogue or further information address The President, or Mr. Geo. H. Safford, Secretary of the University, or the Secretary of the Department which you wish to enter, viz: Medical, F. J. Shadd, M. D., 901 R St. N. W.; Law, James F. Bundy, Esq., 420 Fifth St. N. W.
