

LAMBERT GIRL'S 'REAL BEAU' TO AID CASE AGAINST ORPET

Ervin Clow, High School Student, Sure Poison Victim Did Not Commit Suicide.

SAW HER BEFORE DEATH

Declares She Did Not Have a Worry on Her Mind—Hunt for Others in Tragedy.

WAUKESHA, Ill., Feb. 17.—Ervin Clow, nineteen-year-old senior at Highland Park High School, who was a sweetheart of Marian Lambert, planned to-day to aid the Lake County authorities in prosecuting William H. Orpet, Wisconsin University Junior, held for Marian's murder.

Clow, who passed notes to Marian, took her home from school and walked with her to choir practice and church, said to-day he is certain she did not commit suicide.

Ervin was Marian's "regular beau," his friends said.

"I am sure Marian did not commit suicide," Clow told a reporter. "I was with her on the afternoon before she disappeared and there was not a worry on her mind. She was not the kind of a girl who would commit suicide."

"Did you know of her relations with Orpet?" Clow was asked.

"I should say not," Clow replied. "Why, I never even kissed Marian. We were pals and I thought of her as a mighty nice girl."

"I did not know that Orpet was writing her. Once, when I questioned her about him, not knowing his name, she told me he was her brother. When I learned different later, she told me she didn't love him. She let me read one of his letters to her, passed it to me in her book at school. It was full of love. But Marian laughed about it."

Clow said he will aid State Attorney Dady, if asked to, and that all

of the schoolmates of Marian, who believe she did not kill herself, are also willing to aid.

"The Loyal Eighteen," a girls' club to which Marian belonged, is working to aid Dady, also. The girls, Marian's closest confidantes, have sought to comfort Marian's mother.

CHICAGO, Feb. 17.—Intimations were given to-day, for the first time, that possibly other men will be involved in the death of Marian Lambert, for which Will H. Orpet, a University of Wisconsin student, is held.

A detective working for the defense said statements that other men besides Orpet were friendly with Marian had been investigated and that one admirer in particular might be drawn into the mystery.

A new announcement by the State's investigators is that at the time Orpet is alleged to have bought an empty bottle he first tried to buy an empty six or seven grain capsule. He seemed disappointed when told there was not one that large in stock, and took a bottle instead.

Each side claimed to-day that its case hinged on the discovery of the bottle that contained the poison which killed the high school girl. The State declared this would provide its only missing link. The defense said it would clear their client.

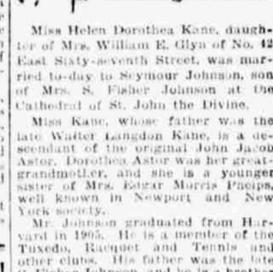

It has been the State's theory that Orpet carried the bottle away or destroyed it after the girl's death. Another search is being made for it in the woods where her body was found, but with little hope of success. The prosecution contends Marian's death was so swift the bottle would have fallen at her feet.

Harry Beardley, a Burns detective, who spent the last four days in Madison, Wis., and has unearthed all the clues found there, makes the positive statement that the State's case against Orpet is in complete shape for the bottle. He said Orpet never went with any girl in Madison.

The detective declared his investigations in Madison had disclosed that Orpet had requested a fellow student, Carl Fisher jr. of Baraboo, Wis., to get him a surgeon with not too many scruples.

Fisher admitted to Beardley, the latter said, that he had learned of such a doctor and had given the information to Charles Hunsinger, a drug clerk in Madison, to be turned over to Orpet. This was just before the Christmas holidays.

