

POLICE GET NEW CLUE TO SLAYER OF GIRL IN POND MYSTERY

Last Man Known to Have Seen Hazel Drew Alive Declares She Was Walking Toward Uncle's Farm and Detectives Now at That Place.

(Special to The Evening World.)

TROY, N. Y., July 14.—A good lead toward the solution of the mystery surrounding the murder of Hazel Drew, whose body was found in Teal's Pond on Sunday, was obtained to-day in a statement made by Rhody Gunderman, a farmer, who declared to District-Attorney Jarvis P. O'Brien that he had seen the girl mounting the hill toward the farm of her uncle, William Taylor, last Tuesday night.

The Taylor farm is one-third of a mile from the scene of the crime and the girl was alone on the road when Gunderman drove past her on his way to Averill Park. He was accompanied by Frank Smith, a feeble-witted farm hand, whose rather incoherent statements to the detectives yesterday led them to believe that he knew more about what had happened to the girl than he cared to tell.

Smith had told that he saw Hazel Drew alone on the road a quarter of a mile from her uncle's farm and that he had spoken to her. Gunderman had not come forward with any statement and was not found until to-day. His story, however, corroborates all that Smith said, and makes it certain that the young woman was alone, fifteen miles from her home, on Tuesday night. It also establishes clearly that Smith did not see her again that night, as he drove to Averill Park with Gunderman and spent the night there.

"I left my farm about 6 o'clock Tuesday night to drive to Averill Park to pick up a fishing party from Troy," said Gunderman to-day. "On the way down from my farm I picked up Smith, and he went with me to the park.

"Just below the road leading to Taylor's farm and one third of a mile from Teal's Pond we met Miss Drew. Smith said, 'There's the oldest daughter of John Drew,' and when we passed her she said, 'Hello, Frank' to Smith. Frank called her 'Hazel' and we drove along. As I looked back I saw her going up the hill toward her uncle's farm. She carried her hat in her hand and was swinging it at her side."

Gunderman and several other witnesses saw Smith about Averill Park as late as 11 o'clock at night. While there Smith met Frank Richmond and Mrs. Richmond. Richmond is employed on the Taylor farm. Smith said to him that he had company up at the farm, but Richmond replied that he did not know anything about it. He had not seen Hazel Drew when he left there that evening, nor had he heard she reached there.

Taylor Denied Seeing Her. "I drove home with my wife about 11 o'clock," said Richmond to-day, "and when we got home I said to Mr. Taylor, 'I hear that Hazel Drew is up here.' Mr. Taylor said then, 'If she is up here I have not seen her.'"

Richmond drove along the same road a short time after Gunderman had passed along it, but he saw nothing of the Drew girl. The farm now occupied by William Taylor, the uncle of the girl, was formerly run by John Drew, her father.

As far as the detectives have learned the two families were not on very good terms. William Taylor is regarded by his neighbors as an eccentric and whimsical old man. A year ago it was reported in the district that he had tried to kill himself by cutting his wrist.

The body of the murdered girl was interred at Barbersville Cemetery. Funeral services were held in her home in Troy, a great crowd gathering about the house, while Rev. George P. Perry, of the First Baptist Church, conducted the ceremonies. Only the immediate members of the family went to the grave.

Detectives late this afternoon subjected Smith and Gunderman to a severe questioning, hoping to break down the remarkable similarity of their statements relative to meeting Miss Drew. Accepting these stories of Smith and Gunderman as true, the authorities have yet to explain where Miss Drew was from 10 o'clock Monday morning, when she was going to Waterville, until 7 o'clock Tuesday evening, when Smith and Gunderman say they met her one quarter of a mile below her uncle's farm house, near Teal's Pond, a lapse of thirty-five hours.

Drowned Teal's Pond. Teal's Pond, where the body of Hazel Drew was found, was drained this afternoon in the presence of District-Attorney O'Brien and his corps of detectives. There was two feet of water in the bottom of the pond. It will be late to-night before the authorities will be able to drag for the missing suit case, which the girl carried when she left her aunt Monday morning at 10 o'clock. Efforts will also be made to find her purse and the weapon used in killing the girl. The District-Attorney believes this evidence is beneath the pond's soggy bottom.

