To Liverpool there is a moderate amount of freight offered, and the rates tend downward. Engagements 1,000 bales Cotton lard, 5,000 or 6,000 bbls. Flour 10,000, 20,000 bbls. Grain 31 or 34,000, 1,500 bbls. Resin 12, 15,000 Oil 17 1/2. To London, 2,000 or 3,000 bbls. Flour 1 1/2, 2,000 bbls. Spirits 25, 300 bbls. Naval Stores 2 1/2. To Glasgow, 500 bbls. Flour 1 1/2, 5,000 bush. Wheat 5 1/2. To Havre, Cotton is dull at 1/2. To Rotterdam, 10,000 bush. Corn 1 1/2. From Nova Scotia to England a Deal freight was made at 1/80. There is a fair business doing for California at 4 1/2 cts.

The amount received at the Sub-Treasury is \$105,182; paid \$15,300; balance \$89,882.

There is no change in the Money market. Large loans have been made at 1/2 cent on call, and in a few instances balances have been left at still lower rates. First class paper goes at 1/2 cts.

After the Board yesterday afternoon a sale of \$500,000 Convertibles, 1882, was made at 97 buyer side, and between the Boards to-day \$100,000 1874 sold at 97 regular, and 98 buyer side. We hear of several considerable transactions in Bonds to-day for European account.

The steamer to-morrow will take about half a million of specie, a portion of which will be silver. Gold pays no profit at the present rate of Exchange, and it is generally supposed these remittances are to meet bills drawn previously on speculation.

There was no change in the direction of the Harlem Road at the election to-day excepting the substitution of Mr. Robinson for Mr. Sturges, who resigned. The Board is as follows: Robert Schuyler, George Barker, Philip Dater, Nelson Robinson, William S. Wetmore, R. M. Blitchford, Thomas W. Ludlow, Edward Bennett, William S. Miller, Charles Denison, Wm C. Wetmore, Governor Morris, Isaac E. Haviland.

The Water Commissioners of Jersey City propose to make a loan of \$300,000. The Albany Evening Journal denies that any Bank in Albany refuses to receive the notes of Banks having Revenue Certificates as security.

The Oswego and Syracuse Railroad has declared a dividend of 3 1/2 per cent, payable on demand. The town of Binghamton voted, on the 13th instant, to take \$50,000 each in the Albany and Binghamton, and Syracuse and Binghamton Railroads. The vote was unanimous.

Heman B. Ely, Esq. of Rochester, President of the Green Bay and Lake Superior Railroad Company, left Cleveland for Lake Superior on the 11th inst., with a corps of engineers, to commence the surveys of the work. The part of the road between Lake Superior and the Jackson Iron mountain will be pushed forward rapidly this season; and if possible to completion, so as to render the iron there available. W. E. Ferguson has been appointed chief, and William Hall assistant engineer of the work.

The following is a condensed statement of the business of the Georgia Railroad and Banking Co. for the year ending 31st of March last: The gross earnings of the Road Department for the year ending 31st of March last were \$745,111. And the expenses of same Department \$395,367.51. Leaving net profits \$349,743.59. The income of the Company, from all sources, may be stated thus: Gross income from Road \$745,111. Gross income from Bank \$69,617. Total income from Road and Bank \$814,728.51. Expenses of Road management \$395,367.51. Expenses of Bank management \$10,000. Total expenses \$405,367.51. Leaving net profits \$409,361.00. Interest on Bonds \$20,655.42. Total net profits \$429,986.42.

Net Profits from Road and Bank \$429,986.42. The annual dividend of 8 1/2 per cent, payable on 1st of October, will be \$35,838.93. The balance of \$374,147.49 will be paid on 1st of January next. The following is a comparative statement of the earnings of the road in the month of April, 1881 and 1882: Passengers, Freight, Mail, &c. Total. 1881 \$149,475.70 \$20,500.50 \$70,444.29 \$170,420.49. 1882 \$149,820.65 \$20,900.95 \$70,224.09 \$171,745.69. Increase \$344.95 \$400.45 \$779.80 \$1,250.20.

The demand for numerous descriptions of Dry Goods continues good, and at very firm prices. The City trade, as well as the nearly and general western and north-western trade is considerable. The great delay in the opening of navigation, has thrown into this month, much of the demand which would otherwise have been witnessed in April. Cotton Yarns are more active, though still at low prices, 13 1/2 to 14; but both in Goods and Yarns, a considerable advance is near at hand. Brown Shirtings and Sheetings are particularly heavy. Brown Sheetings are appreciating in value under the influence of a speculative demand. The latter now realize 6 1/2 cts. The stock is not heavy. Bleached Goods are active at steady rates. The advance in Raw Cotton is affecting prices, as stocks are not large enough to induce holders to forego the advance. Drills are active. Browns at 7 1/2 cts. for best quality. Blues at 9 cts. and Bleached at 8 cts. The export demand has been very active, but is somewhat diminished, while the spring home trade is nearly over. Osmaburgs are quiet. Denims are in limited demand at 7 1/4 to 7 1/2 cts. Stripes and Ticks are dull, and prices without firmness or uniformity. In Printing Cloths we notice some improvement, both in demand and price. Prints are not active, but a moderate demand exists for good styles, at regular rates. Gingham contains a uniform in price, supply and demand, steady but limited. Lawns are more active at full rates. Delaines are inactive. The clothing trade has been purchasing woolsens more freely for their autumn stock, and prices are firmer, if not higher. Sateens continue to sell freely at full rates. The stock of fancy spring styles of Cashmeres oppresses the market, and prices favor the buyer. The styles most favored still largely are our patterns, that holders are more willing to sell at a very large depreciation in price than keep them over to another season. Staple styles are firm, if not buoyant. The Woolen jobbers have been buying freely, both Domestic and Foreign parcels offering at favorable rates, denoting a rise in the fall season certain. The stock of German Cloths is much reduced, and prices much advanced. Domestic Tweeds are dull and heavy. Kentucky Jeans are firm, and moderately active. The Auction sales are nearly over. Foreign goods are sold down to a very limited amount of stock. French goods have advanced. Ribbons are especially buoyant, scarce and wanted. Raw Silk is advancing in France, Black Silks are the only descriptions in large stock, and these are sold at higher rates. Goods cannot be imported to sell at profit at recent prices. We notice on the market an interesting description of French tricolored Silks offering at the very low price of 42 1/2 cts. They form the National colors of France, were manufactured by the Revolutionary Government of France, under the orders and supplies of Lamartine. The width is 90 inches, but the quality is extremely fine. The silk is a faded silk, and the three different colors are carefully and artistically interwoven, as of one piece. The imports of French goods is exceedingly small. The packets being only half cargoes. British goods are held firmly, but with only a moderate demand. The heavy cloths suited for the fall clothing trade are selling moderately at full rates. The expectation that prices will rule much higher in the fall, both for home and foreign goods. Woollens, Silks and Cottons, is becoming general. Prices are rising abroad both for the raw and manufactured articles; and hence the far-seeing are buying up such goods as they find suited to their purposes in the fall. At least, prices cannot decline. They have reached a very low point—and the lowest.

