### TWO BILLION GALLONS DAILY WATER WASTE

Enough to Supply City Three Months Gone Over Croton Dam.

IT COULD BE STORED.

\$15,000,000 Would Keep It All and Save \$300,000,000 in Catskill Work.

More than two billion gallons of water—enough to last the city five days—went to waste to-day over the Croton Dam reservoir. Yesterday the loss was two billion gallons and increasing hourly, and yet it hasn't been long since the people of New York were told they faced a water famine.

The overflow of Croton Dam reservoir, now 75,000,000 gallons an hour, began three weeks ago, and enough water, it is calculated, has gone over the dam already to supply the five boroughs for three months. A year's supply will have been wasted by the time the flow has ceased.

It could be saved at a cost of not more than \$15,000,000, storage reservoirs above the Croton Dam. In the meantime the city is spending \$200,000,000 for an aqueduct from the Catskills, eighty miles farther away. And the waste at Croton is now more than flows through the Esopus River, the chief source of the Ashokan supply. A year ago the Water Department was appealing to New York to use less water. Later the use of hydrant hoses for flushing streets and the sprinkling of lawns by private citizens was forbidden. Inspectors scoured the city for leaking faucets. It was even suggested too much water was wasted in baths. The water scare was at its height.

To-day a sheet of clear drinking water ten inches deep is pouring in a cataraet over the spillway at Croton, a waste of two billion gallons every twenty-four hours.

For years the waste at Croton has been going on. The volume of water, according to calculation made in the office of the Water Department, which has gone over the Croton Dam in the last few years is greater than the flow of the two aqueducts to New York.

New York now has a storage for 16,000,000 gallons of water—a ten months' supply, provided none of the reservoirs leaked and there was no rainfall. But the old reservoirs above the Croton do leak. They are not in shape to hold their capacity. Also, the new storage at Croton, but are used to help the reservoirs when depleted by letting their water free to find its way to the lower dam over bare ground.

AND THE WATER WASTED IS PURE AS CRYSTAL.

In winter the supply is always greater than the consumption. This allows for

FLOW OF WATER OVER CROTON DAM.

### SERGEANT IN BATTLE WITH POLICEMAN FOR POSSESSION OF GUN

Women Witnesses Scream and Citizens Help Subdue Man in Uniform.

"Why don't you move on and attend to your beat. I've been watching you for twenty minutes," said Police Sergeant James Burke to Patrolman Richard J. Finn of the Greenpoint avenue station as the latter stood before No. 352 Java street, Williamsburg, shortly after 7 o'clock to-day.

The patrolman stared dully at the sergeant for a minute and Burke repeated his question. Suddenly the policeman's eyes began to glow strangely and he reached for his hip pocket. Burke rushed when he saw the drawn B. K. revolver and before Finn could fire he grappled with him. Both rolled over and over on the ground. Burke fighting grimly and silently, the other with the strength of a maniac and yelling murderous curses.

The neighborhood is populous and a crowd of excited women began screaming. Several citizens came to the rescue and Finn was subdued. Someone meantime had telephoned the station that there was a riot on Java street and six patrolmen were rushed to the scene.

Finn was taken to the station where Capt. Linden locked him up in a room and sent for Police Surgeon Archibald Smith. The surgeon declared Finn was suffering from intoxication. After suspending him and informing Deputy Commissioner Walsh, Finn was about to be sent home when he became violent again. His condition was such that an ambulance was summoned from St. Catherine's Hospital. Dr. Hutchings ordered him removed at once.

### THREE ALIENISTS EXAMINE RICHESON FOR THE GOVERNOR

Noted Physicians Visit Condemned Minister To-Day to Decide Upon His Sanity.

BOSTON, May 11.—Rev. Clarence V. T. Richeson, under sentence to be electrocuted during the week beginning May 19 for the murder of Miss Avis Linnell, to-day faced three alienists sent by Gov. Foss to test his mental responsibility.

If these three experts—Dr. Morton Prince, Dr. Henry B. Stedman and Dr. Walter E. Fernand—with Dr. L. Vernon Briggs, who has already observed the condemned man, report that Richeson is insane, Gov. Foss, under the law, will submit the petition of Richeson's attorneys for a commutation of sentence to the executive council. In no other way, according to the authorities at the State House, can Richeson's life be saved.

It was stated that even if commutation was granted on the ground of insanity at the present time Richeson's mental recovery subsequently would cause his execution provided it were shown that he was not insane at the time the murder was committed. Richeson is the first prisoner condemned to death under the law which provides for electrocution who has not been sent to the death house at the State prison ten days before the time set for the execution.

