June Advertising: Total number of advertisements printed in The World during June, 1892..... 74,924

Same month last year..... 60,760

Gain..... 14,164

The Evening World Prints Associated Press News.

Take The Evening World home with you. It is a home paper.

New York to-day resumes its natural position as the great popular Summer resort.

The cholera scare will work off the over-production of cheap whiskey in this country if it does nothing else.

It is no longer a distinction for a Republican statesman to decline the Chairmanship of the National Committee.

Long Island mosquitoes caused two teams to runaway. They must carry stilettes like the "skater mafia" of New Jersey.

The YOUNGERS and JAMESSES are out of the train-robbing business, but the DATTOS brothers manage to keep the profits in the family.

In addition to our regular exportation of missionaries to Africa we exported last year 649,615 gallons of domestic distilled spirits, mostly rum.

Here is force of habit for you. Ten tramps broke into a railroad car at Wilkesbarre, Pa., yesterday, and instead of stealing a ride, stole ten pairs of shoes. They prefer walking to box-carrying it across the country.

Actor BEANE, whose boarding-house was on fire, waited to put on a silk shirt and light a cigarette before making his exit down the fire-escape. No stage fright there, and it makes a good summer "ad." too, for the unluckied BEANE.

Congressman OATES was not warranted in saying that there was "bound to be more bloodshed at Homestead, and probably a great deal of it." There is not the slightest indication which would warrant any such gloomy prediction.

Dr. LOUIS PASTERUR is one of the great men who mankind delights to honor. He has devoted his life to the alleviation of human suffering, and it is the universal wish that his illness may prove unimportant and that his valuable services may be long continued.

Every possible precaution has apparently been taken to prevent the spread of typhus from any of the cases brought over by the Nevada, and there is no rea-

son to apprehend a repetition of the experience of the Massilia. Still, it would have been better if the Nevada had been more careful in taking its passengers on board.

SHOOTING ON THE SPOT.

The brave old Gen. Dix made himself famous when he uttered the sentence, "If any one pulls down the American flag, shoot him on the spot." The order had a ring in it, was delightful, and it touched the string of patriotism and awoke a responsive echo in every true American heart. But that was in war time. Gen. Dix was in command. The nation's flag was sacred. To drag it down with hostile hands was treason.

The Governor of Idaho probably has an insane notion that he is a second Gen. Dix, and that he can win fame by a parrot-like imitation of the war-time order. "If any one is found trying to pull down the flag," says Gov. WALKER, "shoot him on the spot." But, Governor, there are not war times and you are not a general-in-chief of an army. You are the Governor of a State in time of peace, and as such are charged with the enforcement of the civil laws. There are statutes of your State, Governor, defining the crime of railroad wrecking and fixing its punishment. There is also a Constitution, Governor, which guarantees that no person shall be deprived of life or liberty without due process of law.

Now, you might have issued an order to this effect: "If any one is found playing any tricks with the railroads, arrest him on the spot." You might have added, had you so pleased, "carry him to jail and hand him over to the proper authorities." Such an order would not have had such a ringing, Dix-like sound as the order you did issue. But then it would have been legal and proper, while your order, Governor, was illegal and improper. It very unwisely directed those to whom it was addressed to do what they had no legal right to do, and what might have involved them in serious trouble.

OPEN THE FAIR.

Now that the Senate has receded from one of its ridiculous provisions in the World's Fair Appropriation bill—that prohibiting the sale of wine, liquor or beer anywhere on the Fair grounds—it is to be hoped that the House will dispose of the obnoxious provision.

It was perfectly natural that persons who thought it highly improper that a visitor who spent all day in the Exposition should be permitted to take a glass of wine or beer or a little whiskey or brandy with his lunch should have deemed it a violation of moral and religious obligations to allow a visitor to enter the Exposition at all on Sunday. But as sensible people regard both propositions as absurd exhibitions of fanatical folly, it is to be hoped both will be discarded from the bill.

Does Senator QUAY believe the streets of Chicago to be so wholly free from immorality and temptation as to be safer for Sunday loungers and idlers than the halls and passages of the Exposition?

THE CEREMONIES of Notification Day next Wednesday take place in the evening. But that is a necessity of the National Committee meeting and other business which will occupy the afternoon, and will make no difference in the title of the new institution of Presidential years, which will henceforth be known by the name bestowed upon it by THE EVENING WORLD—Notification Day—for all time to come.

Next Wednesday's gathering at Madison Square Garden will be a memorable and an important event. The Kings County Democracy addressed a letter to Mayor GRANT yesterday, expressing a desire to participate in the ceremony and to contribute to its success as far as possible. To that end the Democratic County Committee proposes to appoint not less than twenty-five nor more than one hundred of the most prominent citizens of the County to cooperate with New York in the arrangements.

The Executive Committee will of course cheerfully and gladly accept the co-operation, and there will doubtless be such a gathering of distinguished citizens from all parts of the Union in New York as has seldom if ever been previously witnessed.

