ANDREWS IS IN THEIR POWER.

Merely a Puppet in the Hands of a Big Tammany-Padrone Combine.

BLOOD MONEY FOR THE VOTES

Slave Drivers Look After the Ballots, Andrews Gives Work to the Victims.

COMMISSIONER, EXPLAIN THIS.

You Wrote One Thing to Father Bandini and Another to Mr. Romme.

What the padrone pays for the privileges which he enjoys at the hands of the city department officials is a question which ever since "The Evening World" started out to expose the evils of the slave system has been asked again and again. Employment agents, as the padrones are, with greater powers than were ever conferred upon any employment agent, and authority, as it seems, to dispense the patronage of some of the departments, to put men upon the payroll of the City Government, to demand a fee for doing so, and to rob the laborer of half his earnings, as well as to receive other blood-money, it is generally believed that they must return

for all the help needed. He did, in fact, actually employ 20 laborers through the Society on Monday night, one of whom being supplied by Vincenzo Pulamio, of 35 West street, and he put ninety-six men to work last night. This was during the same period, whether acting under orders or otherwise he went to the padrone's again, and while only ninety-six men were put to work last night at the full rate of \$1.00 per diem, several hundred men, hired by the padrone at 75 cents, were engaged cleaning the streets.

In the interval of the writing of Commissioner Andrews's first letter and last evening the padrone had made his power felt. The Commissioner weakened. The Benevolent Society, which has the interest of the laborer heartily, was cast aside and the padrone allowed to continue his policy of blackmail and infamy.

Commissioner Andrews stands in a peculiar position to-day, which he has thoroughly understood some time this afternoon, when the Rev. Father Bandini, call him as you will, the Rev. Father, thought of him. The Rev. Father will say that he would employ all the men the padrone would employ, and then turning round and employing the padrone's creatures instead.

The explanation is requested from Commissioner Andrews in a letter which he wrote on Feb. 2 last, to Mr. Romme, of 117 Mulberry street. Mr. Romme is recognized as an honest man. He has now charge of several contracts and continually employs several hundred men. He does not resort to any of the padrone tricks to rob the men.

He will recently had 1,000 men employed in some iron mines. The mines were not paid, and Romme came back to this city with the men. Anxious to see that the latter were enabled to give bread to their families, he asked Commissioner Andrews to give them some kind of temporary work. He received no reply to his first letter. Then he wrote again and again, until finally on Feb. 2, he received a reply, of which the accompanying is a fac-simile.

To understand the Street-Cleaning Commissioner's position it is but necessary to state that a few days afterwards he wrote to Rev. Father Bandini stating that he had never been aware of the fact that he could obtain men by any other means than through the padrone. He wrote that letter to the clergyman at the time he had Romme's letter before him. In reply to which he had stated that he had more men than he needed. He had no influence, and his men not procure employment.

To understand the committee which the Legislature intends sending down to investigate the padrone system, Rev. Father Bandini said this morning that he would do all in his power to help the committee in its task. "I have," he said, "taken up my coat and will stop at nothing until this fight is over. I am not assigning any man or so-called padrone. What our Society is doing is to get the padrone out of the city. It is hard for the outside world to understand how these people suffer under the system. If the committee wants to get to the bottom of it all I have no doubt generally believed that they must return

What we want is legislation. It is the general impression that the story which reached the juror having been in the hands of the juror, it is only to influence the decision of the Supreme Court, they wear the uniforms and in Albany, where, it is reported, he is trying to procure a stay for Cesar McKane.

SUTHERLAND IS NEXT

Coney Island Police Justice to Be Tried Monday.

He Is Charged with Oppression in the Election Cases.

Constable Andrew Scott Jamison's Trial Will Follow Sutherland's.

Justice of the Peace Kenneth P. Sutherland, of Coney Island, will be the first one of John Y. McKane's followers to be placed on trial. The charge against Sutherland is oppression in connection with the last election. Deputy Attorney-General Shepard appeared this morning before Justice Cullen, in the Brooklyn Court of Oyer and Terminer, and moved that the trial of Sutherland be set down for next Monday.

Lawyer Foster L. Backus, one of Sutherland's counsel, protested that, owing to the immense amount of work entailed on counsel by the McKane case, it would be impossible between now and Monday to give Sutherland's case the attention it required to bring it to trial on that day.

Justice Cullen, however, thought that the trial of the case should not be delayed, and stated that if it was found that counsel could not handle the case alone, additional counsel would be appointed. Mr. Shepard's motion was granted.

Mr. Shepard also moved that the trial of Constable Andrew Scott Jamison should follow after Sutherland. This was also agreed upon.

The report that McKane's lawyers had discovered something concerning the trial of the case, which would upset the verdict could not be confirmed this morning.

Justice Newton, who is also quoted as being engaged in running down the case, could not be found, and none of the clerks in his office could give any information as to his whereabouts.

KEARSARGE'S CREW.

City of Para Arrives with the Shipwrecked Men.

Transferred to Tugs and Taken to the Navy-Yard.

The Men Will Be Quartered on the Receiving Ship Vermont.

The steamship City of Para, of the Pacific Mail Steamship Company, arrived this morning with Admiral Stanton, Commander Heyerman and the officers and crew of the wrecked United States corvette Kearsarge on board.

The crew of the Kearsarge were transferred to the Government tug Marquette, and the men to the tug Traffic, commanded by Lieut. Bell. All were taken to the Navy Yard, where the crew will be transferred to the receiving ship Vermont.

Admiral Stanton will report to Admiral Gerhardt, commander of the North Atlantic Squadron.

The Kearsarge was wrecked on Bonadoc Reef while on her way from San Domingo to Nicaragua on the night of Feb. 2. She was under full steam at the time, but the sea was running heavily and the vessel was in danger of breaking up.

The men succeeded in getting to shore with one exception. Private Robinson, who tried to wade to the shore, was drowned.

Lieut. Brainerd, with a volunteer crew, sailed from Bonadoc to the island of Old Providence, ninety miles southwest of the wreck. From there he sailed to Colon, where he wired the news of the accident to Washington.

It is due to two kind friends of the late actress and to Miss Lewis, who was formerly a Post-office clerk, who saved to afford her body a decent burial.

STREETS IN FOUL CONDITION.

Melting of the Snow Reveals Heaps of Fever-Breeding Refuse.

The mild weather of the last two days has exposed the foul condition of the streets on the east side. Snow and ice have been concealing dirt and pestilence.

The streets were never in such a filthy, fever-breeding state in the worst days of the epidemic. As soon as the warm weather sets in and the rays of the sun begin to hatch the germs of disease, the health of the city is in danger.
