LAST EDITION. DEAD ON THE BEACH.

A Sailing Party Finds the Body of a Murdered Man at Rockaway Point.

HIDDEN UNDER SOME CANVAS.

Three Bullet-Holes in His Head and Stab-Wounds on One Hand.

MIDDLE AGED, WELL DRESSED.

The Body Had Been in the Water—Belief that the Man Was Killed and Then Robbed.

A mysterious murder was committed on the beach at Rockaway Point, almost directly opposite the Oriental Hotel, at Manhattan, some time late Saturday night.

The mutilated body of a middle-aged man was discovered shortly after noon yesterday, and later in the day the peculiar actions of a well-dressed stranger, who appeared on the scene, added to the mystery.

That there was a dead man lying on the beach became known to a number of persons in the course of the afternoon, but none of them seemed to think it necessary to notify the police or county officials, and six hours after the body was first seen it was still there, untouched, and partially covered with a piece of old canvas, which had evidently been placed there originally by the person or persons who committed the deed.

Small parties of the other authorities immediately to approach sufficiently close to examine it, and they must have gone away knowing that a man had been killed and his body left there to fester.

The mysterious stranger referred to was the only one who seemed to comprehend the situation, and he suggested and seemed desirous of informing the ironer and the other authorities immediately. He claimed to live in the neighborhood, was well dressed in a blue yachting suit and seemed a man of means and education. He left the scene at about 1 o'clock in the direction of Rockaway, but up to 6 o'clock he had not been heard of nor had he been seen by the coroner as he said he would.

The body was found by Charles Jones, of 37 Gates avenue, Brooklyn, a clerk in the employ of H. N. Squire's Son, 13 John street. He was out sailing with his brother-in-law, Harry Hansen, of 120 Gates avenue, Brooklyn, and John Mayo, also of Brooklyn.

"We started out at 7:30 o'clock in the morning in a small yacht from Cedarville, opposite Sheepshead Bay, for a sail to Sandy Hook," said Mr. Jones this morning. "On our return at noon we made for Rockaway Point, and anchored opposite the Oriental Hotel at Manhattan Beach.

"We went ashore in a rowboat, which we beached, and started for a short walk around the point. I was in front, and he came after me. Lying on its back, face upward, with an arm outstretched, was the dead body of a man of about forty years old. The face was covered with blood and slightly swollen. In the left temple was a bullet hole, another in the corner of the left eye near the nose, and still another back of the right ear.

"The left hand was black and blue, the discolorations probably being the result of blows from a cudgel. The right hand was under the right hip and with a few inches of the handle of a revolver which protruded from the right hip pocket. The hand was covered with deep knife wounds and horribly lacerated with ugly looking cuts. The body had been in the water, but not long enough to effect its appearance.

"It was dressed in a fairly good black suit of clothes, white shirt and white stockings. The rest had turned up from the bottom, and we couldn't see whether or not the pockets contained a watch or if they had been rifled. We didn't care to touch the body, and therefore didn't make a close examination as we might have done.

"While we were looking at the dead man, a stranger came up, who seemed to take a lively interest in it. He said the authorities ought to be notified, and as he seemed willing to attend to the matter, we let him do so. He left in a rowboat. I think he said he lived in the neighborhood.

"We rowed back to our boat and sailed around on the outside in plain view all afternoon—until 6 o'clock, in fact—waiting for the coroner to appear; but he evidently had not been notified, for he

AMUSES THE ACTORS.

But "Society" Stunned at the Regild-Ronalds Wedding.

She Is Fully Seventy and Worth Many Millions.

He Is "A Poor Player" and Scarcely Half Her Age.

The public announcement to-day of the Regild-Ronalds wedding brings the Rio and the "400" together on terms of equal enjoyment in the same event.

The actors of the town are very much amused and society, no doubt, is not a little astonished. In the first place, the bride is more than seventy years old, while the groom is still in his twenties.

Further, the lady is the possessor of millions of money, while the gentleman is "a poor player," of the proverbial fortune of that class.

Both bride and groom are known in their circles for their eccentricities, and, altogether, the union seems to have many strong points of eminent propriety despite the wide difference in the ages of the contracting parties.

