

CITY DUMP NUISANCE.

Odors from Riker's Island Reach the Annexed District.

Citizen Signs "The Evening World" to Protest.

Commissioner Andrews Says He Is Trying Another Scheme.

The Riker's Island nuisance is more widespread than it appeared to be at first. The people of College Point are not the only sufferers. The nasty odors arising from decayed garbage which is deposited in the city's dumping ground on Riker's Island are wafted inshore and the residents of the Twenty-third and Twenty-fourth wards get the full force and effect of them, too.

The first step in that direction will be taken to-night, when a mass-meeting will be held at Loeffler's Hall, Willis and Third avenue, to protest against the further use of Riker's Island as a depository for the city's refuse.

Riker's Island is between the shores of the Annexed District and College Point. The unhappy inhabitants of both are thoroughly worked up over the matter, as will be seen from the following letter:

To the Editor: I beg sufficient space in your valuable paper in which to complain, as a representative of the citizens of our neighborhood, of the intolerable nuisance existing at Riker's Island, which so seriously threatens the health of the residents of both College Point and the district directly opposite on the New York side.

The odors emanating from the mass of filth and garbage which is daily deposited in the immediate vicinity of our homes are always wholesome, and at times are positively stifling. I cannot describe the nature of the filth which is deposited there, but it is so offensive to the senses that we are obliged to keep our windows closed, and especially at this season of the year, are especially essential to good health, we are forced to breathe night and day the putrid and sickening miasma which is wafted from the island.

From the same cause our young people are deprived of the invigorating and pleasurable effects of bathing, as our bathing place at Oak Point is rendered unfit for human beings to enter, owing to the collection of refuse, rubbish and other filth which is deposited there from the tons of garbage which are deposited by the city at Riker's Island.

The inhabitants of our district are most severe, and justly so, in their denunciations of this disgusting nuisance, which, as you are well aware, has already imperiled the health of many of our families, and in some instances, has even resulted in the death of our children.

As the law does not recognize an accumulation of small thefts as a specific charge, the collector of the same has retained \$1.35, which he had collected from Mrs. Mathilde de Marais, of 113 Alabama avenue, for the same reason.

The American Surety Company is the bondsman of the various collectors. In this case, the collector claims that he had taken the money while employed in collecting small sums from the various policy-holders of the company.

Some time in March last he disappeared. When an inspector was placed on his route it was found that he was a defaulter. He has since been arrested.

MR. FAGAN'S REVENGE.

Accuses His Former Boarding-Master of Robbing Him.

Detective Nilon, of the East Thirty-fifth street station, arraigned John McDonald, thirty-three years old, of 332 East Thirty-eighth street, and Patrick Fagan, forty-six years old, of 733 East One Hundred and Fifty-sixth street, at the Yorkville Police Court today.

He charged the former with being a suspicious character, and the latter with inciting to riot. Fagan, who is a well-to-do watchman, Fagan lived with him for five years, but was put out a few days ago.

McDonald was arrested at 2 o'clock this morning as he was returning home after witnessing a prize fight at Jamaica.

It appears that on the night of June 16 last a Bohemian cigar-maker, named Frank Pinta, of 234 East Thirty-eighth street, was robbed by the collector, who was drunk, and Pinta had him arrested.

At the station-house Fagan repeated the remark, and when questioned by Detective Nilon, said he saw McDonald steal the jewelry and money from Pinta.

McDonald denied the charge of theft. Justice Feitner held both men for examination.

KELLERMAN A DEFAULTER. Confessed that He Stole Small Amounts White Drink.

Jacob Kellerman, twenty-two years old, living at 373 Ewen street, Brooklyn, was tried this morning in the Gates Avenue Police Court on a charge of larceny made by Benjamin Monroe, of the American Surety Company, of 186 Remsen street.

Kellerman was an agent of the Prudential Insurance Company, of New York, employed in collecting small sums from the various policy-holders of the company. Some time in March last he disappeared.

When an inspector was placed on his route it was found that he was a defaulter. He has since been arrested.

As the law does not recognize an accumulation of small thefts as a specific charge, the collector of the same has retained \$1.35, which he had collected from Mrs. Mathilde de Marais, of 113 Alabama avenue, for the same reason.

The American Surety Company is the bondsman of the various collectors. In this case, the collector claims that he had taken the money while employed in collecting small sums from the various policy-holders of the company.

ANOTHER BOOM IN SUGAR.

It Gave Tone to the Market, Which Opened Dull.

Chicago Gas Goes Off on Judge Winides's Statement.

Speculation came practically to a standstill this morning, the great strike out West being the cause of the prevailing indisposition to engage in new ventures.

The railway list yielded 1-8 to 1-2 percent, but the sales were extremely light, and the bears were afraid to extend their lines, despite the "tie-up" on the Western roads.

Shortly before 11 o'clock Sugar was taken in hand, and the price was marched up rapidly on the shorts from 99 1/2 to 101 3/4. This gave tone to the whole market, and the price of the other commodities was generally higher.

At 3 o'clock the mercury here scored 68, and steadily mounted thereafter, although there was no danger at any time that the degree point, the record of 74, would be reached.

At the same hour Boston was refreshing itself to 70 degrees, Albany, 76, Washington, 75, Baltimore, 70, St. Louis, 70, St. Paul, 64 and New Orleans, 60.

The coldest was at the coldest Eastport, Me., at 50.

Forester Dunn said that the storm over Minnesota yesterday had moved off northeast into Canada, and the only southerly winds are from the south.

The Old Dominion Line steamer Guyandotte, which was on her way to the south, was held up by a dense fog, and shortly after 1 o'clock this afternoon proceeded to her pier at the foot of Beach street, North River.

She had gone ashore on Homer Shoals.

HUMIDITY AFTER A RECORD.

Ninety-five Per Cent. of Moisture in the Atmosphere To-Day.

The humidity took the visible form of fog, that lay over the town and harbor as thick as a Navaho blanket.

Fortunately it was not very warm, but the day was oppressive for all that.

At 8 o'clock the mercury here scored 68, and steadily mounted thereafter, although there was no danger at any time that the degree point, the record of 74, would be reached.

At the same hour Boston was refreshing itself to 70 degrees, Albany, 76, Washington, 75, Baltimore, 70, St. Louis, 70, St. Paul, 64 and New Orleans, 60.

Regular value 30c. to 50c. pair.

SPRINKLER AFTER DALY. Hyers Wants Water Supplied Him at 2 Cents Per 100 Gallons.

A motion was made before Justice Barrett in Supreme Court, Chambers, to-day by Lawyer A. B. Boardman, counsel for Moses G. Hyers, for a writ of mandamus compelling the Commissioner of Public Works Michael T. Daly to furnish him with Croton water for sprinkling the streets at 2 cents a hundred gallons.

The motion was made under the law of 1904, which went into effect in May last, and which provides that the Commissioner of Public Works shall furnish to private contractors having the largest number of subscribers for street sprinkling water at three cents a hundred gallons.

Hyers says he has demanded the water of Commissioner Daly, but has been refused. Assistant Corporation Counsel Connolly advised that the Commissioner was acting under advice from the Corporation Counsel.

Justice Barrett said that the new law of 1904 was effective regardless of any previous agreements, and seemed on the point of issuing the writ when his attention was called to the fact that the new law provided that the water should be furnished to the contractor having the largest number of subscribers.
