The shapes and materials represent a most extensive variety of detail—to conform with the widely differing types of feet.

A perfect foot is hard to attain.

If perfect by nature, its pure form should be preserved by correctly formed shoes.

If imperfect by nature it can be remedied by the judicious selection of shoes.

The Sorosis, scientifically constructed shoe, is produced after much study of nature's needs.

Sorosis Shoes for Boys and Girls are particularly recommended for their hygienic qualities.