The stay is due to Sheriff John Quinn, the Suffolk County jailer, who decided to hold Richeson in the jail until some conclusion as to the disposition of the case is reached at the State House.

The former minister knelt before Sheriff Quinn last night and implored him not to send him to the State prison and to the death house at the present time. The tall Virginian who stood before the court four months ago and calmly acknowledged the murder of Miss Linnell begged the Sheriff to be allowed to remain in the jail quarters a few days longer. Sheriff Quinn said that Richeson wept when he was told that he would not have to go to the State prison this week.

It is expected that the transfer to the State prison will not be made before Thursday of next week. The executive council will meet on Wednesday, and by that time the Governor expects to have the reports of all the alienists. Until the Governor feels satisfied that some action should be taken by the Executive Council Richeson's fate rests entirely in his hands.

Alienists' Instructions for T. H. BRYENWORTH, Chairman of the Republican State Convention to-day declared President Taft "had been delirious in his friends." Then Col. Roosevelt was introduced for the presidential nomination.

Charles H. Root was named State chairman of the organization and J. O. Thompson accepted the appointment as member of the National Committee. Twelve delegates at large with half a vote each were named for the national convention.

### ISMAY CHEERED BY A BIG CROWD AT LIVERPOOL

Appears Pale and Haggard and Says He Is Still Suffering From Strain.

LIVERPOOL, May 11.—A big crowd awaited the arrival to-day of J. Bruce Ismay, managing director of the White Star line, on board the Adriatic, and cheered him as he walked down the gangway with his wife, who had gone on board at Queenstown and accompanied him here.

Mr. Ismay lifted his hat in acknowledgment of the reception, but excused himself from making any statement to the press, saying that he was still suffering from the strain of the disaster. He had, he said, already given a plain, unvarnished statement of facts to a responsible and adequate commission, and he thought that his evidence to be given before the British Court of Inquiry should not be anticipated.

He expressed his gratitude for the cablegrams and letters he had received from public societies and private friends, conveying their sympathy with and their confidence in him "during the greatest trial of my life."

Mr. Ismay was pale and haggard, and appeared much touched by his reception.

### REAR-ADMIRAL FISKE FLIES WITH AVIATOR PAGE.

First High Naval Official in the United States to Go in Airship.

(Special to The Evening World.)  
LYNN, Mass., May 11.—Rear-Admiral A. Fiske, commanding the second squadron of the Atlantic fleet, made a flight over the battleships in Salem Harbor in a hydro-aeroplane. He is the first United States Naval officer of high rank to make an air flight.

The hydro-aeroplane shot over the great battleships, landing gracefully on the water a few yards away. It had come from the Burgess plant, two miles away. W. Starling Burgess was at the lever and Page was in the passenger's seat. Admiral Fiske put out in a tender going aboard the warship after stowing in starting the motor.

The machine rose quickly several hundred feet after skimming a half mile of the surface. For fifteen minutes the eyes of every officer and jackie who could get on deck were on their commanding Admiral, who was complacently floating several hundred feet above them. Then the machine dipped and the Admiral, highly pleased, returned to his ship and with Burgess again at the lever and Page as a passenger the hydro-aeroplane was "driven" home.

**Missing Boy Was Drawn.**  
ALEXANDRIA, Conn., May 11.—Playing with other children on the bank of the Bryan River to-day, James Kuvick discovered the body of John Kuvick, the eight-year-old son of George Kuvick, who has been missing since school closed yesterday. The body was floating in the water and an overturned boat was nearby.

### TAFT SEES HIBBEN INDUCTED AS NEW PRINCETON HEAD

President Attends Installation at Old Nassau and Is Made LL. D.

(Special to The Evening World.)  
PRINCETON, N. J., May 11.—John Grier Hibben, D. D., LL. D., was to-day made president of Princeton University to fill the vacancy left by Woodrow Wilson when he became Governor of New Jersey. Gov. Wilson was away campaigning, but President Taft was present at the ceremonies, as were Chief Justice White of the Supreme Court of the United States, President Lowell of Harvard, President Hadley of Yale, President Butler of Columbia, President Finley of the College of the City of New York and the heads of nearly a hundred other colleges and universities.

As a part of the ceremonies, President Taft and Chief Justice White received degrees of Doctor of Laws from Princeton.

The sparkling sunlight, playing through the cooling leaves of the trees of the campus, set off brilliantly the many-colored academic hoods of this great gathering of educators. The scene was framed by a great body of graduates and undergraduates. Twelve hundred students had been selected as a chorus, 1,800 more added their voices to the cheering.

