

GIBSON IS HELD ON MURDER CHARGE IN FIRST DEGREE

Lawyer Goes to Jail to Await Action of Grand Jury Next Week.

...car's office. You may look them up." "Did you ever make a mistake in your diagnosis on strangulation?" "Not yet."

"And you found this woman was strangled by the hand?" "I have said nothing of the kind."

"No you did not find that the woman was strangled by a hand?" "I was not able to state what caused the compression, whether it was a hand or hand."

"Could this woman have been strangled under water and leave such condition in the throat?" "Why there were no marks in the throat."

"Yes." "Could two persons have struggled together and one have strangled the other with such gentleness and not left marks on the skin or subcutaneous marks?" "Under water, no; above water, yes."

"Have you ever known such a case in your own experience?" "No."

"Then this case is unique?" "Yes, I have never known a case before where the organs in the throat were situated as they were in this case and there remained no external nor subcutaneous marks of blood suffusion."

Gibson appreciated the importance of the expert's admission and a grim smile passed across his face. "How long must a force be applied to produce strangulation?" "I do not know."

Mr. Elder put the following hypothetical question: "Suppose two persons are in a boat that has a curved bottom that makes it highly movable—there is a good breeze blowing that makes the water on all sides of the boat rough. Now, suppose that these two persons are seen near the middle of the boat bent over, when the boat is turned over and that under the surface of the water one of these persons—a woman weighing 120 pounds, strong and vigorous, should violently seize the other person, a man of similar weight and strength, but that while under water the woman seizes and pulls off the jersey shirt over his head and arms and that they struggle and go together to the bottom of the lake, a distance of a number of feet, the hold of the woman is released—the man comes up to the surface exhausted—that after several days the body of the woman is recovered and that later an autopsy reveals the conditions such as you have found—would you believe it possible for the man to have applied a pressure necessary to produce death by strangulation and to force the organs into the position you have found and do all so as to leave no marks either external or internal visible to the naked eye?"

POSSIBLE, BUT ALMOST UNBELIEVABLE, SAYS DOCTOR. "I think it is possible," said Dr. Schultz.

"Do you think it probable?" "I think it highly improbable, I would say almost unbelievable."

half a mile away when he saw them. Cross-examined by Mr. Rogers the witness said he had not seen the boat previous to the moment he saw both its occupants jump into the water. "Were there any persons with you when you saw this?" "I was on the porch of the Lakeside Hotel and near me was a Miss Small and a Miss Pencil, a woman who weighs more than 200 pounds."

PASSENGERS DRIVEN BY FLAME FROM TWO RUNAWAY PULLMANS

Coaches With Four Day Cars Break From Train, Leap Bank and Catch Fire.

NASHVILLE, Tenn., Oct. 1.—Two Pullman sleeping cars, four day coaches and two express cars broke away from a rapidly moving Louisville and Nashville train near Elkton, Ala., early to-day, plunged down an embankment, then caught fire and burned, but every passenger and the crew, excepting one man, escaped death and less than a score received minor injuries. An express messenger caught in the wreckage of his car was cremated.

Flames spread so rapidly that occupants of the Pullmans were compelled to flee in their night clothing, abandoning all their baggage.

It is believed a broken rail was the cause of the accident. Among the injured were J. Y. Walker, New York; Mrs. Bertha H. Senney of East Highlands, Cal., and a passenger named Brasenburgh of Brooklyn.