District-Attorney O'Brien has questioned all the employees on the trolley road running between Troy and Averill Park. None of them saw Hazel Drew on Tuesday afternoon, and this fact has led to the conclusion that she made the journey of fifteen miles to where she was last seen in an automobile. No one has been found, however, who saw the auto.

The prosecution now has twelve detectives working on the case, the majority of whom were assigned to-day to confine their attention to the neighborhood of the Taylor farm. Dr. Boyce, of Averill Park, who examined the body of the murdered girl, said to-day that she was not only killed over the head before her body was cut into the pond, but also strangled.

CONSUMPTIVES SAVE PAINTER DANGLING IN AIR

Weak Patients at St. Joseph's Form a Life Line and Prevent a Fall.

MAN'S COMPANION DEAD Scaffold Gave Way as Two Painters Worked and One Plunged to the Ground.

Half a dozen consumptives, some of them near death from the plague, united their feeble strength to-day at St. Joseph's Hospital, in the Bronx, to save a helpless workman, dangling in air, from the death that had just overtaken his comrade, lying lifeless and crushed on the stones forty feet below. St. Joseph's, which is a Catholic institution for the care of victims of tuberculosis, faces on Brook avenue at One Hundred and Forty-third street. For some weeks two painters, Emil Kann, aged sixty-one, and Thomas Angeline, aged thirty, have been going over the metal and woodwork on the outside of the building touching it up. To-day they were working at the front of the hospital, just below the level of the fourth floor balcony.

They sat on a wooden scaffold that swung by ropes from the roof, their legs dangling in space. A number of the male patients, glad of any diversion in their loneliness, sat in easy chairs along the porch watching the painters.

Without warning one of the ropes slipped and gave way. A wide board on which the men were perched dropped from the horizontal to the perpendicular. Kann, the older, less muscular man, slid screaming with fear and clutching vainly at nothing, off the end of the plank and hit the flagging of the courtyard. He never moved after he struck. Angeline, who had been at the end of the scaffold, which still held, felt it going. He grabbed for the tin cornice just above his head. His fingers closed on it and he swung clear just as the scaffold straightened out below him, hanging straight up and down like a state pencil on a string.

The horrified consumptives had fallen back at the crash and the despairing cry of the doomed man. They tumbled over each other getting indoors. Minutes passed before any of them ventured back to peer fearfully over the balcony.

Clung With Desperation. A face in desperate agony looked up at the falling scaffold still hung by the grip of his hands, too far gone to call out. The edge of the tin cornice was crumbling under his weight. Every second slowly he held his hold, painfully, until an inch at a time as the rusted metal broke away. Already he had torn off two feet of it. Then he was too weak to get abled-bodied help. There were no internes or able-bodied nurses on in that ward or the wards of the top floor for the moment.

Formed a Life Line. Six or eight of the patients rallied together and they bent over the railing and laid hold of the congested wrists of the painter with the best strength they could muster. The men in turn hugged these two leaders around their waists, and with a great gasping chorus and a straining of every muscle this human chain of dying men strained backward, pulling the spent man, who dangled like an anchor at the end of their last link, up, over the cornice and across the balustrade to safety. There they all dropped together on the balcony in a breathless, clinging heap.

Couldn't Keep a Dog, So HE RAN AWAY FROM HOME. Little Henry Harff Took the Pet Along and Begged Food for Both.

Because his father would not allow him to keep a little yellow dog that he had picked up on the street, eleven-year-old Henry Harff, of No. 430 Greenwich street, ran away from home ten days ago. Since that time boy and dog have been sleeping in hallways and cellars and dividing what food the child could beg between them.

The boy's father, John Harff, is a fish dealer. He told Agent Curran, of the Children's Society, about the matter. Curran saw a little fellow leading a dog at the end of a string at Hudson and Leroy streets yesterday, and promptly took him into custody. It was the lost boy, and to-day he was taken before Magistrate Wyatt in the Children's Court. "I shall send you to the Catholic reformatory," said the Magistrate. "You will get plenty of work to do there. Then what's to become of the dog?" cried the small boy. The Magistrate told him he would send the dog to the Bide-a-Wee Home for Dogs.