There were eleven divisions in the parade which preceded the ceremonies. President Taft, Chief Justice White and Dr. Hibben marched at the head. Following them were the Princeton Trustees, the delegates from other universities, the Princeton Faculty, the Graduate Council, the Inauguration Committee, a delegation of Dr. Hibben's class, of 188, and the undergraduates.

All except the little group escorting the President of the United States and Dr. Hibben formed a hollow square about the Princeton cannon, and the distinguished party walked about the four sides in review. There was a parade to the steps of old Nassau Hall, where Washington was thanked by the nation for leading the United States to independence and where Congress sat for five months in 1787.

United States Supreme Court Justice Mahlon H. Pitney, until recently Chancellor of New Jersey, administered the inaugural oath to Dr. Hibben after there had been a mighty blast of trumpets from the horn section of the Metropolitan Opera orchestra, and a prayer by the Rev. Dr. Henry Van Dyke, Chairman of the Board of Trustees, then delivered the keys of the university to President Hibben. Technically Mr. Stewart has been president of the university since ex-President Wilson moved to Trenton.

President Hibben took for the subject of his inaugural address, "The Essential of a Liberal Education." The spirit of his views is shown by the following extracts:

"An education is won by work; and the labor to be undertaken and the end to be attained may all be summed up in the command—'Be a person.'"

"Fit a man for the day's work, but at the same time equip him to meet the crisis and the emergency which the day's work will inevitably bring forth. He who has laid a broad and secure foundation will have no difficulty in erecting the superstructure. Whatever he builds he will be able to

### BRANDT IN TOMBS, MAY APPEAL CASE TO HIGHEST COURT

Lawyers Dispute About Possible Procedure to Keep Him From Dannemora.

With Foulke E. Brandt, the Schiff burglar, back in the Tombs as the result of the decision of the Appellate Division of the Supreme Court yesterday, action in his case has come to a dead stop. His counsel, Mirabeau L. Towns, and the interests that are furnishing the money for Brandt's defense have not decided what to do.

Half a dozen different lines have been considered and discarded. In the present aspect of the case Brandt is back in prison to stick out his thirty-year term unless the Governor interferences.

While there is a dispute among lawyers over the right of Brandt's counsel to appeal from the decision of the Appellate Division, it is quite probable that he will do so, and many lawyers believe such an appeal will be sustained owing to the fact that Brandt's case comes up in habeas corpus action. It is contended that Mr. Towns has the right to carry the controversy clear to the United States Supreme Court despite the fact that Brandt is an alien.

There has been some talk of Mr. Towns awaiting out a new writ of habeas corpus on the ground that Judge Rosinsky, who sentenced Brandt, has since rescinded the case, declaring his own action irregular. Such a writ would subject the action of Judge Rosinsky to review by the Appellate Division.

APPPELLATE DIVISION JUDGED SENTENCE LEGAL.

But the Appellate Division in its decision handed down yesterday unanimously agreed that Judge Rosinsky legally sentenced Brandt. No matter what Judge Rosinsky's opinion might be about his own action, it is not likely that the Appellate Division would reverse its own judgment on the legality of Brandt's conviction and sentence should the matter come before that tribunal on another habeas corpus writ.

Mr. Towns is of the opinion that if he serves notice of an appeal it will serve as a stay and keep Brandt from going back to Dannemora Prison. Warden Fallon of the Tombs will deliver Brandt to Warden Kaiser of Dannemora any time the warden presents the proper papers. Every effort will be made to keep Brandt in New York until his case is finally disposed of, but it is not likely he will be admitted to bail again.

The persons responsible for the \$7,500 bail bonds which gave him his liberty while the appeal was pending were quite feverish with anxiety to surrender him yesterday afternoon and scarcely two hours had elapsed from the time the Appellate Division decision was handed down until Brandt was in cell No. 10, first tier, Tombs Prison.

The probability that Gov. Dix will order Judge Hand to reopen the inquiry by the appeal from Judge Rosinsky's habeas corpus decision is remote. The Governor is in Europe and will not be back for a month. The Grand Jury has fully gone into the Brandt matter and its findings on the testimony are matters of record available to the Governor. Judge Hand could not add to this information.

### NEW BATTLE AT MINES; BOY KILLED BY VOLLEY FIRED BY TROOPERS

Display of Firearms and the Hurling of Stones at an Olyphant Colliery, Scranton, Cause an Order to Charge.

### MOB GROWS SULLEN AFTER CHILD IS SHOT.

Reinforcements Hurry to the Scene From Peckville and Wyoming Barracks—Trouble at Shamokin.

