

low workers in which he denounced the strikers and defied them to touch him. The police charge his murder to the strikers. Eight or ten men were seen running away following the shooting.

Armed police and citizens are patrolling the streets held on Wednesday night by rioting strikers. More stores have been looted, however, and 200 shots were exchanged between a detachment under Inspector Cady and two forces of strikers who attempted to fire the Tide Water Oil Company's plant and one of the Standard Oil buildings.

Commissioner of Safety Wilson has given notice to all General Chemical employees who want to return to work to report at the City Dock, where an armed boat will transport them to the plant. These men are not strikers but have been kept from work by fear. Any effort to send them back to the plant is expected to precipitate a general fight. The police have no doubt the company spokesman killed this morning was murdered for revenge as his money, \$53, a dia-

mond ring and other jewelry were substituted. Sheriff Kinkaid, who handled the last previous big oil strike in Bayonne, in which six persons were killed, addressed an Italian society there last night. When asked if he would take charge of the situation, he said:

"I have 500 trained men at my office ready to come out at a moment's notice, but I do not think it will be necessary."

A delegation of these strike leaders, headed by James H. Doherty, a lawyer, announced to the Mayor that they intend to have a sub-committee go to New York and endeavor to deal directly with John D. Rockefeller jr. in the wage disputes. The Mayor said he had no objection.

No effort has been made to bring the strikers and the Standard Oil Company officials together for a peace parley. As Supt. Hennessey, speaking for the company, has announced that the company would remain firm in its refusal to grant the demands, there is little likelihood of any immediate conference looking to this end. The strikers want 25 per cent. increase in wages for men getting less than \$1 a day, and 20 per cent. for men getting more than that amount.

**ALLEGED 'SNIPER' IS FOUND TO BE WOUNDED.**  
An autopsy performed to-day on the body of Mrs. Sophie Torack, who was killed Wednesday night while watching a riot from her window, showed that a bullet from a thirty-two caliber revolver caused her death. This bears out the contention of Chief of Police Reilly that none of his men was responsible for her death. The police on that occasion used buckshot in their riot guns.

One man arrested during the day for "sniping" walked with such an effort that the police examined him. The examination disclosed a dozen buckshot wounds on his back. The police believe scores of strikers are going around with similar injuries. Physicians have been directed to notify police headquarters of all such cases treated by them.

Inspector Cahane of the New York police passed the day in Bayonne as a spectator. He said he wanted to study mob and riot conditions for his own information and was particularly impressed with the success of the Layone authorities in using firemen as auxiliary policemen.

Post Office Inspector Cushman went to Bayonne in an effort to find the writers of a large number of anonymous letters received by officials of the Standard Oil Company and Bayonne city officials. The strikers, it is charged by the police, have been interfering with the delivery of the mails in the Constable Hook section.

**RUTHLESS U-BOAT WARFARE DEMANDED BY MILLIONAIRES OF GERMANY'S PITTSBURGH**

Rhine and Westphalian Provinces Said to Be Hotbeds of Von Tirpitzism.

PRAISE RAIDS OF U-53.

Confident of Overcoming the Policy of Von Bethmann-Hollweg, Imperial Chancellor.

By Carl W. Ackerman.

DUSSELDORF, Germany, Oct. 13 (United Press).—Nearly every big industrial leader in the Rhine valley industrial center, which is Germany's Pittsburgh, favors ruthless submarine warfare, regardless of the interests of the United States.

Chancellor von Bethmann-Hollweg faces the opposition of the industrial interests of both the Rhine and Westphalian provinces, hotbeds of Von Tirpitzism. These interests believe that though they may not convince the Government now, they will win later. They are now centering their hopes on winning Field Marshal von Hindenburg to their side.

"The war must be fought to a finish," says the Westphaelische Zeitung, which fairly represents the sentiment of the district in this respect. "Either Germany or England must win, and the interests here on the Rhine are ready to fight until Germany wins."

Directors of Germany's steel trust and other millionaires in this industrial country declare unreservedly that Germany will not make peace until England asks terms. The Rhinecland press is still discussing War Secretary Lloyd George's statement that the allies must carry the war to a "knockout," and they hold that this statement justified their contention that Germany must use every possible weapon against England. The activities of the U-53 have greatly increased their faith in the possibilities of unlimited submarine warfare.

August Thyssen, Germany's Carnegie, declared in an interview at Homborn-on-Rhine that, since England is still the great sea power, it was necessary for Germany to operate submarines along the Canadian and American coasts to overcome this advantage.

"It can be imagined that this is uncomfortable for America, but it must be remembered we are at war with Canada and this is one means of ending the war," said Thyssen. "We can't always make war as America wants."

"Do you think Germany wants war with America?" he was asked.

"Never!" was the emphatic response. "First, because we have enemies enough; and, second, because in peace times our relations with America are always most friendly, and we want to continue so after the war. We are always most sympathetic toward America. The world interests of both countries will develop through peace."

