

before him, as a driver upon his cattle along the road, and the most intelligent among them.

THE QUESTION OF FREE CANALS.

The canal question is now the leading issue in our State politics. It is not a partisan question, at least so far as the canal itself is concerned. For the purpose of an adverse effect upon the canal, it is likely to influence the popular vote on this question, and it is likely to influence the vote on the canal itself. It is likely to influence the vote on the canal itself, and it is likely to influence the vote on the canal itself.

THE WORK OF THE FRESH AIR FUND.

The children that will start to-day for the country—the class from which they are taken.

The Fresh Air Fund today sends out on account of the Fresh Air Fund the largest party of children that has ever enabled to enjoy the delights of country life. The number of beneficiaries who will start to-day is 462. They will be distributed among the villages on the western shore of Lake Champlain as follows:

Table with 4 columns: Village, Girls, Boys, Total. Lists villages like Clintonville, Watkinsville, etc., with corresponding numbers.

The party will leave this city at 5 o'clock this afternoon, and by to-morrow night all the children will have reached their destination. The party will be under the charge of the Rev. Wm. Parsons, who will be assisted in the work of taking care of the juvenile travellers by the following voluntary helpers: The Rev. J. H. Wilson, the Rev. William Pliesch, H. A. Parsons, Frederick Greck, Mrs. M. McKinnon, Miss Sarah Warren and Miss Jennie Warren. The children have been gathered from those quarters of the city where the respectable poor drag out a miserable life in death-bed tenement houses, and they go out bearing the sign manual of poverty, hunger and sorrow. But, as has been the case in former years, sorrow will be blown away with the first breeze from the mountains, and hunger will disappear and poverty be forgotten amid the plenty of country life. The children who start to-day have been selected by the following missions and chapels: St. Augustine's Mission, Carmine Mission, Lebanon Mission, Romeyn Mission, St. Thomas's Chapel, Olivet Chapel, Chapel of the Atonement, Brick Church Chapel, Bohemian Mission, Zion Chapel, Wilson Mission, Alexander Mission and Gotham Church. Some, also, have been selected by physicians and Bible readers. They have been carefully chosen, the particular circumstances of each case being carefully considered. It is safe to say that there is not a child that starts to-day for the country that does not absolutely need the change.

To appreciate fully the need that the children of tenement-house districts have of spending a short time in the summer in the country, it is necessary to see the homes in which they live. A Tribune reporter recently accompanied one of the ladies connected with this city missionary work, who was making up a certain number of children to send to to-day's party. The first place visited was a rear tenement house. A long, narrow, dark, dirty hall led through the house, and was flanked by such high buildings that the sun struggled vainly to make anything like a respectable daylight through the narrow crevices. The children were crowded into one or two rooms, and the groups of dirty children that occupied most of the available space. Four rooms of substantial woodwork were set up in the rear of the house, and the woman, whose two boys it had been proposed to send into the country, on every landing door stood open and showed dirty rooms almost bare of furniture. The children were crowded into one or two rooms, and the groups of dirty children that occupied most of the available space. Four rooms of substantial woodwork were set up in the rear of the house, and the woman, whose two boys it had been proposed to send into the country, on every landing door stood open and showed dirty rooms almost bare of furniture. The children were crowded into one or two rooms, and the groups of dirty children that occupied most of the available space.

The woman visited had two rooms, and there she lived with four children. Only one of the boys was well-paying business in the country. He was taken ill with consumption, and came with his family to the city, thinking that he could get some light air, and that he would be able to get the same. He failed to get work, poverty and death, his widow, a delicate looking woman, supported herself and family by taking in washing. The room was a filthy, narrow, and the woman, who was a widow, supported herself and family by taking in washing. The room was a filthy, narrow, and the woman, who was a widow, supported herself and family by taking in washing.

THE HARVARD-COLUMBIA BURLISQUE.

COLUMBIA'S SIDE OF THE STORY OF THE DRAWING-ROOM AFFAIR—WHY THE MEMBERS OF HER CREW THINK THEY WERE BADLY TREATED. To the Editor of the Tribune:—I have been placed in a false position by the accounts of the affair in the New-York press. If you would publish our statement of the difficulty you would very greatly oblige me. The first meeting of the Harvard and Columbia representatives was held in Boston, and it was then decided to row an eight-oared race on the 24th June on the Thames; and it was freely understood at that time that a "fair ebb tide" meeting would be held at least two hours after the ebb.

OBITUARY.