Original Astor Descendant Weds

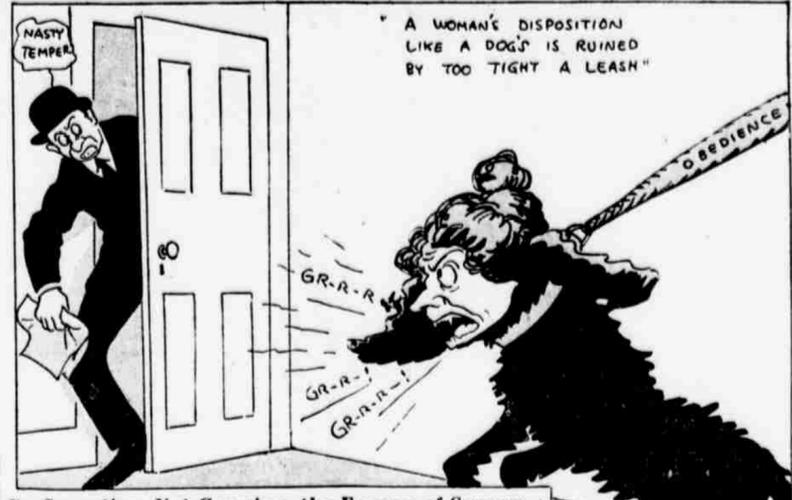

Miss Helen Dorothea Kane, daughter of Mrs. William E. Glyn of No. 42 East Sixty-seventh Street, was married to-day to Seymour Johnson, son of Mrs. S. Fisher Johnson at the Cathedral of St. John the Divine.

Miss Kane, whose father was the late Walter Langdon Kane, is a descendant of the original John Jacob Astor. Dorothea Astor was her great-grandmother, and she is a younger sister of Mrs. Foster Morris Phelps, well known in Newport and New York society.

Mr. Johnson graduated from Harvard in 1905. He is a member of the Tuxedo, Racquet and Tennis and other clubs. His father was the late S. Fisher Johnson, and he is a brother of Mrs. Edward D. Clifford Chalmers.

MUST OBEY? Tyranny Bad for Tyrant and His Slave

Co-Operation, Not Coercion, the Essence of Successful Marriage—Whether or Not a Wife Should Be Made to Obey Depends on Her Character—Evening World Readers Asked to Consider New Angles to the Discussion.

By Marguerite Mooers Marshall.

"The woman who obeys her husband is neither more nor less than a slave. The husband who expects obedience is a tyrant." That is one woman's ringing reply to the question I have asked the men and women readers of The Evening World to answer—"Must a wife obey?" Whether you agree with it or not, I think you all will be interested in the point of view of Amelia Rives, Princess Pierre Troubetzkoy, author of several much discussed novels and a play, "The Fear Market," which is now being produced in New York. The possessor of a husband both devoted and distinguished, Princess Troubetzkoy showed a fine, frank contempt for his little two-syllabled verb "obey" when I talked with her in her charming home just across from Central Park. I should like to hear what you think of her opinions.

"When I was a little girl I told the minister that I thought the marriage service should read, 'I promise to love, honor and be gay,' she confessed unashamedly. And really, don't you find that a rather delightful revision? If I were a man I'd so much prefer that a woman should promise me charm and sparkle and laughter, instead of a life of serfdom. St. Paul undoubtedly would have disapproved of Princess Troubetzkoy's substitution. But how do you like it as a possible answer to the question we are considering. "Must a wife obey?"

"Marriage must be a relation not of coercion but of co-operation," the Princess continued. "Marriage as I see it is a partnership, a union of friends as well as of lovers. But if supreme authority is conferred upon the husband, if he is named the master, then the wife is in the position of an apprentice to matrimony. She is bound out, exactly as poor boys and girls used to be, but, unlike them, her term of servitude is supposed to last for life.

"I believe that any man who will beat his wife is a disgrace to mankind. He seems to forget that she is a part of himself and the mother of his children. Now, should a good, moral wife and mother obey a man who has no good principles, performs no good acts and orders her to do things that are not for the good of herself and her children? No! "I have seen a man with a fine wife and children. She goes out working by the day, earning the bread and clothes for herself and children and maybe paying the rent. He sits at home and demands the money that his wife has washed and worked for, take that woman's hard-earned money and blow it in some saloon. Now, ought a woman to obey such a man? No! God never meant for a woman to be her husband's slave, but his equal.

"The Golden Rule Applies to Marriage." "Whatever comes up, husband and wife should consult each other and work for each other's interest, strive to make each other happy. Do unto each other as each would like to be done by and set a good example to the children, who are growing up to be men and women for it. The outside world is cold and when money and family friends are gone also. But I am not saying that all men are like the one I have described, as there are good men as well as good women in the world.

