

PRINTERS ON THE RACES.

The Card at Guttenburg a Very Brilliant One.

Third Race Brings Together Crack Sprinters.

One of the most brilliant cards of the meeting will be run off at Guttenburg to-day. Should the rain hold off and the track remain dry, the racing ought to be very interesting and close finishes should be the order of the day.

Table with race results including names like 'Laurier', 'C. J. Kelly', 'W. J. Kelly', etc.

Second Race—Purse \$400; selling allowance: 1/2 mile and a half furlong.

Table with race results for the second race.

Fourth Race—Purse \$400; selling allowance: 1/2 mile and a half furlong.

Table with race results for the fourth race.

Gloucester Selections.

Shipping News.

Table with shipping news including ship names and destinations.

SUSPENELL HELD THE FORT.

Shot at Several People Who Passed on His Street.

Sitting at an Open Window with a Pistol Terrorizing Passers-By.

Justice Getting this morning, in the Lee Avenue Court, Williamsburg, held for trial a man who gave his name as Con Suspenell, aged thirty-two, of 14 Withers street, on the charge of indiscriminately shooting at people on the street.

At midnight Saturday Suspenell sat at an open window of his home and refused to allow any one to pass on his side of the street. On the opposite side of the street he would only allow Italian and Irish to pass, and sat at the window swearing he would kill any person who dared to disobey him.

He fired several shots at pedestrians, and was becoming more violent when Policeman Keenan, of the 11th ward, came crawling up behind him, secured him after a severe struggle.

Suspenell was held yesterday in \$1,000 bail. He easily found a bondman. He is said to have been drinking heavily.

FOR A NEW HOSPITAL.

Subscriptions Asked in Brooklyn for a Good Cause.

The Long Island Throat and Lung Hospital, which now occupies inadequate quarters at 1025 Grand avenue, Brooklyn, may soon have a suitable home of its own.

At a special meeting of the Directors held last week, Fire Marshal Lewis offered the following resolution, which was adopted: "Resolved, That the Directors be authorized to receive subscriptions for the purpose of procuring a suitable site upon which to erect a new hospital for the Long Island Throat and Lung Hospital."

The directors themselves subscribed \$500, which will be used to equip the present institution with improved instruments.

Among those present were: President, Judge Thomas A. M. Wootley; Secretary, Dr. J. M. Wootley; Samuel Stewart; Whitehouse, Judge Benjamin Lewis; John A. C. Steele and Rev. Dr. S. G. Nelson.

The subject of the hospital is purely charitable, its work being confined among the worthy poor. It is open daily except Sunday from 10 o'clock to 12 o'clock.

It was announced at the meeting that subscriptions from all interested in this charitable and humane object would be sent to President Keenan, 284 Canal street; Vice-President Benjamin Lewis, 80 Lafayette avenue; or Dr. J. M. Wootley, 310 Chamber street.

A Policeman Robbed.

A Pretty Servant and Collins's Waiter Disappeared at the Same Time.

Mrs. Annie Shurr, who keeps a boarding-house at 150 Lefferts street, Brooklyn, asked the police this morning to look for her servant, Katie Ross, who has been missing since last Friday.

The girl disappeared suddenly, and Mrs. Shurr thought she had merely become tired of her situation, until this morning when it was discovered that several articles had disappeared.

A search was made and it was found that a gold ring set with rubies and pearls, a gold watch and \$5 in money, belonging to Policeman John J. Collins, of the Butler street station, who boards at the house, were missing.

Collins left the money locked up in a closet in his room.

The girl, described as twenty years old, 5 feet 4 inches in height, dark hair and complexion, and when last seen wore dark blue clothing and a brown hat.

A SOMNAMBULIST'S FALL.

Descended Three Stories, but Escaped Uninjured.

WILL HOLD A CONVENTION.

Organized Labor to Work for Constitutional Amendments.

An important and animated discussion was held by the Central Labor Union yesterday upon the subject of calling a Labor convention in New York City, to propose amendments to the Constitution of the State of New York which will further the interests of organized labor.

The subject was introduced by Delegate Cuno, who announced that Feb. 14 next an election of delegates to the constitutional convention would be held in New York State.

Delegates Cuno, Archibald, De Costa, O'Neill, Enrich and Lovring discussed the subject, and decided to send a committee of five to New York City, to propose amendments to the Constitution of the State of New York which will further the interests of organized labor.

Delegate Cuno made a motion that the committee be instructed to discuss constitutional amendments based upon the laws for which it claimed declared unconstitutional by the courts of the state.

FACTS.

Dr. Copeland Supports His Statements.

WITH A CASH FORFEIT OF \$10,000.

To Go to Charitable Purposes.

ON THE VERY DAY THAT ANY ONE DISPROVES.

The Direct and Truthful Statements Made in His Open Letter—Here is an Opportunity for a Doctor to Benefit the Poor and at the Same Time Prove Before the Public That He is Misrepresented.

TO THE DOCTOR WHO ISSUED THAT \$5,000 CHALLENGE: I am only led to notice the effort to excuse yourself to your patients and the public, which you printed Wednesday, because you intimate that I pervert the facts.

