### THE DAY'S OPERATIONS IN STOCKS.

The reaction that took place in yesterday's speculation was the natural sequence of the advancing market for the last few days. And it would worry none, save the very weak marginal holder, if prices were to suffer further declines before going higher. Bull markets are safe when accompanied by frequent reactions. Selling yesterday represented realizing and bear pressure, but declines were not important, and at no time significant of any adverse development in the situation. In the early trading quotations were generally strong under the influence of continued commission house buying. On the subsequent decline sales were easily absorbed by a good class of buyers, important market interests taking all the stocks speculative holders had to sell.

The bull campaign is not over. Prices are not high, and existing and prospective conditions in the business and financial world have not been discounted by market values. Railroad earnings prove conclusively that industrial prosperity has not run its course. Confidence on the part of capital proves that the opportunities for profitable investment have not reached their limit. A year ago railroad earnings were enormous, but returns now coming to hand smash all past records. For the month of January roads reporting show a gain of about 20 per cent over January, 1899, when the increase was about 10 per cent over January of the preceding year. Heavy traffic movements are confined to no one section of the country. The North, South, East and West are all sharing in the profits of the progress of prosperity. Railroad earnings reflect the country's business more accurately than any other medium, and in view of the striking records that are now being made it is simply childish to assert, as some people do, that stock values are advancing in response to manipulation alone.

Manipulation is present in all markets, but manipulation must have some basis in order to be successful. Some speculators are taking advantage of known conditions to advance prices, but the underlying cause of the present advance is to be found in a growing public demand, based on easy money and industrial prosperity. The people who bought stocks "cheap" in December will sell them "dear" in February, but that is speculation. The speculators on weak margins, who come in at the top of the bull wave, will lose their money; but that also is speculation. The investors who buy good stocks at current prices, or at the top, will not worry over speculative setbacks. American securities are, as a rule, cheap at ruling figures, and careful operators are buying on the confident expectation of future price improvement.

### THE DAY'S OPERATIONS IN BONDS.

GOVERNMENT BONDS.—Market strong. Final quotations follow:

| | Bid. | Asked. | | Bid. | Asked. |
|---|---|---|---|---|---|
| U. S. ex 2s, reg. | 102½ | — | U. S. 4s, 1925, reg. | 134 | 135 |