"When a good man gets a wife who is a clubwoman, she neglects her home and children. Maybe she drinks, smokes and does things that are not for the good of the family. Such a woman should be under no obligation to obey me. I can't think in such a case the husband has a right to reform her, and she should obey in whatever is for the good of the family. I believe in the right of the home, and for the interest of the home, I believe in right and justice for both the man and woman, and I am the mother of the children. I do believe that if the word 'obey' were left out of the marriage vow and 'do unto each other as such would like to be done by' were substituted, it would be much better. I have heard unreasonably men give unreasonable orders to good wives, and say, 'You must do so-and-so, for you respect to obey me.' My husband is fifty years old. I never did obey a wrong command and I never will. If women stand for the right, work for the right, and put the other man in a ridiculous light, will try almost any expedient except a direct command. That, I believe, is never the solution of any matrimonial problem.

"Tyranny is bad for the tyrant, as well as for those over whom he rules. The husband who believes in and attempts to enforce his wife's obedience becomes cruel, conceited, selfish. Also he makes a fool of himself. Suppose she is attracted by some man whom he absolutely knows is rotten. If he commands her to give the fellow up she will simply fall into his arms.

"In such a situation the wise husband will make love to his wife all over again, will put the other man in a ridiculous light, will try almost any expedient except a direct command. That, I believe, is never the solution of any matrimonial problem.

Here's a very interesting letter from a woman who believes that

obedience is for some wives, but not for others. How would you solve the human problems which she states? "Dear Madam: I read your article last evening in regard to a wife's obeying her husband and in behalf of the right class of women, I feel as if I should write this letter. First, God created man and woman equal, and the Good Book says, 'Whom God has joined together let no man put asunder. These two are as one flesh.' Now, does a man chastise and beat himself? No! But I have seen a devoted and distinguished husband show a fine, frank contempt for his little two-syllabled verb 'obey' when I talked with her in her charming home just across from Central Park. I should like to hear what you think of her opinions.

A New York boy, who was wounded on two successive days and is proudly wearing the Croix de Guerre, the greatest of French military honors, returned home to-day on the steamship Espagne of the French Line. He is J. B. Taylor, twenty-two years old, of No. 320 West Eighty-third Street. Taylor has been in France for eight months driving an ambulance. During the greater part of his service Taylor was stationed near Pont-a-Mousson. On Dec. 19 he drove to the third line trenches to pick up two wounded men. He had lifted one into the ambulance and was bending over the other when he was struck in the right shoulder by a rifle bullet. Undaunted, the young man got the wounded man into the ambulance and drove the machine to the dressing station. Here his shoulder was treated.

Refusing to be deterred from duty by the wound in the shoulder, Taylor set out the following day with his ambulance. He had to drive through a portion of the village under shell fire. A shell burst almost in front of him, wounding him in the chest. In his wounded shoulder and another piece struck the steering gear, causing the machine to swerve and throw Taylor through a window into a ruined house.

ZEPPELIN WRECKED; BRITAIN'S DEFENSE ADMITTEDLY POOR

Huge Dirigible Blown Away From Belgium and Swept Over Holland.

INTERNEED BY DUTCH.

Parliament Hears From Ministers That Nation's Aerial Protection Is Inadequate.

LONDON, Feb. 17.—A Rotterdam despatch to the Daily Mail says that during yesterday's storm a Zeppelin was blown adrift, apparently from Belgium, and wrecked at Berik, near Veio, where it was seized and interned by the Dutch authorities.

Living in fear of further Zeppelin raids, Britain knows to-day that her aerial defenses are inadequate. Colonel Secretary Bonar Law, First Lord of the Admiralty Arthur J. Balfour and Under Secretary of War Harold J. Tennant all admitted it in yesterday's sitting of Parliament, but each declared the Government was doing all it humanly could to remedy the situation.

Mr. Balfour unhesitatingly said Britain's greatest anti-air mistake was her failure to create a fleet of Zeppelins, not so much for aggression and defense as for scouting. Such airships, he said, could have played an important part in the war and Germany possessed an advantage in having them.

"We are doing all we can," he said, "but since we began this race ten years behind the enemy, I do not pretend there is any reasonable probability of catching up."

The debate on air defense was introduced by Mr. Joynson-Hicks in moving an amendment to an address from the throne, regarding "that no proposal has been made therein for placing the air service of the country on a firmer and stronger basis."

