The average daily circulation was 342 volumes. The number of books added to the library was 7,315 volumes, which, with one exception, the largest number added in a single year since 1877.

These figures indicate a high standard of reading on the part of those entitled to use the library, of whom there are 5,245 persons. It was said that the plans of the association, which have not yet been prepared, will be to begin the erection of a new building on the Astor Place site in May, 1890. The library has an exhibit at the Paris Exposition, showing the workings of the institution.