Charles A. Ronalds Regild and Mrs. Adele A. Ronalds were married Thursday last at New Rochelle by the Rev. Dr. Barrett. The nuptials were of the nuptials was made with due deliberation to-day.

Theremin Regild, as the groom is known in his profession, is a young actor, formerly connected with the company of Augustin Daly, and was married to Rosa Vokes. As a light comedian he was clever and popular, and socially he was a favorite among the members of the dramatic profession. He has a strongly marked taste for dress and fashions, and his wardrobe is one that has just made comes as a rare surprise to many of his stage confederates, for from a purely utilitarian standpoint he has done very well indeed.

His bride is the widow of Thomas Lorillard Ronalds, who died nearly twenty years ago, leaving a fortune that is estimated in seven figures. The widow is a woman of health and money, and is now living at 40 West Forty-fifth street and a country place at Avenel, in New Rochelle, where she has a large estate.

Although upwards of seventy years of age, the widow Ronalds has always preserved a youthful vigor, and she is a large woman, with a fondness for the colorful and the gaudy. She is a woman of a century ago, and cannot fail to attract attention wherever she appears.

Her husband was a man of means and in fine weather while in town she makes sport in a livened turnout, two or three times a week.

For the past year Regild has been observed as her constant companion. The neighbors in their city street, who cannot recover easily from their astonishment at the marriage, declare that they have seen the gentleman and his companion was her nephew.

Mrs. Ronalds had a box at the opera last night, and she was known here to be with her. Her relatives and old family friends obtained a ticket for the performance, and she was going to help to a profitable direction in the city.

It is reported to have been a brilliant, although rather private event, and the few guests who were present were those who were known to the newly married pair as still residing there, and the house in town is said to be a fine combination of artistic magnificence and modern conveniences.

The wedding was held at the residence of the bride, and the ceremony was performed by the Rev. Dr. Barrett. The bride was dressed in a white gown, and the groom in a dark suit.

LAUNCH ACTIVE SUNK ALL SIX WERE SAVED.

Sent to the Bottom of North River by the Ferry-Boat Fanwood.

Collision Opposite Pier 14 Late This Morning.

The Three Men on Board Rescued by a Tug.

As the result of a collision with the Central Railroad of New Jersey ferry-boat Fanwood, the steam launch Active lies a bruised and battered hulk at the bottom of the North River, opposite Pier 14.

But for the promptness of Capt. Van Wart, of the Fanwood, the three men comprising the crew of the launch would probably have found a watery grave.

At 10:40 o'clock, as the Fanwood was on her way from Communipaw to her pier at the foot of Liberty street, Capt. Van Wart, who was at the wheel, noticed a small black steam launch proceeding leisurely along up the river about twenty-five feet from the shore.

The Fanwood blew her danger whistles, but the strong tide was too much for the little craft. Then the Fanwood reversed her engines, but a collision at this time was inevitable. The Fanwood struck the Active amidships with the bluff of her bow and bowled her over.

The cutterwater threw the launch out of the water, and the three men struggling in the water would have been struck by the paddle-wheel if it had not been stopped.

As it was the three men, consisting of the captain, engineer and deck hand, swam to the launch and were rescued until assistance arrived. This came in the shape of the tug R. J. Barrett, which was lying at pier 6 when the accident occurred.

Capt. Dick Barrett immediately put out between his boat and the tug Glen Island as to see which should get there first. The tug was the first to reach the launch in short order. First Mate Mox threw a life line to the men, and two of them were hoisted aboard the tug.

Mox was nearly dragged overboard in his endeavors to save the men. The tug was able to get a good haul on the launch, and the Captain dragged on board.

The name of the engineer was James Keating. The men were rescued in twenty minutes before they were rescued.

THE JESSIE G. H. PARTY RESCUED BY THE SLOOP.

Carrie Potter.

THREE MEN, THREE WOMEN.

Their Yacht Struck by a Squall While in the Lower Bay.

MR. SMITH QUITE A HERO.

Cannot Swim, but Managed to Save Miss Mamie Conlon from Drowning.

The mystery of the sunken yacht is cleared up. The six persons who were in the craft when it upset in the bay yesterday were all saved. The six persons in the party were all Brooklynites.

