

MONKEYS FIND AN EASY MARK IN PROF. HAGGERTY

Collect His Bananas Greedily as He Tests Their Imitative Faculty.

SILENT AS TO RESULTS.

Won't Talk of His Discoveries, but Chimpanzee May Write Book About Him.

cray graduates of the university. At low rate, they are highly educated and extremely useful as the connecting links—between Haggerty and the other inhabitants of the cages.

Because it was a very hot day and news was dull, the City Editor sent a reporter to the Bronx Zoo to see how Melvin Haggerty, a Harvard Professor, is getting along in the monkey house, where he is spending the summer in the interest of Cambridge culture.

One of those talkative little birds, called a stool pigeon passed the word here the other day to Lieut. McMullen, of the Headquarters staff, that two members of the Local Brotherhood of House Trimmers and Indoor Finishers were violating all the rules of the union by robbing the same house every day, all day, in broad day.

Just to make certain sure, the trail was entered outside. They had to wait nearly two hours and it was a very weary wait—before doors came the gentle strangers. They traveled slowly, each being laden with a heavy value and many bundles that he had to do stunts getting out of the doorway.

Another apparatus used by the Professor is a rope operating through a pulley suspended from the ceiling. A banana is attached to the upper end of the rope, while the lower end dangles just above a hole in a platform resting under the apparatus. The trick monkeys lower away on the rope until the fruit descends within reach.

Yesterday Harrigan, a big muscled monkey, was led out of his cage after he had seen the trick performed a number of times. Plainly showing lack of education, Harrigan grabbed the rope violently and pulled the whole business down. The Harvard monkeys chattered their disgust as Harrigan ran off with the banana.

Prof. Haggerty is taking his job very seriously, and does most of his stunts while the public is not around. So he goes up to the Zoo expecting to see a free show.

gates. Haggerty had his clothes on. Following up to the cage, the reporter asked pleasantly: "Does it seem sort of natural in there?"

Although his name does not sound as if he came from Harvard, there can be no doubt that Haggerty knows his Back Bay and that he is bearing well in mind that a certain other illustrious alumnus is going to get \$1 a word for all that he says about animals. Therefore, Mr. Haggerty is not going to give

grants to the public prints what he is finding out from his association with the monkeys. If it does feel natural for him to be with them, he's not going to tell the reporters, and he did not tell this one. But once out of the cage, the young man of science is quite like other folk, and talks enthusiastically of the possibilities of discovering just what monkeys think of the rest of mankind.

Something Coming to Haggerty. He's been with the monkeys a whole week now, and already he knows more

tricks than Marcelline ever dreamed of. It is stated on good authority, however, that Haggerty will not be turned from his serious purpose by any tempting offers he may get from the magazine to study monkey psychology to the end that Newport may not have anything on Harvard in the future. His able assistants are two cultured ring-necked pheasants who are said to be hon-

ors. Haggerty had his clothes on. Following up to the cage, the reporter asked pleasantly: "Does it seem sort of natural in there?"

125th St. West, Between Lenox & Seventh Aves.

S.S.S. CURES S.S.S. MALARIA

Malaria is due to impurities in the blood which destroy the rich, healthful qualities of the circulation, and reduce it to a weak, watery fluid. The body is then deprived of its necessary nourishment and strength, and is unable to resist the countless disorders that assail it, and the general system suffers in consequence. The appetite fails, digestion is weakened, chills and slight fever are frequent, while the sufferer loses energy and ambition. Boils, skin eruptions, and some times sores and ulcers follow when the blood becomes deeply polluted with the malarial germs. Both a tonic and blood purifier are needed to cure Malaria, and S. S. S. is best fitted for this work. It is the most perfect of all blood purifiers and at the same time an invigorating, healthful tonic. S. S. S. goes down into the circulation, and moves every trace of impurity or poison, and gives to the blood the health-sustaining qualities it needs. It cures Malaria thoroughly and permanently because it removes from the blood the germs and poisons which produce the disease, and while doing this tones up and strengthens every part of the system. Book with information about Malaria and any medical advice furnished free to all who write. THE SWIFT SPECIFIC CO., ATLANTA, GA.

Clearance SIEGEL & COOPER Co.

MEET ME AT THE MOUNTAIN. NO CONNECTION WITH ANY OTHER STORE. J.B. GREENHUT, PRESIDENT.