EX-GOVERNOR GOODWIN. PORTSMOUTH, N. H., July 4.—Ichabod Goodwin, the first Governor of New-Hampshire, after a life of more than four score years, quietly breathed his last at his home in this city at 8:48 o'clock this evening. He was born on October 10, 1796, in what is now North Berwick, Me. He was the eldest son of Samuel Goodwin and Nancy Thompson Garrison. In early life Mr. Goodwin followed the sea, and in 1822 he established himself in this city as a merchant, supplying the ship-builders of the Piscataquis with copper and sagging in foreign freighting business. He was prominently represented in nearly every enterprise of public importance here. He was the first president of the Portsmouth Board of Trade, and for years a director of the Eastern Railroad in New-Hampshire, a member of the Board of Directors of the Portland, Saco and Portsmouth Railroad, and president of the Board of Directors of the Eastern Railroad Company. He was a delegate to the National Convention which nominated Clay, Taylor and Fremont for President in 1852, and was elected Governor of New-Hampshire in 1859, and re-elected in 1860, his last term expiring in June, 1861.

TORNADOES IN THE WEST.

LITTLE ROCK, Ark., July 4.—This city was visited last night by a veritable tornado. For half an hour the wind whirled at the rate of seventy-two miles an hour, and for one minute it made three miles, or at the rate of 180 miles an hour. These figures are given by the Signal Service Station here. No buildings were blown down, but signs, chimneys, roofs and windows were scattered in all directions. Rain fell in torrents.

FOUND IN THE NORTH RIVER.

The body of an unknown man, very much decomposed, was found in the North River, at the foot of 21st-street, yesterday afternoon. The man was about fifty years old, 5 feet 7 inches tall, with smooth face, hair and eyes. The body was taken to the morgue.

COLLEGE BOYS AT THE OAR.

THE PENNSYLVANIA CREW WINNERS.

A CLOSE AND EXCITING CONTEST ON LAKE GEORGE—WESLEYAN SECOND, PRINCETON THIRD, AND BOWDOIN LAST—CORNELL'S MISFORTUNE. LAKE GEORGE, N. Y., July 4.—The Inter-Collegiate race is over, and those who witnessed it at aquatic contests that ever occurred in this country. At 4:30 o'clock, when the crews were preparing to go to the start, a wind suddenly arose, and a referee Garfield announced a postponement of the race. Within fifteen minutes the wind died away, and the crews were ordered to start. Bowdoin and Cornell were soon at the head of the race, but the race was delayed over three-quarters of an hour on account of the delay of the other crews. The air was very chilly, and the oarsmen who were prompt experienced considerable discomfort waiting for their opponents. The officers of the race were: Henry G. Garfield, referee; Judges and time-keepers—J. E. Enstis, for Wesleyan; Samuel Lloyd, for Princeton; Clemens Jones, for the University of Pennsylvania; Davis Michael, for Bowdoin; and C. S. Francis, for Cornell. Judge at the finish—William Benedict, of Troy.

It was not until 6 o'clock that the boats drew into the line. Princeton made a false start and was called back by the referee. At the second-off Cornell took the lead first, and within a dozen strokes had a lead of half a length, followed by Bowdoin, Princeton, University of Pennsylvania and Wesleyan, in the order named. The advantage was secured by Cornell was gradually increased, until at the eighth of a mile there was clear water between their shell and that of Princeton, who, by a gallant spurt, had passed Bowdoin. The strokes of the several crews during the first minute were: Princeton, 36; Bowdoin, 45; University of Pennsylvania, 36; Wesleyan, 45; and Cornell, 48. At the quarter Cornell still in the van, with a length's lead; Bowdoin second, a trifle in front of Wesleyan. The Princeton crew was compelled to accept fourth place at this point.

The half-mile buoy was reached in 2:45, with Cornell still leading. The Wesleyans here slightly increased their stroke and secured second position, not over half a length behind the leaders. The University of Pennsylvania crew, rowing close to the west shore and pulling in magnificent form, obtained third place, while Bowdoin, suddenly weakening and going to the rear, was possibly owing to the fact that one side of the boat was much stronger than the other, and the referee frequently warned them to keep their keel on a straight line of a mile from the start the Ithaca shell was still in front, with the Wesleyan close at hand. Princeton was not a quarter of a length in the rear, following on almost equal terms by the University of Pennsylvania.

It was apparent to all the spectators shortly after the three-quarters of a mile that the Princeton crew was in a bad way, and it is all nonsense to say that we are embarrassed in receiving and loading our freight. You might just as well say to-morrow that the sun will rise, and that the moon will set, and that the world will end. The Princeton crew was in a bad way, and it is all nonsense to say that we are embarrassed in receiving and loading our freight. You might just as well say to-morrow that the sun will rise, and that the moon will set, and that the world will end.

While the strike is in progress, it is not confident that it will take place to-day. Many have already found work elsewhere and are not anxious to return to the strike. The Princeton crew was in a bad way, and it is all nonsense to say that we are embarrassed in receiving and loading our freight. You might just as well say to-morrow that the sun will rise, and that the moon will set, and that the world will end.

MIDNIGHT WEATHER REPORT.