Thyssen does not believe an economic war will follow the present war.

"We want peace because we desire to develop our industries in peace, not war," he said. "A few who, because they manufacture ammunition, want a long war, do not speak for Germany, because we do not intend to live after the war by manufacturing ammunition."

Thyssen is an intimate friend of the Kaiser. Before the war he often met Judge Gray of the United States Steel Corporation, and his son, Fritz, studied the Pittsburgh steel and coal industries. He is one of the few industrial leaders who oppose Admiral von Tirpitz.

AMSTERDAM, Oct. 13.—Chancellor von Bethmann-Hollweg has emerged from the submarine crisis strengthened by his victory over the advocates of unlimited submarine warfare, the Munich Neuester Nachrichten declares.

"He will continue his policy with the support of the Kaiser and von Hindenburg," the newspaper added. Premier Asquith's recent speech in Commons holds out no hope for an early peace, said the Cologne Gazette.

"So long as he draws out mendacious phrases about the menaced independence of small nations, an understanding with him is impossible," said the Gazette. "So long as British Ministers do not recognize the uselessness of predatory war, the nations will continue to bleed."

**ALLIES HELD BACK IN FURIOUS DRIVE, BERLIN REPORTS**

Great Effort to Break Through Lines on Both Sides of Somme Frustrated.

SIX ATTACKS ARE MADE.

London Claims an Advance on a Front a Mile and a Half Long.

BERLIN (via London), Oct. 13.—A great attempt of the French and British forces on the Somme front to break through the German lines yesterday resulted in failure, the War Office announced. Six assaults near Sailly were repulsed. The battle northwest of Sailly still continues. Following is the text of the German War Office statement:

"Brandenburg Infantry received dense British columns northwest of Guedecourt with a devastating fire.

"South of the Somme French attacks between Fremes and Manancourt and in the vicinity of Chaulnes were continued. They died under the greater part of our own curtain of fire. Stubborn fighting, which ended in our favor, again developed for possession of the sugar refinery of Genesmont. The main portion of Ablancourt remained in our possession after a fierce struggle. In the course of the latest battles we captured here about 200 French, including 14 officers.

"Army group of the German Crown Prince—East of the Meuse (Verdun front) and in the region west of Markirch, in the Vosges, there was lively artillery fighting. West of Markirch French advances were repulsed."

LONDON, Oct. 13.—British troops advanced on the front extending from Guedecourt to Les Bouffes (about one and one-half miles) in severe fighting north of the Somme last night. Gen. Haig reported this afternoon. Gains were also made northwest of Guedecourt and 150 prisoners were taken.

A German attack north of Stiff redoubt was driven off.

Fourteen British raiding parties entered the trenches in the regions of Ypres and Armentieres during the night, returning with prisoners and inflicting casualties.

**BIG GERMAN GUNS ON SOMME FRONT ARE MOVED BACK**

WITH THE FRENCH ARMIES ON THE SOMME FRONT, OCT. 13.—The Germans have withdrawn their heavy guns from one and a half to five miles behind their Somme front, Anglo-French aviators have discovered on recent flights.

The withdrawal was ordered to save the guns from capture. In the recent dashes of Allied infantry into the German lines many heavy guns have been taken before the Germans had an opportunity to withdraw them.

The Germans now have 2,100 guns opposing the French and British on the thirty mile Somme front, compared with the 2,800 guns they used in the attack on Verdun. Of this number 600 are south of the Somme, facing the French, and 650 opposite the French advance north of the Somme. The British are opposed by 550 German pieces.

Since the allied offensive began more than 600 German guns have been captured.

**BRITISH ARMORED CARS MOVE AGAINST BULGARS**

Advance Made East of the Struma River, Says Allied War Office.

SALONICA, Greece, Oct. 13 (via London).—British troops have made some advance to the east of the Struma River, in Greek Macedonia, says the official statement issued at the Entente Allied headquarters today.

British armored cars explored the region where the Serez-Demir-Hissar railroad joins the Serez-Salonica line and found that the railway was being strongly held by the Bulgarians.

New Yorker Commands Ambulance Section in Balkans.

PARIS, Oct. 13.—The recently formed section of the American Ambulance Field Service which is to serve with the French army in the Balkans left to-day for the Salonica front. It consists of thirty ambulances, with repair cars, a kitchen, camp tents and other accessories for service far from the hospital base. The section is under command of Lovering Hill of New York.

**VIENNA ADMITS GAINS BY ITALIANS SOUTH OF GORIZIA**

Austrian War Office Claims Defeat of the Roumanians at Vulcan Pass.

VIENNA, Oct. 13.—Italian troops have gained some ground six and one-half miles south of Gorizia in their violent offensive on the Carso. It was officially announced to-day, but have left 2,700 prisoners in Austrian hands. In the Pustria region the Austrians have withdrawn somewhat.