The following are the exports for the week ending 18th inst.: Flour—2,200 bbls. Cotton—2,000 bbls. Grain—10,000 bush. Spirits—25,000 bbls. Naval Stores—2 1/2. To Glasgow, 500 bbls. Flour 1 1/2, 5,000 bush. Wheat 5 1/2. To Havre, Cotton is dull at 1/2. To Rotterdam, 10,000 bush. Corn 1 1/2. From Nova Scotia to England a Deal freight was made at 1/80. There is a fair business doing for California at 4 1/2 cts.

MARKETS.—CAREFULLY REPORTED FOR THE TRIBUNE. TUESDAY, MAY 18.—P. M. COTTON.—The market is more active, and prices are steady. The demand is moderate, and the supply is not heavy. The market is active at steady rates. The advance in Raw Cotton is affecting prices, as stocks are not large enough to induce holders to forego the advance. Drills are active. Browns at 7 1/2 cts. for best quality. Blues at 9 cts. and Bleached at 8 cts. The export demand has been very active, but is somewhat diminished, while the spring home trade is nearly over. Osmaburgs are quiet. Denims are in limited demand at 7 1/4 to 7 1/2 cts. Stripes and Ticks are dull, and prices without firmness or uniformity. The clothing trade has been purchasing woolsens more freely for their autumn stock, and prices are firmer, if not higher. Sateens continue to sell freely at full rates. The stock of fancy spring styles of Cashmeres oppresses the market, and prices favor the buyer. The styles most favored still largely are our patterns, that holders are more willing to sell at a very large depreciation in price than keep them over to another season. Staple styles are firm, if not buoyant. The Woolen jobbers have been buying freely, both Domestic and Foreign parcels offering at favorable rates, denoting a rise in the fall season certain. The stock of German Cloths is much reduced, and prices much advanced. Domestic Tweeds are dull and heavy. Kentucky Jeans are firm, and moderately active. The Auction sales are nearly over. Foreign goods are sold down to a very limited amount of stock. French goods have advanced. Ribbons are especially buoyant, scarce and wanted. Raw Silk is advancing in France, Black Silks are the only descriptions in large stock, and these are sold at higher rates. Goods cannot be imported to sell at profit at recent prices. We notice on the market an interesting description of French tricolored Silks offering at the very low price of 42 1/2 cts. They form the National colors of France, were manufactured by the Revolutionary Government of France, under the orders and supplies of Lamartine. The width is 90 inches, but the quality is extremely fine. The silk is a faded silk, and the three different colors are carefully and artistically interwoven, as of one piece. The imports of French goods is exceedingly small. The packets being only half cargoes. British goods are held firmly, but with only a moderate demand. The heavy cloths suited for the fall clothing trade are selling moderately at full rates. The expectation that prices will rule much higher in the fall, both for home and foreign goods. Woollens, Silks and Cottons, is becoming general. Prices are rising abroad both for the raw and manufactured articles; and hence the far-seeing are buying up such goods as they find suited to their purposes in the fall. At least, prices cannot decline. They have reached a very low point—and the lowest.

MARKETS.—CAREFULLY REPORTED FOR THE TRIBUNE. TUESDAY, MAY 18.—P. M. COTTON.—The market is more active, and prices are steady. The demand is moderate, and the supply is not heavy. The market is active at steady rates. The advance in Raw Cotton is affecting prices, as stocks are not large enough to induce holders to forego the advance. Drills are active. Browns at 7 1/2 cts. for best quality. Blues at 9 cts. and Bleached at 8 cts. The export demand has been very active, but is somewhat diminished, while the spring home trade is nearly over. Osmaburgs are quiet. Denims are in limited demand at 7 1/4 to 7 1/2 cts. Stripes and Ticks are dull, and prices without firmness or uniformity. In Printing Cloths we notice some improvement, both in demand and price. Prints are not active, but a moderate demand exists for good styles, at regular rates. Gingham contains a uniform in price, supply and demand, steady but limited. Lawns are more active at full rates. Delaines are inactive. The clothing trade has been purchasing woolsens more freely for their autumn stock, and prices are firmer, if not higher. Sateens continue to sell freely at full rates.
