

WILSON DECLARES FOR WAR WITH ALL GOVERNMENT RESOURCES

"I advise that the Congress declare the recent course of the Imperial German Government to be in fact NOTHING LESS THAN WAR against the Government and people of the United States; that it formally ACCEPT THE STATUS OF BELLIGERENT which has been thrust upon it, and that it take immediate steps not only to put the country in a more thorough state of defense, but also to EXERT ALL ITS POWER AND EMPLOY ALL ITS RESOURCES to bring the Government of the German Empire to terms and end the war."

Ignorant Senators either gave extracts from these communications or sent them to the clerk to be read from the rostrum.

North, South, East and West vied with each other in their declarations. The voice of the country was unmistakable in its demand for war. The Senate Foreign Relations Committee reported out the Administration state of war resolution amended so as to strengthen its entire text, with but one dissenting vote—that of Chairman Stone.

The resolution as amended reads: "Whereas, The Imperial German Government has committed repeated acts of war against the Government and the people of the United States of America, therefore be it

"Resolved, by the Senate and House of Representatives of the United States of America in Congress assembled that the state of war between the United States and the Imperial German Government which has thus been thrust upon the United States is hereby formally declared, and that the President be, and he is hereby, authorized and directed to employ the entire naval and military forces of the United States and the reserves of the army to carry on the war against the Imperial German Government; and to bring the conflict to a successful termination all the resources of the country are hereby pledged by the Congress of the United States."

After obtaining a full membership in the House Foreign Committee this afternoon decided not to meet until tomorrow morning.

During an informal morning session the House body merely discussed the situation.

WILSON PLANS ARMY OF 3,000,000

The first line of the new army will number 1,200,000 men. The second and third lines will increase the total available strength to 3,000,000.

Following on the President's announcement in his address last night of a forthcoming call for 500,000 men "chosen upon the principle of universal liability to service," the War Department will present Congress immediately after war is formally declared its plans for a complete reorganization of the military system with compulsory service as the basis.

Legislation is necessary to authorize the plans that the War Department has ready for carrying into effect this new form of service. The details are still kept secret, but will be made public when bills are presented to Congress. The President's reference in his address to military service was in broad and general terms and left some doubt just what kind of service he had in mind. He spoke of "universal liability to service," avoiding use of the terms "universal training" and "conscription."

There is no doubt, however, in the War Department as to what is intended. It means some carefully applied form of turning this universal liability of service into a reality of actual service by large numbers of the nation's manhood.

Under the present system the full war strength of the regular army is 270,000 men and of the National Guard, as apportioned among the States, approximately 650,000 men, making a total of 920,000 already provided for by law.

As numbers stand to-day both regular army and National Guard are considerably short of full ranks. The regular establishment has been operating on a peace basis strength of approximately 110 men to a company, while war strength is 150 men. The President can change the basis from peace to war strength by executive order.

CONSCRIPTION CAN BE RESORTED TO

There is also provision in the National Defense Act that when the National Guard is taken into the Federal service conscription can be resorted to in order to fill up its ranks to the allotted number.

The President's call for half a million men, according to the War Department, is an additional army to the existing forces and not a part of them. In fact as matters now stand there are three separate units of military force—regular army, National Guard and the new unnamed class. Under the scheme worked out by the General Staff, which is understood to have the President's approval, all these now distinct forces will be incorporated into a unified Federal command.

The President's demand on Congress for "subsequent additional increments of equal force" is understood to mean that men will be called up in blocks of half a million each for training and service as needed. They will come along in successive waves behind this first line of twelve hundred thousand.

The War Department to-day declined to disclose the details of the bills to be presented to Congress carrying out the new system of military service. Until it is enacted into law the present plan of voluntary recruiting for regular army and National Guard will continue.

Every moment now is precious, for since the President uttered his first word, Germany is certain to consider the challenge given. The formalities of a Congressional vote mean nothing to the desperate warriors of the Kaiser.

Among the rumors afloat is that warning has been received from England that more German raiders have succeeded in running the British blockade and are now headed toward the Atlantic lanes of our commerce.

Another is that giant submarines are on their way toward our coast, while a third report has it that a dash of the German fleet is expected against the British battle squadrons.

The British and French are said also to be anxious to have many of their smaller ships now on this side

in some cases have been placed as high as 300.

But aside from the generally known methods of meeting the submarine menace, the Entente navies have developed some important secrets in nearly three years of war practice and the American navy is expected to have the benefit of them.

The Council of National Defense and its civilian advisory commission was in special session at the War Department again to-day, at work on immediate mobilization of national resources and energies for war with Germany.

Reports have been current for some time that additional Cabinet members might be appointed to direct such work in co-operation with the council. It has been said that a secretary of munitions and a secretary of transportation might be created.

The Navy Department will immediately spend the \$14,000,000 emergency appropriation for increased yard facilities, as follows:

At Portsmouth, N. H., facilities for the immediate construction of ten submarines.

New York, one slip for the construction of a capital battleship and additional machine shops, \$2,000,000.

Philadelphia, two slips and shops, about \$4,000,000.

Norfolk, one slip and shops, about \$2,000,000.

Puget Sound and Mare Island, shipways (number and amount not stated).

Connecticut Assembly Votes Thanks for Wilson's Speech.

HARTFORD, Conn., April 3.—Resolutions expressing the thanks of Connecticut to President Wilson for "the splendid message delivered by him to Congress last night on the international situation, and pledging him full support, were adopted in both branches of the General Assembly to-day.

STOCKS OPEN STRONG BUT REACTION FOLLOWS

Early Advances Wiped Out by Noon—Volume of Business Heavier Than Yesterday.

After a strong and lively opening, marked by general advances in industrial shares the stock market reacted to-day and fell into the doldrums. By noon all early advances had been wiped out and railroad stocks were on a decline.

The heavy buying at the opening faded away after an hour of trading, although the volume of business was twice as heavy as that of yesterday. All railroad stocks were weak. United States Steel lost two points gained at the opening and fell back to 116 3/4. Professional traders appeared to be timid in advance of an actual declaration of war by the Congress.
