

A BIG BASEBALL DEAL.

LEAGUE AND ASSOCIATION AT PEACE.

THE BOSTON CLUB OF THE LATTER ORGANIZATION WILL BE DROPPED OR MOVED AWAY.

Philadelphia 9, New York 5, Chicago 10, Cleveland 4, Boston 8, Brooklyn 3, Pittsburgh 3, Cincinnati 1.

It can be seen announced positively that the war between the National Baseball League and the American Baseball Association is a thing of the past.

It has been an open secret for months that both the National League and Association have wanted of the war which sprung up between the club-owners at the behest of the Brotherhood.

The evacuation of Cincinnati by the Association was only the beginning of the concessions for peace. The next move will be the dissolution of the Association club of Boston.

Each faction has appointed a committee and they will meet in Washington on Tuesday next. A. G. Spangler, Jr., agent, John T. Brush, and C. H. Spangler, Jr. will represent the League, and C. Von der Ahe, Henry Van der Hoist and "Jack" Phelps the Association.

In settling their differences the Western Association should not be left out of the cold as now seems probable. The younger Western organization stood manfully by the League in both its Brotherhood and Association wars, and its interests ought to be protected at all hazards.

All the Eastern clubs of the National League started on their tour of the West last night. Few of the club-owners, however, accompanied their teams. They have more important business to attend to at Washington on Tuesday.

BRIDEGROOMS BEATEN AGAIN.

BOSTON'S MEN TOO MUCH FOR THEM—SCORES AND RECORDS.

If there was a pleasant spot in this neighborhood yesterday, it was at Eastern Park, Brooklyn. The cool, fresh breezes from Jamaica Bay made the atmosphere delightful to the 6,000 spectators.

Levet started in the fifth inning. He was hit unusually hard and at the end of the fifth inning he was taken out. Hemming was substituted. He did considerably better, but Staley was in the form, and the Brooklyn could not catch up.

Ward again sent the visiting players first to the bat, reaching the last inning for his own team. A careless play by Pinkney and Lovett was responsible for the long run scored by the Boston in the opening inning.

In the fourth inning the home players scored two runs and took the lead amid wild applause. Pinkney did not seem over anxious to get. Nash sacrificed each runner a base and both scored on Brodie's lively three-bagger between right and center fields.

In the fifth inning the visiting men scored three runs and Lovett was promptly relegated to the bench and Hemming put in to pitch. But the damage had already been done. Stovey, the first batsman, got to first on a single by Ward and Lovett followed with a hit and a run.

In the fourth inning the home players got a run and tied the score. After W. O'Brien and Griffin had been disposed of, Daley was sent first on a ball. He got around to third on a wild pitch and scored on Lovett's drive toward second base, which Long and Love tried to win.

In the fifth inning the visiting men scored three runs and Lovett was promptly relegated to the bench and Hemming put in to pitch. But the damage had already been done. Stovey, the first batsman, got to first on a single by Ward and Lovett followed with a hit and a run.

THE SCIENTISTS' STUDIES.

BIMETALLISM DISCUSSED BY THE AMERICAN ASSOCIATION.

THE NOMINATING COMMITTEE RECOMMENDS PROFESSOR LEONTE FOR PRESIDENT—ROCHESTER THE PLACE FOR THE NEXT MEETING.

Washington, Aug. 22.—The reading of the papers in the several sections of the American Association for the Advancement of Science was concluded to-day, and the association adjourned till Tuesday evening, when the final general session will be held.

President, Professor John Leconte, of the University of Berkeley, Cal.; vice-presidents—Section A, Professor J. H. Eastman, Naval Observatory, Washington; Section B, Professor B. F. Thomas, State University, Columbus, Ohio; C, Dr. Alfred Springer, Cincinnati; D, Professor John D. Johnson, Washington; E, Professor H. S. Gannett, U. S. Geological Survey, Washington; F, Professor S. P. Henshaw, Cornell; G, Professor S. P. Henshaw, Cornell; H, W. H. Holmes, of Washington; I, S. Dana, Putnam, Harvard University; general secretary, Amos W. Butler, Brookline, Ind.; secretary to the committee on the organization of the association, J. H. Eastman, Naval Observatory, Washington; J, Professor W. L. Upton, of Brown University; K, Professor Brown Ayres, Tulane University, New Orleans; L, Professor A. H. F. Pitt-Rivers, of the University of Cambridge, England; M, Professor H. Landolt, of the University of Zurich, Switzerland; N, Professor L. D. Salisbury, State University, Madison, Wis.; O, Professor J. H. Eastman, Naval Observatory, Washington; P, Professor W. L. Upton, of Brown University; Q, Professor Brown Ayres, Tulane University, New Orleans; R, Professor A. H. F. Pitt-Rivers, of the University of Cambridge, England; S, Professor H. Landolt, of the University of Zurich, Switzerland; T, Professor L. D. Salisbury, State University, Madison, Wis.; U, Professor J. H. Eastman, Naval Observatory, Washington; V, Professor W. L. Upton, of Brown University; W, Professor Brown Ayres, Tulane University, New Orleans; X, Professor A. H. F. Pitt-Rivers, of the University of Cambridge, England; Y, Professor H. Landolt, of the University of Zurich, Switzerland; Z, Professor L. D. Salisbury, State University, Madison, Wis.

The committee recommend that the next meeting of the association be held in August, 1892, at Rochester, N. Y.

Dr. Leconte, the new president, has an international reputation as a geologist and is also an authority of standing on optics, aerodynamics, physiology and many other subjects.

He was born in Liberty County, on the University of Georgia in 1841. He obtained his medical degree at the College of Physicians and Surgeons, New York City, in 1865, and settling in Macon, Ga., practiced his profession for several years.

In 1850 he entered the Lawrence Scientific School at Harvard, and devoted his attention principally to the natural sciences, and was graduated with the degree of B. S. in 1865.

He received the degree of M. D. from the University of Georgia in 1872 and is a member of the National Academy of Science, and the American Association of Geologists.

His scientific career has been marked by many important contributions to the study of the human body, and he has been elected to many of the highest positions in his profession.

He has been elected to the position of President of the American Association for the Advancement of Science, and his election is a tribute to his high standing in the scientific world.

His work has been characterized by originality and thoroughness, and he has been one of the most successful of our modern scientists.