Mr. Joynson-Hicks criticized the present defense, which he characterized as antiquated, and said it ought to be as easy as pressing a button to send up squadrons of battleships to meet a Zeppelin attack. He asserted the allied airmen at the front are out-clasped by their adversaries.

Under War Secretary Tennant replied: "From to-day the navy will deal with all hostile aircraft attempting to reach Great Britain, but control of the air defenses within the country has been transferred from the Admiralty to the War Office. Sir Percy Scott has been taken over by the army from the navy and a joint naval and army committee will be formed to co-ordinate the air defenses."

Mr. Balfour said that one of the great difficulties in connection with enlarging the air service has been lack of material.

"We are still in need in certain directions," he said, "not because the Government is oblivious to the needs of the situation, but because the material cannot be obtained.

"Every possible resource in Europe and America is being utilized for the provision of air material. One of the difficulties is that nothing can be standardized because the air service is constantly developing and changing. We are deficient in air defense guns, but that is due to lack of material. The whole question here has to be considered in relation to the demands of the army and the navy for competing material."

Mr. Tennant, in behalf of the War Office, after outlining a new scheme for the co-ordination of the army, navy and munitions department in the work of air defense, closed with the statement:

"While we have made strides in providing proper equipment and funds for the arsenal and vulnerable points of the country, the safety of every part of the United Kingdom against attack by long range aircraft can never be complete."

Charles P. Trevelyan (Liberal) has given notice of a motion calling on the Government to state the general terms on which it would be willing to enter into negotiations with a view to bringing about a just and lasting peace.

Another peace amendment was sponsored by Arthur Ponsonby (Liberal), who suggested an international tribunal to which diplomatic disputes should be referred in future.

"Bonnie" Thornton Has Pneumonia. The condition of Mrs. Bonnie Thornton, wife of James Thornton, composer and vaudeville comedian, seriously ill with pneumonia at the University Hospital, was reported more favorable to-day. Mrs. Thornton popularized the ballad, "My Husband, among them, "My Sweetheart," "The Man in the Moon," "When You Were Sweet Sixteen" and "The My Have Seen Better Days."

ALLIES REPULSED TRYING TO REGAIN LINES THEY LOST

Berlin Claims Defeat of British Near Ypres and French in Champagne.

SNOW STOPS BATTLES.

London Says Kaiser's Forces Lost Heavily in Attack on "International Trenches."

LONDON, Feb. 17.—Driving rain and snow have forced a temporary lull in the fierce fighting that has been in progress for the past week on the western front.

"The English made three vain attacks yesterday on the position southeast of Ypres, which we had captured," says the Berlin report. "They lost a total of 100 prisoners.

"In the Champagne the French repeated with failure their endeavors to regain their positions northwest of Tahnre. Generally speaking, stormy, rainy weather is hindering fighting activity."

The British official report says "an artillery bombardment by both sides and heavy fighting with hand grenades have taken place between the Ypres-Comines Canal and railway (where the Germans took the trenches). The fighting continues, elsewhere the day passed quietly on the British front.

"The capture of the trench, reported yesterday, was preceded by a heavy bombardment and the explosion of five mines, which rendered our front trench untenable. The attacks, over a 4,000-yard front, were repulsed everywhere else with considerable loss to the enemy. The trench captured has frequently changed hands during the past year, being called the 'international trench.'"

Protest British Seizures. Breakers Want to Know About Securities Seized Here That Britain Held Up. Representatives of a dozen stock and bond firms met in the offices of Bolezavsky & Co., No. 24 Broad Street, this afternoon and perfected an organization to protest to Washington against the seizure of securities by Great Britain. It is estimated that the securities which have been seized by the British Government in the registered mails destined for New York will total \$2,000,000 or more.

It is declared that Britain gave no right of her intention to seize securities and has given no intimation as to whether the securities shall ever be returned. The securities were seized on the ground that they were being sent from their German owners to this country through Holland.

Not a Bite of Breakfast Until You Drink Water. Says a glass of hot water and phosphate prevents illness and keeps us fit.

Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste, toxins and ptomaine-like poisons are formed and sucked into the blood.