THE NAVAL FAÇADE.

So we are to have a grand naval parade and review in New York Harbor at the Columbus Celebration next October. Our citizens and visitors are to enjoy the privilege of witnessing a spectacle that could be seen nowhere else in the United States, as well as in our own splendid bay. Secretary Baynes has given praise for the readiness with which he has fallen into the Committee's views regarding this feature of the display, and for the energy with which he is pushing arrangements for its success. Our people are always well pleased with military parades. They frequently enjoy such spectacles and are accustomed to them. But there is a charm of novelty about an imposing naval parade which makes it more than ordinarily attractive.

The days of October set apart for the New York celebration will be a fitting opening for the World's Fair, and everybody in creation who can do so should see the Chicago Exposition. But no one should fail to witness the New York October celebration, for no hint in Chicago or anywhere else will be seen like it.

IMMIGRATION SUGGESTIONS.

The Joint Congressional Committee on Immigration makes some valuable suggestions in its report, which is now ready for submission to the two Houses, aside from its elaborate details of the abuses at Ellis Island. The statistics show that in ten months up to Jan. 31st last nearly 2,000 immigrants arriving in this port were sent back to Europe as contract laborers or paupers. Yet there is little room to doubt that but for the carelessness or inactivity of the persons engaged with enforcing the laws, and the evil of the landing system permitted, the number of rejected immigrants would have been much larger. Briefly, the Committee recommends an

inspection of immigrants by four persons instead of one, and rigid inquiries as to the purpose of departure to be entered on the ship's books and sworn to by the captain and surgeon of the ship. If the inspection was made more rigid and the return of prohibited immigrants was certain the steamship companies would gladly assist the Government in a strict scrutiny at the port of departure in order to be spared the necessity of giving rejected immigrants their return passage free.

LOOK TO THE PUBLIC HEALTH.

There is very little fear of cholera in New York. But precautions are always necessary in a cholera season, and it is very desirable that the Quarantine authorities, the immigration establishment, the Street-Cleaning Department and the Board of Health should be on the alert and more than ordinarily careful and active now that the disease is visiting parts of Europe. The cholera epidemic of 1833 was heard of in northern and central Europe in 1831, in London in 1832, and spreading across the Atlantic. The attack of 1852 to 1853 commenced in Europe in the former year and was severe in the United States in the latter year. The greatest vigilance is necessary at such seasons in the disinfection of ships, cargoes and baggage. It is proper to have cleaning and disinfecting places wherever animal refuse accumulates. Good water, perfect sewerage and clean streets are protections against all such diseases, and as far as individuals are concerned wholesome food and abstention from excesses of all kinds are absolutely essential. New York is about as well protected against the attack of a cholera epidemic as any city in the world, with its pure water, its two rivers and its sea air. But our authorities are none the less bound to use every precaution and extraordinary vigilance while the disease is heard of in Europe, and it is especially desirable at this time that our Board of Health should have the confidence and the assistance of the very best medical ability that can be obtained.

Cupid should add a stomach pump to his accoutrements after this. A New Haven girl whose despondent lover took laudanum dosed him with mustard and brought in a doctor, who pumped the young man in time. That girl wants no suicide record tagged on to her heart trophies.

The American spirit of competition in the case of the Philadelphia nother, who, reading of the recent births of triplets near New York, went to work and produced quadruplets. The mother and children are doing well, but the father is reported as very low.

This country is now at peace with all other countries, and proposes to respect the rights of all nations. It cannot, accordingly, permit the Cuban colony at Tampa to go into the business of filibustering.

WORLDLINGS.

Big (Gibbini), the new Italian Premier, distastes society and avoids it. He is democratic in his ways and has a taste for music.

Spain has had 124 Ministers of War during the century, with an average time of service of six months each.

The increase of aeronautical tragedies leads to the fact that it is a little more than a century since Montgolfier made his first experiment with paper balloons filled with the smoke of burnt wool.

The largest whale ever captured was the size of a small locomotive in 1801. It yielded five hundred tons of oil.

One of Montana's exhibits at the World's Fair will be a small block of gold weighing 60 pounds and worth \$120,000.

A Station Island Outrage.

What do you think of the President of a village on Station Island who refused permission to a respectable lawyer to address the trustees in behalf of a client, and who, when one of the Board had induced him to hear a respectful address, and the lawyer had spoken, only laughed at the latter? Is not such misconduct punishable in some way, or is it merely to be ascribed to the lawlessness of Station Island, July 2, 1892.

What He Called For.

Stranger—Gimme a drink of four-dollar whiskey. Bartender—There you are, sir. Stranger—(smacking his lips)—By George, that's good! How much? Bartender—Four dollars.

Every Attention Given.

Mr. Scudderman, I hope you will treat this little boy of mine exactly as if he were your own son. "Oh, yes, certainly, I will give him a whipping every day, when you desire it."

A Solemn Cease-fire.