DRY SPELL KILLS CROPS. Long Island Farmers Lose Heavily Through Lack of Rain.

Reports from the farming districts of Long Island indicate heavy losses by reason of the failure of early crops, due to the continued dry spell. The potato and corn crops are said to be practically destroyed for lack of rain. For a depth of eighteen inches the soil is said to be without a particle of moisture. Only on such small farms as are artificially irrigated have the crops been preserved.

In and around Setauket, Wading River, Huntington, Northport, Green Lawn, and, in fact throughout the entire north shore and central points of the island, farmers are in despair. In many of the churches in these sections prayers have been offered up for the preservation of the crops by generous rains.

Victim of the Pond Murder Mystery Who Met Death at Strangler's Hands

MISS HAZEL I. DREW.

Americans Surprise Englishmen When Sheppard Wins Race

(Continued from First Page.)

Tait, of Canada, finished fourth. The runners held well together until the last hundred yards. There was great excitement over the finish. The Englishmen, who were confident the Americans would not get better than third place, even if they had a look in, were greatly disappointed.

The time in the final heat was two full seconds off the record, made by Lightbody, of Chicago, at the St. Louis games in 1904.

Brilliant Scene in Stadium. The sun shone brilliantly at the Stadium this morning, giving promise of perfect weather for the second day of the Olympiad in contrast to yesterday's drizzle which threw a damper over the opening ceremonies. The flags of all the nations that have sent athletes to compete in the games, with which the stands are decorated, floating in a light breeze, added a further touch of brightness to the scene, while among the competitors the improved conditions had a good effect, lightening their spirits and increasing their enthusiasm.

The spectators, however, were slow in coming, and when the hammer-throwing, the first event on the programme, commenced the stands were almost entirely deserted.

The finals for the 300-kilometre cycling race is also down for this afternoon, and Wientis has qualified for this contest.

In the draw for the three-mile team race the United Kingdom, Italy, Holland and Germany were drawn for the first heat. This insures a victory for the United Kingdom. In the second heat America will have to compete against Canada and Sweden. This is a handicap for the American team, for should it win, victory will follow a hard struggle, while the United Kingdom should win the first heat easily.

Americans Take Heat in Team Race. In the first heat of the three-mile team race the English team was the only one that qualified.

The American team, which won the second heat of the three-mile team race, was composed of George V. Bonham, Irish-American Athletic Club; G. A. Dull, University of Michigan; J. L. Eisele, New York Athletic Club; H. L. Trube, New York Athletic Club; and Harvey W. Cohn, Irish-American Athletic Club. Canada did not compete in this heat. The other teams taking part were French and Swedish. French was second, Trube was third, a Frenchman was fourth and Cohn was fifth. The Swedish set the pace until the last mile, when Eisele and the other Americans came to the front. Boulton took the lead 60 yards from the finish, made a fine spurt and crossed the line four or five yards ahead of Eisele. Trube was only a little distance behind Eisele.

American Takes Fourth Place in Bisley Shoot. BISLEY, July 14.—Major Martin American, was fourth in the Halford Memorial rifle shooting contest here to-day. His score was 14. Hesston, also an American, scored 14. Both won small prizes.

RAN IN STREET ARLAZE. While at work in the kitchen of her home, No. 47 East One Hundred and Thirty-sixth street, the Bronx, this afternoon, Mrs. Catherine Gambert set fire to her dress. She ran screaming to the street.

Several more extinguished the flames, and she was sent to Lincoln Hospital, with burns on the face and body. She is fifty-five years old. Her condition is serious.

BROTHERS DEAD AFTER FIGHTING SHERIFF'S POSSE

One Shot Himself While Home Was Besieged; Bullet in Other's Heart.

BENTON HARBOR, Mich., July 14.—Both August Gross, who yesterday without known cause shot and fatally wounded an inoffensive meat peddler named James Kirk, and his younger brother, Fred Gross, lost their lives in a pitched battle with Sheriff Tennant and a posse of seven men who went to the Gross home to-day to arrest August Gross. One of the officers was injured. The Gross brothers are both supposed to have been insane.

