can be made to yield revenue to a reasonable number of politicians. This does not sound poetic. So far Mr. Colvin plays well his assumed part. One might think him the hard headed lawyer who interprets the Constitution to suit his own purposes, or the simple lobbyist working a private scheme. But the poet is at last revealed. "An expert," says he, "should oversee the men, so as to insure a thoroughly artistic treatment of the boulevard."

conference and the diversity of the interests of the various nations concerned, no substantial objections to the adoption of the rules have been received from any source.

The Democratic leaders in Congress are wise in resolving that no tariff revision shall be undertaken during the present session. The task is so large that it could never be completed in the time at their disposal.

At last we learn from President Cleveland's own lips, or rather from his own pen, that he has abandoned his cherished intention of restoring Lillinkalau to her shattered throne. His words, written as long ago as last August, and just now published, contain an "absolute denial of the least present or future aid or encouragement" on his part "to restore any government heretofore existing in the Hawaiian Islands." This is said with Mr. Cleveland's characteristic lack of directness and pendency, but its meaning is fairly plain. The statement forms part of an unofficial communication made by him to a committee of royalists who visited Washington last summer. Their reason for keeping quiet about it is plain; but why did the President take the same course?

THE NEWS THIS MORNING.

Foreign.—General von Hanneken is said to have been invested with extraordinary powers for reorganizing the Chinese Army. A consignment of \$150,000 in goods, which arrived yesterday, and another of \$100,000, due at St. John's today, are expected to give some relief to the Newfoundland financial situation. Germans deny that the prohibition of American cattle is a retaliatory measure. One fireman was killed, and three were injured and damaged amounting to \$1,000,000 was done at a fire in Toronto, Ont.

Dr. Felix Adler was a member of the Tenement-House Commission which did good work for our city's tenement population several years ago, and his interest in workingmen and women has familiarized him with the conditions under which large numbers of people in New-York are forced to live. He therefore spoke with knowledge in discussing the homes and rookeries of the city in his lecture yesterday. His remedy for tenement-house evils is a radical one; he would reform the tenement-house out of existence. That way, of course, lies the road to the ideal state of things, but no one knows better than Dr. Adler the impracticability of so dealing with things as they are, and devise laws that will make tenement-house life as tolerable as may be. And when these laws are enacted, let us hope that no religious corporation will seek to stay their enforcement by appealing to the courts.

It is in no way surprising that the schools of New-York have sadly degenerated under Tammany control, that the accommodations for children are far short of what should be provided, and that there has been rapid progress on the down grade. The question just now before the Board of Education is whether President Knox, the head and front of the Tammany ring in the Board, shall be re-elected at the meeting day after to-morrow. There are some signs that he will yield to the demands of decency and step aside; but if another man takes his place the need of a thorough reformation in this department will not be lessened a scintilla. We want a new school law, which will bring our school system up to the times and remove the evils that have crept in; and we want to have it administered by men who know what education is by personal experience, and who have nothing but disgust for existing methods. Tammany Hall and our public schools can have no relationship save that of antagonism.

It gives us pleasure to record the fact that Governor Morton is devoting attention betimes to the reduction of expenses by the cutting off of useless bureaus and officers, and enforcing economy all around. One of the places where need of reform is great is the office of the Superintendent of State Buildings, filled for several years past by one Delehanty, who has the honor of being the father-in-law of Senator Murphy. The cost of maintaining the public buildings has increased enormously under Delehanty's supervision. This office and all the others ought to be administered on strictly business principles.

On the eve of his retirement from office, Governor Markham, of California, has made an appointment which is thoroughly disgraceful. By a political deal that has nothing to commend it, one of the Police Commissioners of San Francisco resigned on Saturday, and in his place the Governor named "Moss" Gunst, a
