## THE TRIBUNE.

NEW-YORK, THURSDAY MORNING, JULY 29.

### FACTS FOR PARENTS.—No. II.

Lord Brougham said that if we were deprived of what we are ignorant beings on the face of the globe.

Every child since Adam, with the common organs of speech and common talents, no matter when he lived or where he lived, or what language he heard, has learned, at three to five years old, to speak just as well and just as badly as his father and others around him spoke.

Many thousand children now in our country, not over five years old, speak two languages, the English and the German, as correctly as they are spoken by their parents and neighbors.

Thousands and hundreds of thousands of young ladies and gentlemen now in our country, who have studied Grammar from three to five years, speak the English language no better in any respect than those around them who do not know a noun from an adjective or verb.

Many persons, probably every person, who at any age under ten or twelve years give up the use of their native language, in the course of two or three years are unable to speak it. Hence the vast amount of time and money expended by Americans in the study of the French, is, in a hundred cases out of twenty, probably ninety-nine out of a hundred, useless.

Children in School are frequently confined to the Alphabet three and even six months, and sometimes a year or more before they learn it.

Any child over three years old, with a very little aid, will learn in a week, if not in a day, twenty-six minerals, showing the elements of our Globe, and be able to recognise them in any place upon the Earth. He thus takes a lesson similar to that in the first chapter of the Bible, and a preparatory step for lessons in other books.

CITIES OF THE EMPIRE STATE.—The Express gives the following comparative census of the various cities of this State:

	1840.	1850.	1860.
New-York	312,932	370,089	203,007
Brooklyn	36,233	24,529	15,396
Albany	33,633	23,109	24,238
Rochester	20,202	14,404	9,269
Troy	19,373	16,959	11,605
Buffalo	18,041	15,661	8,653
Utica	12,810	10,183	8,323
Schenectady	6,638	6,272	4,258
Hudson	5,671	5,531	5,392

It will be observed that Brooklyn is now the second city in population in the State, which place has been heretofore held by Albany. Rochester outranks both Troy and Buffalo, which cities were ahead of it in 1835.

A SIGN OF PROMISE IN THE SOUTH.—The following article from the Savannah Republican, a leading Georgia journal, has great significance and force:

PROTECTIVE DUTIES.—This subject of late years has been made as complete a bug-bear as possibly can be, and one cannot propose a moderate duty of protection, but the cry of the "accursed Tariff" is rung through all its changes. It becomes the people of the South to examine this matter for themselves, and not import opinions on a subject of vital importance to them, and which they should weigh in the scale of their own interests, regardless of prejudice. That it is the interest of England and France to flood us with their manufactures and luxuries, and drain us of our specie, there is little doubt; and we should consider if, in order to keep this advantage, they do not talk more about free trade than they practice. Let us see what articles of American produce are admitted into those countries for a less duty than ten per cent, and upward. Is it Rice, Grain, Flour, Timber, Wool, Stoves, Provisions, or Tobacco? No! It is Cotton only; and that into England, where they cannot dispose of it, to keep their immense factories in motion.

But they have measures already in progress, which promise to be successful, to supersede the necessity of depending upon the Cotton. Their experiments in India have proved successful, and they find they can obtain from there just as good article as any of ours. As soon, therefore, as they make any further progress, we shall see a heavy duty laid on our Cotton, to the protection of theirs. Our foreign demand will be lessened, and our planters will not find sale for all they produce. They must then turn their attention to other objects of industry, and that will doubtless be MANUFACTURES of the culture of Silk. It is then that they will see the advantage of checking by moderate duties the heavy influx of the surplus goods of overstocked Europe, and preventing a balance of trade which can no longer pay in produce, but must certainly be in specie. This is the case at this time; the notwithstanding our large crops, both North and South, and our increased exports, SPECIE is carried from New-York almost every packet. Particularly so to France, to whom the State debt are due, showing the great drain to be created by the almost free ingress of French Wines and Silks.

The views of Southern people have been much changed of late years, and they do not view protective duties with quite as much a disapprobation as they formerly were. They are already prospering up. In Georgia, there are Cotton factories at Eatonton, Athens, and elsewhere; in North and South Carolina, and Virginia, there are several, and they will continue to increase. It is only within a month that 100 bales of Cotton have been shipped from this State to other markets. This is a good omen, for the time is not distant when we shall send our best market for Cotton at home; and we shall then be a self-dependent people. A war with England would show us the value and necessity of this, and for this we should be preparing.

