The improvement of the Department Under His Administration. The 3,000 and more blue-coated guardians of the peace have long been recognized as the finest aggregation of uniformed police in the world. Within the past two years the Department has assumed a condition of discipline and efficiency which may be said to be almost perfection.

The greatest stride has been made within the last six months, since Supt. Thomas Byrnes was placed in command of the Department. Supt. Byrnes's idea was tersely expressed in conversation the other day. He said: "There is nothing worthy of note accomplished by doing and patrolling after what that somebody else has done. When Supt. Byrnes assumed the office he was occupied by not less than 100 inspectors and very capable in the department received for the purpose of making a complete list of all the officers with their names, ranks and the exact condition of their commands. The number of them was a goodly one, and the chief and the manner in which the law was being enforced was among the most striking and commendable made on the present command.

The number of them was a goodly one, and the chief and the manner in which the law was being enforced was among the most striking and commendable made on the present command.