SCRANTON, Pa., May 11.—A riotous demonstration at Olyphant colliery No. 1, Delaware and Hudson Company, to-day resulted in the killing of George Robarecky, a fourteen-year-old boy, by the State troopers. The troopers were riding down a crowd of rioters who were desperate in their manner, displaying firearms and hurling stones and clubs at the State police. The boy was standing in the front yard of his home and the mob stood near, defiantly daring the troopers to come on.

### INCREASE IN WAGES FORESTALLS STRIKE ON INTERBOROUGH

New Scale Goes Into Effect To-Morrow and Peace Is Expected to Reign.

Commencing to-morrow, a new scale of wages becomes effective on the Interborough Rapid Transit, by which most of the operating forces of the subway and elevated railroads of the city receive advances of from 5 to 10 cents a day on an upward scale. According to a statement issued from the office of T. P. Shonta, the increase will total \$200,000 the first year.

"It is the policy of the Interborough," stated Mr. Shonta, "at all times to make the working conditions and pay of its employees equal to or better than they can obtain in any like business elsewhere."

The graduating scale shows the motorman to be most benefited by the new order. At present a motorman receives \$3 a day. From the first to the fifth year he will now receive \$3.50, and after the fifth year \$4.25. Conductors will benefit as follows: First year, \$2.50 for a day of ten hours, second year, \$2.90; third year, \$3.45; fourth year, \$3.50, and fifth year, \$3.60.

Increase for guards, switchmen, towermen, starters, train clerks, agents and gatemen in the transportation department, and for trackmen, repairmen, signmen, wiremen, riveters and drillers in the chief engineer's department, and for employees in the car equipment and motive power departments are regulated in the same manner.

The effect of the increase, it was stated to-day, will be to take off the subway strike spoken of by Warren G. Stone, Chief of the Brotherhood of Locomotive Engineers, who some time ago announced the unionization of the motorman and conductors on the subway and elevated roads was in progress.

Auto Speeders Paying Up.  
The general order to deal severely with the speeders of automobiles, given this week by Police Commissioner Waldo, is proving a source of revenue to the city. To-day \$100 in fines was collected from eighty-five persons taken to Harlem Court by seven motorcycle policemen patrolling Riverside Drive and upper Broadway. Yesterday the fine amounted to \$400.

Radical London Newspapers United.  
LONDON, May 11.—The London Morning Leader, Radical, will make its final appearance on Monday. It has been taken over by the Daily News.

The mounted police moved forward just as a volley of stones struck them. Several pistol shots were fired by the crowd.

The troopers had their guns ready and were ordered to shoot. The police were ordered to fire low and the bullet that hit the boy was not intended for him. It passed through the body over the heart, coming out through his back. He died shortly afterward.

The shooting cooled the rioters, but on learning the boy was dead they gathered in greater force. The police appear to have the situation well in hand. More troopers from the Peckville station and from Wyoming barracks arrived at Olyphant shortly after the shooting.

There was no trouble to-day at the Cayuga breaker in North Scranton, where the breaker disturbance occurred and several men were wounded. State, local and railroad police are still on guard.

Leaders of the United Mine Workers are endeavoring to keep the foreign-speaking miners throughout the region gathered in crowds about the mines.

Corpl. George Dace, in charge of the State troopers, was placed under arrest in connection with the shooting of the boy. He was taken to the State police barracks at Wyoming, where bail was arranged for him. He will appear later in the office of the District Attorney of Lackawanna County.

All the special policemen of the Delaware & Hudson Company were hurried to Olyphant during the morning to assist the State troopers in maintaining order. The policemen formed a line around the breaker and have warned men not to attempt to cross it.

SHAMOKIN, Pa., May 11.—Eleven pickets of the foreign miners to-day tried to stop a number of engineers and firemen whose work is necessary to keep the mines in condition during the suspension pending the Wilkes-Barre convention. State policemen and representatives of the American United Mine Workers' committee put the foreigners to flight.

LOSES HIS CITIZENSHIP BECAUSE HE IS A SOCIALIST.  
United States Judge in Seattle Annals Naturalization of Leonard Olsson.  
SEATTLE, Wash., May 11.—Judge Cornelius Hanford of the United States Court has handed down a decision annulling the citizenship papers of Leonard Olsson of Tacoma because "he admitted he was a Socialist and advocated propaganda for radical changes in the Constitution of the United States."

Lawyers say that, if unchallenged, the decision will make revocable the citizenship papers of foreign-born citizens who, at the time of their application for papers, held such views. It is also declared that the decision is so broad that, under it, any person advocating the initiative, referendum or recall may lose his citizenship if he is found guilty.