At a late meeting of the Society for the Encouragement of the Fine Arts in London, the first prize for oil painting was gained by Gustave Girardant, a child nine years of age.

THE AMERICAN NAVY.—We are indebted to an officer of the Navy for the following list of Vessels of War in the Navy of the United States, with their rates:

The vessels, with few exceptions, mount more guns than they are rated. The Ships of the Line, rated 74 to 120, mount from 80 to 140 guns. The Independence, Razee, is rated for 54, and mounts 64 guns. Frigates of the first class, rated 44, mount from 54 to 64 guns. The Sloops of War of the first class are rated 20, and mount (with the exception of two) 24 guns; the two exceptions are the Cyane and the Levant; these vessels mount no more than the number of guns they are rated. The Sloops of War of the second class, rated 18, mount 22 guns. The Sloops of the third class, rated 16, mount 20 guns. The Brigs, Brigantines, and Schooners, rated 10, mount 12 or 14 guns, and those marked without any rate, mount, if any, one, two, three or four.

STATISTICAL ERRORS.—We have heretofore adverted to the manner in which the late Census was taken, and the egregious errors which have been engrafted upon the statistical returns. This fact was discovered at Washington, and some monstrous errors in the returns of this State were pointed out by us to the authorities at Washington. Almost daily evidences are coming to the light, showing unparagonable inaccuracies, sufficient to impair all confidence in these statistics. The Editor of the Petersburg Intelligencer has gone through them with some care, and the following article is the result of his observations. Upon these returns some writers on political economy are founding theories and drawing deductions, which of course must be fallacious, if the premises are so utterly wrong. The Intelligencer says:

The table of Agricultural Statistics, which has been published and constructed with much labor no doubt, contains gross blunders. Instead of imparting information, it is calculated to mislead, and is therefore worse than useless. Virginia is stated to produce 92,123 tons of Hemp and Flax; Pennsylvania 170,000; Ohio 252,520 tons; and other States similarly impossible quantities—making an aggregate (exclusive of Kentucky, the only State that produces much) of 843,049 tons!—far exceeding the production of the whole world.

Louisiana must rejoice to hear that she makes of Sugar 249,937,720 lbs., equal to 250,000 hhd's; and of Pitch, Tar and Turpentine, 12,233 bbl's; when the largest crop of Sugar she has made in the last five years, according to commercial statistics, is 46,500 hhd's; and of Naval Stores she was probably unconscious that she produced any.

The Silk culture must have increased rapidly and invisibly in Pennsylvania, to have reached 273,939 lbs.—an error probably of about 270,000.

The product of Sugar in New-York is put down at 10,093,991 lbs.! Her maple trees must be numerous and well tended.

The product of Hay must astonish the farmers: New-York, 3,160,916 tons! But poor Virginia is miserably deficient in her Tobacco crop—only 14,157,841 lbs., or about 11,000 hhd's; her annual inspections (which, to be sure, include most of the North Carolina crop) being 45,000 to 50,000 hhd's. But then she makes it up in Cotton, which, according to the Census return, is 10,767,451 lbs., or 35,800 bales. By the bye, the returns of Cotton by some of the Marshals are in seed Cotton, by others in ginned Cotton; and as the table does not make the distinction, it is valueless in all important items.

Perhaps the Assistant Marshals were paid by the quantity for what they returned, and this may account for the productiveness of the country in some articles.

It is fair to infer that the Census of inhabitants is little to be relied on, when derived from the same sources.

**FOR ONE, NO NUMBER.**  
As there have been many complaints, and justly too, made through the newspapers in regard to the size and quality of Bread, I would through the same channel inform the citizens at large, and the public printers, that at my old place, No. 52 Houston-st., corner of Cannon, can be had for one shilling, a loaf of Bread, made of the very best materials, and with the strictest attention to cleanliness, that will weigh 44 pounds, while the bread sold by the Grocers, and a majority of the Bakers, will not weigh over 34 pounds for the same money. I think of this difference, and while the public printers are watching your interest, do not be negligent of it yourselves, but come to HARPER'S where you can always get the worth of your money, and an article that will please the most fastidious taste.

Understand, 44 pounds of the best of Bread for a shilling, while four remains at present prices, and more should I dare become yet cheaper. JOHN HARPER, 52 Houston-st. cor. Cannon. j23 1w
