Regarding the results of Columbus's life, Mr. Hale said that Columbus was not a great explorer. He had no new lands to discover, but he was a great discoverer of the world...

What Mr. Hale said was, as he heard, that Columbus was not a great explorer. He had no new lands to discover, but he was a great discoverer of the world...

THE DANGER FROM LEPROSY.

EMPHATIC LESSONS FROM THE EXPERIENCE AND PRACTICE OF CHINA.

To the Editor of The Tribune.

Sir: The recent appearance of several Chinese lepers in New York, and the fact that they are permitted to pursue their avocations for a time, at least, among us, suggests to me the following points which it may be useful to consider in our country...

1. Leprosy in China is very frequent; in the province of Quanzung, of which Canton is the capital, alone, there are at least 10,000 lepers...

2. The Chinese believe that the disease may be communicated by the contamination of food. This generally received opinion seems to me strange at first...

3. The Chinese Government believes that leprosy is contagious, but it does not seem as if the people shared in this belief. There are asylums to isolate lepers all around Canton...

4. But even the Chinese believe, with many other Eastern nations, that leprosy is communicated by contagion. Their laws regarding this disease are very strict...

5. To allow the leprosy man intercourse with healthy women is simply to strengthen and nourish the leprosy-bacillus. The strength of the latter is gradually attenuated as lepers breed with other lepers...

6. It must not be believed that we are absolutely and under all circumstances safe from leprosy. It is true that European leprosy in China, even though it is not the same as the Chinese leprosy...
