

COMING STATISTICS.

THE INTERNATIONAL STATISTICAL CONGRESS.

THE INTERNATIONAL STATISTICAL CONGRESS.—THE SANITARY CONDITION OF MANKIND—THE RESULTS OF AGRICULTURE, MANUFACTURING, AND MINING—COMMERCIAL OBSERVATIONS.

The eighth session of the International Statistical Congress was to have been held at St. Petersburg in 1871, but for reasons connected with the political situation of Europe at the time it was postponed by the Russian Government until 1872.

Improvements in Census-Taking.—A pamphlet of some 60 pages, received from St. Petersburg, brings us the results of the Committee of Preparation. The proper division of the Congress into sections was among the first things which engaged the attention of the Committee.

The number is, therefore, limited to the subjects which are essential to the sanitary condition of mankind, to the results of agriculture, to the results of manufacturing, and to the results of mining.

The following formulae were adopted in relation to metallurgy: 1. Number of establishments. 2. Methods of treatment of ores. 3. Motive powers. 4. Number of workmen. 5. Wages. 6. Quantities produced. 7. Substances used. 8. Losses.

The Committee give considerable prominence to statistics bearing upon the physical development of man. The necessity of a great number of observations upon the subject at different periods of human life, was noted 40 years ago by Quetelet.

The necessity of a great number of observations upon the subject at different periods of human life, was noted 40 years ago by Quetelet. One of the conclusions reached by this Congress was that "to determine the sanitary condition of a population it is necessary that statistics should be taken for each individual through all the phases of his existence from birth to death."

PERSONNEL OF THE NEW NATIONAL COMMITTEE. (TELEGRAPH TO THE TRIBUNE.)

BALTIMORE, July 9.—The National Committee, appointed by the Convention to-day, met to-night at the Opera House, and, after waiting an hour for a full attendance, concluded not to organize but to hold an adjourned meeting to-morrow for that purpose.

The Committee contains a few members of the old Committee, but most of the members are new men and a number are comparatively young men and a number are of their way up to prominent positions in the politics of their States with the past few years.

But one delegate appointed to the Baltimore Convention is personally hostile to Greeley and Brown, and that is Mr. Cullough of Chicago. He was strangely appointed in opposition to the wishes of every delegate in the Convention from Cook County, with the exception of his own son-in-law, Mr. Fuller, and his appointment was a gross insult to the delegates.