Men and women who can't get feeling right must begin to take inside baths. Before eating breakfast each morning drink a glass of hot water mixed with a tablespoonful of limestone phosphate in it to wash out of the thirty feet of bowels the previous day's accumulation of poisonous toxins and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, backache, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make any one an enthusiast on the subject.

Remember, inside bathing is more important than outside bathing, because the skin pores do not absorb impurities into the blood, causing poor health, while the bowel pores do. Just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels.—Adv.

Real Comfort ALEXANDER'S Double Spring Expansion

EYES EXAMINED BY REGISTERED SPECIALISTS WITHOUT CHARGE. PERFECT FITTING AS... \$1.00

J. Alexander Co. 263 W. 34th St. 54 E. 125th St. 10th Ave. near Madison St.

7 Visits for \$5

The reason why many people suffering from catarrhal rhinitis are not cured is because they cannot afford to receive proper treatment after a single visit. The offer of the nominal fee rate of 7 visits for \$5 is given at the time by Dr. McCoy so that all sufferers from catarrhal rhinitis may afford to receive treatment at once.

Clogged Nostrils, Dropping in Throat, Deafness and Head Noises

Mr. Robert Allen resides at No. 221 Third Avenue, New York. When he first consulted the doctor he was suffering from clogged nostrils, dropping in throat, deafness and head noises. He had been suffering from these troubles for over a year and had tried many treatments, but without success. He was advised to visit Dr. McCoy and after seven complete treatments, the doctor told him that he was cured. He has since been free from all these troubles and is now enjoying perfect health.

ARE YOU GOING DEAF? DEAFNESS AND HEAD NOISES.

When Mr. Edward J. Dunn first consulted the doctor he was suffering from deafness and head noises. He had been suffering from these troubles for over a year and had tried many treatments, but without success. He was advised to visit Dr. McCoy and after seven complete treatments, the doctor told him that he was cured. He has since been free from all these troubles and is now enjoying perfect health.

DISCHARGING EARLS, DEAFNESS, HEAD NOISES.

When Mr. Walter Pritchett first consulted the doctor he was suffering from discharging ears, deafness and head noises. He had been suffering from these troubles for over a year and had tried many treatments, but without success. He was advised to visit Dr. McCoy and after seven complete treatments, the doctor told him that he was cured. He has since been free from all these troubles and is now enjoying perfect health.

DR. J. C. McCOY, Candler Building, 220 W. 42d St.

A few drops west of Broadway. Hours: Monday, Wednesday and Friday, 10 A. M. to 5 P. M.; Tuesday, 10 A. M. to 12 noon. Dr. J. C. McCoy will be on Tuesday, Feb. 22, from 8 A. M. to 5 P. M.

BRIGHTER CHILDREN

Children are brighter to-day than a generation ago—but are they stronger? That's a grave question. So many pinched faces, dulled eyes and languid feelings make us wonder if they will ever grow into robust, healthy men and women.

Eases the Cough

helps the cold relieve hoarseness. HALE'S HONEY OF ROSEHOUND & TAR. All Druggists. The Pike's Toothache Drops.

BELLANS

Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

BROWN'S BRONCHIAL TROCHES

Keep the Voice Clear. You may depend upon them to relieve the most stubborn cough, soothe the inflamed throat, and stop the irritating action of the throat. The new 10c THAL BOX. Contains 100 troches. Each troche contains 1/100 grain of menthol, 1/100 grain of eucalypti, 1/100 grain of camphor, 1/100 grain of salicylic acid, 1/100 grain of borax, 1/100 grain of glycerine, 1/100 grain of sugar, 1/100 grain of water, 1/100 grain of alcohol, 1/100 grain of oil, 1/100 grain of essence, 1/100 grain of perfume, 1/100 grain of flavoring, 1/100 grain of coloring, 1/100 grain of preservative, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1/100 grain of sequestrant, 1/100 grain of chelator, 1/100 grain of flocculant, 1/100 grain of clarifier, 1/100 grain of filter aid, 1/100 grain of stabilizer, 1/100 grain of emulsifier, 1/100 grain of thickener, 1/100 grain of sweetener, 1/100 grain of acidulant, 1/100 grain of buffer, 1