They were Charles Ellis, and Theodore Smith, of 315 Sixth street; David Anderson, of 120 De Kalb avenue; Miss Della Gress, of 100 Fifth avenue; Miss Mamie Conlon, of 429 Hoyt street, and Miss Rose Darcy, living on Fourth-ninth street.

They had frequently been out before and felt perfectly safe as Andrade was considered experienced as a sailor. They engaged the sloop-yacht, Jessie G. H., of George Hyman, at the foot of Forty-fifth street, Brooklyn, and started from the boat-club shortly before four o'clock, with Cony Island as the objective point. It was somewhat equally at the time.

The boat reached a point some two miles off Swinburn Island when a squall struck the boat, and the crew was thrown overboard. Mr. Smith, who could not swim, clung to the mast and was rescued by the sloop.

Mr. Smith, who could not swim, clung to the mast and was rescued by the sloop. The other two girls succeeded in climbing up on the side of the boat, and reached the dingy, and cutting it loose, they were able to get ashore.

The boat only held three safely, and with four already in the dingy, the crew was thrown overboard. Mr. Smith, who could not swim, clung to the mast and was rescued by the sloop.

HYDRANTS USELESS.

Bayonne Firemen Unable to Get Water to Quench Fire.

Big Plaster Factory and Three Other Buildings Destroyed.

A Suspicious Fire Last Week Added to the Mystery.

BAYONNE, N. J., Aug. 20.—The police of Bayonne and the Fire Department of that city think they have to do with incendiaries.

At 12:45 o'clock this morning flames burst forth from the building occupied by the Eastern Plaster Board Company on First street. These buildings consisted of one brick structure 400 feet long and three adjoining frame buildings each 150 feet long. These buildings had not been occupied for nearly two years. A night watchman supposed to be in charge of the buildings, but investigation demonstrates that he was not at his post of duty last night.

At 1 o'clock this morning an alarm was sent out from the box at the corner of First street and Avenue A, which is the extreme point of Bayonne City at the intersection of Newark Bay and the Kills.

The engines quickly responded. The firemen were amazed when they tried to take water from the two nearest hydrants, and learned that both had been tampered with. The hydrants were useless. Connection was quickly made with other hydrants in the vicinity, and the firemen toiled for hours. The precise amount of insurance is not known.

It was not until 7 o'clock this morning that the fire was extinguished. The last engine did not leave the scene until 10 o'clock. The fire destroyed the buildings, and the contents were probably amount to \$100,000, about \$60,000 representing the buildings which had been insured. The precise amount of insurance is not known.

LAST EDITION. NOW FOR BIG DISCLOSURES.

Kilpatrick Will Give Names of Builders Who Paid Blackmail.

ALL BUT TWO, HE SAID, DID SO.

Kerwin Will See Him in Private and Then Something May Drop.

HE HAD WARNED M'LAUGHLIN.

Told Him When Captain of Ward Man Burns's Attempted Extortion.

It was nearly 11 o'clock when the Board of Police Commissioners resumed the round of trials of police officers at Headquarters to-day.

Mr. Wellman said prior to the resumption of the proceedings that no new cases would be made public until the end of the present quintuple trial was in sight.

It is almost definitely settled that the next officer to be placed on trial will be Capt. John T. Stephenson.

The Commissioners and Mr. Wellman propose to cut a large and juicy watermelon for a surprise party to the public in the trial of Stephenson.

There will rely for his conviction upon witnesses who testified before the Lexow Committee, for the charges made by the man Ryan fell to the ground upon investigation so far as Stephenson is concerned. The checks alleged to have been paid to "the Captain," it appears, were all drawn six months before Stephenson was in the Fifth Precinct and in command.

"Witness Ryan is a cousin of Capt. Ryan," said Mr. Wellman to-day, "and he has discovered a doubt as to whom the checks went to."

The case against Capt. Stephenson is said to be a bronchial case, if the witnesses are to be believed, and the witnesses, it is said, will be reputable business men.

Mr. Wellman's officers brought exactly thirteen of the most disreputable-looking women in the Fifth Precinct and corralled them in one of the ante-rooms till their turn should come to appear in court. The names of the women were given to the Lexow Committee, for the charges made by the man Ryan fell to the ground upon investigation so far as Stephenson is concerned. The checks alleged to have been paid to "the Captain," it appears, were all drawn six months before Stephenson was in the Fifth Precinct and in command.