WASHINGTON, July 5, 1 a. m.—A storm of slight energy is central on the North Carolina coast. The barometer is highest in the Northwest and Upper Lake region. Rain has fallen in all districts except the Northwest and Upper Lake region. The prevailing winds are light northerly. The temperature has risen in the Northwest and Upper Lake region and fallen in the other districts.

TRIBUNE LOCAL OBSERVATIONS.

7:00 7:15 7:30 7:45 8:00 8:15 8:30 8:45 9:00 9:15 9:30 9:45 10:00 10:15 10:30 10:45 11:00 11:15 11:30 11:45 12:00

TRIBUNE OFFICE, July 5, 1 a. m.—The barometer fell slowly. Cloudy weather prevailed, and in the afternoon fell rain 1.19 inches of an inch of rain, the average (66%) being 1.19 inches on the corresponding day last year and 2 1/2 inches lower than Monday.

FLAMES IN FIRST AVENUE.

A LOSS OF \$100,000 IN A CANDLE FACTORY. Heavy black clouds of smoke, rolling in great volumes over the lower part of the city about 6 o'clock last evening, caused some alarm among the people down town. The smoke issued from Nos. 67 and 69 First-ave. and No. 124 East Fourth-st. The building is 100 by 50 feet in dimensions, is three stories high, of brick and is owned and used as a manufactory of paraffine candles by Rowland S. Mitchell, of No. 3 West Tenth-st. There was a large quantity of grease, tallow, etc., stored in the building. The position of the building was such that the smoke from the factory could be seen from the city. The fire was caused by a candle factory. The building is 100 by 50 feet in dimensions, is three stories high, of brick and is owned and used as a manufactory of paraffine candles by Rowland S. Mitchell, of No. 3 West Tenth-st.

THE STRIKERS AND THE RAILROADS.

OFFICIALS DECLARE THAT THE STRIKE IS AT AN END—THE MEN CONFIDENT THAT THE COMPANIES WILL YIELD—TAMMANY'S RESOLUTIONS. For the first time since the beginning of the freight-handlers' strike, both the railroad companies and the men were absolutely inactive yesterday. The fall in the struggle, which was due to the fact that the men had accepted the offer of the railroad companies, was a relief to all concerned. The men were confident that the companies would yield to their demands, and the companies were confident that the men would accept the offer. The strike was at an end, and the men were confident that the companies would yield to their demands.

INACTIVITY AT THE PIERS.

THE TWENTY-THIRD'S BAD LUCK. UNFAVORABLE WEATHER FOR THE 23D REGIMENT—COMPLAINTS ABOUT THE CONTRACTOR WHO FURNISHES THE FOOD. FROM A SPECIAL CORRESPONDENT OF THE TRIBUNE. NEW-YORK STATE CAMP OF INSTRUCTION, PECKSKILL, July 4.—Bad luck has followed the 23d Regiment from the time they left their army last Saturday afternoon till now. On their march to the boat a number of men were overcome by the heat, and it was uncomfortably hot work for all the men, the occasion disagreeably recalling the terrible Centennial Fourth in Philadelphia. Then came a pouring rain to give them a damp welcome to such hospitable as their new camp had to offer on their arrival here. On Sunday morning, while they were at breakfast, an amateur cyclone demolished the mess tent, and some of the men narrowly escaped with their lives, while several received bruises of greater or less severity. To-day, the 23d Regiment, which has been made miserable by the annual inspection of the regiment, was particularly distinguished by the persistent rainfall, which began while the inspection was still in progress and continued with intermittent discomfort till night. To this category of disagreeable things must be added, as last, but not least, the unsatisfactory food and service at the mess tent. And yet, to the credit of the men it is said, they have borne it all with a philosophic spirit.

SUMMER LEISURE.

INDEPENDENCE DAY AT SARATOGA.

SARATOGA SPRINGS, N. Y., July 4.—A number of Saratoga and guests celebrated the Fourth by enjoying a ride to Lake George for the purpose of witnessing the intercollegiate regatta. They returned home by special train about 10 o'clock to-night. Saratoga observed Independence Day by a general excursion of places of interest, and by the appearance of the village in the morning. The hourly excursion trips over the Saratoga Lake railway and steamer were largely patronized. The arrivals to-day have been very good considering that it was a general holiday. The weather is fine and delightfully cool. Between forty and fifty races have already reached here, and their number is being increased daily. Mr. Noble and family, J. S. Davenport, Mr. and Mrs. W. T. Tallarfer, Mr. and Mrs. L. W. Vick, M. T. Williams and family of New-York; Mrs. James Halsey and family of Chicago; Thomas J. Bourke, William P. Newman, Miss Taylor, Mr. and Mrs. Lloyd Thomas, Miss Annie Manning, John A. Delahanty, of Albany; M. E. Wendell, of Troy; Samuel E. Allen, of Boston; Oswald Blossome and party, of England; Mr. and Mrs. J. H. Stoddard, of Brooklyn, are among the early arrivals at the Grand Union Hotel.