After the shooting of Kirk yesterday Gross barricaded himself in his farm house twelve miles from here in Pipestone Township, and through the night exchanged occasional shots with the crowd of farmers and officers who were guarding the premises to prevent his escape. His younger brother Fred joined the crazed man in the defense of the house, and the aged mother of the two men was also in the house through out the night, and the battle with the officers this morning.

The officers found her almost prostrated with terror when they broke into the house after the battle. The posse drove to the Gross farm in two automobiles from Benton Harbor this morning. Shortly before their arrival the Gross brothers had rushed from the house and taken positions with their guns near the front fence. After about fifteen shots had been fired at the officers, who were replying with rifles and shotguns, August left his cover and ran for the house. Fred was wounded through the leg and when he found that he was unable to follow fired a bullet through his own head, dying instantly.

Expecting August to open fire momentarily the posse closed in on the house, entered it and found the crazed man dead on his bed. A single shot from a charge from a shotgun had pierced his heart. August Gross was a well educated man. Worry over his failure to get financial returns from a slight which he had invented for military offices is said to have unsettled his mind.

FALLS FIFTY FEET; ONLY BREAKS HER JAW. Six-Year-Old Girl Has Remarkable Escape From Serious Injuries in Tumble From Bluff.

Though she fell fifty feet from the top of a bluff at Fifteenth street and East River to the sand bank below, Julia Burns, six years old, of No. 331 East Forty-fourth street, this afternoon suffered only a dislocated jaw and a slight laceration of the chin. She was taken to the Flower Hospital.

With her a dozen other girls about her age Julia was playing on the bluff underneath which on the bank of the river is a sandy spot. She stumbled and fell to the sand below.

HITCHCOCK HAS CAMPAIGN TALK WITH SHERMAN. UTICA, N. Y., July 14.—Chairman Hitchcock of the Republican National Committee reached this city to-day and was at once driven to the home of Representative Sherman, the Vice-Presidential candidate. Mr. Hitchcock stated that he was here simply for the purpose of talking over campaign matters with Mr. Sherman. He said that he was surprised to find Mr. Sherman looking so well and did not think he had any appearance of an old man.

Mr. Hitchcock will return to New York at 6 o'clock this afternoon.

DIED AFTER LONG WAIT. Robert Roche, thirty-five years old, who, on May 21 last, shot himself through the head in attempting to end his life, died in Roosevelt Hospital to-day. He lived at No. 44 West Thirty-sixth street.

Warning to WORLD Readers. The Health Board of this city has been striving heroically to cut down the usual large death rate caused at this time of the year by germs carried about by insects. They cannot succeed unless YOU and EVERY CITIZEN of this city does his or her share to HELP THEM. Never use water for cleaning or scrubbing without adding a non-poisonous disinfectant to it. Pour a diluted disinfectant into the sinks, toilets and washbasins and sprinkle it about the kitchen, cellar and dark corners of every room and thus purify the air you breathe. DISINFECT ALL GARBAGE—KILL ALL BAD ODORS. The most economical disinfectant and antiseptic to use, and one that is non-poisonous and mixes with water, is C. N. Disinfectant. A small bottle will last a month, and if you use it conscientiously it will keep your home free of flies, roaches, mosquitoes, etc., and will protect the health of your family. Cut this out and DO IT

THINK CANDY IS POISONED.

Word "Love" Priced in Sweets Creates Suspicion. YORK, Pa., July 14.—An attempt has been made it is believed, to poison Miss Amelia Shepp, an attractive young woman of this city. A box of candy received by her several nights ago will be analyzed by a chemist. The package was delivered by a messenger boy, who says that he received it from a man of medium size with a mustache and carrying a monocle. The lad was given a dollar to deliver the box to Miss Shepp. The lid of the box bears the name of a Lancaster confectioner. A close observation of the candy showed that each piece was drilled full of tiny holes. Cutting open one of the pieces a trace of fluid was found. On one piece the holes formed the letters spelling the word "Love."

HOUSE WORK

Thousands of American women in our homes are daily sacrificing their lives to duty.