I am excessively careful in dealing with such cases to state only such facts as can be easily and simply proved. I stated:

"I-That your 'interventions' were bogus, in that they were paid advertisements, and not written for or endorsed by the newspapers, as you try to make it appear they are."

"The advertising account books of the various newspapers which prove this. Even if you have been, as you say, interviewed in occasional instances by some good-natured reporter, that does not in the least detract from the general truth of my position, that your plan of running your advertising regularly as 'interviews' and trying to make the public believe that they were endorsed by the papers in which they are printed is a bold and foolish effort to deceive the public."

"2-I stated that you had had men and boys who were not doctors treating patients in your various offices, and pretending to be physicians."

"I have not desired to drag in people not directly interested in this matter, but it would not have stated them unless I was prepared to substantiate them. I have offered a forfeit of \$10,000 to be paid to any charitable institution in New York designated by the Mayor of the city on the day that you or any one else publishes in the newspapers any tangible evidence to show that what I have stated in the above is not true. If you wish to do so to the deserving poor, here is an opportunity for you."

"This is not a challenge. It is a bona fide offer, and I mean what I say. You have intimated that I am misrepresented in which you advertise your 'interviews' as any practical evidence disproving the statements I have made above and I will that day hand over to any institution designated by the Mayor the sum of \$10,000."

"W. H. COPELAND."

SEVERE METHODS OF LOCAL TREATMENT FOR CATARRH AND CATARRHAL DEAFNESS, AS PRACTISED BY SOME ALLEGED SPECIALISTS, ARE MORE TO BE DREADED THAN CATARRH ITSELF. A CASE COMES UNDER OUR OBSERVATION IN WHICH THE PATIENT WAS RENDERED TOTALLY AND HOPELESSLY DEAF, HIS EAR-DRUM BEING RUPTURED BY THESE CLUMSY OPERATORS.

CATARRHAL BRONCHITIS. A Case of Twenty Years' Standing Which was Relieved at Once by the New Lung Treatment.

A predisposition to catarrhal and bronchial trouble. A heavy cold. Continual hacking cough that nothing would check. Steady loss of flesh and strength. Night sweats and paleness and emaciation. Heic! Heic! spells of dizziness and faintness. Bronchial catarrh. "I could not walk a block without stopping for breath," said Mrs. Johanna McMahon, who resides at No. 648 1st ave. "I would be all out of breath upon the slightest exertion."

"I had the water brash and frequently heartburn. My heart would take spells of fluttering and I would feel a sensation of heaviness, as though death were near at hand."

"For seventeen days before visiting the physicians of the Copeland Medical Institute my head ached incessantly and I was nearly crazy. If I could sleep over I would grow dizzy, and upon waking suddenly I would feel like a drunken man."

"Since being treated by Dr. Copeland and Gardner I feel like a new man. I have not had a headache since. I have gained in weight and strength. I eat well and sleep well, a thing I have not done for many months."

"To make a long story short, I feel splendid, and gladly make this statement that others suffering as I did may be benefited by the new lung treatment."

"I wheezed when I breathed; you could hear me all over the room. There were pains in my side and back, sharp shooting pains that extended through under my shoulder-blades."

"I coughed very much, a racking cough that nearly tore me all to pieces. I could not sleep at all. I was nearly crazy. If I could sleep over I would grow dizzy, and upon waking suddenly I would feel like a drunken man."

"The treatment of these physicians is mild and agreeable, and they benefited me in every way. Why I walked all the way home from their office after being treated one week, a thing I could not have done before they treated me, and I feel so much easier and better, and I am so thankful to Dr. Copeland and Gardner that I cannot say enough in praise of them."

"THEY BURNED MY NOSE OUT." THE FREQUENCY WITH WHICH THIS COMPLAINT IS MADE INDICATES THAT SOME SELF-STYLED SPECIALISTS MIGHT TAKE A LESSON FROM THEIR OWN FAILURES TO CURE, WHICH ARE NOT ONLY FAILURES, BUT RESULT IN SOME CASES IN PAIN AND POSITIVE INJURY TO THOSE WHO ARE UNFORTUNATE ENOUGH TO HAVE PLACED THEMSELVES UNDER THEIR CARE.

SOUND AND COLOR LINKED. Mysterious Association of Temperature, Sight and Hearing. Experimental psychology is a new chapter in the temple of speculative science, of which the world has heard comparatively little, yet it has attained the dignity of an international congress held in London a few days ago, in connection with which a new branch, or rather twig—of science was defined as the psychology of observations conducted for a special purpose.

As a rule, the papers were somewhat too metaphysical to enlist the popular interest, says the Philadelphia Record, yet there was one by Prof. Gruber on the "Psychology of Observations," which dealt with a mystical theme in a way to fascinate the audience.

Prof. Gruber, in brief, after years of observation, is inclined to have found in the persons whom he has made a study of the blood is contaminated and some ailments must be given to relieve the same. He is inclined to believe that the blood is contaminated and some ailments must be given to relieve the same.

CATARRH OF THE STOMACH.