The Italians are maintaining their attacks on the Austrians without cessation and desperate fighting continued throughout yesterday.

Efforts by the Roumanians to stay the Austro-German advance in Transylvania have failed, the War Office announced to-day, and they are being driven back further by General von Falkenhayn's troops. The statement follows:

"Roumanian attacks near Vulcan Pass failed. In the region of Kronstadt the enemy was compelled to retire in the direction of the frontier passes. In the last two days 15 officers, 639 men, one heavy gun, five machine-guns and much war material have been brought in.

"In the Georgen Mountains and on both sides of the Upper Maros Roumanian resistance has been broken. Our troops are pursuing the enemy."

ROME, Oct. 13.—The new Italian drive on the Carso Plateau, which continued to-day with success for Italian arms, was begun two weeks earlier than was intended, it is said here, Gen. Cadorna throwing in his full force against the Austrian lines to compel the Teutonic high command to divert troops from Transylvania and thus lessen the strain on the hard-pressed Roumanian army.

The official war office report adds that the Austrians are suffering enormous losses in men and material, 55 officers and 1,771 more prisoners have been captured, a total of nearly 3,000 in two days and 30,881, including 724 officers, since Aug. 6.

Despite the Italian successes, Berlin continues to report Teutonic troops pursuing Roumanians through the wooded Carpathians, an enemy aeroplane was brought down by our rifle fire. The machine caught fire as a result of the fall. The aviator and the observer, who escaped death, were captured.

"Over the whole Caucasian front an exchange of fire and scouting operations are taking place."

**SERBIANS CHECKED BY BULGARS, SAYS SOFIA**

Six Assaults Fail, Declares the War Office at Sofia.

SOPIA, Thursday, Oct. 13.—(Via London).—Attempts of the Serbians who forced a passage of the Cerna River, on the Macedonian front, to continue their advance northward, have been checked by the Bulgarians, the War Office announces. Six Serbian assaults were repulsed. The announcement follows:

"From Presha Lake to the Cerna there was the usual cannonade. In the bend of the Cerna there was spirited fighting. Six consecutive attacks by the enemy in the environs of Skochivir were repulsed. The enemy sustained severe losses.

"An attempt of hostile infantry to advance on Dobrouljic Heights was foiled. In the Moglenia Valley there was considerable activity on the part of the artillery, combined with infantry and machine gun fire."

GERMANS CAPTURE A RUSSIAN TRENCH, QUICKLY LOSE IT

Kaiser's Troops Take the Offensive North of the Pinsk Marshes, Says Petrograd.

PETROGRAD, Oct. 13 (via London).—German troops took the offensive yesterday along the Pinsk River, in Russia, north of the Pinsk Marshes. The War Office announced to-day that the Germans captured a trench section, but were subsequently expelled with heavy losses. The statement says:

"The Germans last night opened artillery fire on our trenches along the western bank of the River Shara, in the region of the village of Goldovitch, and later delivered an attack which resulted in the temporary capture of a trench section. The enemy was soon driven out by our counter-attack, being repelled with heavy losses.

"In the region southwest of Bubnov our patrols attacked enemy outposts and put them to flight. Our patrols then occupied a trench of the enemy, in which they fortified themselves.

"In the region southwest of the village of Svislitski, on the river Narayavka (on the front southeast of Lemberg), the enemy attempted to dislodge our advance guards, but was repelled by our fire. In the region of Svelitski, on the river Sushava in the wooded Carpathians, an enemy aeroplane was brought down by our rifle fire. The machine caught fire as a result of the fall. The aviator and the observer, who escaped death, were captured.

"Over the whole Caucasian front an exchange of fire and scouting operations are taking place."

**REGISTER TO-DAY.**

To-day and to-morrow are the last days of registration. Registration places open to-day from 5:30 P. M. until 10:30 P. M. If you do not register you cannot vote.

**HOT WATER THE BEST LIVER AND BOWEL MEDICINE**

Says glass of hot water before breakfast washes poisons from system.

Physicians the world over recommend the inside bath, claiming this is of vastly more importance than outside cleanliness, because the skin pores do not absorb impurities into the blood, causing ill health, while the pores in the ten yards of bowels do.

Men and women are urged to drink each morning, before breakfast a glass of hot water with a teaspoonful of limestone phosphate in it, as a harmless means of helping to wash from the stomach, liver, kidneys and bowels the previous day's indigestible material, poisons, sour bile and toxins, thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Just as soap and hot water cleanse and freshen the skin, so hot water and limestone phosphate act on the eliminative organs.

Those who wake up with bad breath, coated tongue, nasty taste or have a dull, aching head, sallow complexion, acid stomach; others who are subject to bilious attacks or constipation, should obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to demonstrate the value of inside bathing. Those who continue it each morning are assured of pronounced results, both in regard to health and appearance.—Advt.