In order to keep the home neat and pretty, the children well dressed and tidy, women overdo. A female weakness or displacement is often brought on and they suffer in silence, drifting along from bad to worse, knowing well that they ought to have help to overcome the pains and aches which daily make life a burden.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

comes as a boon and a blessing, as it did to Mrs. F. Ellsworth, of Mayville, N. Y., and to Mrs. W. P. Boyd, of Beaver Falls, Pa., who say: "I was not able to do my own work owing to the female trouble from which I suffered. Lydia E. Pinkham's Vegetable Compound helped me wonderfully, and I am so well that I can do as big a day's work as I ever did. I wish every sick woman would try it."

FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Why don't you try it?

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

ATHLETES MAKE PROTEST AGAINST ENGLISH METHODS

Foreign Teams Claim They Should Not Be Made Compete Against Each Other.

By Martin Sheridan. (Special Representative of The Evening World.)

LONDON, July 14.—At a meeting of the Foreign Olympic Committee representing all nations present here, just held, it was decided to enter a protest to Lord Desborough regarding the way the best members of the foreign teams are compelled to run against each other in their heats.

The English committee's methods have excited great dissatisfaction not only among the Americans but all other foreign competitors. The Americans expect their best hurdlers and sprinters will have to compete against each other before the finals.

Snepard is greatly elated over winning the 1500 metre, but confesses he had a desperate race to beat out Wilton. He believes now that he can easily win the half-mile. James E. Sullivan wrote a letter of protest because the American flag was not flying at the stadium. At 2 o'clock to-day the first American flag was hoisted here. Ambassador Tild called on the American committee to-day and asked them to attend a banquet at Dorchester House.

Distances and Time in Race Compared With A. U. Records. 1500-Metre Run (1,639.5 Yards). Best A. U. Record—T. Conner, 1881, 1 mile (1,760 yards), 4m. 13.3-58. 1,300 yards, 3m. 24-58. 20-Kilometre Bicycle Race (12.4 Miles). Best A. U. Record—Guignard (professional), motor paced, 4m. 42-58. Berton (professional), amateur pace, 25m. 54-58. Linsley (amateur), competition, unpaced, 25m. 47-58. 3,500-Metre Walk (2,17 Miles). Best A. U. Record—P. P. Murray, 1884, 2 miles, 13m. 48-58.

WOMAN DEAD FROM POISON NEAR BANK OF RIVER. CENTRAL VILLAGE, Conn., July 14. Mrs. Kate Roth, wife of Patrick Roth, of Canterbury, was found dead near the Quinebaug River, close to the bridge, to-day with a poison bottle lying beside her. The woman leaves a husband and a son.

Mrs. Roth formerly lived in Brooklyn, and married Roth a few years ago. She was forty-eight years old. Medical Examiner Atkins viewed the body and took away the poison bottle for examination. It is supposed the woman swallowed the poison while temporarily insane.

That Satisfying, Lingering Taste HAS PLACED

Post (Formerly called) Toasties in the mouths of millions. "The Taste Lingers." Package two sizes—10 and 15 cents. Made from purely white flour. Postum Cereal Company, Limited, Battle Creek, Mich.

Warning to WORLD Readers

The Health Board of this city has been striving heroically to cut down the usual large death rate caused at this time of the year by germs carried about by insects. They cannot succeed unless YOU and EVERY CITIZEN of this city does his or her share to HELP THEM. Never use water for cleaning or scrubbing without adding a non-poisonous disinfectant to it. Pour a diluted disinfectant into the sinks, toilets and washbasins and sprinkle it about the kitchen, cellar and dark corners of every room and thus purify the air you breathe. DISINFECT ALL GARBAGE—KILL ALL BAD ODORS. The most economical disinfectant and antiseptic to use, and one that is non-poisonous and mixes with water, is C. N. Disinfectant. A small bottle will last a month, and if you use it conscientiously it will keep your home free of flies, roaches, mosquitoes, etc., and will protect the health of your family. Cut this out and DO IT

Warning to WORLD Readers. The Health Board of this city has been striving heroically to cut down the usual large death rate caused at this time of the year by germs carried about by insects.
