MR. DAMROSCH'S PLAN.

HE URGES THE FEASIBILITY OF HIS PROJECT FOR A HUGE HALL FOR THE AMERICAN INSTITUTE OF MUSIC.

To the Editor of the Tribune.
Sir: In an editorial which appeared in today's issue of The Tribune a large hall capable of seating eight thousand people would be conducive to satisfactory musical results, and that a number of smaller halls would better subscribe the purpose.

The progress of musical culture in America has been phenomenal during the last twenty-five years, but those who have watched its development carefully will have noticed that it has resulted rather in the high culture of the few than in the general culture of the masses.

Picture galleries, fine municipal and ecclesiastical architecture with sculptural adornment, libraries, subsidized theatres, opera houses and concert halls are educational factors which are placed within the reach of nearly all citizens.

But nearly everything that has hitherto been done for music has been done more for the development of the higher forms, for the benefit of the cultured few, rather than to bring it within the reach of the many.