Passaway entering Miss Hall's dress-making room—Why, what are you looking so solemn about? Miss Hall—Mr. Cleveland has just been reading from the papers all the news that he thought would annoy you.

UNLIKE common H-O (Horn-by's Oatmeal) is a proper summer dish. The excess of oil being removed, it is not overheating.

\$44 AT A TOTS' FAIR.

Seventy-Fourth Street Children Do Big Work for the Fund.

They Set a Splendid Example for Older Folks to Follow.

Latest Contributions Received for "The Evening World's" Charity.

All letters containing money for the Sick Babies Fund should be addressed to the Treasurer of the New York World, Pulitzer Building.

Donations of clothing, &c., should be sent to Mrs. Roberts, 347 West Forty-ninth street.

THE SUBSCRIPTIONS.

Table listing names and amounts of subscriptions to the Sick Babies Fund, including Mrs. M., Mrs. J., and various other donors.

A few Seventy-fourth street children have done a big thing for THE EVENING WORLD'S Sick Babies Fund. They saw what other little folks were doing in the cause of this charity, and they made up their minds that they would contribute their share towards diminishing the distress among the babies of the tenements. They determined to hold a fair in aid of the fund. A flat was vacant at 169 East Seventy-fourth street, and they got permission to use this.

They had ready and immediate aid from the neighborhood and to Bloomington brother, Lichtenstein & Co., Siegel & Co., Schloss & Co., Rosenbaum & Co., and other prominent merchants, and obtained donations of various articles. They then put their fair in order, assisted by Mrs. N. D. Nagelsmith, Mrs. Meyer, Mrs. Stern, Miss Sabatini and Rev. Dr. Meyer.

They had ready and immediate aid from the neighborhood and to Bloomington brother, Lichtenstein & Co., Siegel & Co., Schloss & Co., Rosenbaum & Co., and other prominent merchants, and obtained donations of various articles. They then put their fair in order, assisted by Mrs. N. D. Nagelsmith, Mrs. Meyer, Mrs. Stern, Miss Sabatini and Rev. Dr. Meyer.

The children worked with great enthusiasm. Their ages range from six to twelve years, and they are all boys, but what they accomplished was worthy of the hearts and hands of adults. It would do any one good to see and hear the tiny youngsters at work from 8 to 10 o'clock every evening buttoning their big and little visitors and calling out: "Take a chance for the sick babies! They have done exceedingly in getting together \$44 in their first experiment, and understood how hard they worked to get together this amount when you know that they charged only five cents for admission and five cents for each article sold. The little friends of the fund who have done so much for it in this instance are:

William Kahn, Harry Nagelsmith, Sarah Meyer, Joseph Asch, John Nagelsmith, Jennie Meyer, Jennie Friedman, Milton Stern, Charles K. Hertz, Arthur H. Hertz, Lester Hertz.

Older folks may find a lesson in the work of these little ones. If their experiences had been shared by the summer sufferings of the city, they would have learned that the hearts of those who have suffered from poverty are not a thing of indifference when they read this column. Nobody who is not absolutely penniless is so poor that he cannot give something to the fund. The work of the seventy-fourth street children should stimulate their elders to do something in the way of kindness for the world's unfortunate.

LONG BRANCH ENTERTAINMENT.

Fine Array of Talent for a Performance on July 22.

A musical, literary and dramatic entertainment in aid of the Sick Baby Fund will be given at Long Branch July 22.

Through the ready generosity of Col. Blithers, proprietor of the West End Amusement Park, the entertainment will be given.

The entertainment will be given at Long Branch, N. J., on Sunday, July 22, at 10 o'clock.

It is hoped that Long Branch will turn a profitable thought to the sick little ones in New York.

A B G Help.

Relieved the #1 for the Sick Babies Fund. Hope it will be a big help.

A Profitable Fair.

Relieved the #1 for the Sick Babies Fund. Hope it will be a big help.

A Fair for the Sick Babies Fund.

Beautifully the Bay Window.

If your house has a bay window with a southern exposure fill up the recesses with a fine shade-making a perfect world of light. The edges may be finished with swinging tassels of the same color, or flower heads dangling from three inches of green stem, and tied in place by jaunty little bow-knots in fancy ribbon. A full roll of imitation Valenciennes lace may be set beneath the flower fringe.

Funny Things About the Face.

The average human nose is tady out of line, and it is this fact that usually leads its peculiar peculiarity to the face. A medical writer says that there are anatomical reasons why a slight deviation from a true centre line may be expected. If he is correct in his deductions, the nose which is squarely set between the two eyes is, after all, the abnormal one.

Now, have your carpenter or "handy man" put up the framework for your window seat. The seats and the backs are cushioned, and from the sides hang draperies of the same material with which the upholstery is done. Corduroy, velvet, wiretweed, rep and denim may all be used, but be sure to choose good coloring. Have the color harmonize with the rest of your room, the wall paper, carpet, furniture, &c.

Money and a Blessing.

Relieved the #1 for the Sick Babies Fund. Hope it will be a big help.