Poor Appetite with Violent Pains and Nausea After Eating—A Case That is of Interest to Every One Who Suffers from Indigestion—Terrible Suffering Night and Day.

Do you eat well? If so, you enjoy one of the greatest blessings of life.

But how many people are there who never know the meaning of the word 'eat'! The more the taste is pampered in the less the appetite manifests itself. Instead, perhaps there is a decided revulsion, and the food that one must eat to keep the body alive is forced into an unwilling stomach, only to cause intense pain and nausea.

No one who has suffered from catarrh of the stomach understands the terrible condition to which that disease brings its victim.

Here, for instance, is the case of Mr. Joseph Egan, a watchman in the Metropolitan Museum of Art, Central Park, and who resides at 324 East 83rd street. In discussing the matter Mr. Egan said:

"I have suffered from catarrh of the stomach in its most severe form for sixteen years. In the last few years my sufferings were terrible. I had a terrible gnawing in my stomach, which food did not satisfy."

"I had the water brash and frequently heartburn. My heart would take spells of fluttering and I would feel a sensation of heaviness, as though death were near at hand."

"For seventeen days before visiting the physicians of the Copeland Medical Institute my head ached incessantly and I was nearly crazy. If I could sleep over I would grow dizzy, and upon waking suddenly I would feel like a drunken man."

That Challenge

The Plain Truth About It.

Outside of all the evasions and complications with which the author of this so-called challenge has tried to cover it in order to confuse the public and to conceal the humiliation of his position, the affair simply amounts to this:

THIS DOCTOR ISSUED A CHALLENGE TO A CONTENT OF COMPARATIVE SKILL. DR. COPELAND ACCEPTED IT. THE CHALLENGER AVOIDED THE CONTENT BY STATING THAT HIS LAWYERS ADVISED HIM NOT TO ENGAGE IN IT AT PRESENT.

Stripped of all outside issues, the above contains all there is to it. The challenge stated \$5,000 as the amount. It was issued on the 8th; accepted on the 7th. On the 11th Dr. Copeland repeated his acceptance, urging acceptance. He deposited \$5,000 with the New York "World." On the 12th the doctor who issued the challenge stated he had sent some of money to various papers, sprung a number of new conditions, but urged his lawsuits as a ground of indefinite delay. Dr. Copeland visited some of the papers, but could find no one who seemed to know anything about the purpose or the conditions of the deposit supposed to have been made. Dr. Copeland's acceptance of the challenge was as simple as it could very well be made. He specified two things, that the money must be put up and that the names of the jury and of the test patients be printed, so that there could be no opportunity for evasion. He gave the challenger the selection of the jury, providing they be reputable physicians, and the selection of the cases, although he did not specify, as the doctor who made the challenge tries to imply, that they should be his patients. He wished to leave no ground for criticism or objection on the manner of his acceptance and to give the challenger no possible reason or excuse for failing to make good his challenge. Nothing was said when the challenge was issued about lawsuits. Two questions naturally arise: First—Did the challenger enter his lawsuit in order to protect himself from the results of his challenge? Second—If he did not want his challenge to be accepted what did he issue it for?

OF THE CASES COMING UNDER THE CARE OF DR. COPELAND AND GARDNER, THE MOST DIFFICULT TO CURE ARE THOSE WHICH HAVE BEEN MISTREATED BY SEVERE LOCAL TREATMENT, CAUTERIES, ACIDS AND ESCHAROTICS IN THE HANDS OF IGNORANT PRACTITIONERS ARE DANGEROUS WEAPONS AND HAVE PRODUCED FAR MORE DISEASE THAN THEY HAVE CURED.

The Copeland Medical Institute, 15 West 24th St., New York.

W. H. COPELAND, M. D., Consulting Physician. E. E. GARDNER, M. D., Consulting Physician.

Specialties: Catarrh, Bronchitis, Asthma and all diseases of the Eye, Ear, Throat and Lungs. Stomach and Bowels; Skin and Blood diseases. Eczema, hives, blotches, pimples, scabs, ringworm, scald, salt rheum; Kidney, Bladder and Urinary troubles—Diabetes, Bright's, gravel, piles, hemorrhoids, rheumatism, neuralgia, lumbago, sciatica, dyspepsia, chronic diarrhoea, dysentery, consumption, dropsy, liver complaint, jaundice, glandular tumors and all Chronic diseases.

WORLD'S BIGGEST HAMMERS.

Krupp's Gun Works Has the Largest and It Weighs 150 Tons.

The Philadelphia sight-seeing always takes a lively interest in viewing the gigantic trip-hammer used in the great iron and steel works at Pittsburgh, says the Philadelphia Press, as it is watching the results of their titanic blows.

"These Pittsburgh 'ponanders,' although as large or larger than anything in the United States, are but pigmies when compared with those used in the great iron works and gun foundries of Europe.

At the Ternoli works in Italy there is a hammer weighing fifty tons. It was cast in 1873 and is said to have taken ninety days to cool sufficiently to admit of its being set in position.

In Russia, rolling mills have two sixty-ton hammers in constant operation and the Ternoli works in France have
